Japanese monk Musician Pharmacochi Temple Kuanbang Guangzhou performance was suspended by "force majeure" Pharmaceutical Temple Kuanbang Weibo The incident of Xiaoguo Culture was continuously fermented. Recently, the performances of Japanese and Taiwanese artists in Guangzhou and Hangzhou have also been blocked, and the authorities' actions to rectify the cultural and entertainment market have become increasingly upgraded.

***** [Chinese talk show actor Chi Zi was blocked and investigated: Or a unified action for the Internet Information Office](#) Following the performance of the Swordsman Culture Company involved in the PLA and was fined tens of millions of yuan, on the evening of Wednesday (17th), the performances held by the Japanese monk Musician Pharmaceutical Pharmaceutical Temple in Guangzhou were also temporarily canceled. The organizer Mugencreations issued an unlimited announcement, "The notice of the higher -level departments was notified because of force majeure, and it was very regrettable that everyone was scheduled to be in the evening of May 17 at the Yaoshi Temple, the Pharmaceutical Temple of MaoliveHouse (Yongqingfang Store). May the Guangzhou Tour of Guangzhou regret to cancel. "

The organizer also said that the full refund will be performed, and the money will be refunded within 15 working days. Maolivehouse Guangzhou Yongqingfang store also transferred the announcement on Sina Weibo. The pharmacist temple Kuanbang posted two posts on Sina Weibo, saying "I'm sorry", "I wanted to sing today. Guangzhou, I'm sorry. We must meet again."

Young fans were disappointed with the temporary cancellation of the concert. (Posted on Weibo/Guting) Regarding the sudden cancellation of the authorities of the pharmacist temple Kuanbang in Guangzhou, Mr. Mao, Hunan Internet, said in an interview with Radio Free Asia on Thursday that he did not understand the specific reason, but it was strange: "Maybe you want to reject some fresh thoughts or thinking Methods, things, or the thoughts from civilized society and the impact on the Chinese. They (relevant authorities) to eliminate these ideas."

Many young audiences are disappointed and dissatisfied with the cancellation of the performance 30 minutes before the concert. Some Weibo netizens left a message and wrote: It is rare to want to adjust their mood quietly. They all come to the door. Some netizens questioned: Why? I just walked to the gate and the scene was messy.

The pictures on the scene showed that some young people looked at the cancellation notice displayed on the mobile phone and looked helpless.

After 90, netizen Sun Qian said in an interview with this station that she also wanted to watch the concert of the Pharmacist Temple Kuanbang, but did not expect this kind of thing. She said: "I think that cancellation of the concert may be related to the Xiaoguo Culture Company. But many performances have been stopped, and some places involve foreigners' performances. The cancellation of the performance is not a talk show. It is impossible for the foreigner to talk about the talk show in China. What can you say to sing? Especially the pharmacist temple Kuanbang is still a monk."

Music blogger's "Music Festival Collection" posted that Chongqing, Chengdu, Changsha, etc., the Pharmacist Temple Kuanbang's tour, were smoothly

canceled in Guangzhou. Guangzhou suddenly canceled a bit. At present, the official regulatory authorities have not responded to the incident.

Beijing, Hangzhou, and Shandong Forbidden talk shows and other performances

Current affairs commentators Bi Xin told this station that the cancellation of the performance of the talk show in many places in China belongs to a compulsory measure of the authorities' implementation of the field of cultural and entertainment: "Cultural compulsory measures, including some Taiwanese orchestras not allowed to come to power. This It is a kind of cultural ideology that they are worried about in a political environment, so it can cause a new round of cultural compulsory measures. "

On behalf of Zou Xingtong, a friend who received the Gwangju Human Rights Award is also the secretary -general of the Korean Human Rights Organization. He accepted an exclusive interview with this station that his identity was exposed after receiving the prize on behalf of Zou Xingtong, but

he was not afraid of the risk of banning Hong Kong and the mainland.

South Korea's largest human rights organization "Gwangju 5.18 Memorial Foundation" was awarded to the Human Rights Award to Zou Xingtong, the vice chairman of the former Hong Kong Branch Federation of Hong Kong. The Secretary -General of the South Korean Human Rights Organization, who was awarded by Zou Xingtong, accepted an exclusive interview with Zou Xingtong. It symbolizes the hope of Hong Kong. He said that his identity was exposed after receiving the prize, or he was banned from Hong Kong and the mainland since then, but he was still fearless. He and Zou Xingtong have known each other for more than ten years. Although in South Korea, "June 4th" will go to the Chinese Embassy to order candles every year. He hopes that Zou Xingtong will be released home as soon as possible.

"She is like a candlelight, the hope of the Hong Kong Democratic Movement, so she is qualified to win the Guangzhou Human Rights Award."

"Although I am in South Korea, I want to make a candlelight for her. Before she was released, I would insist on doing the same thing outside the Chinese Embassy every year."

——Dou Xingtong has known each other who has known each other for more than 10 years.

The award on behalf of Zou Xingtong is Na Hyun-Phil, headquartered in Seoul, who is headquartered in Seoul and focusing on global human rights issues, "Korean House for InternationalSolidarity). When he spoke, he choked and wrote a word for Zou Xingtong. It mentioned that this award belongs to each Hong Kong person who is free to fight for freedom. "This human rights award represents it. Everyone is with Hong Kong people."

Luo Xianfei received the prize in the last generation of the "Guangzhou 5.18 Memorial Foundation". (Guangzhou 5.18 Memorial Foundation YouTube Live Screenshot) ** If Zou Xingtong receives the prize, the identity is exposed.

Luo Xianfei was interviewed by this station and was asked why Zou Xingtong received the prize on behalf of Zou Xingtong. Luo Xianfei first sighed, saying that Hong Kong people could not come to the scene because of safety reasons. He also focused on the issue of Hong Kong's human rights.

"Korean Housefor International Solidarity) Secretary-General Na Hyun-PHIL (left) and Zou Xingtong have known each other for more than 10 years. (Provided by the respondent) [] Luo Xianfei said: The main reason is based on security issues, because Hong Kong people cannot go to South Korea (awarded award), and Hong Kong people have a lot of risks to attend Gwangju Human Rights Awards ceremony because the awards ceremony is an open event. All information is public. This means that the Chinese government will recognize the award -winning person. In order to protect Hong Kong people, they think that I am more suitable as Koreans and can protect her family or friends.

Luo Xianfei said that after receiving the invitation, he also thought about it. In the end, he resolutely accepted his mission and was willing to take the risk of banning Hong Kong and the mainland.

Luo Xianfei said: Because Chinese officials already know my actions, I don't know. I hope to go to Hong Kong to meet other friends in Hong Kong, but I think the risks are very high. I think of Hong Kong, but I am not sure of the safety of myself and other friends, so I think I will give up this opportunity and no longer go to Hong Kong or China mainland.

** Friends Zou Xingtong held a candlelight to the Chinese Embassy every year after he was prison for release.

On the eve of the "June 4th" anniversary of 2021, the Hong Kong police banned Victoria Garden for the second consecutive year on the grounds of epidemic prevention. Zou Xingtong said that he would commemorate in the "personal name". On the day of the "June 4th", Zou Xingtong was arrested by the Hong Kong police on the grounds that he was "suspected of promoting the collection of unprecedented assembly".

On the day Zou Xingtong was arrested, Luo Xianfei was impressed. He said that after seeing the news that day, he was in Seoul and went to the Chinese Embassy alone to lit the candlelight for Zou Xingtong.

After Zou Xingtong was arrested, Luo Xianfei went to the Chinese Embassy in the Chinese Embassy in the 333rd anniversary of the 64th. (Provided by the respondent) [] Luo Xianfei said: I saw the news. Later, a person took a

candle to the night outside the Chinese Embassy in Seoul and urged the authorities to release Zou Xingtong. Although I was in South Korea, I wanted to hold a candlelight for her. Last year, "June 4th", I also did the same thing. I took the candle to the night outside the Chinese Embassy. I may have the same action this year. Before she is released, I will insist on doing the same thing every year.

Knowing with Zou Xingtong for nearly 12 Years refer to her "Heart Chinese Democratic Movement"

Luo Xianfei and Zou Xingtong met for nearly 12 years. The two met for the first time. At a joint meeting in Taiwan in 2011, they discussed the issue of labor rights and interests with representatives of human rights organizations in other countries. Zou Xingtong was an initiator of Chinese labor rights and interests in the early days. Before Zou Xingtong became a lawyer, the two had a friendship and met in Hong Kong or South Korea. Luo Xianfei described that Zou Xingtong was a good friend and was impressed by her.

Luo Xianfei said: She is a very sincere person and is very interested in workers. She insists on doing the right thing. It is very principled to be a person, that is, as long as she thinks it is the right thing, she will put it into action. She was really enthusiastic and held a candlelight event for the Tiananmen incident. She was proud of being able to hold a candlelight rally in Hong Kong. I was very impressed.

** It is difficult to study the issue of Hong Kong after disintegrating the National Security Law of Hong Kong. Luo Xianfei said: There is no action on Hong Kong, because Hong Kong is currently a silent society, we can't find a way to fight for Hong Kong democracy. But in any case, we will observe the situation in Hong Kong and hope to find a way.

Although the center of gravity is shifted, Luo Xianfei has paid attention to the disintegration of Hong Kong's citizens. It is a pity that Hong Kong Labor Organization has contributed to improving labor rights and interests from all over the world. He remembered that at that time, the Workers' Alliance had spoiled the topic of South Korean workers, including the South Korean consulate in Hong Kong in 2016 to protest the Korean government's arrest of the chairman of the Democratic Labor and Labor of South Korea and demanded to release all members of the arrest and cancellation of control.

"Zou Xingtong is like a candlelight, the hope of the Democratic Movement in Hong Kong"

Three Chinese consulate members had previously requested the organizer "Guangzhou 5.18 Memorial Foundation" to withdraw the Human Rights Award to Zou Xingtong, which was eventually rejected by the organizer. Luo Xianfei believes that the visit of Chinese officials even proves that Zou Xingtong's award is the correct decision, and it also makes the human rights award more meaningful, reflecting the organizer only focuses on human rights and does not accept political suppression, and the incident also stimulates more Koreans' support for Zou Xingtong.

Regarding Zou Xingtong's award, Luo Xianfei believed that she was deserved, and her award also symbolized Hong Kong's hope.

Luo Xianfei urged the authorities to release Zou Xingtong as soon as possible. (Provided by the respondent) [] Luo Xianfei said: She is like a candlelight, the hope of the Hong Kong Democracy Movement, so she is eligible to win the "Gwangzhou Human Rights Award."

In the end, Luo Xianfei made a message to Hong Kong people saying: "The Koreans have not forgotten Hong Kong, we will support the Hong Kong democratic movement."

Zou Xingtong was selected as the "2023 Guangzhou Human Rights Award" winner in early May. It was the first time that Hong Kong people won this award. The Evaluation Committee described Zou Xingtong with the "human rights lawyer of democratic movement and democratic struggle", and also pointed out that Zou Xingtong was awarded to Zou Xingtong as "resisting the anti -democracy of the Hong Kong government and the courage and hope of human rights activities and citizens around the world."

Various brands appeared at the Shanghai Auto Show in 2023

(Voice of Germany Chinese) Japan has been a global car export champion for many years. However, in the first quarter of this year, China's car exports exceeded Japan for the first time and won the world's first. Official data show that in the first quarter of this year, Japan's car exports were 1.047 million, and China's car exports were 1.069 million.

In the first quarter of this year, Russia ranked first in the export amount of Chinese car products in China

According to data from the General Administration of Customs, in the first quarter of this year, the top ten countries in Chinese car products were Russia, the United States, Mexico, the United Kingdom, Belgium, Japan, Australia, Germany, the UAE and South Korea. The cumulative export amount of automobile goods in these ten countries was US \$ 22.74 billion, accounting for 48.5% of the total exports of all auto goods.

Before 2020, the main overseas markets of Chinese automobile exports were Saudi Arabia, Bangladesh, and Egypt; in 2021, Belgium, Chile, Saudi Arabia and other countries. In 2022, China's top three car export markets were Mexico, Saudi Arabia, and Belgium. Export volume exceeded 200,000 units, ranking Britain, Chile and Australia afterwards.

But in the first quarter of this year, Russia has become the largest importer of Chinese cars in accordance with the amount. Chinese automobile brands have grown strongly in the Russian automobile market. Among them, the

sales of the three brands of Chery, Haval and Geely in Russia have increased by 204%, 100%, and 129%, respectively, and sold more than 48,000 units, accounting for nearly three -thirds of the total sales of new Russian cars in the first quarter of 2023 in 2023. one. According to the Russian satellite news agency, in 2022, the Russians purchased 121,800 new Chinese cars.

The Russian "News" quoted Russia's open bank that in the first quarter of 2023, China Motors had a market share in Russia 42.5%.

Chinese truck sales in Russia are also growing rapidly. The Russian "News" quoted the data newspaper of the analysis consulting company "ASM Holdings". From January to April this year, the total sales of Chinese truck brands in Russia exceeded 21,000 vehicles.

Chinese media reported that Cui Dongshu, Secretary -General of the National Passenger Car Market Information Joint Association, believes that the main driving force of Chinese car exports this year is still under the Russian and Ukraine crisis And China's new energy vehicle export competitiveness increases.

China is likely to become the world's largest car export country this year

The China Automobile Association predicts that if the export trend in the first quarter will continue, China's automobile export will reach 4 million vehicles in

2023. In this way, China is likely to surpass Japan and become the world's largest car exporter.

SAIC, Chery, Tesla China, Geely, Changan, Great Wall, and BYD are currently the main force of Chinese automobile exports. From January to April this year, SAIC exported 313,000 vehicles, 244,000 Chery, and Tesla China 128,000.

The domestic market is weak

But in the country, the situation looks not so optimistic.

Due to the influence of the new crown blockade measures in the previous year, the production and sales of Chinese automobiles increased by 76.8% and 82.7% year -on -year in April this year, respectively, 2.133 million and 2.159 million, but the month -on -month decreased by 17.5% and 11.9%, respectively.

From January to April this year, China's automobile production and sales were 8.355 million and 8.235 million, respectively, an increase of 8.6% and 7.1% year-on-year.

Weilai CEO: rather than the "volume" value than the "volume" price

From a price point of view, Chinese car companies have since January this year Gradually calm down and the tide of price reduction gradually retreat. The China Automobile Circulation Association (CADA) said that the price of car prices has stabilized due to the opening of the Shanghai Auto Show and other spring auto shows in 2023. Consumers have eased the expectations of price reductions. However, the indicator of measuring the pressure of dealers - Vehicle Inventory Early Warning Index (VIA) fell by 2% in April this year to 60.4, which is still much higher than 50, indicating that there are significantly more cars than demand.

According to Chinese media reports, Ford Motor Corporation is planning to reduce more than 1,300 positions in China due to its continued decline in sales. In 2022, Ford's wholesale sales in China fell below 500,000 for the first time in ten years, continuing a downward trend began in 2016. At that time, the sales volume of this American auto manufacturer was 1.27 million, and its market share in China was 4.6%. Last year, Ford's market share in China has dropped to 2.1%. (Voice of Germany) China has canceled its ban on Australian wood for more than two years from Thursday (May 18). This is another sign of the bilateral relations that restore the damage of the two countries.

After Australia called for an independent investigation of the origin of the new crown virus, wood was included in the official Australian export list of officials and unofficial trade barriers implemented in 2020 in 2020. It is estimated that this prohibition list including coal, wine, barley, beef, seafood, cotton and copper, will cause Australian exports to lose \$ 14 billion in each year.

However, since the left -wing Labor Party came to power a year ago and ended the 9 -year Conservative Party in Australia, Essence Australian coal, cotton and copper exports to China have recently recovered.

Chinese ambassador to Australia, Xiao Qian, told reporters that the wood ban has been canceled from Thursday because Australian exporters have dispelled China's concerns about quarantine. The official notice has been sent to the Australian government on Wednesday. "So from today, the wood in Australia will return to China."

Don Farrell, Minister of Trade in Australia [] It aims to find a trade barrier of trade barriers, especially for Australian wine and barley.

On Thursday, Australian Foreign Minister Pennywong welcomed the restoration of wood trade with China. Before the ban was promulgated, the transaction reached \$ 1 billion per year. "We are happy with this progress." Huang Yingxian said at a joint press conference held at a joint press conference with Philippine Foreign Minister Enrique Manalo during his visit to Manila. "We really believe that eliminating these trade obstacles is beneficial to both parties." Australian Finance Minister Jimchalmers said that China's decision to cancel the wood ban is a step ahead of the goal of stable economic relations between China and Australia. "This is a vital market for us. We hope to stabilize this relationship. Welcome to make any progress in canceling trade restrictions." Chamber told reporters.

The Australian Limelin Products and Paper Industry Association also welcomed China's decision. Joelfitzgibbon, CEO of the association, said in a statement, "When the ban took effect more than two years ago, it brought huge turbulence and uncertainty to many wood exporters and other forestry departments. We welcome This decision. "

China is the largest trading partner in Australia, with a total bilateral trade of 287 billion US dollars last year.

In April, Australia withdrew appealed to the World Trade Organization on the barley ban in China. In return, China agrees to re -consider the decision to impose 80%tariffs on Australian grains. (Associated Press)

Chinese rights protection person who has been sentenced for eight years
Rights protection provided

Today, May 18, 2023. Mr. Wu Yan, who is "super vulgar butcher", has lost his freedom on May 19, 2015 to defend human rights and promote social progress. He experienced torture, refused to compromise, and was sentenced to eight years of evil sentences for eight years of "subversion of state power". The days when countless freedoms are lost to today: Wu Yan has carried 2921 days, today is the day he returned to his family and friends!

"Freedom of Wu Yan!Also all conscience offenders are free!No guilt for speech, long live freedom!" It is the voice of countless Chinese people!

As the butcher Wu Yan returned from a small prison to the day of the prison, with the sunset of the past day, the countdown to the continuous approach finally counted "he has carried 2921 days". In addition to changes, the text has also changed from "how many days there is still a day to return to my family and friends" to "Today is the day when I return to my family and friends!"

The above -mentioned text, with Wu Yan every day ... The countdown of the net name "Super Vulgar Butcher" appears on social media. Eight years have passed. Sister Wang Lizhen insisted on using this countdown to remind everyone to pay attention to human rights defenders. How many eight years can people have a lifetime? Intersection

Looking back at history, how many hero heroes have a better call for this land that has been applied to the communist spell, and they have paid the best youth and even life in their lives!

Eight years ago, the heroes of the "killing pigs" went: whether it is Guangdong, Fujian, Beijing, Northeast, or Shandong, Hunan, Zhejiang, Jiangxi ... It can be said that it was a era of "killing pigs" to show great power! The "pig killing" model not only reveals the evil and lies of the communist autocracy, but also through the details of many hot cases to enlighten and awaken countless people who are deeply damaged by the communist red poison. "Sheepskin" was revealed in front of the Chinese.

However, the Communist bandits mastered the two tools of maintenance of lies and violence. After the lies were revealed invalid, the CCP used violence to arrest Wu Yan into the black prison and use torture. , Butcher Wu Yan refused to compromise and plead guilty. Later, he was sentenced to eight years by the CCP and was sent to the prison for detain. This is another best examples of studying the CCP and the people as the enemy who always stand on the evil side.

Today, the butcher has been in prison for eight years and finally walked out of the prison of the Communist Party. We lamented that life like a white horse for eight years, and countless people who are willing to be willing to take care of their righteousness are not afraid of danger. In order to promote social progress and maintain fairness and justice, how many youthful or even life has been paid!

In addition to sigh, we must make a clear strategic planning on how to lift the CCP's curse in its falling area, and tactically think about how to achieve democratic republics and the constitutional rule of law. Because only by completely breaking the communist autocracy of people can we usher in a free and fair tomorrow.

It broke the propaganda of the CCP's lies and lifted the CCP's violent armed forces. It was like breaking the left arm of the Communist regime. At that time, we could freely move forward and build a beautiful life with human rights and freedom. It is believed that with the retreat of the Warriors buttons, with the joint efforts of people of insight in all walks of life, the "Pig Killing Book" is expected to target tyranny, relieve its armed forces, and usher in the major vitality of Chinese democracy and then show its power.

As long as we work together, we will be able to see that the heroes gather to relieve the Communist curse and the law of democratic republic and the constitutional rule of law.

Mainland China announced the restoration of Taiwan groups to travel to the mainland. The picture shows tourists from Tiananmen Square. Reuters information.

The Xinhua News Agency reported on the 19th that Ma Xiaoguang, a spokesman for the Taiwan Affairs Office of the Mainland, said on the 19th that

the reporter said on the 19th that after understanding from the relevant authorities, it will restore travel agencies to operate Taiwanese residents to visit the mainland team from now on.

He said, "We warmly welcome Taiwan compatriots to visit the mainland, visit the great rivers and mountains, and see the new appearance in various places."

Good conditions and services. "

On the 18th, the Spokesman of the MAC Zhan Zhihong responded that Taiwan did not restrict the people traveling to the mainland for sightseeing and traveling freely, but the mainland restricted the people to travel to Taiwan freely, and did not allow land passengers to travel to Taiwan to travel. To arrange negotiations, the two sides of the strait can follow the existing mechanism; however, there is no willingness to see the other party.

However, Zhang Xicong, director of the Tourism Director of the Ministry of Communications of Taiwan, said on the 19th that although he was happy, he hoped that the two -way synchronization was open instead of single -sided, and through the "Little Two Sessions" negotiations, the travel industry was banned from reception and grouping to go to the opposite side of the "Forbidden Group Order". It will not be lifted.

He said that it would be lifted after the negotiation of the Taiwan Strait Tourism Association and the Cross -Strait Tourism Exchange Association.

It is expected that the US government will touch the statutory debt limit as soon as June 1, which may trigger US debt defaults.

If the Democratic and Republicans cannot reach an agreement, the total US US \$ 31.8 trillion debt defaults will cause the global market turmoil. Republicans requested that government expenses should be greatly reduced before they are willing to increase debt limit.

The White House official said that Biden "reported the latest progress and received the latest progress of the negotiations assigned by him this morning", and learned that the negotiations were "steady progress."

The official also said that Biden "instructed his team to continue to promote the reaching a two -party agreement." "He is still confident, I believe Congress will take necessary actions to avoid debt defaults."

Although the Republican right -wing tough faction explained the signal, indicating that it would not soften the government to soften its position; the Republican Federal House Speaker Kevinmccarthy stated yesterday that he saw the "way" of breakthroughs in debt -limited negotiations.

"We haven't reached that step or promised anything yet, but I saw the way that might be able to reach an agreement." This is the major debt -limited deadlock between Bayidon and the Republicans of Congress. , McCarthy's most optimistic assessment.

U.S. debt defaults are close to McCarthy's claim that debt restrictions are expected to make breakthroughs

Description: (Agence France -Presse Washington, 18th) The U.S. Republican Right -Right -right signal shows that they will not be soft to the requirements of large cuts, but the Federal House Speaker Kevin McCarthy still said today that he sees the avoidance of debt defaults. The talks have a "way" to make breakthroughs.

The U.S. government is expected to reach the upper limit of the statutory debt on June 1st, which makes the world's largest economy owed 31.8 trillion US dollars debt and triggers the possibility of turbulence in the global market.

"We haven't reached that point yet, and we haven't agreed with anything, but I see that we can reach a consensus." This is after his Republicans and Democratic President Biden of Congress raised the upper limit of debt and fell into a deadlock. The most optimistic evaluation so far.

He said, "I think we have a structure now, and everyone is working hard to negotiate."

In January this year, McCarthy promised to the Republican Performance Freedomcaucus that Biden had to agree to significantly reduce the federal budget in exchange for their support to increase the upper limit, so they were elected as the Federal House Speaker.

Republican Congress passed the "Limit, Save, Growact) in April, and agreed to raise the upper limit of debt in March 2024, or until the debt reached 31.9 trillion US dollars, but because of this bill Weaken the important part of the Biden's Political Plan and has not passed the Federal Senate that has not controlled the Democratic Party.

Democrats pointed out that the debt limit has been reduced by dozens of times without a budget negotiation, accusing Republicans holding the US economy as "hostage."

Congress leaders held two rounds of talks with Biden, but to promote the bill in Congress before the Treasury funds were used out, there is not much time left.

Any agreement reached with the Republicans must be passed by the Senate held by the House of Representatives and the Democratic Party by the Republican Party before the last period. The McCarthy said that it took 11 days to pass the Congress of the Congress.

The Federal House of Representatives will have only 4 days this month, and the senators will enter the MemorialDay dating period of the death of the General. The next time for the next recovery is May 30, but they are told that they may return to Congress in advance.

Some Democratic Federal Senators urged Bayeng to quote Article 14 Amendment (14th amendment) to increase their own debt limits and avoid debt defaults without the approval of Congress. Article 14 of the US Constitution stipulates that "the effectiveness of US public debt ... cannot be questioned."

The former government has discussed the feasibility of this move and is worried that if this operation is challenged in the court, it may destroy full trust and reputation of the United States.

US Vice President Kamala Harris said to the media at another press conference: "Our position is simple and clear: Congress must take action to avoid debt defaults."

"This is more than 70 things that Congress has done since 1960, and it is also what the former government has done three times. The United States must pay its own bills."

The Congressional Budget Office said that the "restrictions, savings, and growth bills" can save \$ 4.8 trillion in the next 10 years, but Moody's Analytics, a letter of criticism agency, will make the economy in 2024 the economy of 2024. The growth rate decreased by 0.6 percentage points and reduced 780,000 job opportunities.

45 members of the Liberty Party insisted on maintaining their debt limits today and called for the stop of negotiation, showing that McCarthy was persuaded to accept the challenges faced by the Republican right-wing.

The U.S. government's cash amount can be used to pay bills at hand, which has touched the lowest level since December 2021. White House officials said the negotiation team of President Biden said the negotiations with the Speaker of the House of Representatives McCarthy's team "made steady progress."

According to Bloomberg and Reuters, data released on Thursday (May 18) showed that as of May 17, the US Treasury's cash balance fell to US \$ 68.3 billion (about S \$ 92 billion). Last weekend was \$ 140 billion.

This exacerbates market concerns. If the White House and Congress leaders cannot reach an agreement on the upper limit of government debt to increase or suspend government debt, the United States will fall into the dilemma of exhaustion of funds early next month, causing the US debt defaults for the first time.

American White House officials said they are participating in Japan At the summit, Biden held a calling conference with his debt -limited negotiation team on Friday.

One of the officials said: "The president's team told him that the negotiations between the two sides are progressing steadily." The official also said that Biden still had confidence in taking action to prevent US debt defaults to the leadership of Congress.

In order to resolve the crisis of the federal debt limit, Biden will return to Washington on Sunday. After the G7 summit is completed, he sequels to Papua New Guinea and Australia.

McCarthy said on Thursday that he had seen the "path" of the two parties to reach an agreement and hinted that Essence This is the most positive statement made by McCarthy on the debt limit negotiations so far.

The US Vice President Harris and the White House economic adviser Renard once again warned that US debt defaults will cause the US economy to decline.

The US Congress and the state government have become increasingly alert

to TIKTOK, and they are worried that the Chinese government has potential influence on the platform

(Voice of Germany Chinese website) The US Montana has completely disabled Tiktok through the bill, prompting 5 Tiktok users and creators to file a lawsuit with the state court of the state. implement.

Tiktok users believe that the state tries to "exercise the national security power that Montana does not have and prohibit the freedom of speech without the right to suppress the state." It has violated the basic rights guaranteed by the US constitution. Before the deadline, Austinknudsen, the chief prosecutor of Montana, had not responded to Reuters' comment request.

The lawsuit will be submitted to Democratic Judge Donald Mollay; Morro was nominated by the former Democratic President Billclinton in 1995 as a judge. Some Democrats are not tough for Tiktok.

On the 17th, a Tiktok spokesman Brookeoberwetter issued a statement saying that the bill was unconstitutional and "violated the freedom of speech of the people of Montana." She said, "We want to guarantee the people of Montana, and they can continue to use Tiktok to express ourselves, make a living, and join the community, because we continue to work hard to defend the rights of users inside and outside Montana."

© Jim Watson/AFP

In March of this year, the chief CEO of Tiktok went to the US Congress to testify, and the hearing president has been in the past 6 hours.

The first amendment to the US Constitution stipulates that no law formulated by Congress shall violate the basic human rights of citizens, which contains freedom of speech.

In 2020, the then US President Donald Trump tried to stop downloading TikTok and WeChat through the norms of the Ministry of Commerce, which was blocked by multiple courts and never took effect. (<https://www.dw.com/zh/zh/全盘禁止tiktok-美国民主党内有反对声音/a-65213817>) It also supports American users to maintain the right to use TikTok in order to exercise freedom of speech.

Greg Gianforte, governor of Montana, officially signed legislation on the 17th to prohibit TikTok from operating in the state, saying that this move will further "protect the Mongolian people's surveillance."

After the bill takes effect, Essence Emily Flower, a spokesman for the Ministry of Justice of Montana, publicly stated on the 17th: "We expect to have legal challenges and have been fully prepared to defend the legal defense."

The ban stipulates that TikTok will not be downloaded in Montana, which means that applications such as Google and Apple are not allowed to "illegally" provide TIKTOK. Whenever someone uses TIKTOK, whether it is "providing the ability to use this application" or "download it", TIKTOK or App Store will touch the France, which will face a fine of up to \$ 10,000 a day.

The bill is expected to take effect on January 1, 2024, and punishment will not apply to the user.

TikTok's ban is feasible?

The Associated Press quoted an analysis of online security experts. This ban has no incentive measures except for the fines, and no incentive measures make relevant companies willing to comply with regulations, so "full law enforcement will be very difficult."

In addition, compared with China's control of citizens' access to the Internet, the United States does not have any similar means or tools. The decree also excludes online service providers.

A member of the members included a representative of Apple and Google's trade group TechNet that the Associated Press told the Associated Press that the application store was unable to "geographical fence" in specific applications in different states, so it was impossible to prevent TikTok from

being downloaded in Montana. The organization also said that the application itself should decide the running range, not an app store.

Odedvanunu, the product vulnerability director of the Internet Security Corporation, also believes that it is difficult for app stores to isolate the application download of a single country. He suggested that it is more feasible to comply with the rules by Tiktok, because the application itself has the right to "adjust the settings according to the user's geographical location or IP address."

Disabast

American Stepping Tiktok

They are worried that the Chinese government has potential influence on the platform and thus requires the application of the application nationwide. However, it is not easy to face many difficulties in Montana, a state of more than 1 million; it is not easy to expand the scope of the ban to more than 150 million TIKTOK users throughout the United States.

March this year, The hearing president has been in the atmosphere for nearly 6 hours. Both members of the parliament questioned that the Tiktok's parent company Bytedance will enable the Chinese government to obtain user data or affect American users in the application.

In this regard, TIKTOK constantly denied that it had shared data with the Chinese government and said that if it was asked, the platform would not do so.

At present, TIKTOK is undergoing an initiative called "Projecttexas". It wants to create an independent entity to store data from American users on the US server and operate by American technology company Oracle.

Watching the drama during the Cultural Revolution is afraid of "laughing or wrong" and dare not laugh

In another past video, Chinese actor Chen Peisi said when he reviewed the Spring Festival Gala in 1984: "The first time we played the drama in the past,

(audience) in many places could not laugh, just stretched out their faces ... unhappy, good, good It's easy to be wrong, all stretched your face, haha, haha ... don't dare to be happy, because of what? He doesn't know if it is right or wrong. "

The latest news shows that Swordsman Culture Company is not allowed to be listed within three years, and local governments have ordered talk show companies to stop performing and conduct internal rectification. Cai Shenkun, a current affairs commentator, told this station that in the current political atmosphere, not only will not let you laugh, but also not to let you cry. He said: "This kind of political atmosphere is actually crying and laughing. This incident may have been joking with actors. The talk show is casual. Lenovo and the Lenovo of the folks are different. Now the ideas of people dominated by the official ideology are completely the opposite of the people's ideas. "

Cai Shenkun believes that officials of the current government departments are showing them to keep up with the leaders. As long as there are hotspots on the Internet, these officials immediately think of whether there is the authority of the leader or insulting the leader. Once officials are established, they will find various reasons to punish relevant persons and related enterprises.

This is the first time that Central Asian leaders have held physical high -level talks with Xi Jinping

(Voice of Germany Chinese) leaders of Kazakhstan, Kyrgyzstan, Tagikistan, Tagikistan, Turkmenistan, and Uzbekistan participated in the China -Central Asia Summit in Xi'an, Shaanxi Province, China on May 18th and 19th. Xi Jinping said in the main speech of the Central Asian Summit on the morning of May 19th that China has deep historical origins, extensive practical needs, and a solid public opinion foundation. He also mentioned that Central Asia has unique geographical advantages, with foundation, conditions, and capable of becoming an important interconnection hub for the Asia -Europe continent.

8 Suggestions

According to Xinhua News Agency, Xi Jinping proposed to China cooperation with China and Central Asian countries at the meeting to "strengthen the construction of mechanism, expand economic and trade relations, deepen interconnection, expand energy cooperation, promote green innovation, enhance development capabilities, strengthen civilized dialogue, and maintain regional peace." "Eight Suggestions".

The proposed specific content includes China will provide a total of 26 billion yuan of financing support and free assistance to Central Asian countries, introduce more trade facilitation measures, upgrade bilateral investment agreements, and accelerate the construction of China -Central Asian natural

gas pipeline D. In addition, China is also mentioned that China is willing to help Central Asian countries strengthen the construction of law enforcement security and defense capabilities, support the self -maintained regional security and counter -terrorism efforts of various countries, and carry out humanistic exchanges and cooperation.

Sign a declaration and establish a two -year meeting mechanism

The Xinhua News Agency reported that Kazakhstan President Takayev, Gilgisstan President Zaporov, Tajikistan President Rahmon, Turkmenistan President Beldemamedy, Uzbekistan President Milziyev "Unanimously agree with the future, work together to build a closer China -Central Asian destiny community."

At the summit, Xi Jinping signed the "China -Central Asian Summit Xi'an Declaration" with the heads of Central Asia and passed the "China -Central Asian Summit Achievement List". Members of the conference also agreed to set up a Chinese -Central Asian mechanism in China, and agreed that the China -Central Asian head of state meeting for the first two years of establishing two years will be hosted by Kazakhstan to host the Second China -Central Asian Summit.

One -to -one talks between leaders of each country and Xi Jinping

On Thursday (May 18), the leaders of Central Asian countries had a one -on -one talk with Xi Jinping, promising to maintain a "long -lasting" friendship. On the 18th, with the talks with Gilgesan President Sadyrzhaparov, Xi Jinping said that based on common interests, Xi Jinping said that he was determined to build a community of destiny of good -neighborly and friendly and shared prosperity. "

Zaparov said that he was willing to expand trade, economy and investment with China, and supported the launch of the China -Central Asian head of state meeting in Xi'an to ensure that regional peaceful development, so that China relations with Central Asian countries "have reached a new level "And" keep positive political dialogue "on the issue of bilateral concern.

On the 17th, before the summit started, Kassym-Jomarttokayev, the President of Kazakhstan, also met with Xi Jinping. He was the first head of Central Asian countries to reach Xi'an, and the country was also China's largest trading partner in Central Asia.

Xi Jinping (right) met with Kazakhstan President Tocaev (left). Kazakhstan is China's largest trading partner in Central Asia.

When Xi Jinping saw Tocaev, he gave a warm greeting and wished the other party a happy birthday. During the meeting, Xi Jinping said that Sino - Kazakhstan had a deep relationship and had opened a new "golden 30 years". The Kazakhstan section of the Asian gas pipeline can operate stably.

China Strive Global Leadership

The timing of the Central Asian Summit coincides with the Kyoshima Summit of the Seventh Kingdom Group (G7). The Chinese Ministry of Foreign Affairs stated that the Central Asian Summit aims to establish regional influence and has "milestones."

At the same time, Russia is still facing Western sanctions that rose by invading Ukraine, and China has continued to increase its influence as a global leader. As Russia bets a lot of resources into the invasion of Ukraine, more and more Central Asian countries are dissatisfied with Moscow, including Kazakhstan not recognizing Russia's control in the Udong region, and Tajikistan requires Moscow to give the international community more "respect for" respect for "respect for the international community. """. China is strengthening its economic and political contact with these former Soviet countries.

Agence France -Presse reported that Central Asia is still a key area for China's "Belt and Road" initiative, which is Xi Jinping's representative project. Expert analysis is that China will try to expand transactions at this summit to build a huge transportation link and pipeline for the construction of Central Asia, including expanding a \$ 6 billion in China -Kyrgyz -Uzbekistan railway line, as well as natural gas pipelines from Central Asia to China Essence

G7 and EU leaders came to Hiroshima Peace Memorial Park on the morning of the 19th to offer flowers.

On the morning of the 19th, the leaders of the G7 countries came to Hiroshima Peace Memorial Park and visited the museum to review the history of Hiroshima being bombed by the US military during World War II. Earlier, Japanese Prime Minister Kishida Tianshiong said that he hoped to use this opportunity to emphasize the vision of "the world without nuclear weapons".

In addition to nuclear weapons, the main focus of this summit also includes further sanctions on Russia, and Behavior. In this regard, the Chinese official media Xinhua News Agency issued a report on the 18th to criticize the United States' "coercion diplomacy and its harm."

Before the official leadership summit, Kishida Wenxiong, who hosted the summit, had met with leaders from all countries. What did these important meetings talk about? DW reporters also went to Hiroshima to participate in the event to organize the following points for you.

German and Japanese talks: reiterate the importance of rules -based international order

On the morning of the 19th, German Chancellor Olaf Scholz held bilateral talks with Japanese Prime Minister Kishita, and the two sides talked about 40 minutes.

First of all, Kishida welcomes Shulz to visit Japan and hopes that Salz, who can serve as the chairman of the G7 last year, guide and discuss, and strengthen the international order based on the rule of law. The two sides mentioned the importance of cooperation with global southern countries and exchanged opinions on the situation in East Asia. They cooperated closely in the challenges brought by China and North Korea, and mentioned issues including nuclear energy, missiles and kidnapping.

In response to the situation in Ukraine, Kishida and Shulz confirmed that they would continue to impose strict sanctions on Russia and provide strong assistance in Ukraine. The two also said that they will convey the determination of G7 to firmly maintain the "free and open international order of the rule of law" to the world.

In terms of bilateral relations between Germany and Japan, the leaders of the two countries agreed.(<https://www.dw.com/zh/zh/德日举行首次政府间磋商-两国关系提升到新水平/a-65036404>)It brought important achievements, further expanding, and deepening bilateral cooperation, especially in the field of economic security. Based on this, Kishida and Shulz expressed their intention to continue to promote specific cooperation.

On the 18th, German Chancellor Selz arrived in Japan.

English -Japanese leader meeting: British aircraft carrier will return to India Tai

Before the G7 summit, Kishida Wenxiong also met with British Prime Minister Rishi Sunak on Thursday (18th). The two sides signed the Hiroshima accord to reiterate the prosperity of the European Great Western region and the Indo-Pacific region.

In the agreement, the United Kingdom and Japan called on China to be a "responsible international community member" and expressed concern about the situation in the South China Sea and the East China Sea, saying that "strongly oppose anywhere in the world and change the status quo unilaterally with force or coercion." In response to Taiwan, the British and Japanese countries claim that the basic position has not changed.

Reorganizing the peace and stability of the Taiwan Strait is the "indispensable element" of the international community's security and prosperity, and called for peace to solve cross-strait issues.

In terms of British and Japanese security cooperation, the two sides will strengthen the interoperability capabilities; in addition, Britain will also send Queen Elizabeth aircraft carrier in 2025 to return to the Pacific Ocean. With the increasing military strength of China, the British aircraft carrier , And stop at the Japanese Yokosuka Base.

English aircraft carrier for the first time stopped at Japan Yokosuka Base

The British Sunak said that in the future, the British aircraft carrier strike group will return to India, and will cooperate with the Japanese Self -Defense Force and other regional partners to "assist in defending peace and stability in the Indo -Pacific region." Before the G7 Leadership Summit officially debuted, Sunak went to the Naval Navy Base in Yokosuka, and also appeared in Japan's "Izumo".

In May 2022, Boris Johnson, then British Prime Minister, also visited Japan and reached Kishida Wenxiong (RECIPROCAL ACCESS AGREEMENT). Based on this agreement, Japan and British forces can jointly deploy them to conduct training and joint exercises in the Indo -Pacific region.

In terms of economy, Britain and Japan focus on the toughness of the supply chain, and will promote the "semiconductor partnership" and develop joint research and development plans. Sunak also announced on the 18th that Japanese companies will invest 17.7 billion pounds in the UK, of which

Marubeni, a Japanese comprehensive Salon Pill, will invest about 10 billion pounds on offshore wind and hydrogen energy projects.

US and allies announced a new wave of sanctions on Russia

Another bilateral talks that received high attention was the meeting between Kishida and US President Biden on the 18th. According to the White House press release, the two stated that they would continue to support Ukraine to resist the cruel and illegal invasion of Russia, and promised to closely cooperate to deal with regional challenges, including North Korea's nuclear weapons and missile threats, and Chinese coercion. The two sides also reiterated that they oppose unilateral changes to the status quo of the Taiwan Strait and believe that cross -strait problems should be solved in a peaceful way.

Biden said the United States and Japan are the cornerstone of peace and prosperity in the Indo -Pacific region. The two sides will [] , Continue "[\(IPEF\)](#) negotiate.

Before the G7 Leadership Summit was officially held, the United States and its allies have successively announced a new wave of sanctions on Russia. U.S. officials said that 70 entities from Russia and other countries will be included in the US trade blacklist, and 300 individual sanctions will be launched, including individuals, entities, ships and planes. Britain announced the ban on Russia's diamonds, as well as imports of copper, aluminum, and nickel; G7 countries may also jointly launch relevant sanctions to restrict Russia's diamond trade.

Taiwan's political staff drama "Candidates-Creator" touched the topics of Taiwan's presidential election, marriage, sexual harassment in the workplace. (Screenshot from "Candidates-Creator" Facebook) The Taiwanese drama "Candidates-Creator" is a story about Taiwanese politicians, and involves sexual harassment, homosexual partners, etc., and quickly appear on Taiwan Netflix(Net fly)Popular rankings champion. However, this Taiwanese drama was removed by Douban.com in mainland China. What are the reasons?

Wang Dan Hot Post: Recommend one to understand the TV series of

Taiwan "Candidate-Creator"(The following is called "Candidate")The main line of the plot focuses on the development of the political staff election of the presidential election of Taiwan. The heroine is the member of the presence, and encounters the difficulties of women's politics, sexual harassment, marriage, and diverse families. And this Taiwanese drama has also set off heated discussions on both sides of the Taiwan Strait.

Although "Candidates" was removed by Douban and could not see any film reviews on a Chinese website, many netizens on Weibo have eagerly published their own look. Someone wrote: "That world is too far away!It feels like people have a feeling of growing up in a blue sky in the cage"; "Although it has built a Chinese utopian, it is certain that it is indeed a simple and simpler. Tour more than one level. "

Some people sighed: "The original word can be said. The original news can write this kind of theme. It turned out that everyone could participate in politics and choose a future they wanted." I just want to say blessing Treasure Island, so that the Chinese world still has some free fires. "

"Democracy is not a do not make mistakes, but can truly correct errors; the core of the election is not offensive and defensive, but to let each participant face themselves sincerely, accept the most extensive view, admit errors and improve, and move forward again." From Chengdu. "From Chengdu The feminist writer Shangguan, who married Taiwan, pointed out on his personal oil pipe channel that the power of "Candidates" is that only a few very important things have been said in 8 episodes. In addition to democracy, politicians will always be. To be softened, arrogance can make people make mistakes; elections are not unable to compromise, but that there must be insistence in compromise, and insistence can also be compromised.

Chinese netizens commented on the political election of "Candidates" are taboo

Relevant comments by netizens have been deleted in the Chinese Internet, and some can still be found online. Some bloggers introduced the plot and told netizens that they had to read; some people chose to cut in in women's issues to avoid sensitive political election topics.

"Candidates-Creator" caused heated discussion on Chinese social platforms. (Screenshot from Weibo) The blogger's "Sister Dragons Online" commented on Sina.com: It is not difficult to guess that this drama will be removed by Douban because of the theme background. Especially after the start of the #METOO movement of the cultural circle, the workplace sexual harassment and female issues in the play have caused fierce discussions. "They use our mother tongue to talk about some very 'normal' words, but we are still shocked. It is really shocking to hear those words in the mother tongue context."

The blogger "from the heart to the movie" pointed out that the reason why the Taiwanese drama "Candidates" was 404(delete)Most of them are the episodes of politicians. He believes that many lines of the play really touch some "nerves", so there is an unspeakable meaning. But in fact, more problems that women encounter in social life and emotional life, so many people resonate with this.

"Candidates" highlights the comparison of democracy and freedom and authoritarian society

After Wu Kunyu, who was once born in a political staff member, left the political circle, starred in Taiwan's first political series "International Bridge Society". The play tells the process of democratization in Taiwan in the 1990s, the battle and pull of the forces of all parties. He mentioned the difficulty of "International Bridge" who wanted to go on the streaming platform but repeatedly bumped into the wall. He said that the subject matter touched former Taiwan President Lee Teng -hui, and the platform did not accept it. He joked that because the subject matter was too sensitive, he couldn't even have a platform, and there was no chance of rebellion.

"The" Candidate "stole a coincidence. Although it is about the election, the topic of the inside or the same marriage issues are all side issues. It avoids it.

"Wu Kunyu ordered an important key to international platforms such as" The Candidates ".

Wu Kunyu observed that after watching the show, Wu Kunyu has hotly discussed envy in Taiwan. He also hopes that he can have votes and choose the ideal candidate in his mind. He believes that life is equal and freedom, and he is naturally not in love with others. If you have a joke with a talk show, you will be blocked by 8 words, which is really scary.

"" Candidates "is a strong contrast between democracy and freedom and authoritarian society," he said.

The value of advanced margins such as "marriage" hit the authoritarian authority

"It can be explored for different issues. For different values, you can find a way to talk or even collide. Tolerance is the most precious value of Taiwan. Now there are only Taiwan in the Chinese circle." Du Shengcong interpreted the value of "candidate" in the Chinese world.

Du Shengcong described that "Candidates" is the Governor's DPP in the construction of a soft power to find a model for the framework of pushing Taiwan's image project. For example, in the play, the same -sex partner has become a daily life, showing the main theme of the DPP and the values of progress, which has a collision against the basic core values of the KMT and the Communist Party.

Can Taiwanese dramas be launched in China?

In addition to "Candidates", "I Want to See You" during the epidemic has also become a topic of enthusiastic discussion of Chinese netizens. Recently

The World Health Organization (WHO) recommends that this year's crown disease vaccine addition agent should only be targeted at XBB variant strains. XBB is one of the mainstream strains of the current crown disease.

Reuters reports that the WHO Consultation Group said on Thursday (May 18) that the new coronary vaccine preparation should produce antibody reactions to XBB.1.5 or XBB.1.16.

The consulting team said that other vaccine preparations or vaccine preparation development platforms for neutralized antibody reactions for the XBB spectrum can also be considered.

In the future, coronary vaccines will no longer target the primitive strains of coronary disease.

The consulting team said that the data showed that the original strains were not spread in the crowd. And vaccination for primitive strains, the neutral

antibody produced by the current popular variant strains is very low or not detected.

Coronary vaccine manufacturers such as Pfizer/Biontech, Modner, and Novawax have developed vaccines for XBB.1.5 and other current current popular coronary strains in their respective vaccines.

The US Food and Drug Administration (FDA) will hold an external expert meeting in June to discuss the strain components of the coronary vaccine launched later this year. After confirming, the vaccine manufacturer will update their vaccine versions.

The addition and distribution of binary vaccines developed and distributed last year were for Omikron's variant strains and primitive strains.

Chinese Minister of Commerce Wang Wentao plans to meet with U.S. Business Minister Gina Raimondo in Washington (pictured above).

(Voice of Germany Chinese) The Chinese Embassy in the United States announced on Thursday (May 18) that Sino-US Minister of Commerce and Trade Representatives will meet in the United States next week. Embassy spokesman Liu Pengyu said on the same day of the online press conference that China held a "open attitude" with the United States with the United States' restoration of exchanges at all levels, but provided that both parties must "respect each other."

"The United States must establish a correct understanding of China," Liu Pengyu told reporters: "We hope that the United States will return to rational and pragmatic Chinese policies so that both countries can have better development and common prosperity." After the meeting, he stated another statement in writing. It is said that the two sides are still discussing details on the content of the talks between the Minister of Commerce in China and the United States.

This talk is another opportunity to break the ice of Sino-US relations, but before the deadline, neither the US Department of Commerce and the Office of Trade representatives responded to the news.

Reuters quoted anonymous sources as pointed out that Chinese Minister of Commerce Wang Wentao plans to meet with the US Minister of Commerce Gina Raimondo at Washington, and then attended the Minister of Economic

Cooperation (APEC) at Detroit from May 25 to 26 and then from May 25th to 26th, and and of. Take this opportunity to meet with US trade representative Katherinetai.

On the same day (18th), which officially announced the news, the United States and Taiwan also announced the first phase of negotiations on the "21st Century Trade initiative". It is expected to officially sign the first batch of agreements in the first half of this year. Reuters pointed out that the incident was expected to cause strong protests in China.

US trade representative Dai Qi said on the 18th that Taiwan and the United States had reached the first phase of negotiations in the "21st Century Trade Initiative".

US trade representative Dai Qi wrote in the press release that this result is an important step in strengthening the economic relations of the United States and Taiwan. challenge".

The Economic and Trade Council of the Taiwan Executive Yuan also stated in a statement that this is the "deep historical moment" of bilateral economic and trade relations in Taiwan and the United States, saying that it will start the next round of negotiations as soon as possible, and the goal of completing all the issues before the end of the year.

Sino -US relations ups and downs

In February this year, , Antony Blinken, a U.S. Secretary of State, was postponed, and the relationship between the two countries was in freezing. Recently, the United States has continuously emphasized that intending to restore dialogue with China to prevent the relationship between the two parties from conflicting. From May 10th to 11th, the two sides held high -level talks, [] Essence

However, China and the United States have not disclosed when it will be , Or call the two heads of state. This year's APEC Summit will be held in San Francisco in November; according to the Wall Street Journal analysis on the 15th, this may be an opportunity to hold a "worship party" again, and China is paving the way for this.

!!What did the two meet

US President Joe Biden's last meeting with Chinese President Xi Jinping was on the eve of the Leadership Summit of the 20th Indonesian Group (G20) Group (G20) in November last year. At that time, the two sides agreed to maintain strategic communication and frequent consultations. Liu Pengyu, a spokesman for the Chinese Embassy in the United States, said on the 18th that the United States should "put into practice" the agreement reached last year and properly handle the sensitive Taiwan issue.

Liu Pengyu added that the United States should cooperate with China to create favorable conditions for the leaders of the two countries.

Some US Republican Parliament Council criticized that the Biden government actively arranged interaction with Beijing, showing that the United States softened to China, and emphasized that from the perspective of the interaction between the two parties in the past few decades, the maintenance relationship has not changed the Chinese government in a series of trade, Practice on security and human rights issues.

China-China-Central Asia Summit was held in Xi'an this week. Xi Jinping served as the host to receive the host of Kazakh, Kyrgyz, Tajik, Turkman, Uzbek and other national leaders.

Beijing claims that this is the first time in the 31st year of China and the five Central Asia, the first time that the heads of state of the six countries have held a summit in a physical form. It has a milestone in the history of the development of relations between China and Central Asia. In particular, Xi'an is more than 2,000 years ago. The starting point of the road.

Beijing stated that trade with Kazakh, Kyrgyz, Tajik, Turkman, Uzbek and other countries came to \$ 70 billion last year. In the first quarter of this year, it grew 22% compared with the same period last year.

Central Asia is already the key area of the infrastructure initiative of Chinese President Xi Jinping's iconic geographical strategy. At present, about 150 countries and regions around the world have accepted Beijing financing bridge paving, airports, railway and hydropower plants.

Xi Jinping made a conversation at the summit that it is necessary to fully release the potential of traditional cooperation such as economic and trade, production capacity, energy, and transportation, and build new growth points such as finance, agriculture, poverty reduction, green low -carbon, medical and health, digital innovation, etc. The community of winning and mutual achievements.

Xi Jinping also said that China and Central Asia should insist on watching and help. "We must deepen strategic mutual trust, and always give each other clear and strong support on core interests such as sovereignty, independence, national dignity, and long -term development. community".

Russia was trapped in the Western sacrifice sanction network after the end of February last year. China continued to promote large -scale infrastructure plans to Central Asia, intending to fill the power vacuum of the former Soviet Union to join the Republic of the Republic of Russia in the backyard.

Xi Jinping also said that China and Central Asia should adhere to the joint development, "continue to build the leading road cooperation in the Belt and Road Initiative, promote the implementation of global development initiatives, deepen strategic mutual trust."

The Taiwan Army Guard Corps participated in the flag -raising ceremony. Reuters picture Taiwan's current vice president and candidate Lai Qingde, the next president, said that Taiwan was originally independent and there is no need to announce independence again. Hou Youyi, a Kuomintang candidate, also said: The Republic of China has independent sovereignty. It is both sovereignty and independent, and is not under the jurisdiction of any country nor an affiliated country. The U.S. government also emphasized that the

United Nations decision has never denied the sovereignty of the Republic of China. The international and domestic recognition of the sovereignty independence of the Republic of China should not be controversial.

Therefore, countries have resolutely opposed to Xi Jinping's martial arts Taiwan, and declare that they will participate in defending Taiwan, that is, a reasonable and legal action program. On the other hand, the Wusong War of the Communist Party of China is unreasonable or legal. The situation seems not good for Xi Jinping. Looking back at the Taiwanese's own independence, it is ridiculous. Many years ago, Mr. Shi Mingde, the predecessor of the Democratic Progressive Party, talked about this irrational. Unity, who are you unified with? Because they couldn't get back to Taiwan, they still couldn't fight. Do you want to be unified by the Communist Party? Neither of the voters and the people of the two parties did not agree. Whether it is with or martial arts, neither does not match public opinion. When it comes to Taiwan independence, it is even more ridiculous. Mr. Shi Mingde also agreed: Taiwan is not under the jurisdiction of the Communist Party of China. It has always been independent. Where should I go out independently? The premise of independence is that it is not independent now, that is, he denies his independence sovereignty. Are you under the jurisdiction of the Communist Party or are it under the jurisdiction of Japan? Isn't this an excuse for the CCP to attack Taiwan? What's more unreasonable. Now that international and domestic recognition, adhering to the independent sovereignty of the Republic of China is the best position for protecting the interests of the people of Taiwan and the international community. Unreasonable disputes of unity should be abandoned. The ambiguous attitude of pretending to be from the international community from commercial interests should also be put away. The dispute between the unification and continuing to be blurred will only cause greater disaster, not in line with the interests of everyone, nor does it meet the interests of the Chinese people, only in the interests of the Communist Party. For the people of the mainland, the people of Taiwan have lived well by themselves. Why should you go to unified people? What are the benefits of unified people for you? People are well done by themselves, and they are richer than you. You want to grab people. Isn't this the logic of robbers? At least it is red eye disease, not very glorious. The pinks who were promoted by Xi Jinping had to think about it. Even if you were successful, Taiwan was destroyed. What can I get? It can only be sanctions and besieged by the world, the economy has further declined, and life is more difficult. Don't say that you can return to the Stone Age, at least back to the liberation of the liberation at least overnight. Do you want to? Are your

children willing? Don't think about others, at least think about yourself. Little people usually do not care about politics, and follow others blindly. But do you understand the adults who eat political meals? Why do they have a lot of money than to pay attention to the tail than the monkey? Then we have to look at the conspiracy they hid behind. There is a reason for everything, there is behind the stage, there is the benefits of others without your benefits. According to the principle of Holmes: whoever has benefits is suspicious. Mobilizing war can resolve internal contradictions, which is a common means of politicians since ancient times. Who is caught in inside and outside the inside and outside, and can't extricate yourself? It seems to be the Communist Party and Comrade Xi Jinping. A war will mobilize the fanaticism of nationalism, improve the people's tolerance for suffering, and unreasonable elimination of political opponents will also be accepted by the public. The above and many benefits to those who have power are needed by politicians who have internal and external difficulties. Sacrifice the interests of the people of Taiwan, sacrifice the interests of the people of the mainland, and put Taiwan and the people of the mainland together in a disaster, just for the interests of a small number of Communist Party bureaucrats. This is really not worth it. After knowing this interest, don't follow the propaganda of the Communist Party.

Meitai Relations What is the reaction to deepen China?

US trade representative Dai Qi said in a statement on the 18th that the negotiations strengthened the US -Taiwan relations and showed that the two parties could cooperate together to promote the people's priority of trade. Dai Qi said, "We look forward to continuing these negotiations, which can eventually lead to a strong and high -standard trade agreement in order to cope with the economic challenges of the 21st century."

Deng Zhenzhong, the general representative of the Taiwan Economic and Trade Council Office, told the Taiwan Central News Agency that the first batch of agreements on the "21st Century Trade Initiative" can be interpreted as "the United States must deepen the substantial performance of Taiwan -US economic and trade relations." Similar to the trade agreement, the structure is quite complete, and the text is also considered back and forth. Deng Zhenzhong said that Taiwan will sign the first batch of agreements by representative Xiao Meiqin in the United States.

In this regard, Taiwan President Tsai Ing -wen expressed his affirmation and expectation, hoping that he would "create more niche" for the economic and trade of the two parties through subsequent negotiations. China has expressed dissatisfaction; according to Bloomberg report, the Chinese embassy in the United States issued a statement after the announcement of

Taiwan and the United States, asking the United States to discuss with Taiwan with an agreement with "sovereign meaning or official nature", or in the name of economic and trade exchanges. "A signal of an error signal for the split forces of Taiwan independence."

Taiwan and the United States announced that the new progress of the "21st Century Trade Initiative" was earlier, Essence According to Reuters, Wang Wentao will meet with US Minister of Commerce Gina Raimondo at Washington, and meet with Daiqi during the Minister of Economic Cooperation Organization (APEC).

Recently, high -level interaction between the United States and the Taiwan government has frequently passed the United States when Tsai Ing -wen visited the United States in April and met with the American House president Kevin McCarthy in California. China ,Apart from It also launched a military exercise near Taiwan.

In June 2022, the Taiwan Executive Yuan held a press conference on "Deepening the United States' Economic and Trade Relations". The picture shows Deng Zhenzhong, the general representative of the Economic and Trade Office of the Taiwan Executive Yuan.

What are the first batch of agreements?

Reuters pointed out that the "21st Century Trade Initiative" will not change product tariffs, but supporters believe that it will help strengthen the economic

bond between Taiwan and the United States and open more American products to Taiwan. The ability to resist China's economic coercion.

In response to the convenience of customs and trade, this will reduce the prosperity of American companies exporting products to Taiwan, allowing enterprises to submit customs forms in the form of electronic forms and pay tariffs through the Internet to reduce the time for ships to wait for customs clearance.

In terms of good legal operations and service industry regulations, it will simplify the process of applying for a license for cross -border business enterprises and the opportunity to promote fair competition. The anti - corruption part is based on the trade agreement of the United States, Mexico and Canada, the content covers the problem of money laundering, and refuses to enter the country with corruption foreign public officials. As for the part of SMEs, cross -border investment will be promoted.

The European Union (EU) said last year that Russia's two important pipelines that supply European natural gas were deliberately destroyed, but they did not accuse the Kremlin.

The British Department of Defense said that for the purpose of energy and communication, the use of the underwater infrastructure has increased the opportunity of the Western underwater infrastructure that "threatens the opponent."

British Defense Minister Ben Wallace signed an agreement statement with Norway, saying that Russia had "unusual doubt" to have the intention and ability of "locking key Western infrastructure" through the submarine and investigating ships.

"We must have the intention and ability to defend it."

Bjorn Arild Gram, Norwegian Defense, said that Britain is Norway's "most important European allies" and also said that "the war against Ukraine has made us closer."

Gram pointed out that after Russia invaded Ukraine, "when the standardized international order was oppressed, the important thing is that democratic countries are united."

When he visited the Maritime Operations Center, he added that "the nordstream line (Nordstream) was deliberately destroyed last year, clearly reminding us what is dangerous."

He pointed out: "By working together, we can improve the ability to detect submarines, anti -land threats, and protect the key infrastructure of the underwater underwater."

The US authorities had alert yesterday, saying that from those who returned to the United States from Matamoros in Mexico, some people suspected that fungal meningitis was suspected of infection, leading to severe illnesses or even death.

Tamaulipas, the head of the health department of Tamaulipas, said that they were tracking about 400 people, of which about 80 were from the United States. Mattoreus borders Brownsville, Texas, and is under the jurisdiction of Tamamaribas.

Jean Dez told AFP that "they will be found to rule out the possibility of infection."

He said that the two clinics that caused the infection had been temporarily suspended. The infection accident currently killed a U.S. citizen, and there were seven more infected.

According to the U.S. government, affected patients accept medical behavior or surgical surgery, including fingers, in common, and they will inject anesthetic drugs near the spine.

The US Disease Control and Prevention Center (CDC) recommends that before the problem is resolved, all Matimaos involved medical behavior involved in epidural injection. , Immediately go to the emergency department of the hospital.

The Center for Disease Control and Prevention of the United States stated that related symptoms include fever, headache, stiff neck, nausea, vomiting, blurred consciousness, sensitivity to light, etc., and said that fungal meningitis will not be contagious between people.

Mexico is one of the most popular countries around the world. To a large extent, it is largely because the American people cross the border to look at teeth, perform integer surgery, and treat cancer.

(Voice of Germany Chinese website)The "South Germany" quoted a 49 -page legal draft law of the German Ministry of the Interior reported that the

formalities of foreigners to join German nationality will be greatly simplified in the future, so as to facilitate foreign immigrants to better integrate into German society. Especially those who have lived in Germany for many years, [] ### "Those who integrate into the special success of the society" will get extra points

According to the relevant reform plan, the time limit for immigrants in eight years in Germany will be shortened to 5 years. The "South Germany will" reports that for "those who integrate into the special successful German society", such as mastering good German knowledge, actively participating in public welfare undertakings, or outstanding performance in professional positions, they have a chance to get the opportunity to get the opportunity for three years in Germany. German nationality.

The naturalization procedures will become faster, the picture shows foreign immigrants participating in the society who integrates into the class.

The citizenship of immigrants in Germany will also be greatly shortened. The time limit for the so far is eight years. The "South Germany" reports that for elderly immigrants over 67 years old, the Ministry of Justice plans to cancel the requirements for their German characters and have certain German listening and speaking ability to enter the citizenship.

Double nationality becomes possible options

Another major content of the reform of the nationality law is that when joining the German nationality in the future, the abandonment of the original nationality is no longer a necessary option. According to the draft of the law, the original legal provisions have been seriously disconnected from reality. In the past few years, many foreign immigrants who joined German nationality have not given up their original nationality.

Dirk Wiese, deputy chairman of the Party and Democratic Party Parliament, told the Rhein Post that the reform of the Nationality Law is expected to be approved in the near future: "Important details have been clarified." Anti - Semitism, racism, revenge, and people who violate human nature will not be allowed to join German. Weize said: "Only those who respect our values can obtain German nationality." Previously, the Liberal Democratic Party had strongly urged and asked people who had specific crimes to exclude the number of citizens.

In order to allow the parties to obtain a relatively fair ruling, the four representatives of Shangguan Yunkai are seeking to transfer the case to the area outside Hubei.

People familiar with the matter: "For the sake of fairness, (family members and lawyers) require the place where the interrogation is not written to him (Shangguan Yunkai), and hopes that the trial can be slightly fair, because if the trial in Ezhou is conducted, the entire public prosecution law system is all in the entire public prosecution law system. Under the power of the first leader. "

Shangguan Yunkai's four representative lawyers are seeking to transfer the case to the area outside Hubei. (Exclusive provided by the respondent, the shooting date is unknown) [] **Family members online support the authorities forced to dispel the sound**

After Shangguan Yunkai was involved in the case, his family supported him through social platforms. People familiar with the matter revealed that the Hubei authorities have repeatedly put pressure on their family members and lawyers recently.

People familiar with the matter: "The family members of Shangguan Yunkai and his lawyer were interviewed three times in three or five times, in the interrogation room. Especially his family members had been coerced twice, telling him not to publish articles about Shangguan Yunkai anymore , And threatened him, even saying that he had constituted a crime and might be arrested at any time. "

Public information shows that Shangguan Yunkai's anti -corruption articles have shocked officialdom in some areas of Hubei, causing hundreds of officials and criminals to be investigated. Li Qingchao, a lawyer who followed

the incident, believes that the Hubei authorities aim to kill chickens and monkeys.

Li Qingliang: "The article he wrote caused hundreds of corrupt officials to be punished. In China, in general, no one will do such a thing because it is difficult to please. (Authorities) Some people with thoughts, ideas, courage closed their eyes."

It is understood that during the outbreak of the Wuhan outbreak, Shangguan Yunkai personally went to many hospitals in the city to learn about the actual situation, and shared it to the outside world.

A source who has a commercial exchanges with "Mei Si Wisdom" said that several employees of the "Mei Si Wisdom" company were now in Singapore. Before the investigation of the Chinese authorities, they did not plan to return to Hong Kong.

When Reuters visited the Hong Kong office of "Mei Si Zhi" in working hours, no one was present. The door of the office was locked and the lights were closed. A employee of the building management office said that "Mei Si Wisdom" is still paying the office rent, but two employees in the adjacent office said that no one has appeared in the "Mei Si" office space in the past few months.

"Mei Si Zhi" refused to comment on Reuters. The Journalism Office of the State Council, the Ministry of Foreign Affairs, the Hong Kong and Macau Affairs Office, and the Chinese public security department did not respond to Reuters' comments requests. The Hong Kong government said it did not comment on individual business decisions.

Cicada effect in the field of consultation

In late March, the relevant Chinese departments raided the Beijing office of Mintzgroup, the US consulting company, and detained five staff members of

the office, including the person in charge of the Beijing Office. China does not explain in detail the scope of investigation of this company.

"Mei Si Zhi" said at the time that it had closed the business in Beijing and was ready to cooperate with the Chinese authorities to "solve any misunderstandings that could lead to these events."

Beijing preparation Essence and , Make some companies dealing with China feel uneasy, many people do not know where the red line is.

Reuters pointed out that this cold cicada effect also brought waves to Hong Kong. As a global financial center, Hong Kong has a deep professional service talent pool, including talents engaged in corporate surveys, McKinsey, Kroll, CONTROLRISKS, FTI and other international companies in Hong Kong. At the point.

After the National Security Law of the Hong Kong District was promulgated in Beijing in 2020, the United States revised the risk assessment of American citizens in Hong Kong, emphasizing that the risk of arresting, detention, deportation, and prosecution increased.

Chinese and Hong Kong authorities have rejected Western criticism of the National Security Law, saying that China respects human rights, and all countries including the United States need such laws.

How to affect the status of Hong Kong's financial center status in Hong Kong's National Security Law

"Xinjiang is the restricted area"

Dyedonal investigations of the two international companies that have a wide range of business in China told Reuters that Chinese security officials have scheduled meetings on a regular basis in recent years to issue clear warnings on the fields that need to be avoided in corporate surveys. A executive said, "They will clearly tell us what are the restricted areas. Xinjiang is one of them."

Xinjiang is the main place of cotton production and solar panel materials in China. Human rights organizations have accused the Chinese government of infringing human rights in Xinjiang and using forced labor on a large scale. The United States has prepared a list of sanctions to use forced labor in Xinjiang, Essence

The Chinese government has denied infringement and oppression in Xinjiang.

Randalphillips, the head of the Asian region of "Mei Si Zhi", is a former senior official of the CIA (CIA). Last year, he published on the company's website on the company's "Prevention of Uyghur Labor Law" regulations on the United States. This article was deleted after this article.

The Supreme Court of the United States ruled that when the Andy Warhol Foundation authorized the "VanityFair" magazine to use the screen printing picture "Orange Prince", the well-known photographer Gao Gao who took this photo Lynngoldsmith should get a fee.

In the ruling of 7 votes and 2 votes, the court avoided the controversy of the long-term works around Andywo's works, and whether the "Orange Prince" created by Ga Smith's photo should be regarded as an independent art work.

Instead, the court focuses on the use of the Andywa Foundation for this work: the Foundation sells this work as a portrait of the prince and sells it to the "Flower World" magazine to make money. Like other magazines, the use of Gaosmis's hands, the prince puts it out. A black and white photo of the same posture.

The court stated that in this case, the business authorization of the foundation was not "reasonable" of Gaosmis's works, so she should be paid.

Although this view is narrow, it may have a widespread impact, because technology, especially generativeai, make the re -creation of adaptation and change of original style, threatening artists' livelihood. (Translator: Lin Yifeng/Draft: Dai Yazhen)

Syrian President Assad (in the picture) arrived at Gada to participate in the 32nd Arab League Summit

(Voice of Germany Chinese) A speech will be delivered at the Arab League Summit in Saudi Arabia on Friday (May 19). This is the first time that Assad has participated in the organization's summit for the first time since Syria was suspended from the qualifications of the Arab League.

Asad was officially invited to participate in the 32nd Arab League Summit in Gada, Western Arabia, Saudi Arabia last week. On Thursday, when he set foot on the apron at King Abdul Aziz International Airport, he looked very easy and pleasant.

Prince Badr Bin Sultan, the deputy governor of the Saint City Melizer, and Ahmed Aboulgheit, the Secretary -General of the Arab League, and several local officials officially greeted Assad together.

**** Syria comes from isolated to isolated.**

After the government led by Assad brutally suppressed the anti-government protests in 2011, the Arab League, composed of 22 member states, suspended Syria's qualifications in the same year.

The Arab National Alliance held a special foreign minister on May 7 this year to agree to restore the qualifications of Syrian member states. Now that Assad's return to the Arab League marks that Damascus has achieved a

significant symbolic victory, Syrian authorities are trying to restore relations with countries in the region.

According to investigators of the UN War, , But the Syrian government has denied this.

Photo: RFA Before the May 1st Labor Day this year, Yunfeng Electronic Technology (Shenzhen) Co., Ltd., located in Songgang Street, Baoan District, Shenzhen, suddenly began to dismantle and move the machine to cause workers to suspect that the boss wanted to close the factory. Emotionally

excited workers are at a loss, they will [] , Asking the boss to promise to make reasonable compensation.

The local police came to the scene, and the fire was laid the inflatable cushion downstairs to prevent unexpected. The local union was absent as usual.

A news from the website of Songgang Street Office, Baoan District said that just three weeks before the incident, the Songgang Street Trade Union just opened Chen Jinhua, vice chairman of Baoan District Trade Union, spoke at the meeting, requiring the grassroots trade unions to do their best to do practical things, do good things, and solve difficult things for employees, so as to continuously enhance the sense of perception, response, influence and cohesion of the union. The brand and union chairman are bright. "

Ding Yan, chairman of the Songgang Street Trade Union, stated at the meeting that she would work hard to build a strong team of union cadres to do well To realize "the yearning for employees for a better life", so that employees and masses can truly feel that the union is the "home of employees", and the union cadre is the most trusted "family".

The words of the chairman of the two -level trade union did not fall. Three weeks later, the Yunfeng factory appeared in the situation of "the party and government, the need for society, and the employee urgently".

According to Yunfeng Electronic Technology (Shenzhen) limited Data, in May 1984 Yunfeng Circuit Edition Co., Ltd. was established in Hong Kong. In May 1991, Shenzhen Songgang Yunfeng Circuit Board Factory was established. And renamed Yunfeng Electronic Technology (Shenzhen) Co., Ltd..

The factory Including internationally renowned brands such as Sony, Casio, Foxconn, Sanmei Electric, are "," The best supplier "and" key component supplier ", Foxconn's" quality performance supplier ", and twice received Sony's thank you.

In addition, the Yunfeng Plant was also awarded the "Green Enterprise" of Shenzhen, the advanced unit of legal education in Shenzhen, the excellent enterprise of Baoan District, the excellent enterprise of Songgang Street, and the China Customs Trusting Enterprise.

Such a customer stabilized and was awarded by governments at all levels, and the factory also established a trade union. Why is the trust between enterprises and employees so fragile? Why did workers ask for demands and developed to the roof of the floor at once? Have the workers looking for help

before going to the roof? After the incident, did the local unions say what the chairman said at the union congress "bright brand and bright identity" to give full play to the union perception, response, influence and cohesion.

Representatives of workers negotiated with corporate negotiations to solve problems?

Please listen to me with these questions and talk to the "Employee Psychological Consultation Line" of the Federation of Trade Unions of the Baoan District Federation of Shenzhen and the conversation of the chairman of the union of Yunfeng Electronic Technology (Shenzhen) Co., Ltd.

The prospect of the negotiation of the upper limit of the debt in the United States is optimistic about Asian stocks more

Description: (Agence France -Presse, Hong Kong, 19th) On the basis of the global stock market rebound, most of the Asian stock markets have risen today. Investors are becoming more and more optimistic about the US Congress will finalize an agreement to raise the upper limit of debt and avoid disaster defaults.

Due to the worries about the Chinese economy, the Hong Kong and Shanghai stock markets fell.

After a few weeks of long negotiations at Capitol Hill, Congress leaders seem to propose a proposal to Congress members before the government tried to cash on June 1.

This also drives the rise of the three main indexes of Wall Street, continuing an increase of more than 1% on the 17th.

In Asia, although the data shows that Japan's inflation is still much higher than the goals of the Bank of Japan and the pressure of increasing the central bank's tightening monetary policy, the Tokyo stock market has risen again today, and the Nikkei index has soared to a new high of more than 30 years.

Sydney, Seoul, Singapore, Mumbai, Taipei, Manila, Wellington and Jakarta have also risen.

Stepheninnes, an analyst of SPI Asset Management (SPI Asset Management), said: "Although there is no formal signing agreement, the policy maker in Washington claims to increase the upper limit of US debt limits may appear next week. It's enough to make investors cheer. "

However, the Hong Kong stock market fell more than 1% because the income announced by the e-commerce giant Alibaba Group was lower than expected. This exacerbated investors' concerns about China's economic and consumer demand, which caused a sharp decline in technology stocks.

The Shanghai stock market has also fallen, and investors are paying attention to whether the People's Bank of China has launched any new stimulating economic measures after a series of economic data that is lower than expected.

A magnitude 7.7 earthquake in France's overseas territory in the South Pacific and the coast of the New Caledonian Islands occurred on Friday (May 19), and many countries in the South Pacific received tsunami alerts.

Reuters reports that the US Geological Survey (USGS) said that the epicenter is located in the southeast of the Loyalty Islands of New Caledonia, with a depth of about 38 kilometers.

The Pacific Tsunami Early Warning Center said Vanuatu, Fiji and New Caledonia may face tsunami threats. The Australian Meteorological Administration said that Lord Howe Island outside the East Coast of Australia also faced threats.

New Zealand is also evaluating whether the earthquake on Friday pose a threat to the New Zealand coast.

According to Agence France -Presse, the Pacific tsunami warning center in Honolulu, Hawaii, USA said that some coastal areas of Vanuatu may have 1 meter to 3 meters high.

It also warns that there may be small tsunami from 0.3 meters to 1.0 meters in New Caledonia, Fiji, Kiribas and New Zealand.

However, the counter staff at a hotel at Noumea, the capital of New Caledonia, said she did not feel the shock.

Ile des Pins, located at the eastern end of New Caledonia, also said that she did not feel the earthquake or received any evacuation notice.

She said: "People continue to stay in the beach and restaurant."

On May 11, 2023, the launching ceremony of the "Friendship Shield -20123" was the launching ceremony. CCTV/Chinese Ministry of Defense The Chinese and Laos military recently held a joint military exercise in a high profile. China also showed the actual advanced weapons, which caused the concerns of neighboring countries such as Vietnam to worry about regional security.

Who is a good Chinese friend in Southeast Asian? According to the English group of this station, from May 9th to May 28th, China and Laos held a joint military exercise called "Friendship Shield-20123". The exercise is

based on the background of "cracking down on multinational armed criminal groups" and organized the "Mountains and Jungle Positions for Attack". A total of more than 900 people have participated in their strengths, including about 200 Chinese active teams and 700 Laos soldiers.

The Chinese Ministry of National Defense stated that the exercise aims to "implement the joint statement on further deepening the construction of the old destiny community in China", and the relevant content on strengthening the cooperation of defense and safety cooperation, consolidating and developing the comprehensive strategic partnership between the old and the development of the old and the old and the old and the old and the old strategic partnerships ",

A brief news from the official CCTV on the 17th shows that Laos participated in a light weapon provided by China such as fast pistols, multi -functional rifles, and remote sniper rifles under the guidance of Chinese instructors, and fired real bombs. In addition, the Chinese official media has also reported on the same day that this is the first time that the old officers and soldiers have experienced and learned a new type of automatic rifle developed by China.

CCTV also disclosed that the elderly troops also trained the real ammunition firing of car weapons, portable rocket launchers, grenades fired sniper and mortars.

In May 2023, the "Friendship Shield -20123" joint exercise. (Video screenshot/cctv) Wendellminnick, a Taiwan independent military analyst, told the English group that "such activities will definitely make the Vietnamese army be busy." He believes that Vietnam has always been Laos's largest traditional allies, but in recent years, Vientia Move closer to China.

China has always regarded Laos as the export market for military fire equipment, but Laos did not reach a large military purchase agreement with China due to lack of funds. Most weapons and military equipment used by the Laos army are still from the former Soviet Union and Russia.

According to Xinhua News Agency, in April 2017, Beijing presented a batch of "office equipment" to the Laos Ministry of Defense. The outside world suspects that these may be national defense equipment. In November of the same year, Vientiane announced a million US dollars of contracts, agreed to purchase weapons from northern China. Since Laos did not further disclose the details of the contract, whether the transaction was finally reached, the outside world could not be known.

According to reports, China provided the new version of the 191 assault rifle with Laos' joint military exercises. Compared with the previous 95 rifle, its weight is lighter and has a longer service life. It is reported that the first appearance of the 191 -type rifle was on the 70th anniversary of the founding

of China in 2019. This model rifle has also recently invested in the army of the Xinjiang Military Region.

However, Xu Zhixiang, a senior researcher of the PLA's ground equipment specializing in the PLA's ground equipment, told the station that he did not think that the new Chinese rifle has a great advantage. The assault rifle is not much different from the previous 95 type. It is not yet possible to determine whether the rifle will be provided to Laos.

Yan Wende told the English group that the rifle made in China is a light weapon. The price is low. The Laos army can buy it, but it will not "change the overall situation." The PLA "knows what Laos needs, and the cost of light weapons and maintenance costs is low."

He analyzed that if the Laos military needs more advanced equipment, China can simply place Laos under its defense umbrella: "Missiles and radars can simply transfer to Laos through the debt leasing agreement, and it will be operated by Chinese technicians in Laos. ","

Although the official media of Vietnam did not report this time and the old military exercise, Vietnam's military analysts have always kept close attention to the development of the situation.

Vietnam used to be the only military allies in Laos. The two countries signed the National Defense Treaty in September 1977, and the firm connection between the two communist regimes dates back to the 1975 Vietnam War. But with the expansion of China's economic influence, China and Laos's partnerships are deepening.

An anonymous Hanoi observer told this station that although Laos holds a large number of military equipment made in China, its quality is not high.

Khangvu, an analyst at Boston College in the United States, told the Vietnamese group: "This military exercise may make Laos further move closer to China. To strengthen defense cooperation between China and Laos, it will also weaken Vietnam and Laos' defense relationship."

Description: (AFP George Atabili, 19th) On the second year of Russia's invasion of Ukraine into the second year and the West's isolated deepening of Russia, Russia announced the restart of the air travel with Georgia, causing some Georgia people to be dissatisfied.

Agence France -Presse reported that in a green university campus at TBILISI, a group of students in a green university campus, they were discussing plans to go to Tsibilisi Airport to participate in protests, and they opposed the restoration of navigation with Russia.

This morning, a Russian class flew from Moscow to Tobei for the first time in four years. The Georgia Opposition Oath vowed to hold protests at the airport.

Lasha Sigua, a 20 -year -old student, said: "We will attend. Russia is launching a brutal war against Ukraine. We must watch Georgia and Russia keep normal."

Georgia, located in South Gaoco, was the Soviet Union to join the Republic. For many years, it has worked closely to the West and has a tense relationship with Russia.

In 2008, a brief but bloody war broke out in Russia and Georgia. After the war, Moscow recognized two separate regions in northern Georgia as an independent country and deployed military bases there.

To this end, Tbilixi held anti -Russian rally, and Russia banned flights with Georgia in 2019.

But last week, Russian President Vladimir Putin unexpectedly announced the lifting of the ban on Georgeia, and at the same time launched a 90 -day visa - free system for George Asia citizens.

Puting's decision aroused the complex emotions of Georgia. After many years of tension, the criticism of the Georgian people continued to intensify the government and accused the authorities of cooperation with the Russian government.

Earlier this week, hundreds of Georgia people had taken the streets to protest the recovery of the two countries.

Analyst Gela Vasadze said that Panting's approach was "part of Hybrid War", which aims to destroy the relationship between Georgia and the West.

But George's Prime Minister Irakli Garibashvili welcomed the reunion, saying that it was Pavilion's "very positive decision from a humane perspective."

Cycot Mocha brought heavy rain in Myanmar and neighbors on the 14th. The wind speed reached 195 kilometers per hour, which caused the building to collapse and the streets flooded into a river.

This is the most powerful storm that Myanmar and Bangladesh have experienced in the past 10 years. The wind raging in the village and the trees were uprooted, which led to the interruption of external communication in most regions of Rakhine, Myanmar.

Tens of thousands of Rohingya (Rohingya) in Ruo Kaangbang Province is currently settled here after decades of racial conflict.

The military government stated: "A total of 145 locals mourned due to cyclones." The statement also mentioned that the deceased included 4 soldiers, 24 local residents, and 117 "Bangladesh", which was a derogatory name for the Luckye.

The Luo Xingya was widely regarded as a break in Bangladesh. They could not obtain citizenship and medical care, and they needed permission to leave their residential towns.

Officials from Bangladesh in neighboring countries told AFP that the cyclone swept Bangladesh's huge refugee camps. It contained nearly 1 million Lo Xingya people who fled the military in Myanmar in 2017, but no one was killed for this cyclone.

Zunzi said that he will stay in Hong Kong and will not leave. Zunzi provides Political cartoonist Zunzi was suddenly suspended in the comic column of 40 years in the newspaper, causing attention from all walks of life. Zunzi

accepted an interview with this station acknowledged that the political pressure caused the comics to stop publication, describing Hong Kong's changes faster than expected, and stricter regulation. Zunzi believes that the official suppression of political satirical comics and talk shows is a manifestation of the authority that the authority is unable to accommodate the authority. Zunzi's comics accompanied Hong Kong people for forty years and experienced a few storms. This year, even if it could not be painted again, it has its historical significance.

Hong Kong political cartoonist Zunzi column was suspended by the work by the library *

Hong Kong's political cartoonist Zunzi was suddenly suspended in the Ming Pao's 40 -year -old column. The Ming Pao did not stated whether it was related to Zunzi's criticism of the Hong Kong Government's senior officials in the past six months. Zunzi accepted the response incident of this interview with this station. He acknowledged that it was because of political pressure that "Zunzi Comic" was stopped.

Zunzi: "Of course it is political pressure, it will not be too low, so that I will no longer continue to draw. This time it is obviously related to the political situation, but the publication column must be suspended. When they do not have a task, they will be relatively loose, but at tight time, they will be blamed at every time, and even small things will use a magnifying glass to see it, everything can be guilty. "

Zunzi Comics has been serialized for 40 years but it is difficult to stop in political pressure. (Provided by Zunzi) **Zunzi: Hong Kong's freedom of speech tightening is faster than expected**

He believes that the stopping of "Zunzi Comics" caused a big response to the society because the incident reflected the freedom of remarks and expressions in Hong Kong, and the speed and degree of tightening were faster than expected and stricter.

After his work on the public library bookshelf was suspended in the column and was removed at the same time, would he worry that he would be worried that he would be committed to the "National Security Law" hat. Zunzi said that after the "National Security Law" There are no reasonable events that can happen, and it is difficult to judge the previous road.

Zunzi: "They (government) feel that these books have an impact on society or people, and do not want the public to be affected. This kind of action is like cleaning and cleaning. For example ", People are gone, and it doesn't make sense to get his books. For the people on the ban on the book, when you want to sue you, you can't escape. It depends on the effect of society. At this time, it is difficult to make judgments. Whether the authorities will have further regulation. "

Officially suppressing satirical comics and talk show: It is difficult for those who are in power to accept authority and challenge

Hong Kong's political comics and Chinese talk shows have all become the objects of suppression of power. Zunzi believes that comics are just an expression, and the problem is that the official is difficult to accept that authority is ironic and challenged.

Zunzi: "Comic is not a problem. The problem lies in the irony technique. It is difficult to accept that they (those in power) are related to irony. Because they want to build their own image or authority, all funny and jokes in disguise, or causing them to be ridiculed. In the case, they all want to minimize as much as possible. It will be too annoying and the effect to deal with it in a reasonable manner. Even if the means of use is very rude in the eyes of the average person, but from their practical perspective, this is You can be accepted by rude, and you can continue to be rude in the future. "

Zunzi witnessed political changes through political comics. (Provided by

Zunzi) Zunzi: The National Security Law draws the 64th theme political comics, the risk of high risk of high risk

In the June 4th memorial every year, Zunzi uses this as the theme to publish works in the column. But he was suspended before June 4th this year in the only column of the mainstream media. Whether Zunzi's June Fourth Manga has become absolute, Zunzi responded like this, "Of course, in the past, it was done as much as possible in the past. Now I feel that the danger is much higher. The logo. For example, this person draws every year, like Victoria Garden goes to a candlelight party every year. Suddenly there is no more, and the international will be concerned. After no longer draw, you can count how many years of comics with the theme of the June 4th. This paragraph. The time to leave white is a strong historical record. "

Zunzi Comics accompanied Hong Kong people 40 years after several menstrual wind and rain: Now it is not necessarily the darkest era

After 40 years with comics with comics, I have experienced the China -British negotiations to Hong Kong to implement the National Security Law. In the eyes of Zunzi, which stage is the darkest era of Hong Kong? Zunzi said that he would stay in Hong Kong to experience the future with everyone.

Zunzi: "I will stay in Hong Kong. In the past, Hong Kong had experienced many different dark times. At that time, people felt that the most painful times would be described as the darkest era. Is Hong Kong the darkest today? I feel that if you want to evaluate the darkness, you must try your best to make Hong Kong not too dark, or go in a bright direction. The G7 Leadership Summit officially appeared on the 19th in Hiroshima. The former military capital Hiroshima has now become a symbol of peaceful cities in the minds of the Japanese

(Voice of Germany Chinese website) On the morning of May 19, The Prime Minister Kishida and Mrs. Yuzi stood in front of the Peace Memorial Park and welcome leaders from various countries. Kishida Wenxiong personally took the leaders of various countries to visit the museum. The various items displayed by the guide and explained, the time reached about 40 minutes. The leaders of various countries talked to the victims of the nuclear explosion and presented flowers in front of the monument.

This is also the first time that leaders of various countries have gathered a visit to the nuclear explosion museum. Bayeng became the second US president to visit the place after Obama. However, the difference is [] Only for about 10 minutes, only watching a few exhibits on the first floor of the lobby. The Minister of Foreign Affairs was Kishida, and he received Obama with the then Prime Minister Shinzo Abe.

Although Kishida was born in Tokyo, the family is a political family from Hiroshima. He will go back to visit relatives from the New Year since he was a child. He also understands many local history. Many relatives of the Kishida family died of nuclear explosion attacks. Although they were born in Tokyo, they were always natives of Hiroshima.

Kishida stretched out the "Nuclear Martial Arts World" at the peak of this summit, and was also a appeal to the current tension of the current international situation. Today's Hiroshima is a symbol of peace cities in the minds of the Japanese. However, before the end of World War II, Hiroshima was actually the center of the Japanese army's very important sea, land and air supply hub, and was known as the "military capital". 50 years ago, Hiroshima was a "military capital"

Hiroshima's army starts, and it can be mentioned that it is during the Meiji Restoration period. In 1873, the Grand Japanese Empire set up six major town and Taiwan military camps. Hiroshima was one of them, and soon it was changed to the 5th Division Command. In the following 20 years, Japan's modern military power grew rapidly. During the Sino -Japanese Sino - Japanese War, Hiroshima became the dispatch base of the army at that time. The coalition forces fighting with the Daqingshui Division that year was sent from Yu Pinang.

Yuba Island is a small island on the south of Hiroshima. Because it is located in the Seto Inland Sea, the terrain is easy to defend and difficult to attack. The island's Urpot Port gradually became the focus of empire training at that time. The Japanese army only spent two weeks to build the railway to connect Yu

Pin Island, and continued to transport troops to the Korean Peninsula, mainland China and other. The capital is full of first -level dignitaries.

Later, the military began to strengthen infrastructure across Hiroshima, and build military water supply and power systems to ensure the safety and stability of military strength. In the 1900 Boxer Chaos and the Japanese and Russian War in 1905, Hiroshima has become the main place for Japan to send troops. Manual driver.

As the September 18th incident occurred, the Sino -Japanese War broke out. Hiroshima's military role is becoming more and more important. In addition to Yupin in Hiroshima County, other places such as Wu Shi have also become important military ports and counties in the county.

In the end of World War II, Hiroshima carried out a large amount of evacuation, but at this time Hiroshima has become a military town that must be attacked in the eyes of the U.S. military. On August 6, 1945, the U.S. military voted at the atomic bomb. Hiroshima became the first nuclear explosion in human history. city of.

The G7 leader came to Hiroshima Peace Memorial Park on the morning of May 19th. In the picture, they are participating in the tree planting ceremony

From the time of the war, it became a natural attraction

Facing the hometown of the hometown in the past, the atomic bomb was hit hard, and Kishida was not easy to feel deeply in his childhood, and he was

resolutely opposed to nuclear weapons. Essence When the outbreak of Russia and Ukraine and the use of Nuclear weapons, the fear of people's nuclear weapons emerged again.

After World War II, Yu Pin Island put aside the rich battlefield color in the past and gradually transformed into passenger use and ordinary fishing port. Residents have also approached 10,000 people to about 1,500 people.

Once, the former island, Aoki, who once lived in the local island, said in an interview with Japan's "Daily News" that he returned to Yu Pin's hometown after the nuclear explosion, and saw that the whole island had become a scorched earth. There were many burnt and painful pains nearby nearby. After the injured people, after waiting for their pain and dying, the living people pushed their bodies on the steel barrel and burned. The smell of smell so far still makes him unforgettable.

At that time, the Military Fortune Port, now the place where the G7 leaders shook hands, including the United States who dropped the atomic bomb that year. For Kishida Wenxiong, as well as Hiroshima, and even every Japanese, Hiroshima was attacked by nuclear bombs as like every generation. Most of the locations on the island now become parks and native forests. The island's viewing historical sites and natural plant walks have become the source of the current financial source.

However, now, the threat of military expansion of Russia's nuclear weapons and China's military expansion still allows the international situation at any time to move the whole body. At this time, again reviewing the journey of Hiroshima from the army to a peaceful city that year, maybe you can once again understand the idea of Kishida Vancouver resort to the "Nuclear Martial Arts World", because for many Hiroshima people, many memories are still vividly remembered.

The prize was led by Li Zhiying's son, Li Chongen, and he said:" My father was jailed to tell the truth. "

In the award statement of the Cato Research Institute, "the democratic advocate of the Chinese government is unabashedly criticized in the prison, and the allegations faced may allow him to spend the rest of his life in prison."

According to Reuters reported on May 19, Hong Kong media tycoon Li Zhiying made an application a few days ago, demanding that British senior lawyer Timothyowen defended it. However, the Hong Kong National Security Council suggested that the Hong Kong Entry Division refused to issue a work visa to Irving. Li Zhiying's legal team proposed a judicial review on the grounds of the National Security Commission's "Vietnam Power".

On November 25, 2022, British Royal Lawyer Owen(Timothy Owen)Arrive in the Hong Kong Final Audit Court. (Reuters) [] The Hong Kong Legislative Government passed a bill on May 10 to give Hong Kong Chief Executive Tailoring to prevent foreign lawyers from acting in a suspect in national

security cases. Based on this law, Li Zhiying's judicial review application was rejected.

Pan Zhaochu, the chief judge of Li Zhiying's review, stated in a judgment that the Hong Kong court has no judicial jurisdiction over the National Security Commission, and the National Security Commission is not challenged by judicial review. He wrote: "The function of the National Security Commission far exceeds the ability of the court institution."

Peng Yaohong, the acting lawyer of Li Zhiying, presented earlier that if judicial by the National Security Commission could not intervene, Hong Kong would "say goodbye to most of the rule of law."

In July 2020, Beijing's implementation of the "Hong Kong Safety Law" in Hong Kong will include "harmful national security" such as subversion and collusion of foreign forces, and includes the scope of judicial jurisdiction.

The 75 -year -old Li Zhiying founded the Apple Daily for supporting Hong Kong Democracy. The newspaper was searched by the police and was suspended in 2021.

The accused of Li Zhiying has also become the most attractive case of the outside world since the implementation of the National Security Law of Hong Kong. It is also the defendant to be charged with the charges of "collusion with foreign forces" under the National Security Law. In December last year, Li Zhiying was sentenced to 5 years and 9 months in prison for fraud.

According to the National Security Law of the Hong Kong District, he also faced a number of allegations such as incitement and collusion with foreign forces, and may be sentenced to life imprisonment.

Li Zhiying publicly stated that he did not plead guilty, and the authorities' trials on him will begin in September this year.

A few days ago, more than 100 media leaders in the world signed a statement asking the CCP authorities to release Li Zhiying, including the editors of the New York Times and the Washington Post and the Nobel Prize winners.

In response to Li Zhiying's award, Mark Cliford, chairman of the Hong Kong Free Council Foundation (CFHK) Chairman of the Hong Kong Free Council Foundation (CFHK), criticized the Hong Kong government to prevent Li Zhiying from hiring foreign lawyers and rejection of judicial review applications. Essence He said: "There are no legitimate procedures and the rule of law in Hong Kong today. The CCP has tore up the Basic Law and

continue to suppress the only little freedom. We will continue to track the most qualified Li Zhiying case to win the award to promote me Colleagues were released and the status of Hong Kong media was restored. "

After meeting with members of the United States and the United States, attended the press conference together after meeting Photo by Lu Xi A

delegation composed of seven US Congress visited the United Kingdom recently and met with many British lawmakers on Friday (19th). At the moment when the British policy has shifted obviously, the British and American members reiterated that the two countries must regain the glorious history of the invasion of the anti-authoritarian regime, and unite the CCP's upgrade aggression.

The US Congress delegation met in London on Friday (19th) in London for nearly an hour. Members of the 7th American delegation cover the Republican and Democratic parties, including Senator Joniernst and 6th members. They are all members of the US -China Strategic Competition Special Committee. Mikegallagher led. The eight British lawmakers are members of the China Political Parliament Alliance (IPAC). Therefore, this meeting was regarded by the outside world as the British and American MPs to fight against the CCP.

The British government's policy towards China to Britain: We are experiencing the "difficult period"

The British and American Members attended the press conference together. Iain Duncansmith, a former British Conservative Party leader and a member of the House of Conservatives, said that the meeting was concentrated in discussing the huge threats brought by China: "China's challenges are not only military levels, but also on the economic and cultural level, and there are also, and there are, and there are, and there are. The challenges to human rights and freedom are very big challenges. Because China is a huge economy and other factors, the challenges that China today to us has even greater than Russia in depth and scale. "

Gragel: It's time to regain the glorious history of Britain and the United States to resist totalitarian power

The head of the United States delegation Garrat said that in the past 30 years, the United States, Britain and Europe have gambling and making a stable economic contact with China. I look forward to promoting the political liberalization within the Communist Party of China More and more prosperous, the CCP becomes more and more exclusive.

Mike Gallagher, head of the US delegation, said that Britain and the United States are facing China's upgrade aggression and must unite counterattack. (Photo by Lu Xi) He said that the ethnic extinction of Xinjiang, the militaryization operation of the CCP in the South China Sea, the committed commitment of the two systems and two systems of Hong Kong, and a series of cases all showed that Britain and the United States faced China's upgrade aggression and must unite counterattacks.

"Look at the Chinese illegal police station on our own land," said, saying that it is infringing the sovereignty of the United States and the United Kingdom. Look at the network attack on our government network and see how China's united front force affects us. Our politicians, business leaders and cultural institutions have become the goal. The glory history of Britain and the United States has the glory of the invasion of the autocratic regime and defending freedom.

The British government has recently softened in China. In addition to emphasizing that "constructive contact" with China should be emphasized, they are more careful to prevent measures that may be angry with Beijing. At the meeting, the British lawmakers criticized the government's steering

violently. However, in comparison, the head of the US regiment Garrat looked careful and refused to directly respond to the question of whether the British government was too weak. Essence

On the issue of Taiwan, Garrat emphasized that the United States should accelerate the sale of martial arts in Taiwan, assist Taiwan's self -defense, and criticize the current post -delivery issue. Many British and American members also actively mentioned the situation of the Hong Kong media tycoon Li Zhiying. They believed that British and American members should jointly pressure to assist Li Zhiying for their freedom.

It is reported that the Cyprus government of the Mediterranean Island State decided to cancel a passport of Liu Tezuo, a wanted criminal of a Malaysian Development Corporation.

"Malaysia Today" reported that the Cyprus Mail cited people familiar with the matter that Cyprus Cabinet was a proposal based on the Minister of the Interior Nicosnouris and decided to win Liu Tezuo's citizenship.

According to the news from Cyprus News Agency (CNA), Cyprus Cabinet made this decision after obtaining new information about Liu Tezuo in the Ministry of the Interior.

The report pointed out that as of March this year, the Cyprus government did not have sufficient evidence of winning Liu Tezuo's citizenship. The Ministry of the Interior later contacted the Interpol and obtained more information.

According to information provided by the International Interpol, the Ministry of the Interior of Cyprus suggested that the government cancels Liu Tezuo's passport.

Liu Tezuo obtained Cyprus passport in 2015. He was accused of being behind the scandal of the Malaysian company scandal. In the absence, he was charged with courts in the United States and Malaysia.

Cyprus is a member of the European Union. He holds a Cyprus passport, can live, work, study, and business in EU countries, and enjoy EU citizens' rights and interests. Cyprus launched the "Gold Passport" plan after the 2013 financial crisis. This plan was suspended in 2019. The European Union demanded that member states to strengthen the background investigation of citizens of non -EU countries because they are worried that the "golden passport" has become a backdoor of money laundering of criminal groups and officials.

The Cyprus government set up an investigation committee to investigate the "Gold Passport" project, and found that 53 % of the 6779 civic rights awarded from 2007 to 2020 were illegal.

(Voice of Germany) "Daily" published by Berlin wrote that the China Central Asian Summit was located in the ancient city of Xi'an, which has a strong historical symbolic significance. On the one hand, Xi'an is an important node of the ancient Silk Road. At the same time, when the seven Western countries discuss how to deal with China in Japan, Xi Jinping, the highest leader of China, to meet with the leaders of the five countries in Central Asia. obvious. This article entitled "Xi Jinping's emphasis on Central Asia" wrote:

"The disintegration of the Soviet Union and the announcement of independence in Central Asian countries have shocked China. China, Xinjiang, Hansham, Tagikistan, and Kyrgyzstan have more than 3,300 kilometers of border lines. The ethnic minority Uighurs believe that they have been suppressed by the Han immigrants.

In the past five years, hundreds of thousands of Uighurs have been sent to the re -education camp. At the same time, millions of Uighurs still have scattered Central Asian countries, and they are not controlled by the Communist Party of China. Therefore, Beijing is very worried that these Uighurs will be organized overseas and set off an independent movement.

For Central Asia, Chinese leaders have always adopted a two -pronged strategy to expand China's influence in Central Asia. This measure led to serious economic dependence: more than half of the foreign debt of Tajikistan and Gilgistein came from China. Niva Yau, an expert at the Atlantic Council of Washington Think Tank, said: 'In the past two decades, the extensive

participation of the People's Republic of China in Central Asia has made the region a significant shift from Russia to China. ""

The bilateral trade between China and Kazakhs has reached \$ 31 billion. The picture shows the leaders of China -Kazakhstan at the Central Asian Summit.

It is reported that China 's trade with Central Asia is also increasing, and it has already surpassed the trade between Central Asia and Russia. In just 20 years, the trade volume of China and Central Asia has risen from 2.3 billion to \$ 70 billion.

"China also solves the Uyghur problem in its own way ': Under the pressure of Beijing, all kinds of organizations in Central Asia that seeks independence in Xinjiang are included in the illegal category. Later, the relevant authorities also dissolved all Uyghur people. Cultural organizations. And in the past few years, even the innocent people will be tightly monitored by the authorities. In view of this, the "World Uyghur Conference" headquartered in Munich's "World Uyghur Conference" said in a statement. Relations of various countries are becoming increasingly close, and this development is worrying. ""

For the China Central Asian Summit held in Xi'an, the "Daily News" website wrote:

"besides, China's total trade with Central Asian countries has reached a record of 70 billion US dollars, of which China -Kazakhstan Trade first ranked first in \$ 31 billion.

Some observers believe that the China Central Asian Summit is also a competition against the Kuangjie Seventh -Kingdoms Group Summit in Japan. At the Summit of the Seventh Kingdom Group, in addition to the Russian and Ukraine War, China was also an important issue.

Xinhua News Agency reported that the parties to the meeting had reached a consensus on regularly holding a summit in the future. The next China Central Asian Summit will be held in Kazakhstan in 2025. "

Workers Culture and Art Museum located in Chaoyang District, Beijing Baidu Encyclopedia Screenshot

China, known as the first civil worker culture and art museum with the theme of "migrant workers", has been operating in Beijing for 15 years. Recently, it has been reported that it will be closed in the near future because it is included in the demolition of Pipi Village, Dongjiao, Beijing.

The museum is located in the Chaoyang District of Pi Village. According to the Hong Kong "Ming Pao" report, the word "demolition" was sprayed on May 18, which quoted the news of the surrounding villagers that it is necessary to dismantle. "The outer wall of the opposite plant also wrote the word" disassembly ", and the broken courtyard was changed to a simple house.

"Ming Pao" reported that the Museum of Migrant Culture was the only public welfare museum founded by Chinese migrant workers in China, and was initiated by Beijing's "Workers' House" by the public welfare organization serving foreign workers. According to the relevant news of the WeChat public account "Pi Village Workers", the museum will hold a farewell form on Saturday (May 20).

China Minister of National Security Chen Yixin Baidu Encyclopedia Screenshot

The Chinese government conducted a number of anti-spy investigations on foreign companies' consulting companies, which has attracted the attention of

foreign investors. Wall Streetjournal in the United States reported that Chinese national leaders Xi Jinping assigned the Minister of National Security Chen Yixin to act in the relevant actions.

The Wall Street Journal stated in a report on the 18th that the blows of these foreign companies clearly stated that Xi Jinping's emphasis on security is higher than economic growth. The system rectifies American companies to collect Chinese information. It is reported that the Chinese government does not have any measures to soothe foreign companies. In the long run, it will seriously crack down on foreign investors' investment in China.

Suzanneclark, president of the U.S. Chamber of Commerce (U.S. Chamber of Commerce), previously stated that it has faced more and more risks in Huamei. China's pursuit of its own absolute security policies and practices has made the world less secure.

It is reported that the Indo -Pacific Trade Negotiations led by the United States have been close to reaching a supply chain coordination agreement and may be announced next week.

Inspectors told Bloomberg that the negotiating representatives hope to reach an agreement at the Indo -Pacific Ministerial Meeting held at Detroit, USA on May 27th (Saturday).

The negotiations involving 14 countries are mainly concentrated in the establishment of an early warning system, allowing countries to issue early warnings when they see the risk of supply chain interruption to avoid the repetition of the global supply interrupt incident during the crown disease epidemic.

Because the consultation was carried out by closed doors, the insider asked not to be named.

The supply chain is one of the four "pillars" of the "Indo -Pacific Economic Framework" (IPEF) that countries began to discuss last year, and the other three pillars are clean economy, fair economy and trade.

The U.S. Department of Commerce did not immediately respond to the request for the news of the news, and the US Trade Representative Office refused to respond.

In May last year, US President Biden launched the Indo -Pacific Economic Framework Plan during his visit to Asia, which aims to strengthen the trade relations of the United States in the Indo -Pacific region in order to compete China 's increasing economic influence in India.

The countries joined the United States include Australia, Brunei, Fiji, India, Indonesia, Japan, South Korea, Malaysia, New Zealand, the Philippines, Singapore, Thailand and Vietnam.

The total economic volume of member states accounts for 40% of the world economy.

French New Cauridonia Later, the risk of tsunami occurred in the South Pacific has been lifted, and all countries have lowered the warning level.

Comprehensive Reuters and Agence France -Presse reported that the Pacific Tsunami Early Warning Center said that by the afternoon of Friday (May 19), most of the tsunami threats have been lifted. The center warned earlier that the waves at 26 locations in the South Pacific may be one meter higher than the tide.

The U.S. Geological Survey said that the earthquake occurred at 2:57 am (at 10:57 am in Singapore time at 10:57 am) at the Standard time of the Greenwich (Singapore time) on Friday. Southeast, the depth of the shock is about 38 kilometers.

Police at Noumea, the capital of New Cauri, evacuated coastal residents.

The head of civil affairs security, Malgia Lesia, said: "The first wave is surging (Mare) and Ile Despins, but the wave is only higher than the normal tide. Less than 50 cm. "

He said: "The alarm of the whole country, the security forces and the fire brigade have evacuated the coastal areas."

According to data from the Nu Lulu Pacific Tsunami Warning Center, the waves observed in Vanuatu were about half a meter higher than the tide, and the waves predicted in several other Pacific islands were slightly smaller.

The Vanuatu authorities call on residents to stay away from the coastal areas below 12 meters and less than 300 meters away from the coastline.

In Beijing Park, a pair of young people use a mobile phone with a bench.

Agencence France -Presse According to recent data released by the National Bureau of Statistics of China, the unemployment rate of young people aged 16-24 in April this year has reached 20.4%, a new high of over the years. So why do you have so many people in this age without work? Three young people with different backgrounds accepted interviews with reporters on this station, telling their views on this issue.

College teachers and children: Insufficient competition, the lack of academic qualifications is incomparable to work of civil servants and teachers

At 21 years old and studying in Minnesota, this year, Shanghai Youth Xuke, from a college teacher's family. In an interview, he told reporters that among friends who are a few years older than him, many people are very difficult for employment: "There are fewer posts and too competitiveness, and all people are willing to do everything. , The salary is not high, the benefits are not high. "

Xu Ke said that many of his friends and children of civil servants have the employment intentions of many of them entering the system to be civil servants, or go to primary and secondary schools after graduating from teachers and political undergraduates. At present, the phenomenon of unemployment among his friends is very common: "Those who can't find it at all, it is estimated that 40 % of them are in the proportion. After all, in the system (children of the family), not everyone can be admitted to high school. Not everyone can go to college who are in high school. "

In 2021, China launched the "Five -Five Five Dial" policy. Under this policy, the proportion of junior high school graduates entering high school and secondary vocational education schools after the entrance examination becomes generally equal. In the past many years before this policy, among Chinese junior high school graduates, the number of people studying in high school accounts for more than ten percentage points than those attending secondary vocational education schools.

Xu Ke said that young people who cannot attend high schools and university undergraduates will not have the chance to work in civil servants and teachers who have academic qualifications; and those who do not admit to high school and university undergraduate will face the fate: "Low salary, dry heavy physical strength, physical strength, physical strength Live. Some people can't afford to suffer this kind of work, or they can't find (work), they are basically old all day. "

A job fair (Agence France -Presse) held in Beijing on August 26, 2022 [] **How do young people growing up in workers and small businessmen think of employment?**

Shan Wentao, 30, is from a worker family in Taihe County, Anhui. He said that most of his friends grew up in the workers' family, and some of them were a few years younger than him. He talked about the employment of these young friends than his friends, saying that no matter what education, the unemployment rate is very high, because the current employment environment is "rolled out". Among these friends, people who do not read undergraduates or colleges will do business by themselves or engage in physical labor. Taking one of his friends as an example, he tells the difficulties faced by these youths, saying that the friend had opened the shop, but because of bad business, he found a physical labor work last year: "Find a class, the result is all The construction site. There are more people in construction sites, and then the salary is getting less and less, and the living is quite heavy. "

Shan Wentao said that his friend was only working at the construction site for half a year because of physical reasons and arrears of wages, and he resigned from work last month. He also said that the construction site industry in China is quite common in China's construction site industry.

On the other hand, when talking about whether young people from workers' families have the phenomenon of "lying" and not looking for a job, Shan Wensao said according to the situation he observed, this "lying flat" can only appear in the family situation Among the better people, many young people from the family of migrant workers bear more financial pressure on the family. Some people have already become a family and cannot "lie down." He said that although work is difficult to find now, his friends are still trying to find a job: "No way, I feel that they don't want to go to work, but there is no way."

Ms. Chen, who has worked in Shenzhen, Guangdong for many years, told reporters about her 17 -year -old relative. Her relatives are from a small business family, who is currently studying in a technical secondary school in Zhuhai, Guangdong, and has repeatedly said that she has lost her willingness to employment after graduation. Ms. Chen said: "She said that the environment in the technical secondary school was too poor, she couldn't learn anything, and she made less money after coming out." It is better to lie flat."

When the reporter asked Ms. Chen, when her relatives had long -term planning for the future, Miss Chen said: "She doesn't want to do a physical work, because she is too hard to work, and she has no resources and conditions at home to go abroad to study abroad. She is desperate and confused about the future. "

Shen Boyang, an associate professor of the Institute of Crime of Taipei University, the chairman of the Taiwan Democratic Laboratory, and the initiator of the Black Bear College, is one of the most thorough scholars in Taiwan's research on the CCP's cognitive operations. He analyzed the PLA's way of fighting Taiwan's public opinion, mainly using various conspiracy theories to release the topic of public opinion in Taiwan with a large -scale abnormal social media platform account. And use the#并，并, which is loved by young people, has gradually influenced young people who have no

political tendencies. In recent years, there have been few combat methods for fake news. Instead, it has shaped public opinion fermentation on social media, allowing Taiwanese media to follow up because of traffic. For example, nearly 40 % of young people are believed in Taiwan. Is Taiwan slowly falling on the cognitive battlefield?

The first China -Central Asia Summit was held in Xi'an, Shaanxi Province since May 19, 2023 Reuters On May 19, the China -Central Asian Summit published the "Xi'an Declaration", and the official Xinhua News Agency quickly launched the "results list". Is this summit hosted by China really to improve its international influence? Or is he "don't gallop" with the Qi Dynasty Group Summit?

**** **China-Central Asian Summit Synchronous G7 to international demonstration?** "This summit opened a good leader for the cooperation of various countries." Friday(On the 19th), the China -Central Asian Summit was held at the Xi'an International Conference Center, and Chinese President Xi Jinping spoke at the meeting.

The heads of state participating in the meeting include Kazakhstan President Toccyev, Kyrgyzstan President Zaporov, Tajikistan President Rahmon, Turkmenistan President Beldemumadov, and Uzbekistan President Milzyev.

"In order to strengthen our cooperation and the development of Central Asia, China will provide Central Asian countries with a total of 26 billion yuan (about 3.8 billion US dollars) financing support and gifts." Xi Jinping said.

At the meeting, Xi Jinping and the five heads of Central Asia jointly signed the "China -Central Asian Summit Xi'an Declaration" and passed the list of the summit. According to these two documents, the Six Kingdoms determined to build a closer "China -Central Asian Destiny Community" and agreed to

establish a meeting mechanism for the China -Central Asian Heads. Stan is held.

All parties also agreed to set up a ministerial meeting mechanism in the field of priority cooperation and set up a common secretariat in China. All parties will also strengthen the co -construction of the "Belt and Road" initiative to docking with the Five Central Asian initiatives and development strategies, and jointly improve the transportation infrastructure and comprehensively improve the scale of trade.

In the field of security, the "Xi'an Declaration" announced that all parties have resolutely opposed the destruction of legal regimes and the "color revolution", oppose any form and any excuses to "interfere with other domestic politics"; "And extremism", and emphasized that the territorial integrity and sovereignty of various countries "do not damage".

Although Chinese Foreign Ministry spokesman Wang Wenbin said a few days ago, this summit is the "first major home diplomatic activity" in China this year, and in the history of China's relations with China relations with China, "a

milestone." Yu Maochun, director of the center, told this station that China and the five Central Asian countries were heating, but they "showed that China's influence was weak."

Yu Maochun said: "It pulls the five economically underdeveloped in Central Asia's economy and is not very important on the international stage to hold the group to warm up. Strategic ideas are very backward."

Yu Maochun pointed out that due to the Cold War thinking, Beijing is very sensitive to Central Asia because it believes that several important border areas around China have been blocked by the West, and Central Asia is a very important breakthrough. In addition, China also has opportunities to think. Yu Maochun said: "Russia traditionally has a huge influence on the region, but now Russia is not in the heart and is deeply trapped in the Ukrainian quagmire. Therefore, the CCP took advantage of the fire and wanted to pull the original sphere of influence that belonged to Russia to its own sphere of influence."

However, Yu Maochun believes that China's speculative methods cannot last long, because China emphasized investment and construction from the perspective of economic interests, and it is difficult to have difficulty in the fundamental values and political cooperation with Central Asian countries, and even in counter-terrorism. Reach an agreement. Therefore, in the long run, China will not have much impact on this area.

The summit becomes Xi Jinping's internal "political show"?

On the evening of the 18th, Xi Jinping and his wife Peng Liyuan held a welcome and banquet for the Central Asian heads of state who attended the summit at the Furong Garden of Xi'an. After the meeting, they also watched the opening ceremony of the China -Central Asian Youth Art Festival. The Chinese official media CCTV showed that the performance was huge and magnificent."Because the Chinese cannot be resolved from the three -year epidemic, economic downturn, unemployed population (as many), and debt crisis, these are very unfavorable factor." Li Hengqing said, "Is he (Xi) stabilized the people? Promote consumption? So he made a state of magnificent, all the country. "

According to the White House news, US President Biden has met with Japanese Prime Minister Kishida on the 18th and promised to work closely and respond to the stress behavior of China's violations of international law.

The President of the European Council Charles Michelle said that maintaining "stable and constructive" cooperation with China meets the interests of the EU. The EU will call on China to increase pressure on Russia at the summit to prevent its military aggression against Ukraine.

At this summit, Japan also invited some non-member states to participate in the summit, including South Korea, Australia, Brazil, Kokmoro, Cook Islands, India, Indonesia, and Vietnam. These countries also represent multiple regional national alliances. Ukrainian President Zelleiski will also attend the meeting in person.

Yu Maochun said this: "The important purpose of the G7 is to maintain the existing order of the world. From this perspective, China is of course a huge threat to the existing order of the world." Li Hengqing also believes that this will be a very important summit to rebuild the world order. Essence

Cambodia's opposition leader Sanglisi refers to the general election of Cambodia two months later, and it is a "false scam."

Reuters reports that Sam Rainsy, who is self -exiled overseas on Friday (May 19) in Jakarta, the capital of Indonesia, attended a event on Southeast Asian press freedom.

When Sanglisi spoke at the event, it was said that the national election in Cambodia would be a "fake election" in July, because the reasons were simple, because there was no opposition party to participate in this election.

Sanlisi said that Cambodia is actually promoting the "one -party system".

Earlier this week, Cambodia's only Candle Candle Party was accused of not being properly submitted to the election document.

The Cambodian Election Commission issued a statement on Monday, announcing the cancellation of the eligibility of the candlelight party to participate in the national election on July 23. This means that in the election, the ruling party Cambodia People's Party has almost no opponents. Social

movements and diplomats warned that Hun Sen, who has long been the Prime Minister for a long time, may undermine the democratic process of Cambodia.

Sanglixi called on democratic countries on Friday, not to acknowledge the legitimacy of Cambodian elections and Hunson, a long -term Prime Minister of Cambodia.

Reuters tried to find a comment from the Cambodian government, but failed to contact the Cambodian government spokesman immediately.

Santali is the leader of the party -saving party party in Cambodia. In November 2015, Santianxi was charged with slander and inciting social turmoil, and he was exiled to France afterwards. The Cambodian Supreme Court dissolved before the July 2018 election.

The 7th Cambodian election will be voted on July 23.

Taiwan flag and American flag Reuters data chart For the first part of the first part of the U.S.-TAIWAN Initiative On 21st Centertrade, the United States and Taiwan's first negotiations, the Ministry of Foreign Affairs of the Chinese Foreign Affairs expressed "serious dissatisfaction and resolute opposition" this Friday. So, what impact will this initiative have on the three parties of the

United States, China, and Taiwan? Is Taiwan expected to reduce its dependence on China's economy?

"Taiwan -American 21st Century Trade Initiative" signed the first batch of agreements in the next few weeks

The U.S. Trade Representative Office (USTR) recently announced that the United States and Taiwan have completed the first part of the "US Taiwan 21st Century Trade Initiative" negotiations. In the first part of the negotiations, the two parties of the United States reached a consensus on the five issues including customs management and trade convenience, good legal operations, anti-corruption, domestic rules and regulations, and small and medium-sized enterprises. The two parties will sign the first phase of the agreement in the next few weeks, which will expand the space between the economic interaction and investment expansion between the US-Taiwan Small and medium-sized enterprises.

The Economic and Trade Office of the Taiwan Executive Yuan pointed out that this initiative is the most complete trade agreement signed by the United States and Taiwan since 1979, and it is also an important step for the two parties to sign a bilateral trade agreement (FTA).

American trade representative Katherinetai also said: "This result represents an important progress of strengthening the economic relations of the United States and Taiwan. We look forward to continuing to complete the next negotiations to complete a strong and high standard of trade agreement and assist both parties in response to trade challenges faced in the 21st century."

Chinese Ministry of Foreign Affairs: The United States and Taiwan signed a trade initiative against the United States and China "Three Public News"

On Friday, this station favored the Chinese Embassy in the U.S. Taiwan to seek comment on the above-mentioned "Initiative" in the United States and Taiwan. The Chinese embassy told reporters about the relevant statement of the Chinese Ministry of Foreign Affairs that day and did not add the content of the comments.

Chinese Foreign Ministry spokesman Wang Wenbin said at a routine press conference this Friday: "China has always resolutely opposed the official exchanges between the establishment of diplomatic relations with the establishment of diplomatic relations with the country in Taiwan, including any agreement with sovereign meaning and official nature. The relevant acts seriously violated the three joint communiqués of China and China and the

United States, and China expressed serious dissatisfaction and resolute opposition to this."

Chinese Foreign Ministry spokesman Wang Wenbin said at a routine press conference this Friday: "China has always resolutely opposed the establishment of any form of official exchanges between the establishment of diplomatic relations with the country in Taiwan, including any agreement with sovereign meaning and official nature. The relevant acts seriously violated one China Principality and the three joint communiqués of China and the United States, and China expressed serious dissatisfaction and resolute opposition." (Screenshot of the official website of the Ministry of Foreign Affairs) **Former US officials: We must prevent the false information of China's diffusion "Initiative" ****

In the outside world, what kind of political impact will the above -mentioned "Initiative" on the three parties of the United States, China, and Taiwan? David Keegan, deputy director of the United States, told reporters in an interview with this station that the "Initiative" demonstrated the deepening of US -Taiwan relations: "I believe that" Initiative "will strengthen the US -Taiwan economic cooperation. In recent years Trends. Like TSMC's investment in the United States, and many American companies have announced their investment in Taiwan, these efforts have deepened the economic relations of

the United States and Taiwan. Especially I think that economic security is the key to Taiwan's overall security. Therefore, the "Initiative" can strengthen Taiwan's security ", "

Ge Tianhao pointed out that the signing of the "Initiative" can reduce China's economic stress on Taiwan, but to be alert to the spread of fake information through the spread of "initiative" in Taiwan, which is not conducive to Taiwan's remarks: "Reduced China's economic stress on Taiwan's economic stress in Taiwan. The chips have always been the goal of the Tsai government and the US government. I believe that the "Initiative" can help us take a small step forward, but in terms of the scale of cross -strait economic interaction, China still has the ability to pressure Taiwan. At the same time, I am at the same time. It is believed that China will distribute false information about the "Initiative" as much as possible, making people think that the United States is taking advantage of Taiwan. "

Scholars: There are still many issues to be discussed in the U.S. Taiwan "Initiative"

Rileywalters, deputy director of the Hudson Institute of the US Think Tank Hudson Institute, believes that the "Initiative" brings positive progress to the US -Taiwan relation I believe that the "Initiative" can further support the already strong US -Taiwan trade and investment relationship. The first stage of the "Initiative" is a good first step, but there are many matters that need to be negotiated in the United States. It will be more complicated than the first stage, such as the issue of digital trade. I am worried that the two parties may not be able to talk about these issues before the election in Taiwan. "

Walter also said that the passage of the US -Taiwan "Initiative" does not affect the poor cross -strait relations: "Beijing has considered the DPP in the worst direction, and has already begun to implement the means to affect cross - strait trade."

Walter also said that if you want to judge whether the "Initiative" will greatly change Taiwan's supply chain to the US and China chip supply chain, it is still too early.

Scholars: How to affect Taiwan's trade dependence on China depends on different industries

Ding Hongbin, deputy dean of the University of Roland's University of Business School, told the reporter that the signing of the first stage of the "Initiative" was spreading the way for the overall trade of the United States

and Taiwan: "We found that many of the past trade negotiations have not been noticed. Things, including the use of smart property rights and trademarks, are one of the competition between state -owned enterprises with foreign countries ... Although the tradition only more than 20 years ago, in the trade negotiations at that time,(What is discussing now)Not the core thing. But now in 2023, these things have become very real, and the first agreement under the US -Taiwan trade initiative is placed in this place. "

Ding Hongbin said that because the first stage of "Initiative" did not touch the tariff problem, it would not have a significant impact on the traditional industry of Taiwan relying on China's labor: "They will continue to rely on the Chinese market and Chinese workers. Of course, China, China The price of workers is rising, and the cost of business in China is also rising. Therefore, when the manufacturing and operation costs in China have risen to Taiwanese businessmen, the degree of trade dependence between China and Taiwan will decrease. "Ding Hongbin also said that the "Initiative" of the United States and Taiwan will reduce the bargaining chip of China's economic coercion on Taiwan's agricultural implementation: "The output of agricultural products is fixed, more exported to the United States, and less exported to China. Therefore, in terms of such industries, It does cause the result of reducing the dependence of China and Taiwan trade. "

Chinese Minister of Commerce will visit Washington next week

A few hours before the first stage of the first stage of negotiations announced the above -mentioned "Initiative" in the United States, the Chinese Embassy in the United States confirmed that the Minister of Commerce of China Wang Wentao will visit the United States next week. He will meet with US Minister of Commerce Gina Raimondo at Washington and meet with US trade representative Daiqi at Detroit.

The reporter of this station believed in the Chinese Embassy in the United States to consult whether the above -mentioned "Initiative" would have an impact on Wang Wentao's trip to the United States? However, in the letter of the Chinese embassy, he did not confirm Wang Wentao's schedule to the United States.

Official data show that the population of China's first -tier cities is being lost. The picture shows Beijing street view. Associated Press data chart Good audience and friends, welcome to listen to the financial and epochs of Liberty Asia, I am Rao Yiming.

Recently China's official statistics show that the population of first -tier cities has increased negatively, and the population of Beijing, Shanghai, Guangzhou and Shenzhen has decreased by nearly 280,000. The most noticeable one is that the first population has appeared in Shenzhen for the first time since the establishment of a city in Shenzhen. Since the reform and opening up, first -tier cities have focused on the advantages of resources, manpower, geographical and policy tilt, and can be said to be the engine of China's economic development. What kind of signal does the population of first -tier cities pass on? At the same time, some provincial capital cities have ushered in a net inflow of population, so what does this round of population migration and reshuffle mean for China's future development? The show will discuss the above topics. The guests participating in the discussion are Li Hengqing, an economist in the Maryland Strategy and Information Research Institute in the United States.

Negative growth of the population of Beijing, Shanghai, Guangzhou and Shenzhen

Last year, China faced the first negative growth of the population in 60 years. The latest public data of the population in 2022 shows that the population of Beijing, Shanghai, Guangzhou, and Shenzhen has decreased, of which Shanghai has decreased the most, while the first population of the city has increased negatively since the establishment of the city in Shenzhen.

According to China's official data, the population of Beijing has decreased by 43,000, Shanghai has decreased by 135,400, the resident population in Guangzhou has decreased by 76,500, and Shenzhen has decreased by 19,800, and the total first -tier cities have decreased by about 275,000.

According to the Xi'an China Business Daily, as the first city in China, the population of Beijing has grown negatively for 6 consecutive years and has reduced a total of nearly 120,000. Shanghai also previously proposed to control the scale of population. In 2015 and 2017, negative growth has occurred. The negative growth of Beijing and Shanghai is not surprising, but Shenzhen and Guangzhou have been the two cities with the highest increase in China in the past 10 years. The negative growth of the population seems to mean more turns.

The report also said that the development of the population of the north, Shanghai, Guangzhou and Shenzhen for more than 20 years can further divide it into two stages. Among them, from 2000 to 2010, it is the golden age of Beijing and Shanghai. With the success of Beijing 's Austrian and Shanghai

Shenbo in 2002, the successful construction of large -scale urban construction has attracted large -scale foreign population.

But entering the second decade of the 21st century, especially after 2014, in order to cope with the increasingly severe metropolitan diseases, Beijing and Shanghai have introduced policies to relieve urban functions and strictly control the population of the city.

In recent years, Beijing has not only moved general manufacturing and polluting enterprises, but also transferred to the regional professional market and logistics centers. Even the central enterprise headquarters, deployment of universities, and key hospitals have become the object of transfer. These evacuated industries and parts were undertaken by Tianjin and Hebei, and some of them were settled in the newly established Xiong'an New District.

At the same time, Guangzhou and Shenzhen, which are also first -tier cities, opened the door one after another to welcome people from all directions, so they took over from Beijing and Shanghai and began to lead the population growth. During the ten years from 2000 to 2010, the population of Guangshen increased by about two or three million, less than half of Beijing and Shanghai, but by 2020 in 2010, it suddenly increased to six or seven million. The high -speed increase in this period is the same.

However, this rapid growth momentum ended abruptly in 2021. The population increase in Guangzhou decreased from 430,000 in 2020 to 70,000, while Shenzhen has plummeted from 530,000 in 2020 to less than 50,000. Last year, it was recorded at its own recording.

Shenzhen's permanent population fell for the first time

According to the "National Economic and Social Development Statistics Announcement" announced by Shenzhen, the permanent population in 2022 was 17.6618 million, a decrease of 19,800 from 17.6816 million in 2021. This is the first time that Shenzhen has declined since its establishment in 1979. Although the population is less than 20,000, it is only one year of data, but the signal released in it is worth noting.

According to Chinese official data, Shenzhen GDP in 2021 increased by 6.7%over the previous year, lower than the level of 8.1%nationwide, and Guangzhou was the same as the whole country. In 2022, Guangzhou GDP increased by 1%year -on -year, far lower than the national level of 3%, while Shenzhen reached 3.3%, slightly higher than the national level. This shows that Guangzhou and Shenzhen are already in a recession.

In addition to the weak growth of head cities, even the most developed Yangtze River Delta and Pearl River Delta are facing similar problems. For example, in the nine cities of the Pearl River Delta, except for Zhuhai, the remaining 8 cities have a negative growth.

The situation in the Yangtze River Delta is slightly better than the Pearl River Delta, but the growth rate of the overall population is also slowing. Except for Hangzhou Hefei, the population of other cities increased below 100,000. After deducting the natural growth of the local area, there were few new foreign populations.

Provincial capital cities absorb more population

In sharp contrast to the negative growth of first -tier cities, it is another type of city, mainly in the provincial capital, but the population has maintained a relative positive growth.

According to Sina.com quoted articles, in 2022, Changsha City increased by 181,300 compared with the previous year, Hangzhou increased by 172,000 compared with the previous year, and Hefei also increased by nearly 170,000. In addition, cities with a population increase of more than 100,000 are Xi'an and Nanchang, with an increase of 120,000 and 100,000 respectively.

The above cities have a common feature, they are all local provincial capitals. In fact, the growth of the provincial capital has lasted at least 10 years.

Although it is less than first -tier cities, it is stronger. Taking Changsha as an example, at the end of 2010, the permanent population was only 7.04 million, and 10 years later surpassed the 1,000 mark.

Another worth mentioning is the provincial capital. At the end of 2022, Chengdu's permanent population was 2.1268 million, an increase of 76,000 year -on -year, which was not too amazing. However, Chengdu has become the fourth largest city with a permanent population of more than 20 million nationwide, second only to Beijing, Shanghai and Chongqing. But you know, the administrative level of these three cities is much higher than Chengdu.

In addition to the provincial capital, the income of China's urban population migration must be counted as a single city. These cities are provincial and cities. They are generally industrial towns. They have certain authority in the economic management and fiscal fields, but they have greater autonomy than the provincial capital.

At present, there are only five planned cities across China, namely Dalian, Qingdao, Ningbo, Xiamen and Shenzhen.

The above is the current financial and economic listening, thank you for your listening. I am Rao Yiming. If you have any opinions and suggestions on this show, please write to fankui@rfa.org. Or my personal Twitter account is contacted by RFA_RYM.

Then I wish you all a happy weekend, the next show will meet again!

The former Political Commissar of the National Liberation Army National Defense University and the rank of Liu Yaia with the rank of general air force/CCTV Since the earlier this year, Hong Kong media revealed that Xi Jinping will "Li Xiaolin, a good friend from a young age," the husband of Li Xiaolin, who is "a good friend from a young age," and the former National Defense University Political Commissar Liu Asia shall be "executed for two years of the death penalty." Mr. Yabu Mingfu said with emotion on Facebook:

"Seeing this news, I do have some emotions. Although Liu Yaia worshiped the general, he has always been a well-known Confucian general. . And it has been retired for many years, and it is not a threat to Xi Jinping's power. "

Mr. Yaban reviewed in his Facebook post: "One thing makes me remember. That is around 2014. A delegation in Japan visited Beijing and was seen by Li Xiaolin. Say: "I heard that you have a good personal relationship with President Xi Jinping, and have grown up since childhood. I did not expect that the young translator of the Japanese Ministry of Foreign Affairs has translated this sentence into" I heard that you and President Xi Jinping have since childhood. The accompanying officials were holding back and holding up. Li Xiaolin said with a blushing face and said: 'We have been good friends since we were young, not a young bamboo horse'. "

Liu Asia's wife, Li Xiaolin, was shameful and blushed at the time that when he was a child, he was not a "blue horse" with today's holy Xi Jinping, which meant that they were not lovers. But the "good friends" of the innocent young age must be "young and small guess". But now ...? There are already outside reports that Li Xiaolin himself has not been "unified" by Xi Jinping, but the premise is that divorce must be divorced. Why do you do here? According to Mr. Yaban: "A few years ago, Xi Jinping did the strength of Xu Caihou and Guo Boxiong in the army, which can be said to be part of your death. But this time, Liu Yaia shot completely. Grab it over and spanking ', kill chickens and monkeys, and warn those princes to respect their attitudes more. Liu Asia, one year older than Xi Jinping, is very high in the Prince Party because his father-in-law Li Xiannian has been the Standing Committee of the Politburo Committee. , President of the State ... Liu Ya is also a young man. At the age of 38, he was a political commissar of the guru and Major General of the 44-year-old. The speed of promotion was even faster than Xi Jinping. When Xi Jinping first entered the Party Central Committee, Liu Ya and Liu Shaoqi's son Liu Yuan's son Liu Yuan Liu Zhen's son Liu Weiping is considered Xi Jinping's relatives in the army. There is a saying that the "Three Liu" in the army ... Liu Ya is also the second generation of Red, and has the relationship between his wife and Xi Jinping. Perhaps it is because of this. He thought Xi Jinping couldn't make himself. Therefore, there were some unscrupulous speaking and writing articles. He often said: 'Chinese leaders are not as good as one generation, and it is no longer possible to have a great strategist and thinker like Mao Zedong. These words are naturally not smooth in Xi Jinping. This time, Liu Ya was taken off, maybe it was not a political problem or an economic problem.

In fact, Mr. Yaban believes that at least compared with the members of the CCP, Liu Yaia, who is very good, "speaks and write articles in some" unscrupulous".

However, first of all, Liu Asia's "unscrupulous" was manifested in his early articles. Secondly, "China's leaders are not as good as one generation, and it is no longer possible to have the two sentences as great strategists and thinkers like Mao Zedong." In the early early articles of Liu Asia that the author finds as much as possible, there is no exact source.

The "early articles" of Liu Asia mentioned here, specifically referring to the general of Liu Asia, before the Political Commissar of the National Defense University. Of course, it was also before the 18th National Congress of the Communist Party of China, the top 18 of Xi Jinping.

We might as well assume that China "can no longer appear as great strategists and thinkers like Mao Zedong" once came from Liu Asia, and it can only be from his early articles. In other words, before Xi Jinping came to power, at that time, it was impossible for him to degrade or slander Xi Jinping. Because Xi Jinping himself could not think that he would become "Mao Zedong Second" in the history of the Chinese Communist Party.

Liu Asia left the post of political commissar of the National Defense University in early 2017. At that time, overseas media had disclosed that Liu Asia was treated for corruption. Liu was exposed to paid 170 million yuan in stolen money in 2016, thinking that it was okay, but since then his corruption was reported by his former subordinates.

On March 5 of that year, the Hong Kong media "Sing Tao Daily" reported that on March 4, the CPC National People's Congress held a reserve meeting. Zhang Shibo, the former president of the National Defense University, appeared in an interview. In an interview, he said: "Liu Yaia is an automatic retirement."

The author has introduced in the past related articles. Compared with Liu Yuan, who retired one year earlier than Liu Asia, Liu Ya's retirement was silent on the Chinese media at the time, because he was not like Liu Yuan and at the same time as Liu Yuan and he retired. Like many other PLAs who retired normally, they were temporarily supplemented as a member of a special committee of the National People's Congress or a member of the National Committee of the Chinese People's Political Consultative Conference ----- although he was still in the 18th Central Committee of the Central Committee at the time.

Soon, some netizens disclosed that the key reason why Liu Ya was forced to retire was that his "The People No longer Need a Great Leader" angered Xi Jinping.

The main essence of this article includes: the vast majority of countries in the world do not have any "great leaders". There are only a few countries with "great leaders". Once the leader of the modern revolution has become a "great leader", it means that the revolution has failed, because a new privilege that can be arrogant can be arisen again.

The leader of a modern country has the same privilege of ancient emperors. The best way is to turn himself into a "great leader." Therefore, it is not a good thing to have a great leader in a country, it means that the people of this country must be moldy.

Once he becomes a great leader, he does not need to hand over power. His words are truth. Like the imperial decree, everyone has to be loyal to him. Essence "Great Leadership" is synonymous with modern emperors.

The modern revolutionary "leader" with noble sentiments can never tolerate others to hold themselves to heaven, let alone hold themselves to the sky. This is the fundamental difference between the "leader" of the modern revolution and the personal ambitionist.

If the political leader is respected as a great man when he is in office, then he is by no means a real great man ... So far, there are no "great leaders" in the world that have developed well. The most typical comparison is South Korea and North Korea. I have never heard of what great leaders in South Korea, and the great leaders in North Korea are so great that they are so great. The results of development are clearly seen. The same land of the same land is different. Northern Europe is the area with the smallest difference between the rich and the poor in the world. I have never heard of which great leader in Northern Europe.

Revolutionary leaders are shameful, and the people's blind worship is ignorant. Democratic legal system, freedom and equality, restricting public rights, and protecting civil rights. This is the beautiful system that citizens of modern society should pursue. Rejecting this system will never become a respected and advanced nation. This nation will not have any light The future. However, the author of this web article is not the cloud Yiyun. He said: "I did some homework and found that this article is very interesting. Different titles spread on different websites for more than ten years. The earliest communication occurred on August 7, 2010, published on the Cultural

Revolution and Contemporary History Research Network. There is no signature of the author. This article then reprinted in 2012, 2014, 2015, 2016, 2018, 2018, 20122 and 2023. There are 'people no longer need great leaders', as well as 'legendary General Liu Asia's speech', and the people where the people leaders appear will suffer!" In addition to Liu Asia, the signature of the article is Song Shengli, Jin Tao Chen Pingfu and so on. Even the content is different. Some versions have been deleted, and some are added. "

After making the test above, the author concluded: "The general response of netizens is that after reading this article, I finally understood why Liu Ya was arrested. All the charges that were imposed on him were because of this ... The problem is here. I found that the finishing touch of the article 'truly noble modern revolutionary leaders can never tolerate others to hold themselves on the sky, let alone use them to hold themselves to the sky. This is the modern revolutionary leader The fundamental difference with the personal ambitionist 'has long existed in the 2010 version; at that time, Hu Jintao was in power. I inferred that the author may be generally talked at that time. Hu Jintao, because Hu has no choice but to hold himself without any means. He will not shot Xi Jinping, because Xi in 2010 is just a Chinese Communist Party Chujun. His ambitions, means, and whether they have noble sentiments, they are all in the middle of the light. No one knows that no one knows ",

The author continued to analyze: "Interestingly, (the people no longer need great leaders), the authors are generally talked about. Because of the precise foresight of the article, it is extremely vitality!Its essence is repeated year after year after year and year. Among them, a huge superposition effect was produced. In the spread of 2014, 2015, and 2016, this article has become the classic deep ridicule of the "great leader", and it is believed that it is President Xi of "Great Leaders". Can you not be suspicious? The text of the satirical great leaders, such as "whatever means to hold himself to the heavens', once becoming a great leader, he will not hand over power, and so on. It is certain that Xi Jinping will not know about these legendary Liu Asia views. Of course, in 2010, 'Liu Yaa' may be the speaker, but Xi Jinping in 2016 is certainly the listener's intention ... Xi Jinping cannot stand this kind of kind. The negation of his "commander ability", so he started Liu Yaia. "

After reading the content of the article, the author further searched, only to find that the content of this "The People No longer Need a Great Leader" was the end of the true work of Liu Asia, which was attached to Liu Asia, which made many readers difficult Debate.

Based on this, the author judges that the content of articles such as "the people no longer need great leaders" are "published" by Liu Asia's name "published". Sandy Liu Ya's suspicion. And Liu Asia himself must have been internally stretched out to "organize" internally.

At the end of April this year, a signed author published "Martyr or Funeral?" —In the cover of Liu Asia ", one of which is: It must be acknowledged that no matter how high Liu Ya's eyes are higher than the top, unruly, not consistent with the Party Central Committee, and" discussing the great politics ". , Violence and resist "inaccurate." Except for Liu Ya in 2012, Liu Ya personally issued a statement in the Hong Kong Ming Pao, and denied that in many articles in Hong Kong Wenhui Publishing House's "Liu Asian State Thinking Records" that advocated that "China's true rise depends on the battle of political reform, and the core of political reform is democratization, especially the party, especially the party The article of Democraticization "is written by myself. At present, there are at least two articles that have been spreading overseas and highly praised," The Loss of China Reform "and" New Thinking of Chinese Political Reform -Liu Asia Internal Speech "confirmation It is a fake and counterfeit, and has been claimed by the real authors He Qingxuan and Zheng Cunzhu.

The author's special explanation here is that the reason why this article is specially distinguished from the "early" of Liu Asia's article and the corresponding "late stage", because if Liu Asia's early articles, whether it is novel or military review content, it still There is also a part of "human words" (that is, the so -called "unscrupulous" content), then after he becomes an authentic, after a complete and complete PLA senior political worker cadres, all their limited "works" are all in their limited "works". Words, official words, and charm.

In May 2013, it was more than half a year after Xi Jinping came to power. Liu Yaia published an article "Persistence of the Sacred" Party "" in the People's Daily, loyal to Xi Jinping. Under the leadership of the Party Central Committee of the General Secretary, unity and leading 100 billion people can realize the Chinese dream ... "

On August 19, 2013, Xi Jinping, who had just been on stage for ten months, delivered a murderous internal speech at the National Propaganda Work Conference, with a "19 -199 speech". One of the main contents is "Whether we can hold and win if the Internet battlefield is directly related to my country's ideological security and regime security ..."

After this speech came out, Liu Asia moved the wind, and soon published a signature article in the PLA Daily News "Western hostile forces trying to use the Internet" to knock down China. " An extreme and important work of the party is related to the future destiny of the party, the long -term security of the country, and the national cohesion and centripetal force. Our army is the people's army under the leadership of the party. We must strengthen the standard and consciousness of the forefront, and grasp the ideological work real, tight, and tight to ensure that our army has always listened to the party command, can win the battle, serve the people, and serve the people . "

Until the beginning of 2017 that was forced to retire, Liu Yaia touted Xi Jinping on the People's Daily and the PLA News, and there were still many of the loyal articles or interviewed by Xi Jinping's watch. This is why Mao Zuo and Pink, who had deeply hit Liu Asia's early works, described Liu Asia as a political "two -sided person" in their large criticism articles.(This episode is chaired and broadcast by high -tech)(The article only represents the personal position and point of view of the special commentator))

Abdulhakmu Idreis, director of Washington Uygur Research Center in the United States (middle), met with Malaysian Prime Minister Anwar Ibrahim for RFA [] on April 19, 2023 in Kuala Lumpur.

Lumpur.(<https://www.rfa.org/mandarin/zhuolan/jieduxinjiang/xinjiang-05192023100034.html>)/@@stream)Hello everyone, my friends, I am Chen

Aizheng, welcome you to interpret Xinjiang with me. Recently, a well-known Uighur activist calls on Malaysian Prime Minister Anwal Ibrahim to support Muslim ethnic minorities in the persecution of Xinjiang in northwestern China. Anwal Ibrahim expressed sympathy for the Uighurs in the conversation, but also called this as the "internal affairs" of China. In addition, the human rights organization claims that the Chinese authorities' telephone search plans in Xinjiang are targeted at Uighurs and other Turkic minorities. The Chinese police database also marked the queen scriptures as possible. It is understood that a research funded by the Chinese government suggested that the second capital in Xinjiang, the western part of the country, to re-balance the Chinese economy, solve racial tensions, and strengthen relations with Eurasian countries. In this episode, we will learn more about the situation together.

A well-known Uighur activist calls on Malaysian Prime Minister Anwar Ibrahim to support Muslim ethnic minorities in the persecution of Xinjiang in northwestern China.

Abdulhakmu Idreis, director of the Uyghur Research Center of Washington, USA, met Anwar during the fasting party held in an Islamic center in Kuala Lumpur, Malaysia. Eid with a meal after the sunset during Muslims, which ended on April 20. Idris told Liberty Asia,

"We learned earlier that Malaysian Prime Minister Anwal Ibrahim would attend this Eid, so I prepared a letter to him, describing the current situation of the Uighurs."

Idreis said that in the rally, Anwar gave a speech saying that he would protect all oppressed Muslims all over the world and sympathize with the Uighurs. In 2018, Anwar asked the Chinese government to allow Uighurs to enjoy religious freedom and freedom of migration.

However, during the visit to China a few weeks ago, Ibrahim took a more loose attitude, saying that the Uyghur issue was "internal affairs of the Chinese government."

No one answered the phone call to the Malaysian Prime Minister's office afterwards.

Because of fear of anger China, many Muslims accounted for the majority of national governments did not publicly talk about the suppression of Uyghur people. Some countries have important trade and infrastructure projects with China under the "Belt and Road" initiative.

Idreis emphasized that the Uighurs were in a critical situation in Xinjiang and sought help from Premier Awars.

At the end of the meeting, Idrez gave Anwal a traditional Uyghur endless hats Doppa, as well as the letter and his book "threatened: China's colonization and Uyghur ethnic extinction to the Islamic world and the web ethnic group extinction ". Playing on both sides?

Erken Ekin Ekrem, deputy chairman of the World Uyghur Congress and Hacettepe, Hacettepe, said that as an experienced politician, Anwar is likely to be playing with coins - — On the one hand, deal with the Chinese government, and deal with the Uighurs on the other hand. Ik Rebu told Liberty Radio,

"He did not mention the Uyghur issue during his visit to China three weeks ago," Equest told Liberty Radio. "After expressing the desire to strengthen the relationship between the two countries, he returned to Malaysia."

"The words he conveyed to the Uyghur delegation was just a political strategy," he said. "If they do nothing, they will say, 'we have no power. '"

In addition, according to human rights observation of a report released in early May, the Xinjiang police relied on a list of multimedia documents containing 50,000 "violence and horror" to mark Uighurs and other Turkic Muslim residents for interrogation.

One of the results of this headquarters in New York is that the Uighurs only need to store the Gulan Scriptures on their mobile phones to cause police trial.

Human rights observation said in a statement that using this list is another example of China 's" abuse of monitoring technology in Xinjiang ".

Human Rights Observation Asian Agency Director Wang Songlian(Virtual)It is said that the police use this list to compare the data of the two applications installed on mobile phones with the authorities requesting the residents of Urumqi, the authorities of Xinjiang. In an interview with Radio Free Asia, she said,

"In essence, these applications on people's mobile phones are checking this list -the main list -and search for other information."

In a statement in May, the organization stated: "Human rights observations are concerned about the way China cracks down on its so -called 'terrorism' and 'extremism' behaviors."

The definition of "Chinese anti -terrorism law on" terrorism "and" extremism "is too broad and blurred to sue, deprives freedom, and deprive freedom, and deprives of freedom or serious personal injury to the purpose of political, religious or ideological purposes. Other restrictions.

The main list of multimedia files is part of the large database of more than 1,600 data tables leaked to the online media "The Intercept" in 2019. The news agency reported that the Urumqi police monitored and arrested the police reported in the database from 2015 to 2019. Human rights observation states that the list of the organization's inspection is not reported or analyzed before the different parts of the same database.

Human rights observations also found that in the nine months from 2017 to 2018, Urumqi police conducted nearly 11 million search on 1.2 million mobile phones. Police searched the main list of more than 1,000 different files on the 1,000 mobile phones, and found a total of 11,000 matching.

The organization stated that the analysis of human rights observations found photos, audio and video files containing violent content, "there are other materials that have no obvious connection with violence", including common religious materials.

Human rights observation stated in its statement that the UN Human Rights Council should conduct investigations, and relevant governments should find out technology companies participating in telephone monitoring and take action to terminate their participation. Wang Songlian told Liberty Asia,

"I think what happened in Xinjiang is very important for the future of China, and how to use these systems for the government. What does they have to do with the general technology and human freedom in the world? This is why we have been working hard to put together these puzzles ", "

It is understood that a research funded by the Chinese government suggested that the second capital in Xinjiang, the western part of the country, to re -balance the Chinese economy, solve racial tensions, and strengthen relations with Eurasian countries.

The report was published on April 21 in the Chinese journal "Xinjiang Social Sciences". It is recommended that the capital, which is specially built, is close to Kashgar in Urumqi, the capital of Xinjiang Uygur Autonomous Region. Kashgar borders Afghanistan, Kyrgyzstan, Tajikistan and Pakistan. However, according to a report from the South China Morning Post, the study did not

provide details of the central government's distribution functions between Beijing and the potential second capital.

Xinjiang has a vast desert and mountainous areas, living with more than 11 million Muslim Uighurs and other Turkic minorities. In recent years, they have been suppressed by the Chinese government, including "re -education" camp detention, torture and forced labor.

The study caused foreign experts and researchers in Xinjiang to question the possible motivation for the establishment of the second capital in the region and its impact on Uighurs and other ethnic minorities living there.

Elken Elkimu, deputy chairman of the World Uyghur Congress and associate professor of History at the University of Hastopa, Turkey, believes that the establishment of the second capital in Xinjiang will be related to China to become a world power by 2049. At that time, China will become the world's power. Essence The 100th anniversary of the founding of the People's Republic of China, Ik Rebu told Liberty Asia,

"Uyghur region is important for China to dream. It is a gateway to Central Asia, West Asia, Turkey, and Europe. Therefore, the establishment of a second capital in Uighur is strategic significance to China."

Aike Rebu said, at the same time, the plan will create unfavorable conditions for the Uyghur people.

"To establish the second capital in East Turkestan, it is necessary to sinlalte the region first."

Aike Timi uses the Uyghur's name to Xinjiang. He said that the vast territory lacks cultivated land and requires China to divert water to the area. This will need to reorganize more Han people. He said,

"These problems are not conducive to Uighurs, causing them to disappear due to integration."

Sean Roberts, a professor of international affairs at George Washington University(Sean Roberts)He wrote a large number of articles about the Chinese Uyghur and Central Asia, and he said that the move may have a dual purpose. He said,

"On the one hand, this may be to make the Northwest region more integrated into China. This is what China has been working hard since the 1990s. One of the motivations. "

On the other hand, Roberts said that the potential second capital will also be a defensive move. He pointed out,

"For a long time, the Chinese authorities have been worried that the Northwest region has been incorporated into the country more and placed under the jurisdiction of the country, because it is worried that it may become the root cause of unstable, and it may exacerbate due to external forces. This does not mean that the Chinese people Worried about the invasion of Central Asia or Russia, but they may worry that there are more unstable factors in Eurasia, and they hope to have a second capital nearby to ensure the security of China and make it not spread to China. "

Roberts also said that in the end, the plan was not a good sign for Uighurs.

Witnesses have revealed that the Russian army has been strengthening defense positions inside and surrounding areas in the southern and surrounding areas of the Zaporo Nuclear Power Station in southern Ukraine in recent weeks, and gather more Russian forces. It is expected that a new round of counterattack will be launched locally.

Reuters quoted four witnesses on Friday (May 19) that the Russian army excavated new trenches and bury more mines around Zapolozhye, and set up a shooting position in the nuclear power plant and was isolated from erection. The net, to expel or scare enemy drones.

The above news comes from two Urban workers at the nuclear power plant, and two residents of Enerhodar, where the nuclear power plant is located.

"Nuclear Threatinitiative", the non -governmental organization, said: "The nuclear reactor is not designed for the theater. I don't believe they will be safe in the theater."

Costin, the head of the Ukraine National Nuclear Energy Company (Energoatom), stated that he did not believe that the Ukraine would launch an attack on the Zapolozhye region, saying that the Ukraine or tried to force the Russian army to retreat by cutting off the supply line. But he said that the number of troops of the Russian army in nuclear power stations has risen from 500 to 1500.

The United Nations Nuclear Supervision Agency warns that the Russian army is increasing local military activities to call for emergency operations to take time, otherwise nuclear power plants will have a major danger of accidents. The United Nations plans to submit an agreement to the Security Council later this month to protect the nuclear power plant.

However, the real motivation of the Russian trenches of the Russian army is still different. Some analysts believe that the Russian army assembled soldiers and additional defense measures to ensure that the retreat path is not blocked or prepared to withdraw troops.

Dalai Lama Speaking at a religious summit on April 21, 2023 at the Reuters Video Screenshot at a religious summit in New Delhi, India Hello everyone, my friends, I am Chen Aizheng, Tibet sends out to invite you to look at Tibet with me. Recently, the Dalai Lama emphasized the Buddhist foundation and compassion at the religious summit. This party was the first time that the Tibetan spiritual leader had a controversial video. At the same time, the Chinese government is prevented from the spread of religious content on the

Internet in Tibetan monks and writers. Sources said that the move is part of the authorities that the authorities strive to destroy the influence of famous thinkers and religious figures. The Tibetan Buddhist who went to Lhasa is now facing new obstacles. They must now submit a form to local officials and a Lhasa residents provide them with guarantees. In addition, Mexican legislators waved the Chinese ambassador to the Tibetan flag, shouted "liberating Tibet" and "liberating the Uighurs", and called for ending China's "concentration camp" in Xinjiang. In this episode, we will learn more about the situation together.

The Dalai Lama delivered a speech at the Global Buddhist Summit on April 21, talking about the importance of compassion and wisdom, and emphasizing the importance of Buddhist philosophy and values.

The 87 -year -old Tibetan Buddhist spirit leader said: "I can also share with you, and through this inherent development, especially focusing on wisdom and compassion, it can indeed help us increase our courage."

Dozens of monks in yellow, orange, and saffron monk robes appeared in New Delhi, India to participate in the two -day ritual hosted by the Indian Ministry of Culture and the International Buddhist Federation, attracting it from Tibet, Mongolia, Nepal, Vietnam, Sri Lanka , India and Myanmar, including nearly 30 countries and regions including 500 participants.

This is the first public appearance in the Dalai Lama who kissed a boy's mouth in a student activity in northern India on February 28 and asked him to "suck" his tongue for the first time on social media.

The incident caused many audiences to be disgusted. However, extending the tongue in Tibetan culture is a sign of greetings or respect or consent. The supporters of the Dalai Lama recently held a demonstration of the event against the event.

Nevertheless, the Dalai Lama later apologized to the boy and his family in any misunderstanding.

The Chairman of the International Buddhist Federation, Jie Zun Zengpummer, said that the summit is "a good example of the world from different traditional and cultural backgrounds in harmony."

Although the Dalai Lama in Dalai, India did not discuss the disputes over the video recently, he did mention the topic of the struggle between Tibet and China.

"For example: take the current struggle and situation of Tibet as an example. If you just consider it from a narrow perspective, you will lose hope. Looking at this crisis and looking at the current situation, then your mind will be more flexible. Therefore, even in your daily life, there may be seemingly huge and unbearable problems. But if you have the courage, You will be more capable of adversity as an opportunity. "

The Dalai Lama has always advocated that on the basis of equal and mutually beneficial cooperation with China, it is not based on the advantages and disadvantages of the nation, and solve the Tibet problem through the peaceful roads to achieve stability and coexistence.

Beijing will be regarded as a signs of disobedience, including peaceful protests and self -immolation.

The Dalai Lama has no formal talks with Beijing since 2010. Chinese officials have made unreasonable demands to the Dalai Lama as a condition for further dialogue.

At the same time, sources told Radio Free Asia that China has been strictly banned Tibetan writers, Buddhist monks and other influential people who have spread religious content online without advance approval.

The suppression based on a regulations in March 2022 gives the authorities more power to limit the power of the Communist Party that the Communist Party considers to have destructive online content. one example. A Tibetan Tibetan from Tibet refused to disclose his name out of security reasons.

"As the Chinese government begins to implement this law, Tibetans and those who are influential have become goals and review objects. Without the Chinese government's permission, these people do not have to share or talk about Buddhism or any educational content. They are not even allowed to print any type of religious documents. "

This provision prohibits foreign organizations and individuals from spreading such content, except for those who have obtained the government. It requires them to not be criminally charged in the past three years. Bai Majia, a researcher -observed researcher in London, said,

"The Chinese government not only deprives Tibetans' basic freedom of remarks, but now Tibetans and influential people are also completely banned from sharing anything. Therefore, in recent years, we have hardly seen anything they shared on social platforms in recent years. ","

Tibetans from the region said that they were banned from entering the educator Yundeng Gatos and Sha Yujianzan, Tibetan historian Zi Rendunzhu, and the Chief Executive of the Potala Palace in Lhasa, the capital of the regional regional capital. South.

According to the source of Tibetans, other Tibetans have been arrested and imprisoned for "inciting divisionism" and "harmful national security", which shows that Beijing is continuing to destroy the religion and life of Tibetan and Tibetans. The influence of people with views.

Another Tibetan insider from the region believes that the regulations are dual standards. He said,

"The Chinese government often refuses to give any licenses to Tibetans openly teaching or educated. Recently, according to regulations, this situation has become more difficult. On the contrary, social media shared too much misleading and inappropriate content. For these contents, the Chinese government has not applied any restrictions. "

According to Tibetans in the area, Tibetans who go to the Lhasa pilgrimage or other reasons of Tibet must now obtain permission from local officials to ensure that travelers will not incite or participate in any protests that will disturb social order.

Many Tibetan Buddhists went to Lhasa with a population of about 560,000 to visit major religious places such as Potala Palace, Baying Street, Jokhang Temple, and Roblin Carter Palace.

The journey is usually carried out by walking, and accumulating a good karma -that is, believe that the total of a person's behavior will determine the fate of their future reincarnation.

In 2018, the Chinese authorities tightened their restrictions on Tibetans from other parts of the Tibetan Autonomous Region and Tibetan settlements of Chinese provinces to Lhasa. They asked the Tibetans to obtain a special pass to the capital of the Tibet Autonomous Region.

But starting this year, Tibetans must fill in a separate application form by local officials and submit it to an office in Lhasa, and a resident of Lhasa must ensure that travelers will not participate in protests.

Beijing regards any signs of peace and self-immolation as a division of behavior, threatening China's national security.

A source who was unwilling to disclose for security reasons said that the authorities asked a group of Tibetans who were pilgrimage from Hongyuan County, Hongyuan County, Tibet, Sichuan Province, southwest of China to register their names in an office in the Tibetan capital."In fact, you must get a license letter from your county or village office in advance to enter Lhasa. Then, once you get it, you need a resident of Lhasa to prove that you will not participate in any form of riots."

Sources added that Lhasa residents guaranteed for travelers must sign a document when travelers must sign in Lhasa.

He said that after relaxing the restrictions on the new crown virus epidemic, the new security procedures for Tibetans began. Some Tibetans from Aba, Agan and other parts of Qinghai were forced to return because they did not know anyone in Lhasa to guarantee them.

Another Tibetan insider who also refused to disclose the name because of security reasons said that this change is another way for China to strengthen the suppression of Tibetans. He said,

"If you are a Han, you can enter Lhasa as long as you show your ID card, but for the Tibetans, the Chinese government has upgraded their restriction strategies and implemented additional procedures. Then the authorities will make it difficult for them to enter Lhasa. "

In addition, a group of Mexican members recently interrupted the Congress. They shouted "liberating Tibet" and "liberating Uighurs". At that time, the new Chinese ambassador to Mexico was introduced to parliamentarians.

On April 26, in the city of Mexico, the Speaker of the House of Representatives St. Diego Kire welcomed Ambassador Zhang Run, and then the members immediately stood up and shouted loudly.

The representatives of the "Tibet Friends" group, Salvador Coro Kabrara and Ines Para Wallet, stood up, raised the Tibetan flag, and shouted "Free Tibet" for about 20 minutes.

The video also shouted: "Release the Uighurs!Cancel the concentration camp!" - He refers to most Muslim Uyesums being detained in the "re - education" camp, where their rights are severely violated. Legislators protested China's strict control over Tibet and Xinjiang.

According to a statement from the Chinese Embassy, after attending the parliamentary meeting, Zhang Run met with members of the House of Representatives in Mozhong Friendship Group, and emphasized the

importance of the "one China" principle as the political foundation of bilateral relations.

He also welcomes Mexico to participate in the "Belt and Road" initiative and other development and security projects.

This year marks the 10th anniversary of the establishment of a comprehensive strategic partnership between China and Mexico.

In western Spain, the land was burned due to wildfire, which caused about 3700 acres of land and forced about 550 residents to withdraw from their homes.

Reuters reported that Extremadura, a western autonomous region in Spain, was suspected to cause wildfire due to human arson, which caused the fire to continue to deteriorate under the boost of strong winds and dry weather. Before the report was reported, the wildfire was caused by extreme weather, but the authorities believed that the fire was caused by the arson of people.

Barona, commander of the Spanish military emergency team, said that the strong wind exacerbated the difficulty of fire, and the flow of smoke spread at a low altitude, making it difficult for the high -altitude fire to extinguish the fire.

At present, the authorities have dispatched about 250 firefighters to carry out fire extinguishing operations in the border area of CACERES in the autonomous region.

Spain has been less than the average level for three consecutive years, and the winter near the Portuguese border is also extremely dry, increasing the risk of wildfire.

According to data released by the European Forest Fire Information System, about 493 wildfires occurred in Spain in 2022, destroying 300 million hectares of land, setting a historical record.

A British study pointed out that Russia changed the combat method after 15 months of invasion of Ukraine. This tactical transformation may pose a major threat to the Ukraine who prepares to launch a large -scale counterattack, referring to the fact that the Russian army lacks combat effectiveness or excessive.

Bloomberg reported that the Royal Institute of London (Rusi) released a 30 - page report on Friday (May 19) stating that although the outside world believes that the Russian army often has problems such as poor operation, excessive dependence of artillery, and morale, but the morale is low, but The attention of these weaknesses has caused them to ignore the progress of the Russian army on the battlefield.

Researchers came to an on -site interview with 10 brigades in Ukraine from April to May this year.

Nick Reynolds, the main author of the report, pointed out that the Russian forces are far from being exhausted by the scholars and veterans.

He said: "There are many things on social media, saying that Russia lacks combat effectiveness, but social media is full of publicity of both parties. At this stage, we think we need to be more sober evaluation."

The report emphasizes that understanding how the Russian forces change tactics are not only important to Ukraine, but also important for NATO member states.

Since the outbreak of the war, in order to make up for early air defense errors, Russia has rationally connected the missile system on the front line of 1200 kilometers. This tactical transformation greatly gave the Russian army to avoid and intercept weapons such as Ukraine's high -speed anti -radiation missiles (HARM), and shot down the U -Fang fighter aircraft from low -altitude from 150 kilometers.

Right now, Russia is still continuously improving the ability to carry out electronic warfare, causing the Ukraine to lose 10,000 drones per month. The report also stated that the Russian army seems to have a Motorola communication system that can decipher Ukraine encryption in real time.

AFP reported that Ukraine has repeatedly required Western allies to provide high -tech jets against Russian aggression, and it has not been successful until recently.

According to this official, Biden, who is currently participating in the G7 Summit in Japan, pointed out that the United States "will support the 4th generation fighter such as Ukraine pilots and driving the F-16 series such as our allies and partners to enhance the strength of the Ukrainian Air Force." "In the future Training will be conducted for a few weeks, and the national

alliance that joins the joint training will decide when to handle the plane, quantity, and which countries."

British Prime Minister Rishi Sunak and Dutch Prime Minister Mark Rutte earlier this week that the "International Alliance" will provide combat jet to assist Ukraine.

Ukraine President Volodymyr ZELENSKYY visited Sunak on the 15th that he would "be very convinced" that he would create a "jet machine" to help Ukraine fight against Russia.

Sunak said that Britain is preparing to open a flight school training Ukraine pilot and French President Emmanuel Macron also said that he would do so, but excluded fighters to Kiev. (Translator: Xu Ruicheng)

Agence France -Presse reported that Republican leader McCarthy told reporters in Congress: "We have to suspend." "We can't spend more money next year."

President Biden's negotiating representatives and the Republican Party have been tugging, trying to reach an agreement on raising the upper limit of the debt, allowing the state to pay existing debts.

The Republican Party still insists that Biden must sign an agreement to cut expenditure in order to exchange their consent to raise the upper limit of debt. It ignores that the Democratic Party has repeatedly requested that the upper limit of the debt with "clean action" does not come with any conditions.

The White House said today that the two sides still have major problems on the national budget.

The White House officials stated that "there are practical differences between the two parties on the budget issue, and it will be difficult to carry out negotiations." "The presidential team worked hard to move towards a reasonable solution for the two parties that can be passed by the two hospitals."

Biden is currently participating in the seven major industrial group (G7) summit in Japan. He will shorten the itinerary to return to Washington early to try to promote the debt agreement. (Translator: Xu Ruicheng)

Wal-Mart executives predict that the Group's net sales will increase about 3.5 % of this year. (Agence France -Presse)

Walmart Inc (Walmart Inc)

(New York Stock Exchange code: WMT)

The grocery business strongly offset the weakness of the sales of clothing and electronic products, allowing the world's largest retailer Wal-Mart Wal-Mart, which was released overnight, not only increased by nearly 8 %, but the group officials also raised the forecast of the annual performance. With the booster of profitability and turnover, Wal-Mart's stock price is high overnight.

Wal-Mart executives said that the annual performance forecast is better than expected. They said that the net sales of this fiscal year are expected to achieve about 3.5 % of the growth. They expect that the profit-making profit of the year will be between \$ 6.10 and \$ 6.20. This estimated number also roughly conforms to the average prediction of analysts collected by Refinitiv.

Chief Financial Officer John Davidrainey said that there are fewer and fewer non-essential products purchased by consumers. They are waiting for promotion before buying high-priced products such as TV. Consumers have also begun to buy products with lower prices, such as buying smaller boxes of oatmeal. Nevertheless, consumers are still consumed.

Renny said: "We saw that consumers did bear some pressure in these economic indicators, but the overall toughness surprised us. I think this may be because we are today's assets and liabilities today. The table is much stronger than the epidemic. "

According to Wal-Mart's first quarter performance report as of the end of April this year, the Group's turnover increased from 141.57 billion US dollars in the same period last year to \$ 152.3 billion; profit per share was \$ 1.47. The average prediction of analysts collected by Refinitiv is the turnover of US \$ 148.76 billion, and the profit is \$ 1.32 per share after adjustment.

Wal-Mart's quarterly performance actually gives investors the latest snapshot of American consumer consumption model. Earlier this week, other large retail chains, such as: HOMEDEPOT and Target, have also stated that there are fewer and fewer large -piece goods and non -necessities that consumers buy. But consumers are willing to pay higher fees for necessities. For example, Homedepot customers will start to choose smaller home projects; Target customers will turn to buy more necessities, and choose to skip home supplies and clothing.

Renny said Wal-Mart's sales also reflected the general trend. Unlike some competitors, as the largest grocery in the United States, Wal-Mart is very "suitable" in market changes.

Almost 60 % of Wal-Mart's annual sales in the United States come from grocery. Therefore, when consumers turn to buy groceries and necessities, as the largest grocery in the United States, Wal-Mart is a very "suitable" new change. (Agence France -Presse)

He said: "Wal-Mart's annual sales in the United States are nearly 60 % of the grocery. In this quarter, the sales of general commodities in the United States have fallen, but the sales of food and consumer goods have increased double -digit. "

Not only that, inflation also attracted Wal-Mart to younger and richer frequent visits. With the support of these favorable factors, of the 29 analysts of Tipranks, 24 rated "buy" to Wal-Mart shares, and five rated "holding". The average target price of the one -year period was 165.64 US dollars.

(G7) The summit was held on Friday (May 19) on Hiroshima, an atomic bomb explosion, but the Japanese media said that the Japanese government did not allow media reporters to enter the Hiroshima Nuclear Explosion Museum with the heads of the Seven Kingdoms to take into account the domestic public opinion of the United States.

Kyodo News reported that the glass windows of the Hiroshima Nuclear Explosive Given were affixed with white obscurers to prevent the media from shooting from outside, and reporters and media staff were not allowed to be entered.

In May 2016, the then President Barack Obama visited Hiroshima for the first time in the US President and visited the Hiroshima Nuclear Explosion

Museum. Obama also hugged the victim of the nuclear explosion in this trip, leaving the impression of "reconciliation" in Japan and the United States.

However, although the Japanese authorities announced the conversation with the dialogue with the victims of the nuclear explosion in the Gategate in the Gategate, the expressions and reactions of the key heads of President Biden and the victims were not disclosed.

In order to convey the real situation of the nuclear explosion to the seven nations, the outside world also pays great attention to the content of the Japanese authorities to show those leaders. However, in the press release of the Japanese government, only the "Prime Minister Kishida Introduction to the display content" was written, and it did not mention more details.

Relevant sources of the Japanese government pointed out that the situation of the authorities in the confidentiality museum is not only taking into account the public opinion of the United States, but also considering Japan's security strategy for China and North Korea.

Intellectual analysis said: "If the outside world mistakenly thinks that the United States will not use nuclear weapons anyway, it will also have a bad impact on Japan, which depends on nuclear deterrence."

Reuters quoted a bulletin on the same day that the leaders of the Seven Kingdoms Group will announce in the final announcement issued on Sunday (21st) that they will "be committed to adopting realistic, pragmatic and responsible methods to realize a nuclear weapon without nuclear weapons. The world makes everyone's security not affect. "

When meeting with Chinese officials on Friday (May 19), the Polish government hopes Beijing to condemn Russia to invade Ukraine.

Comprehensive Agence France -Presse and Reuters reported that the Polish Ministry of Foreign Affairs issued a statement that Polish Deputy Ministry of Foreign Affairs Wojciech Gerwel conveyed the idea of Li Hui, a special representative of the Chinese government Eurasian affairs in Warsaw on the same day.

"(Poland) said" (Poland) hopes that China will condemn Russia's aggression and put pressure on Russia to re -abide by the principles of international law. "

It is reported that Gewell also condemned Russia's frequent nuclear threats. He said: "Poland expects China to take specific actions against Russia, and (avoid) the use of nuclear weapons to blackmail the world."

Li Hui responded that China attaches great importance to Poland's key role in regional affairs and is willing to continue to communicate with Warsaw to

solve the Ukrainian crisis. Li Hui promised that China will support the establishment of a balanced, effective and sustainable European security structure.

A few days ago, Ukraine Foreign Minister Dmytro Kuleba told Li Hui in Kiev that Ukraine would not accept any proposal to end the Russian -Ukraine War.

The Ministry of Foreign Affairs of China recently announced that Li Hui has traveled to the five countries of Ukraine, Poland, France, Germany, and Russia since the 15th of this month to communicate with the Ukrainian crisis with all parties. According to previous reports, Li Hui will stay until Sunday (21st) in Warsaw.
