At the recently -ended Shangri -La dialogue, the Minister of Defense of China and the United States was shaking hands behind the shaking hands and accusing each other, so that the outside world was worried about the status

quo of the relationship between the two countries. This shows that the recent relationship between China and the United States is described as "Spring Blossoms", which may be more appropriate.

"Spring Warm" means that compared with the "balloon incident" in March, high -level contacts and dialogue stops in the two countries have recently restored high -level dialogue. Wang Yi, director of the China Foreign Affairs Office, and US National Security Consultant, Sarawon, talked about eight hours in Vienna for two days. When the Minister of Commerce Wang Wentao participated in the Asia -Pacific Economic Cooperation Organization (APEC) Minister of Economic and Trade, he held talks with US Secretary of Commerce Raymondo and trade representative Dai Qi. Xie Feng, the ambassador to the United States in the near future, has been in Washington to take office, and meet with the Deputy Secretary of State of the State Council and the Deputy Minister of Finance. In May, the director of the Central Intelligence Agency (CIA) secretly visited China in May. The latest news is that the Secretary of State Kangda, the assistant Secretary of State of East Asian affairs in the US State Department, and the Director of the China Center of the White House National Security Council, Bilan, visiting China.

After the "anti -repair" movement in Hong Kong in 2019, a large number of young people were arrested and imprisoned for related protests. According to the statistics of the Hong Kong Police Office, 10,279 people were arrested during the demonstration during the demonstration from June 9, 2019 to December 31, 2022, and 4,010 students were arrested and 1,754 were under 18 years old.

Many arrested people need to make adaptation in their long judicial procedures and time in prison, including career, academic, interpersonal relationships, and social atmosphere. In order to understand how the arrested

people continue to live after 2019, the BBC Chinese interviewed the two "anti-repair" motion demonstrators from prison, as well as supporting networks of people in prison for social movement cases.

Since the Ukraine War, Ukraine has acknowledged that Ukraine could not join

the new international alliance before the end of the war. But from last year, from the perspective of far away to now, the United States' attitude towards Ukraine's joining NATO has changed rapidly. Ukraine's joining NATO seems to be a difference: everything has everything, only the east wind is owed (the end of the war). What if the Ukrainian counterattack failed? Is it expected whether NATO will absorb Ukraine and deal with Putin together. Although this sounds incredible, NATO's bottom line of Ukraine has retreated again and again, flexible as if there is no bottom line.

From July 11th to 12th, NATO will hold a peak meeting in Vernis, the capital of Lithuania. Ukraine will join NATO's routes in the key content. The most hesitant country today is the United States and Germany. In addition to Britain, the most resolute one is the Nine Kingdoms of the Balterst (Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania and Slovakia, all of which belong to the former Soviet Union). These countries issued a joint statement saying: "We expect to raise the political relationship with Ukraine to a new level in Vilnius, and start a new political track. Once the conditions are allowed, Ukraine will be assisted in the NATO organization."

The Hong Kong government announced the revision of the "Real Delivery Central" demonstration waves that swept the entire Hong Kong in 2019, and officially characterized it as the "color revolution" and the iron fist suppression. In 2020, Beijing bypassed the Hong Kong Legislative Council's promulgation of the "Hong Kong National Security Law", marking Hong Kong's "secondary return". BBC Chinese interviews, media, media, civil servants and other frontline personnel, they all said that they felt tremendous changes, and said that the official was culturally transforming Hong Kong from culturally.

"Now teaching can not speak China and the mainland. I want to talk about the country. I was not used to it at first, but now I have changed my mouth automatically." Teacher Eu (pseudonym) taught in a middle school in Jiulong said to BBC Chinese. "The Education Bureau will be randomly learned, and you will be considered unprofessional to catch you wrong."

A large number of teachers were "ash" (reporting) during the "Removal Division" campaign in 2019, and "White Terror" continued to this day. She said that she is still very careful now, especially her teaching is regarded as

"high -risk subjects" "citizens and society" Development Division (referred to as communes).

The discipline was formerly known as the "General Education Department". The course was open. It aims to cultivate students to care about social affairs and multi -angle thinking. In 2020, the government announced the reform course and became dominated by national conditions. At the same time, according to the "Hong Kong National Security Law" requirements, "national security education" was implemented in primary and secondary schools.

Teacher Ou is currently taking into account the relevant coordination of the school. She said that before the Education Bureau went to the school last year, she summoned Chinese and historical teachers to review the collections of the library in the school and removed the seemingly sensitive books.

"We even took away the books that Professor Lu Dile talked about Hong Kong culture and were not politicized at all. He thought that everything was lost, but they (the Education Bureau) still found the so -called banned book, which was some English books about Chinese history. Of course, they did not explain to it. The reason, but everyone guess it was because of the "six four "" in it. "

After the "anti -repair" movement in Hong Kong in 2019, a large number of young people were arrested and imprisoned for related protests. BBC interviewed the "anti -repair" motion demonstrators from prison, as well as supporting networks for helping people into prison for social movement cases.

In May of this year, the Hong Kong Public Library took more than 200 sensitive books under the name of "Clean up illegal or National Security". Most of them were the works of democratic people, which caused social uproar. But in fact, this political review has long penetrated the campus of primary and secondary schools.

"The British Literature Division of our school has used George Orwell's "Animal Farm" for many years. The teacher (pseudonym) said.

She was also arranged to be responsible for the national security education in the school after 2019. She said that colleagues were uneasy to face the fuzzy standards. "The bureau has never announced a list of banned books, nor

does it stipulate what cannot be said. It will only give some course goals and guidelines. You can guess what you can't say."

She said that according to the hand -arranged by the school, teachers in other disciplines must also teach the science of junior high school. The authorities have threatened to significantly modify the relevant courses. "We have adopted the most conservative approach. The "Hong Kong National Security Law" came into effect on June 30, 2020. Since then, the Hong Kong government will launch the "National National Security Day" event on April 15 each year.

According to the Hong Kong Police Department, from June 9, 2019 to December 31, 2022, the police arrested 10,279 people during the demonstration, of which 4010 were students. After the "National Security Law" came into effect on June 30, 2020, more than 250 people have been arrested by the law, and their age is 15 to 90 years old.

Zhong Jianhua, a Hong Kong social policy and public administrative scholar who has moved to the United Kingdom, analyzed the BBC Chinese analysis that Hong Kong has entered the era of authoritarian, and authoritarian governance is based on power, not tangible provisions and laws.

"In fact, there is no standard. It depends on the governance team at the time. The National Security Law is the best example. Mainland China is a long - term use of this method. When some people cannot know the objective standards, they can only guess by themselves, and he also wants you to guess, and you naturally dare not touch the sensitive things. This is a typical authoritarian political characteristics. ""Excluding sensitive police rights, I

taught Hong Kong's multiculturalism and race in the other section, quoting the Basic Law that everyone has equal rights, including religious freedom and freedom of speech. At this time Is there a freedom of speech in Hong Kong? Other students are anxious to stop. "

Hong Kong protests the four -year year: "Removal China" movement back and end to the end

Teacher Xu admits that students are affected by the major environment of the society, and the self -examination from the bottom up is very serious. "In 2019, we can also discuss the benefits and disadvantages of demonstrations in the classroom. It is very rational. After three years, even if I want to discuss students, I don't want to participate. The academic atmosphere is very poor. Everyone will not express themselves freely. "

Chen Jialuo, a professor at the Department of Political and International Relations of the Hong Kong Baptist University, pointed out to BBC that officials have continued to suppress and arrest in the past three years to create ripple effects. "Everything is national security. The atmosphere of this infinite outline and no far -end hats has made the public make adjustments, and everything avoids everything."

He said that the people of Nazi Germany and the Soviet Union in history have also experienced this life model. After the "Prague Spring" failure in 1968, Czechoslovak Fall. (Normalization) plans to launch political cleaning and high -pressure governance, detain different segastes, and monitor the people with secret police.

The late Czech President Harvel (Václav HAVEL) described it as a "post-totalitarianism" at the time. Everyone had a red line in their hearts, rooted and internalized political authority. Essence Chen Jialuo said: "The same is true in Hong Kong today. There is no need to take the official shot at all.

This social atmosphere made the "Hong Kong Drifting" reporter Andy (Andy) feel that he had known each other. He said that the "Hong Kong Drifting" friends around him were all liberals and occasionally discussed the current politics, but everyone was alert. "Always talk about half of it, someone panickedly, whether the phone will be recorded, will it be reported, everyone has left China, but it is still in a state of fear. It used to be like this with mainlanders. Now The same is true for friends in Hong Kong. They will say, don't talk about it anymore, be careful of being caught by Guoan. "

Andy moved to Hong Kong in 2018 and joined the English media. In 2019, he interviewed the "Counterfeit Middle" movement at the front line and experienced the great changes in the press in recent years.

He said that at the beginning of the exercise, the police pulled up the "Orange Belt" blockade to prevent the reporters from shooting. "I arrived first, and I wanted to turn around when I saw the orange belt. Then a large group of Hong Kong reporters arrived. They saw that all the orange belts were scolded together and scolded the police to hinder the freedom of the press. . At that moment, I woke up. It turned out that I had a problem. I used to be detained and questioned in the mainland. I was very afraid of the police. The instinctual response was to run away. Dogs, but Hong Kong reporters know their rights very well. "

However, the police expanded during the "counter -delivery" movement. A few months later, he encountered similar incidents in an interview. By July 1, 2020, the "National Security Law" took effect the next day, a citizen went to the streets to protest. The reporter at the scene even saw the police's defense line actively avoided it. This change made him sigh. "I came to work in Hong Kong in freedom of news. How do I know that in just a few months,

Hong Kong reporters have become the same as that of my mainland reporters. The whole environment has changed."

After 2019, the role of the media as the fourth power and the public supervision agency (Publicwatchdog) has weakened significantly. The charged, according to the annual press freedom index of no borders, the 73rd in 2019, the 73rd in 2019 to the 140th in 2023.

In addition to tangible suppression, there are also intangible transformations. Hong Kong Radio, Wired News, and NOW News successively have a large earthquake in personnel. Government officers and pro -Chinese people who have no broadcasting experience in airborne are high -rise, and they have made controversy in the handling of many news.

MAPLE (pseudonym), a senior reporter who worked on the TV station, described the current "standing is heavy, professional as the deputy", and the inferior coins expelled good coins. With the interview director and senior colleagues of the "veteran opening veterans", she also had a year ago. Saying. "Previous Taib (TVB) news was accused of very 'river crab' ("harmonious" homophonic), and also experienced this kind of personnel change, but that's the process of ten years. Now we are completed within two years. The emergency and huge, we have worked hard for many years, and the credibility of many years is gone. "

The professional level of the media has declined, and the objective effect is the increase in official discourse. MAPLE said that the news editor room has a relatively lighter journalist. They lack practical experience, and their superiors cannot provide help. "So you will see many sections of the follow - up officials. No reporters are questioned and questioned. Speaking of the law, this allows the official to monopolize the entire discussion. "British MPs reprimand the government waiting for Li Zhiying's foreign minister to pay attention to contact with China Hong Kong "Apple Daily" stopped: What does this mean? After 2019, the authorities reforming the election system at all levels of Hong Kong have been greatly reduced to reduce democratic composition and direct election seats.

After 2019, the outbreak of immigration broke out in Hong Kong, which applied for a BNO visa -that is, the British national (overseas) visa -150,000 people who moved to the UK. A survey of the Hong Kong General Chamber of Commerce in April this year showed that 74% of the company faced the problem of talent shortage, and 70% of the employees resigned were due to immigration.

However, while the people voted with their feet, the official promoted the "National Security Law" to "chaos anyway" in Hong Kong. The new stage of Xing "" . The SAR Government has also launched a series of activities such as "Hello Hong Kong" and "Happy Hong Kong" to actively "tell the story of Hong Kong."

Scholar, who has moved to Britain, said that these political slogans are like Owaer's "NewSpeak" in the political fable novel "1984". rule. "This is a textual wand used by the authoritarian government. The so -called" Patriot Governing Hong Kong ', and the "Patriot" is defined by him. Packing the front and beautiful words, thereby changing everyone's cognition. "

He said that this set of language techniques was very successful in mainland China. People have been immersed and polluted for a long time, and they will slowly be led by this set of logic. "This is why the" little pink "phenomenon appears. Hong Kong people have experienced the stage of civilization. In addition, there are still freedom of network freedom, and the resistance of resistance will be higher than that of the Chinese people. This is worth worrying about. "

He continued that the official was using language to control narratives to set the tone of political events. "If you set the tone, you can't discuss it again. The source of the 'counter -delivery' movement is that Hong Kong citizens are worried that the amendment to the" Fugm Regulations "violates the guarantee of the rule of law, but officials cannot use the dialectical process to persuade you, and use the language of the struggle to label you. 'Color Revolution', talk about the slogan of some conclusive, and put the nature of the whole thing into his frame, there is no need to debate. "

In August 2019, officials from the Hong Kong and Macao Office of the State Council of China publicly stated that the anti -repair example demonstration was the "color revolution", and then the official repeatedly referred to as

"black storms" and "foreign forces". In April 2023, Xia Paolong, director of the Hong Kong and Macao Office, also said that although the Hong Kong version of the "Color Revolution" was not successful, this is a scar that can never be wiped in Hong Kong history, as if hanging on his head on his head. The alarm bells must always be alert to street violence, "soft confrontation" secretly chaos and overseas Hong Kong activities.

Subsequently, Hong Kong Government officials followed Xia Baolong's argument. In the recent organ donation disputes, the Chief Executive Li Jiachao emphasized that he should be alert to the risk of Guoan and be careful to prevent "soft confrontation". The Hong Kong police arrested four people who suspected of stealing other people's information and used them to try to cancel the registration of organ donation. The Hong Kong version of the color revolution is similar to provoking contradictions through various reasons to create destruction of inconsistent reality."

Scholar Chen Jialuo said: "Any people's livelihood incident can be promoted to the level of 'Color Revolution'. If you have a little dissatisfaction, he will help you think about it, it is called 'soft confrontation'."

The SAR Government has launched plans such as "Hello Hong Kong" and "Happy Hong Kong"

For this new political context, civil servants must also re -adapt. Jing En (pseudonym) in the middle level in the Hong Kong government's trading department revealed to BBC that some used words have become sensitive. For example, the "independent customs zone" must be changed to "separate customs zone", and "refueling" cannot appear in government slogans and "Copywriting, so as not to make people think of the demonstration slogan "Hong Kong people".

She also said that in recent years, almost every document has been changed to its all -recognition. The upper -level officials will join the political terms and slogans of mainland China and put the Hong Kong policy under the framework of the national policy. "'Fourteenth Five -Year Plan', 'Guangdong -

Hong Kong -Macao Greater Bay Area', 'Belt and Road", now all documents must be added to these words, politics is correct. Related projects can be very good. "

She also noticed that the domestic officials began to penetrate the civil servant system. "I opened the email that day, and our emails were written in English, but the attachments actually wrote what 'boss difficulties'. At first glance, it was not a word used by Hong Kong people. Everyone saw it."

"Double -sided person" under normalization

After the 2019 "Counterfeit Central" campaign, the authorities asked civil servants to swear to support the Basic Law and loyal to the Hong Kong Special Administrative Region, and even deleted "political neutrality" in the Civil Servant Code. Civil servants were also required to complete more "political tasks". In December 2022, the former Chinese President Jiang Zemin died, and the Hong Kong government rarely asked all civil servants to watch the memorial service and silent for three minutes.

Jing En recalled that at that time, each department was empty, and all colleagues had to let go of their jobs and mourn. Unless they asked for leave that day to "spare". "Many more than there is KPI (key performance indicators) above. Each department must take pictures and upload it to Facebook pages to make work. There are more and more things that make everyone anti -white, but there is no way, you dare not dare to dare If you don't do it, everyone is helpless. "

Under the National Security Law, the education community also has more "facade kung fu" to do. The authorities stipulate that primary and secondary schools must hold a flag -raising ceremony every week and participate in the mainland inspection team. Teacher Ou, who taught the social science science, said: "Knowing that it is a political task, but I will take students to the Mainland to inspect and want them to learn things. After all, it is not a bad thing to know the national conditions. It is spent in 7 hours in 11 hours, and there is no educational significance for the poor schedule, just to do it. "

Authorities also stipulate that each subject must have elements to maintain national security, and even surgery is no exception. "Our sports teacher thought for a long time before thinking about how to add some national security elements. For example, when explaining the ball, as the citizens need to abide by the law, players must follow the ball. In fact, it is very ridiculous."

Professor Chen Jialuo said that after 2019, Hong Kong's "secondary return", the new style in the new era and new normal is mimicking. "Everyone has to make great work, red, fighting left, and rotten. Of course, we are very embarrassed, but those who are power are very happy. This is part of the means of maintaining stability. Climbing must show loyalty."

He quoted former Czech President Harville's "The Power of thePower" in his masterpiece "The Power of thePowerless". Get up!"Poster, this slogan is not his true thoughts, he just obeys the power to avoid trouble.

"Hong Kong has also formed a different culture in the table, which is getting closer to mainland China. The regime does not care if you are sincere, but only care about whether you are obedient and cooperative. When the exterior walls of the building and the newspapers are all overwhelming expressions, come to him It's as if there is a cheerleading team, which proves how popular you are. Compared to the police and shots, this is the low -cost maintenance method."

The 25th anniversary of the transfer of sovereignty in Hong Kong: From the figure, Hong Kong has changed in recent years Xi Jinping described "one country, two systems" is a good system, and there is no reason to change Many details of the "Outside of the Domain for the National Security Law of the Hong Kong National Security Law" in Japan Whether the Hong Kong people are trapped in the law and the "second immigration wave" of the Guoan dilemma has come one after another Why does the BBC Chinese website say that Hong Kong and Macao "transfer"?

The person staying "How good is"?

Political scholars have pointed out that in the current system and political atmosphere, how much the former value can be preserved in Hong Kong will depend on the people's cooperation.

Scholar Zhong Jianhua quoted Harveil's claim that in the post -ending era, "Living Intruth", "Hong Kong has no room for space, and now rely on overseas Hong Kong people to continue to speak and tell the truth."

Professor Chen Jialuo believes that it is also a persistence without leaving his position. "The key is how good the people staying, how serious they are."

Middle school teacher Ou said that she should "do less" as possible in the patriotic activities in the school stipulated by the authorities. For example, the weekly flag -raising ceremony should have a "state of the country", and she

did not fully implement it. "I have many relatives and friends in the mainland, and some are teachers. They say that schools in the mainland will not say this every week " national party '. The mainlanders are very smart. Hong Kong is too crazy, too brain, and too stupid. "

Teacher Xu also pointed out that the current teacher's social sciences are light and lightly described on the issue of "violating conscience". "You forced me to talk about the" Color Revolution "in 2019. I really can't tell, so let the students go back to take a note of their own notes. Anyway, this family has been castrated. Why should I be so seriously helping the official 'political propaganda'? Or explain the 'to improve the election system' and 'patriotic governance Hong Kong', and say it as a half joke -if it is used to look at it from a humorous perspective, Hong Kong is very funny now. She said that because the trials of the commune department were changed to only two levels of "reaching standards" and "not reaching standards", it was very difficult to meet the standards. The attitude of students in class became perfunctory. "They either do not cooperate, noise rebellion, or they just ignore you and do other subjects. Hong Kong's education system is very utilitarian. The atmosphere of indifference and cynicism is very strong. In the future, a group of smart but no moral elite will be raised in the future. "Mid -level civil servant Jing En said that people who are willing to express their loyalty after 2019 are quickly on the top, but not all civil servants must compete for the superiors, and more people are safe and silent.

"It can be understood that the people above should be charming, but we will not obey blindly. The suggestions for handing over will still be written according to professional judgment. If you really want to add political slogans, use a compromise method, add it in an inconspicuous place, and find it. Find it. Numbers (requiring requirements). China Export unexpectedly falling trade structure in May

June 9, 2023

Image source, getty images

On June 7, the data released by the General Administration of Customs showed that in the US dollar, China exported 283.5 billion US dollars in May, a year -on -year decrease of 7.5%; imports were US \$ 217.69 billion, a year -on -year decrease of 4.5%. The total imports and exports were US \$ 50119 billion, a year -on -year decrease of 6.2%.

Compared with the previous months, the data in May is a bit ugly. Beginning in October last year, China's export volume continued to decline. After the release of the epidemic and the Spring Festival, exports began to increase, exports increased by 14.8%year-on-year, and exports increased by 8.5%year-on-year. %.

A report issued by a credit rating agency "Oriental Jincheng" in China believes that the high increase in March was mainly due to centralized production. In April, due to the low base effect brought by the peak of the epidemic in April, the short -term factors in May faded, plus overseas overseas, plus overseas overseas The impact of the decline in demand showed that the other side evidence was the new export order index in the PMI (purchasing manager index) in April and May in April and May continued to be in the contraction range.

In other words, the export volume in March was due to the previous months of backlog order, which was delivered after the Spring Festival; the exports in April were relatively high because the city was closed in Shanghai last April, which caused the export volume last April to be extremely low, which caused this year to 4 this year. The increase of the month seems very high.

The data in May is ugly, and it also has the effect of a certain "high base effect". In April last year, the outbreak of the Shanghai outbreak broke out. The exit of the month rose 14%.

It is worth noting that according to the RMB pricing and the decline in the US dollar, the decrease of 7.5% at the US dollar is 7.5%, and the decrease is 0.8% at a price of RMB, mainly due to the sharp depreciation of the recent RMB against the US dollar.

The Vladivostok is near the junction of Russia, Central, and DPRK. It is facing the sea three, and it is the largest port on the Pacific coast. Since 2022, with the significant increase in trade in China and Russia, the transportation capacity of container ships from the port from the southeast coast from the port from the port from the southeast coast to the Vladivostok port, and the

capacity of the ship's return is increasing. Indirectly stimulates the attraction of rotation through the port.

Vladivostok transformed into a China Internal Trade Port? The reality and history of the interaction between China and Russia and the Far East
Chinese farmers take over the Far East? When a large number of new residents surge on the land From the perspective of China's export destination, the share of China's main trading partners is quietly changing - Japan, the United States and other export destinations that have occupied the main positions all year round, and the share is declining; the proportion of Russia and ASEAN is rising rapidly.

According to the RMB, the import and export of China fell by 5.5%year -on -year in the past May, an increase of 3.6%to the European Union, and a 3.5%decrease in Japan.

At the same time, the import and export of China's imports and exports to Southeast Asian Alliance countries in the past May increased by 9.9%, and Russia increased by 51.9%.

ASEAN also surpassed the European Union and became China's largest trading partner, and the European Union, the United States, and Japan ranked second, third, and fourth.

Except for Russia, China 's exports to major trading partners in May have declined sharply.

The growth of ASEAN trade is mainly because after the "Regional Comprehensive Economic Partnership Agreement" (RCEP) in the beginning of last year, it has promoted a significant role in promoting the relationship between China and ASEAN trade.

The growth of Russia's trade was that after the outbreak of the Russian and Ukraine War in February last year, European and American economic sanctions on Russia gradually increased. Russia could not even use the international fund liquidation system (SWIFT) settlement, which caused Russia to increase trade in China.

The Federal Reserve 's tenth consecutive interest rate hikes are expected to be approaching the end of this round of interest rate hikes * How to sweep the "inflation monsters" under the epidemic As well as

The main trading country to take care of China is not good. In May, South Korea's exports growth rate was -15.2%year-on-year, and it continued to decline by 0.9 percentage points on the basis of April. In May, Vietnam's exports fell 5.9%year -on -year, and it has declined for four consecutive months.

Reuters quoted analysts saying that in the past 12-18 months, the sharp tightening of global monetary policy, as well as recent pressure on the Western banking industry, has brought anxiety to the road of recovery in China and the world.

In May, the Federal Reserve raised interest rates for the tenth consecutive time. After the interest rate hike, the Federal Fund interest rate increased to 5.00%-5.25%, which was a new high since 2007.

After the interest rate hike in May, the Fed Chairman Powell said that the interest rate cut is not suitable now. He believes that inflation will decline, but the speed will not be fast, and it takes time to decline.

"If this prediction is generally correct, then the interest rate cut is inappropriate, and we will not cut interest rates." He further stated that if the demand is weakened further, there are more signs of softening in the labor market, so we may consider the interest rate cut.

The purpose of the Federal Reserve 's interest rate hike is to curb inflation, but after continuous interest rate hikes, it must be maintained at a high level, making the cost of borrowing enterprises and individuals higher, suppressing the needs of major global markets.

Foreign trade data also shows that foreign -funded enterprises are not good in China. In the first five months, foreign -invested enterprises imported and exported 5.1 trillion yuan, a decrease of 7.6%. In contrast , Increased by 13.1%, the import and export of state -owned enterprises was 2.76 trillion yuan, an increase of 4.7%.

Other data also confirms the predicament of foreign capital in China. According to data from the Chinese Bureau of Statistics, the total profit of foreign companies, Hong Kong, Macao and Taiwan business-investment enterprises in China in January to February reached 35.7%.

Traveling to Turkey for the second time was three months after the country occurred in the country. One evening in May, the plane landed on Izmir, the coast of the Aegean Sea. This is the third largest city in Turkey and the western town. Because the location is far from the earthquake in the east, it is not affected by the strong earthquake. Before going, although Turkey will hold a general election a week later, it still underestimates the popularity of the wave of elections.

At that time, President Recep Tayyip Erdogan faced a powerful challenge from the opposition. From Izmir Airport to the hotel, I saw the big and small election billboards -buildings and roadside, everybody, everywhere. In terms of quantity, Erdogan and the opposition basically divided into autumn. Put down the luggage at the hotel and go to the nearby seaside Avenue to find a restaurant, and see the three or five locals holding the brand of supporting Erdogan to leave, and realized that this was just participating in the Erdogan election rally. The US Vocational Basketball NBA Denver Gold Block led Miami Heat 2 to 1 before the championship, and today played the fourth game of the series in the away series.

In the first quarter of the two teams, the scoring of the first quarter was not high. The block is going back to lead, but Jimmy Butler soared to score a whistle three -pointer to help the Heat at 21-2 to lead.

Section 2 is still stuck, and the two teams are only 9 points. The Heat rely on Lauri to score and Bam Adebayo. Cut into 15 points, Jakich also scored 10 points to join forces, and the midfield was 55 to 51.

After the start of the second half, Jamal Murray cut into it empty -handed and won the Gordon with one arrow. Put the two -pointer golden blocks to pull the lead to double digits. Although the Heat leaned on two three -pointers to 6 points, the gold block Gordon first scored the first time, and then cut into the three -pointer ball in the first time. General 86 to 73 gold blocks expanded to 13 points first.

Section 4 After completing a "3 -point hit" in the Bartler, 8-0 start to reduce the backward to 5 points. Then pull the lead to double digits.

Although the Heat has scored a goal at Duncanrobinson and reduced the gap to single digits, Brown jumped out of the distance and scored 8 points, and the gold block expanded the lead to 17 -point fixed fixed game, and finally won the 13 -point difference. Essence

This year is the first time that the Golden Block team has reached the NBA championship. Today, after winning the series, the series will listen to the card 3-1. Next, it will return to the 5th game of the game on the 13th of Taiwan time.

The Golden Bag Gordon includes 3 of 4 shots of 3 -pointers, and she hit 11 goals in 15 times, scored a maximum of 27 points in the field, Jakich 23 points, 12 rebounds double ten performances, Mori scored 15 Send 12 assists. Brown contributed 21 points from the bench.

In the third game of the golden block, 58 to 33, scored 60 to 34 in the restricted area, and won the Heat. Although the whole three -pointer was 8 shots on the day, there was no harm to the elegant. Two more, but the gold block rely on the three -pointer rain in 28 shots, and the heating of only 8 of 25 shots in the three -pointer was scheduled.

The 6 people scored two digits of the Heat, and Batler scored a maximum of 25 points in the team, and Adeba was about 20 points and 11 rebounds.

When Pei Zhuo explained the search and rescue operation in the capital Bogo University, "Today is a miracle day. Although these children are weak, they are lucky to survive, let the doctor evaluate first."

Pei Zhuo posted a photo earlier in Twitter, showing that there were several adults. Some of them were wearing military uniforms and sitting on a waterproof cloth in the jungle to take care of the young children. A rescuer was feeding the bottle at the mouth of the youngest child in his arms.

Pei Zhuo also tweeted, "The country is jubilant! 4 children disappear in the jungle in Colombia 40 days ago, and now they are found to survive."

The film released by the Columbia Ministry of Defense on the evening of the 9th shows that the rescued children were hung on the helicopter hovering on the top of the treetops at night.

The four rescued Huitoto tribe children were 13 years old, 9 years old, 4, and 1 year old. After the CESSNA206 (CESSNA206) single engine's small aircraft was crashing on May 1st, they wandered in the jungle.

At that time, the driver was notified to the Tower, and the engine had a problem after taking off for more than 10 minutes. The small aircraft took off from the jungle area named Araracuara, southeast Colombia, and flew 350 kilometers to Sanjose Del Guaviare on the Levia River.

The search and rescue personnel found 3 remains at the crash site at the time, and confirmed that they were pilots, children, and a local aboriginal leader. At that time, the plane was almost vertically inverted on the tree.

Officials said that the group was a threat to escape the members of the militia.

Trump, 76, is currently leading the Republican 2024 presidential candidate. According to the prosecution on page 49, he took away hundreds of government secret documents when he stepped down and packed in a carton and brought back his sea lake club in Florida.

The indictment mentioned that these documents include the records of the Ministry of National Defense, the Central Intelligence Agency, and the National Security Bureau. Trump retains these archives at the Haihu Club,

does not add appropriate security measures, and often organizes large -scale social activities.

Trump presented confidential documents about the US military operations and plans at least twice to those who did not obtain a license, with the location at the Golf Course in Bedminster, New Jersey.

Trump faces 37 different crimes, of which 31 are deliberately retaining national defense information related to specific documents. If each charges are convicted, they can be sentenced to 10 years in prison.

The 29 -year -old Faith Kipyegon defeated the gold medal at Diamond League in Paris, Diamond League.

Kipiegon surpassed Gidi about 700 meters before the end, and finally pressed the line with 14 minutes and 5 seconds. When Kipiegan saw her achievements, she couldn't believe her face with her hands, and then fell happily to the ground, and got Gidi's hug.

Kipiegan, who has won 1,500 meters, won two Olympic gold medals and won the gold in the World Championships. He never thought that he could break the world record in 5,000 meters.

Kipiegan said, "I don't know how I did it. I just try to keep it relaxed and enjoy the game. I just participated in the game and then everything followed. When I found a world record, I was really surprised. "

The world record before this was 14 minutes, 6 seconds 62 created in Valencia on October 7, 2020 in Valencia.

Kipiegan, who has raised a woman, said: "I just do my best, I just want to improve my best results, and rewrite the world records in the plan. I just chase Jidi running. She is a great woman. It's great. "

"I don't know what will happen next, I have to talk to the coach and others first. I am very happy and very excited now. I don't know what to say. If my health is healthy, everything is possible."

Kipiegong and Gidi stood out from the group after running 3,000 meters. Gidi hoped to refresh the world record that he maintained and sprinted forward in the last straight road, but he couldn't catch up with Kipiegong after all.

This is a magical week to become the first Kenya Kipiegon, which has created a 5,000 -meter world record.

Kipiegan broke the 3 minutes 50 seconds 07 women's 1500 -meter World Records of 3 minutes, 50 seconds 07.

Former American President Trump(news agency)On June 9, local time, documents disclosed by the US Federal Court showed that former US

President Donald Trump faced 37 criminal charges, including incorrectly saving confidential documents after leaving the White House in 2021, and conspiracy to hinder judicial justice. Essence

On the day when the US Department of Justice announced the indictment, Trump resigned in the case of two lawyers in the case, and another former assistant was also sued.

These allegations originated from Trump's sensitive government materials that he carried with him when he left the White House in January 2021.

Trump will be in court for the first time in Miami next Tuesday, and this will be the day before his 77th birthday.

On the other hand, the current president of the United States, Joe Biden, denied that he had talked with Trump's indictment with Trump's indictment with the Minister of Justice, and said that he had no intention of doing this. Essence

Trump's lawyer

On June 9, local time, US media reported that just a few days before Trump will appear in the Miami Federal Court next Tuesday, some lawyers submitted resignation.

On the other hand, Trump posted on his social platform "Truth Social" that he had assigned a new legal team to defend him.

Trump has said that under the framework of the relevant authorities investigating the secret document in the White House archives after leaving office, the indictment he received asked him to go to the federal court in Miami for court next Tuesday.

According to US media reports, after listening to the witness testimony of the case, the Grand Jury proposed 7 allegations to Trump, including: conspiracy, detain confidential documents, obstructing judicial justice and violation of the spy law.

This will be the first time in the history of American history to be tried in court.

recording

At the same time, the United States CNN (CNN) revealed that it had received a recording of former President Trump, and in this recording, Trump admitted that he had detained the "confidential" military information that has not yet been decrypted.

The media said that the recording could be traced back to a meeting held in 2021. Trump said in it that he could have decrypting this information during the presidential period, but he is no longer likely to do so.

The media pointed out that in this conference recording, Trump is discussing a secret document about attacking Iran.

In a video played on Trump's social platform "TruthSocial", he accused the current president of Biden's government as a hit target because "he was leading in the results of the presidential polls."

Trump said in this recording, "Our country is moving towards hell. After my term of office, they use the Ministry of Justice and the Federal Investigation Bureau as a weapon. We cannot allow this situation to continue because our country is falling apart from analysis. We are facing huge problems, and my case is not one of them."

He also emphasized that he will once again prove his innocence and add that the United States is currently in a state of decline.

The steps expected

According to US media reports, after the release of Trump's prosecution, it is expected that the US Special Service will hold a meeting with the former president's staff and the special service officer assigned to him on the 9th.

Prior to the hearings scheduled to be held next Tuesday, the US Special Service will evaluate any potential threats in the Federal Court of Miami and its surrounding areas, and will formulate a security plan with court officials.

According to legal experts, Trump is unlikely to wear handcuffs or be taken, but he will be collected.

After the arrest document is issued, he will be regarded as a state of being arrested and detained, and after handling these documents, the court will start his trial and listen to allegations against him.

Ukraine (left), Russia (right), middle from top to bottom: Lugusk, Donetsk, Helson, Crimea Peninsula, Black Sea(Peninsula TV Station)The Ukrainian army said that its soldiers had regained some of the locations of the eastern front of the country. At the same time, Russian President Putin acknowledged

that Moscow has no enough modern weapons now, and Ukraine President Zelei said that his soldiers "beaten these days these days "Hardly".

The Ukrainian army announced some photos, claiming that this was an offensive operation against the Russian army, and emphasized that its army has caused losses to the Russian army in the Bachurut region.

A reporter from the Peninsula reported that Gorlovka, northern Donetsk, was being fiercely shot by the Ukrainian army.

In addition, the Battle Command of Southern Ukraine also stated that its air defense forces are responding to the flight targets of Adessa and Nicholaev.

At the same time, the Ukrainian parliament members Oleksen Gongcangko announced that at least two were killed in the attack of the drone in the southern part of the country.

A reporter on Peninsula reported the attack and explosion of the drone on the city. The local air defense system also responded to these attacks.

Earlier, Southern Ukraine's Battle Command said that the Russian army launched drones equipped with explosive devices to the region, and the air defense system intercepted these drones, causing some fragments to fall on some residential buildings. The activist released a photo of a residential building in the city.

Hard battle

As the war in southern Ukraine intensified, and reports that Ukraine might have started to launch his long -standing counterattack, Zelezki said in his daily briefing that his soldiers were recently fighting "particularly difficult battles."

From top to bottom: Carhofka Dam, Holson(Peninsula TV Station)Ukraine said that its troops were ready to launch a counterattack to regain the loss of land in the east and south, but it also made it clear that it would not officially announce the time to launch a counterattack.

On the evening of the 9th, Zerrenzki did not mention the counterattack in his speech, and did not even mention any specific military operations.

He said, "We focus on all places that need to act, and where we can defeat the enemy."

Earlier on the 9th, Russian President Putin said that Ukraine had prepared for several months of counterattacks, but the Ukrainian army failed to "achieve their goals."

Russian public television reporters played a video on the social platform Telegram. Putin said, "We can definitely confirm that the counterattack has begun, and the Ukrainian army has not achieved their goals on any battlefield, but they still have offense offensives. ability."

In this regard, Putin said that the Russian military leadership objectively evaluated the current situation, and the current loss ratio of Ukraine and Russia is "3 to 1".

Russian President Putin made it clear that Russia does not have enough modern weapons, but its military industry is developing and will complete all tasks given to it.

On the other hand, Ukraine stated that it has not yet started to fight back to recover territories occupied by Russia, and also emphasized that the beginning of the attack will be seen by everyone.

Ukraine's National Security and National Defense Commission Secretary Oleksen Danilov denied that Russian officials said that the counterattack had begun.

Danilov said in an interview with Reuters, "All of this is not true." "The beginning of this matter will be determined by our army. When we launch a counterattack, everyone will know this, and we will watch it and watch it. At this point."

He also added that when Russian officials believed that Ukraine's advancement in certain areas of the front line was the beginning of their main action, they thought of wrong.

Iran's drone

On the other hand, John Cerby, a communication coordinator of the National Security Council, said that Russia used Iranian drones to attack Ukraine capital Kiev and pointed out that the military partnership between Moscow and Tehran seemed to be strengthening.

The US official added in a statement that just last month, Russia also received hundreds of "suicide" drones and equipment from Iran to use the battlefield for Ukraine.

He also emphasized that Moscow is obtaining raw materials from Tehran to build unmanned machinery factories in his territory and may be put into use within one year. Cerbine said Russia provided Iran with unprecedented defense cooperation, including missiles, electronics and air defense.

On the other hand, the Chief of Staff of the Russian Armed Forces Valer Grassimov emphasized that coordination with China on the international stage reflects the stability of the world situation.

Glacimov emphasized in a video talks with Chinese officials that it is necessary to adhere to the joint combat exercise as an important means in the framework of China -Russia military cooperation.

Ukraine requires investigation "race extinction case"

On the other hand, the International Court announced on the 9th that it has accepted the request of 32 member states of the United Nations to participate in the investigation of the so -called "racial extinction case" raised by Russia in Ukraine.

As a major UN judicial institution, the International Court pointed out in a statement that it has decided to accept the application for participation from 32 member states, which involves racial extinction based on the Convention on Prevention and Punishment of Extraordinary Raste.

The statement pointed out that in addition to EU member states, the participation applications from the United Kingdom, Canada, and New Zealand have also been accepted.

The court requested that it participated in the country (the statement did not mention all the countries that submitted applications) submitted written opinions before July 5 this year.

On February 26 this year, Ukraine filed a lawsuit on Russia on the interpretation, application and execution of the "Convention on Extraordinary Sin".

On March 18, 2022, Russia rejected the order issued by the International Court to stop military operations in Ukraine immediately.

Description: The new strategy of the German federal government has been brewing for a long time, and one major reason is that the German national security strategy as its foundation is difficult to produce. There are huge differences in ruling three parties around these two documents. Now, it is reported that at least the national security strategy is expected to be announced on June 14.

On March 18, 2022, the Green Party's German Foreign Minister Berbak officially announced the launch of the national security strategy formulation work

(Voice of Germany) on June 14, but there are still very few precise news about Germany's national security strategy. Comprehensive information on multiple parties, the only information that can be determined now is: the file may have 37 pages long, the parties quarrel around it for several months, and the release date is dragged again and again. If this document can really be officially submitted to the Federal Cabinet Conference on June 14, and the Federal Parliament will be submitted shortly after, it will inevitably shrink significantly compared to the initial.

As early as the fall of 2021, the Social Democratic Party, the Green Party, and the Liberal Democratic Party set a goal when setting up the cabinet: formulate the first national security strategy in Germany's history. At that time, the Russian and Ukraine War had not erupted.

In March 2022, [Russia and Ukraine War](#) Nearly a month after the outbreak, the Green Party's German Foreign Minister Belbak(Annalena Baerbock)Formally announce the launch of the national security strategy formulation work. At that time, the German Prime Minister had proposed the "Times Turning", and domestic and foreign countries were looking forward to Germany to introduce a national security strategy. The Ministry of Foreign Affairs stated that the main purpose of formulating this document is to "protect the freedom of our lives."

Federal parliamentarian Alder retired before the German Major of Germans According to the initial plan, this document should comprehensively explore the foreign and security policy environment under the concept of "overall security". Social Democratic Party member Alt(John)In an interview with the Voice of Germany, "overall security" contains many aspects, and educational policies, health policies, environmental policies, grain policies, and fiscal policies are all included.

Opposition members also support the government to formulate a national security strategy under the concept of "overall security".

Endel(ThomasErndl)To the Voice of Germany, "Considering the hybrid threat, such as the supply chain, economic dependence, and even the dependence of the medical field, we obviously need overall general general considerations and find answers." He praised the federal government to handle the task.

Endel, Vice Chairman of the Federal Parliament

There are differences everywhere

However, Endall also pointed out that the document has delayed the release date many times. He believes that the reason why this document that affects almost all political areas is difficult to produce, "obviously because there are differences in core issues within the government."

Heisen State Peace Research Foundation(HSK)Political scholar Witt(AntoniaWitt)It is believed that the German federal government should not have given you too much time on this document. After all, this is a complex project involving all aspects. It requires extensive communication within the government. "Challenge", "What threats do we face in the future", "What methods Germany want to take", and "what goals should be available for security policies should" and other questions. Witt pointed out that the process of formulating a national security strategy "must cover many political controversial topics, and therefore will inevitably lead to disputes and delay.

Reuters recently disclosed that the main differences between the federal government are the arms export trade and cyber security policy. It is reported that the Ministry of Justice, headed by the Liberal Democratic Party, opposed "violent violence" and believes that it should not use hackers to fight back at the attacker after being hit by hackers.

In addition, whether the "national defense expenditure should exceed 2% of GDP" clauses stipulated in the NATO regulations into the national security strategy, the federal government is also controversial. Witt disclosed to the Voice of Germany, "The key to" this problem lies in whether to introduce strict military expenditures and non-military expenses at the same time. That is, if you invest in a military field, you should also invest a piece in the field of non-military measures. Money. The so-called non-military measures, including crisis diplomatic mediation, foreign development assistance, etc. "

Where will the German policy of China be driving?

Do not set up the National Security Council

The German government has also conceived the establishment of the "National Security Council", but this goal has long been abandoned. Witt believes that the agency can have become cross-department coordination agencies, allowing different government departments to find plans to respond to crisis and challenges. She guessed that the main reason for giving up this goal was: there are a lot of disputes about the "committee should belong to which department should belong to which department". It is reported that the Prime Minister's Palace and the Ministry of Foreign Affairs once started to fight.

The opposition member Endel also criticized the government to abandon the plan to establish the National Security Commission just because of differences. He also believes that the agency can have a cross-department coordination.

The Social Democratic Party member Aldter interpreted from another angle: "We have no strategic cultural traditions in Germany. In the past 70 years, we have always lost strategic issues to NATO. We have some conceptual documents, but have never formed strategies. This is a new cultural change, it takes time. "

The difficult national security strategy has caused direct consequences: based on it, [Germany's new strategy to China can also be released before the German-Chinese government on June 20](#) .

Trump has been sued in the United States 2024 Presidential election to add variables

Description: (Agence France -Presse, Washington, 9th) Former US President Trump was charged with illegal holding of defense confidential documents, and a new turning point with the fighting law of law enforcement agencies. Together with Trump's other investigations, the United States will encounter a situation that has never been before before the 2024 presidential election.

The Republican Party's Trump has announced the 2024 presidential election, and the current momentum is far ahead among many competitors in the party.

Today, the US federal prosecutor sued him nearly 40 criminals because Trump's improper government secretly held the government, which means that Trump is likely to represent the Republican Party on behalf of the Republican Party when he was prosecuted. Essence

Trump has stated that he will not abandon the party's primary election and anti-control "corruption" political opponents in an attempt to interfere with the election.

"Mattshoemaker), a national security analyst, who was an intelligence official, said:" This incident may not affect the voters who have not yet decided to vote, but it will affect Trump, which may be shaken or switched to a candidate who has no burden of candidates. supporter."

In addition to being prosecuted by the federal case due to confidential documents, Trump was also sued in financial fraud by New York State for the sealing fee of porn actors. Fall.

But no one can guarantee that the two cases can end such a fast trial. In addition, Trump is also being investigated by Federal and State -level investigations due to subverting the 2020 presidential election.

In case of Sichuan Pu won the 2024 election, it is possible to destroy all the unfinished federal prosecution procedures through self-pardon. This situation has no previous cases in the United States, and a few can cause constitutional crisis; Essence However, Trump is now worried about the damage caused by these legal issues to the preliminary election of the party.

The federal prosecutor sued Sichuan Pu, and let the Florida governor Ron Desantis and former Vice President Mike Pence, who also fought for the Republican presidential candidate, have the opportunity to criticize Sichuan's unsuitable office, but they The risk of losing Sichuan Pu's loyal supporters.

Trump paid the sealing fee to the porn actor "Stormy Daniels" during the 2016 presidential election. Trust Trump. So many Republican opponents stated that Trump was standing up, and maybe he wanted to wait and see before Trump was completely out.

Trump is currently investigating the Federal Survey of the Capitol Riot on January 6, 2021; the Washington Post also quoted earlier this month that the sources were disclosed that Georgia's suspected intervention of the Trump campaign camp was suspected of intervention in the 2020 election. Expand activities to Washington and other states.

"The opponents hope Trump will eventually go out due to a series of prosecutions, including on January 6 (Congress Building Riot) and attempt to overthrow the election," said the University of Virginia. It is their strategy. Take the initiative to take the initiative? Before they succeed, Trump bit his throat step by step. "

The recent survey of "Yougov" of the International Municipal Corporation found that only half of the interviewees believed that the Trump camp was "serious crime" for the Trump camp for hidden seal expenses. However, two - thirds of the interviewees believed that Trump took away government confidential documents from the White House and obstructed the government's recovery of serious crimes.

Among Republican respondents, 28%of them believed that forging commercial records were serious crimes, and 42%believed that taking away confidential documents was serious crime. This gap shows that due to confidential documents by the federal prosecution, it may become a turning point in the Trump Party's primaries.

Dissent ranks second in polls, but is quite different from Trump. He has always maintained restraint and does not comment on Trump's lawsuit. But for a few weeks, the words of the two -party camp have become more and more intense.

US President Biden said [Prosecution of 37 crimes against former President Trump in the Ministry of Justice](#) Previously, he had not talked to the Minister of Justice and was not ready to do it.

Reuters reports that according to the federal court documents published by the Department of Justice Smith on Friday (June 9), Trump was charged with unauthorized information when he left the White House in 2021, and took away the most sensitive information of the US government, including The U.S. Secret Nuclear Plan and the potential security loopholes in China when they were attacked by the United States, endangering US national security.

A reporter asked Biden after decrypting the indictment of Trump after the judicial department decomposed whether he would discuss the case with the Minister of Justice Galan. Biden said, "I have never talked to him at all, and I am not ready to discuss with him. ","

The White House spokesman, Teron, said earlier that Biden and everyone learned that Trump was charged in a confidential document case, and Biden did not know the matter in advance.

Dalton said that Biden "is a president who respects the rule of law. This is why we don't comment on this case."

In 2024, Biden, who will seek re-election, continues to keep a distance with the Trump case under investigation by the Ministry of Justice to show US judicial independence. Trump announced his campaign in November last year. Despite the scandal of the case, Trump's support in the Republican Party has always been leading.

Description: (Agence France -Presse Ottawa, 9th) Canadian Prime Minister Justin Trudeau previously assigned David Johnston, who was former Governor, to investigate the accusation of China twice in the Canadian elections, but the opposition party questioned the appointment. Johnson resigned today.

Johnsonfu announced a temporary report at the end of May, determining that the Chinese government attempted to interfere with Canada's 2019 and 2021 elections, but it did not affect the election results.

Johnson should start a hearing in July. Hearing the opinions of the obstetrics of the diasporas who had been intervened as the target, collected the opinions of experts from national security and international relations, and then submitted the final report in October.

However, the opposition party accused Johnson of the relationship with Trump, and demanded an independent public investigation.

Johnston said in his resignation: "When I took the task of investigating the independent special reporter of foreign intervention, my goal was to help build a trust in our democratic system ... My conclusion is that in my appointment and work, my appointment, work, in my appointment and work. Based on a serious party atmosphere, my leadership produced a counter -effect. "

Liberalparty, which belongs to Trump, did not obtain a majority in the last election, so a small number of governments were organized. The Canadian media previously quoted external intelligence documents and unknown sources to expose China's attempt to intervene and even destroy the Democratic procedures of Canada. Now the Trumodi government is facing the pressure of explaining the official response. The allegations mentioned by the media include secrets to donate donations, Chinese spies that are effective for Canadian candidates or members, etc., the purpose is to want to control the policy.

Last month, Canadian media reported that a Chinese diplomat was accused of trying to intimidate Michaelchong and his family in Hong Kong because Zhuang Wenhao once criticized China; Canada then expelled Chinese diplomat involved in the case Zhao Wei.

China refutes these allegations, and also derived a Canadian diplomat and warned Canada that if it takes a consistent position with the United States in Chinese policies, it may destroy the relationship with China, the second largest trading partner in China.

Johnson mentioned in a preliminary report that common foreign intervention tricks include online attacks, online wind direction, malicious fraud information and "use interpersonal relationships." He also pointed out that there is a lack of information on the government's internal information.

However, Johston refused to investigate publicly because it was about "intelligence sensitivity."

He said he would leave at the end of this month.

A peacekeeper in the United States stands in front of the municipal headquarters in northern Kosovo(Reuters)The NATO leadership in Kosovo International Peace Promotion Group said that there are some "criminal groups" behind the demonstrators in northern Kosovo to promote violence. At the same time, it is warned that the outside world may ignite the spark of the next European war here.

The spokesperson of the International Peace -to -Special Tour, Andreia Galini, said at a press conference held at the Pleishtina of Cosavo on the 9th that due to the local demonstration, the use of weapons and self -made explosives during the local demonstration. There were many soldiers of the special group were injured.

He added, "It is very clear that people try to protest and demonstrate in a peaceful way, but obviously, some criminal groups are hidden behind them just to attack the troops."

Galini said that the situation in northern Kosovo has been calm at the safety level, and he also emphasized that both parties need to be responsible for these incidents, because "one of them made a decision without considering the safety level, and the other party, the other party, and the other party There are no timely to prevent violence during the demonstration during the demonstration. "

After the Kosovo authorities appointed the Albanian officials as the mayor of the northern region, many violence broke out in the local area. In the last election, many A -ethnic officials were elected as municipal leaders, but in this area with the most populous population, the participation rates of the Series in these elections were only 3.5 %.

Turkish Force

The spokesman pointed out that the additional troops sent by Turkey to strengthen NATO mission have been stationed in Kosovo since June 5. At present, they are integrating with other units.

He also added that the Turkish battalion consisting of special forces included a total of 500 soldiers. The battalion will be deployed locally to support the containment of tensions. It may also be sent to the northern region or other locations as needed.

On the other hand, the United States and the European Union demanded that the leader of the Kosovo authorities Albin Coomt withdrew the appointed mayor of Ace, and withdrew the special police force of the northern municipal authorities.

The United States and the European Union also requires a new, local elections in the north, and Kosovo's implementation of a agreement that can be traced back to 2013 to establish the Selvian municipal alliance and give the organization a greater autonomy.

Violent incident in Kosovo(news agency)

Next war

A report issued by the US website "National Interest" warned that the next European war may start with Kosovo.

This report pointed out that there is obvious similarities between Kosovo's situation and the current conflict between Ukraine and call on Western politicians to pay attention to this.

The report pointed out that the recent crisis in northern Kosovo reminds the world to note that "the cruel war that occurred in Ukraine may be the biggest threat to Europe's stability, but this is not the only threat."

The report explains that the political reality in northern Kosovo is similar to the situation in eastern Ukraine, especially because Kosovo is a controversial area in history.

Kosovo's population is dominated by the Albanians. It was separated from Serbia in 1999 and declared independence in 2008. However, Serbia still regards it as part of the territory and supports a few Serbian groups.

NATO has nearly 4,000 soldiers in Kosovo. With the upgrading of violence, NATO decided to send 700 soldiers to the region.

(Voice of German in Chinese) The Supreme Court of the United Kingdom rejected the application for appealing by Asanic's extradition of the British government. The founder of the WikiLeaks hopes to appeal to the court's extradition decision and the extradition order of the British government. However, the judge decided not to accept these two appeals applications this week.

The Organization of the Borders (RSF) believes that after the appeal was rejected, the 51 -year -old Assange was actually transferred to the United States.

[Asanic's wife](#) It was written on Twitter that Anshan will submit another application to the High Court next week. She revealed that two judges will be reviewed at a public hearing this time. She wrote: "We are still optimistic that we will win, and Julian will not be extradited to the United States."

If he fails, he can only hope to be in the European Human Rights Court. A reporter's organization pointed out that the only other option that can prevent Assange from being extradited is to appeal to the European Human Rights Court. But whether the ruling there can prevent him from being extradited is also a problem.

Ukraine President Volodymyr Zlensky praised the heroic performance of the Ukrainian officers and soldiers, but did not directly mention some of the so-called Ukrainian counterattacks of some observers.

In the daily conversation, Zeroski said, "I want to say to officers and soldiers and all those who have participated in tough battles recently. We see your heroic deeds and thank you for every minute in your life."

Ukrainian officials have previously stated that the Ukraine has been ready to counterattack, but no official announcement will be officially announced before the offensive.

Earlier Russian President Pu Ting said that Ukraine's big counterattack has begun, and the Russian Ministry of Defense has stated that it has repelled several waves of Ukraine offensives.

Pu Ting said in a video conversation: "So far, all the opponent's counterattacks have failed, but the potential of the Kiev regime launching an attack is still there." At the same time, Huafu announced that a \$ 2.1 billion of the latest U -wrap military aid against the Ukraine's military aid military aid military aid Essence

Russia said that the war in the Zaporizhzhia region was heating up from the 8th, and the local area is also the place in Europe's largest nuclear power plant.

Former US President Trump said he was innocent.

Former US President Trump was prosecuted for the second time within two months.

This time it was related to the confidential file processing after he left the White House. Last year, the Federal Investigation Agency searched for his private villa in Florida, Mar-A-LGO, and seized thousands of documents, including about 100 confidential documents.

According to a public prosecution on Friday, he was charged with 37 charges, saying that he hid highly sensitive documents such as US military and nuclear plans in the villa, placed in the ballroom, bathroom and even shower.

Legal experts pointed out that for Trump, who was running for president in 2024, he might have to be prison for a long time once sin.

Trump has repeatedly denied illegal acts and said he "never thought that this kind of thing will happen to the former president of the United States."

Trump announced the campaign to the US president again: Will the voters who have voted to him still support it? Trump was prosecuted as the first case of American politics due to the "sealing fee". According to a public prosecution on Friday, he was charged with 37 charges, saying that he hid high sensitive documents such as US military and nuclear plans in the Mar-A-LGO of private villas, placed in the dance hall, bathroom and even even Shower room.

BBC reporters Jude Sheerin and Rebeccaseales reported from Washington that the 49 -page indictment states that the confidential documents placed in the box contain the following information:

Prosecutors said that when Trump stepped down, he transported about 300 confidential documents to his private villa Haihu Manor, which was also a large private club. Tens of thousands of members and guests went to the manor to attend the event, including a banquet hall in the discovery of the document.

Prosecutors said Trump tried to obstruct the investigation by the Federal Investigation Bureau. He had suggested that lawyers "hidden or destroy" these documents, or told investigators that he did not have these documents.

According to the indictment, Trump said to one of his lawyers: "If we directly tell them that there is nothing better here?"

Trump is expected to appear for the first time in the case of the case a day before his life on Tuesday and 77th.

Once convicted, would Trump be imprisoned?

Haihu Manor (Mar-A-Lago) bathrooms are stacked with boxing files.

The court documents show that Trump was charged with 37 criminal crimes, including unauthorized owning confidential materials, hindering judicial justice, and fake statements to law enforcement agencies.

These allegations include 31 charges that deliberately retained national defense information in accordance with the Spy Law.

The prosecution pointed out that the maximum sentence of these charges is 10 years.

The other four charges involve co-workers, detention or concealment documents, and each crime period is 20 years.

The last two charges, that is, plan to conceal and false statements and expressions, each crime period is 5 years.

"These charges are extremely serious," said Carltobias, a legal professor at the University of Richmond, Virginia. "There is a lot of details in the files, most of them are very harmful."

He added that these details and "very disturbing" allegations about the processing of sensitive national security data constitute "strong evidence of the government".

He said: "Of course, all of this must be confirmed, but (in the indictment) has a lot of information for me, and it is very likely to the jury. Obviously, for the jury Say this is the case."

When will Trump be arrested?

In 2022, the Federal Investigation Bureau seized thousands of documents while searching in Trump's Haihu Manor. A law enforcement official told the BBC American partner CBS News that the US Special Service has met with the former president's staff and arranged for his special service staff on Friday.

The news on Friday confirmed that Trump would go to Miami the night before appearing.

Will he be handcuffed and press the fingerprint?

Prior to the report of the prosecution, the legal professor Tobeis told BBC that the form of Trump's arrest may be similar in April. At that time, he was accused of forging a business record and an adult movie actress Daniels (Stormy Daniels) paid the sealing fee and was prosecuted by criminal prosecution.

Trump surrendered in New York and appeared in court in April to deny his control. He pressed his fingerprint, but he was not locked in handcuffs, nor did he take a big head photo of the suspect.

Professor Tobeis believes that Trump is unlikely to be locked in handcuffs or take big head photos this time.

He said: "I think this is unlikely, because there is the status of the former president, and the risk of his flee is very small. He will have to negotiate or defense ... but I don't think they need to use such procedures ","

Once Trump's arrest documents are completed, he will be regarded as arrested and detained. After the file is handled, he will be tried, which means that he will listen to the crime and defense in court.

What is the case?

Trump went to New York to surrender and appeared in court in April to deny the crime. He pressed his fingerprint, but he was not locked in handcuffs, nor did he take a big head photo of the suspect.

Trump should hand over all presidential documents when he left in January 2021, which is regarded as federal property.

Federal officials, including former presidents, are illegal to take away or retain confidential documents at the place of authorization.

But just a few months after Trump left the White House, the National Archives of the United States found that some documents were missing.

These include a letter from Trump's communication with North Korean leader Kim Jong -un, and a letter left to Trump when the former President Obama stepped down.

The authorities asked to provide these records, and Trump handed over some of them.

In August 2022, the Federal Investigation Bureau searched Trump's private villa Haihu Manor, seized 11,000 documents, parts of confidential or highest confidential documents, and some "TS/SCI", which may cause US national security to cause national security "Special serious" damage.

Other items include a photo clip, a handwritten note, an unknown information about the French president, and the amnesty application letter written by Trump's old friend and consultant Roger Stone.

Prosecutors believe that Trump has retained some of the documents under the informedness and tried to hinder the investigation and prevent the documents from being retrieved.

What are the response to Trump?

Trump responded an angry response, saying that it was a "scam" for political motivation. He also claimed that he "had nothing to hide" and had "openly" provided relevant documents.

In a series of Truth Social posts and a film, Trump repeatedly said that he was innocent and said that the complaint was a "political war" before the 2024 election.

He used various arguments to defend his own way of processing documents, including that he decrypted the files before the document was found.

Although there was also a president directly decrypted the documents in the past, there was no evidence that Trump had done so or followed any existing procedures.

Trump also said that some documents are personal files and are protected by administrative privileges. They do not need to be transferred to the National Archives when they are out of office. This is the prerequisite for this case.

He said, "No one may be allowed to see the personal documents I brought from the White House. This is not wrong."

Legal experts have largely denied this argument.

Davidsuper, a Professor of Georgetown University Law Center, told BBC that Trump's lawyer may argue that the former president is just a "very bad archiver."

One of the keys to the case may be a recording. It is said that Trump said in the recording that he intends to retain the documents and acknowledge that his ability to decrypt the documents is limited.

Professor Speel said that if the recording was true, "this almost made him sink, because it showed that he knew the words he said in public was not true."

Sudan explosion conflict(news agency)At 6 am local time on the 10th local

time (at 4 am on the 10th of the Greenwich Standard Time), the Sudan Communication Fire announced by the Saudi Foreign Ministry began to take effect in the 24 -hour ceasefire in Sudan. At the same time, after the "Sudan People's Liberation Movement (Northern Bureau)" led by Abdul-Aziz Hilu attacked the military position and captured soldiers, these fields that occurred in Van Koldorfan Development indicates the expansion of the scope of conflict.

According to a statement from the Saudi-US mediation agency, the new agreement aims to "enable humanitarian assistance to enter the required areas, break the current state of violence, and help strengthen measures to establish trust between the two parties, so as to allow restarting Jida negotiations to negotiate negotiations ","

The Sudan military agreed to stop the war, "given the suffering of our people at the humanitarian level due to the current actions", and emphasized that the military retains the right to "deal with any violations of the rebels during this period".

The rapid support forces also promise to "fully" abide by the ceasefire agreement, "with the purpose of serving the truce", and hoped that the military fulfills its commitment, "Do not obstruct the efforts of humanitarian aid designed to reduce the suffering of citizens."

Since the Sudan broke out on April 15 this year, the conflict between the conflict reached a ceasefire agreement many times, but both were quickly broken.

At the same time, US Secretary of State Anthony Brinkeakan announced the launch of a remote monitoring platform to track the Sudan conflict observation station supported by the United States. Blingken pointed out in a tweet that the role of the observation station was to release an act on violation of the international humanitarian law and other regulations. He also added that it was time to end the "violent cycle" that destroyed the Sudan people.

A few hours before the new ceasefire agreement began to produce, the battle between the Sudan military and the rapid support forces continued on the 9th in southern Kotoumoue. A reporter from Peninsula reported that a violent explosion occurred in the local area, and aircraft affiliated to the military were hovering in the east of Kotoumou in the capital.

Saudi Arabia mediation(news agency)

A state of development that indicates the expansion of the battle area is that the tension situation has been transferred to South Koldorfan -two people familiar with the matter told the Peninsula TV reporter that since Wednesday, the "Sudan People's Liberation Movement (Northern Bureau)" forces 4 places have been occupied, although the ceasefire agreement reached includes the region.

A source of the Sudan government told the Peninsula TV reporter that the "Sudan People's Liberation Movement (Northern Bureau)" led by Hilu has transferred its troops from the Baram area in Van Koldor, to the capital of the state. Cadugley has nearly 40 kilometers, and attacked the Sudan military in 4 regions, Daruka, Caruolo, Ahmir, Umhh Alan.

The troops of the Su Renjie (Northern Bureau) seized some military equipment and captured military personnel.

The government sources added that the reason for the Su Renjie (the Northern Bureau) provided the extensive attack on it was that a member of it was killed in a tense area.

Sources pointed out that this incident does not belong to the scope of the military's responsibility, and its response is not commensurate with the

tension of the country's current experience, especially since the Sudan government and the Su people have reached a ceasefire agreement.

At the same time, local sources revealed to a reporter from the Peninsula TV station that the situation of Kadagley was calm and there were no signs of military upgrade until now.

In Sidalfur, a reporter from Peninsula reported that the state's capital Jana City rose to smoke. The reporter emphasized that the residents of the city of Chad in the border area also heard an intermittent heavy artillery sound during this conflict, and accompanied by communication interruption.

It is worth noting that since the Sudan army and the rapid support forces broke out, the tribal conflict in Sidalfur was intensified, and the conflict that occurred in Jananer had killed hundreds of people.

The rejection of the United Nations

In the development of related matters, the UN Secretary-General Spokesperson Stephen Dugrik declared that the Sudan government announced the special envoy of the International Organization as a "unpopular person". He also pointed out that the special envoy -German Peltus was still not replaced.

Dugrik said, "Peltus has not been replaced now, and the UN Secretary - General Antonio Gutres's position is still the same as what he expressed at the Security Council last week." "Its ambassador to Sudan.

Dugrik added that "Secretary -General pointed out that the principle of unpopular people is not applicable to UN staff, and the use of this principle violates the national obligations stipulated in the UN Charter."

The Sudan Foreign Ministry announced earlier that its government has notified the United Nations Secretary -General that its Sudan special envoy Peltus was listed as "unpopular people."

Earlier, the Sudan military commander, Burhan, asked Gutres to withdraw Peltus at the end of May this year because the latter promoted the current conflict of Sudan.

Blintken is expected to visit Beijing next Sunday

(Voice of Germany Chinese) According to Agence France -Presse, [US Secretary of State Brinken](#) It is planned to visit China on June 18. Earlier this year, he delayed the original February visit plan because of the balloon storm.

A U.S. officials who are unwilling to disclose the above information provided the above information. Blint is said to arrive in Beijing on the 18th, which will also be the highest -level U.S. officials visiting China since the Visa Pompeo visited China in October 2018.

Kobe has not confirmed the plan to visit China to visit China

The U.S. State Department has not officially confirmed this trip. National Security Conference spokesman Johnkirby said recently that Washington will announce the visits of senior officials in the "recent", but no more details are provided.

In November last year, US President Biden and Chinese President Xi Jinping held a meeting in Bali, trying to ease the [tense bilateral relations](#) To prevent the situation from getting out of control, it has reached a consensus, and sending Brinken to China is also part of the negotiation of the two heads of state.

In early February, [the United States announced its airspace to monitor China to detect balloons](#) — And then shot down, the incident aroused anger among the US members, although Beijing denied that it was a spy balloon, and insisted that it was only used for meteorological research. Brinken immediately canceled the trip to China.

However, in recent days, China and the United States seem to have begun to seek controlling tensions, including the White House Security Counselor last month [Jakesullivan and the CCP Foreign Affairs Office Wang Yi, a closed - door meeting in Austria](#) Essence

In recent years, the tension between the two world's largest economies has been upgraded. One of the most important friction points is the Taiwan issue.

According to Reuters, the United States and five allies countries issued a joint statement on Friday to condemn the use of trade operations equivalent to economic coercion. The statement did not name it separately, but it means China.

The statement emphasizes that "trade -related economic coercion and non - market -oriented policies and operations" threatened the international multilateral trading system and "endangered the relationship between the country."

Interview: The United States is time to indicate the willingness to dialogue

Australia, Britain, Canada, Japan and New Zealand jointly participated in this joint statement initiated by the United States. Except for Japan, these countries are members of the so -called "Five Eye Alliance". In addition, the four countries of the United States, Japan, and Canada are also members of the Seventh Kingdom Group (G7).

Last month, the leaders of the Seven Kingdoms had just signed an initiative calling for the cracking down on economic coercion to ensure that any attempt to make economic dependence as a weapon will eventually fail and face the consequences.

Washington has expressed concern about Beijing's trade policy. An official of a US Trade Representative Office mentioned in an interview with the media on relevant joint statements that China had implemented a ban on Lithuania because Lithuania allowed Taiwan to set up a status in the country equivalent to the representative offices of theresses.

However, unlike the complete hostile position adopted by the former Trump at the end of his term, the Biden government has recently sought to maintain cooperation with China in a limited field, such as climate protection.

(Voice of Germany) The British Department of Defense said that in the past 48 hours, Ukraine continued to carry out "major actions." In the latest intelligence update of Saturday, the British Department of Defense said that the Ukrainian army "made good progress and breaks through Russia's first line of defense" in some parts of the country, and its progress in other regions is relatively slow.

Both Moscow and Kiev notified the fierce battle of the front line, indicating that Ukraine had launched a counterattack.

Russian President Putin said on Friday: "We can say that this wave of offensive has begun."

Ukrainian President Zelei said that he had encountered a "particularly difficult battle" and said he discussed tactics and achievements to date with military leaders. Kiev has always emphasized that it will not comment on when the offense will be launched.

The drone attack in the Odessa area killed three people

The Ukrainian army said on Saturday that a Russian drone attack caused three deaths and at least 26 injured. "The enemy attacked the Adessa area at night and used an attack -type drone."

Although the Ukrainian army shot down the drone, one of the shot drone fragments hit an apartment building and caused a fire. At the same time, the Ukrainian Air Force said that Russia launched at least 35 drones and 8 missiles to Ukraine's targets.

How to protect the natural gas pipeline from being eliminated by artificial destruction?

"Wall Street Journal": Poland is used as Beixi Destruction Team Base

The Wall Street Journal reported that German investigators were inspected the relevant evidence of the explosion of Beixi natural gas pipelines, which showed that a destruction team used Poland as an action base to attack [Beixi Pipeline] [Beixi Pipeline](#) Essence This explosion accident in September last year from Russia's natural gas to Germany.

Investigators rebuilt their two weeks before and after the explosion based on a data called "Andromet" ships called "Andromet". The 50 -foot -long white yacht was suspected to be related to the explosion of the Beixi pipeline. According to the yacht's radio and navigation equipment, satellite and communication records, investigators found that the route of the yacht deviated from the original route.

Investigators tried to compare some DNA samples found on the yacht with "at least one Ukrainian soldier".

Ukrainian President Zelei basically told the German media that Ukraine did not attack Beixi natural gas pipelines.

In March of this year, the German media reported that a yacht owned by a Polish company held by Ukrainian citizens may participate in the attack. The German Federal Criminal Police Department has not commented on this.

Former British Prime Minister Johnson, on Friday (June 9), suddenly announced his resignation and took effect immediately.

Reuters reported that Johnson made a resignation decision after receiving a confidential letter from the Privilege Committee. It is said that he has received the report of the investigation results report on whether he misleads the results of the parliament in the "party door" incident.

Johnson pointed out that the Privilege Commission was reduced to a political thug and determined to end his political career.

Johnson said in a statement, "Not only I think this is a witch hunting operation, the purpose is to retaliate against the result of Brexit, and the ultimate goal is to overthrow the referendum in 2016. Removing me is the first step. I believe this is a goal that a group of people are working together. "

However, Johnson's words in the resignation statement were that he decided to leave the parliament "for now", which seemed to imply that he would return

to politics. Johnson did not reveal in the statement that the committee would take any punishment to him.

Johnson's resignation will once again trigger serious internal differences within the British election in the 2024 British election.

The Privilege Committee of the British Parliament is a disciplinary agency in Congress. If the investigation results determined that Johnson was wrong, and he had the right to recommend that he suspended. The privilege survey was hosted by a senior member of the Labor Party, but most members of the committee were conservatives.

The Privilege Commission said that they will end the investigation work next Monday (12th) and will soon announce the investigation report. A spokesman for the committee pointed out that Johnson suddenly resigned "the integrity of the parliament."

Johnson has served as British Prime Minister for three years. He was exposed to violations of epidemic prevention regulations during the period when he was exposed to crown disease. He opened a party in the Prime Minister's palace. Johnson resigned from the position of the Conservative Party and Prime Minister in July 2022, and then stayed to the new Prime Minister in September.

The owner is pregnant, the dog knows first?

Description: The sensitive nose allows the dog to detect the changes in our hormones: if the owner is pregnant or abortion, they will smell the changes in the air and produce abnormal behaviors. Experts suggest that if your family is greeted by newborns, it is best to let your dog prepare as soon as possible.

(Voice of Germany) Anna feels uncomfortable recently. The young startup entrepreneur from Virginia in the United States did not know where to go. In addition to feeling nausea and panic, her dog also performed abnormally. Lulu is a poodle, who is more willing to stick to Anna than Anna's husband. But in the past few days, Lulu suddenly didn't want to approach the hostess.

After that, Anna found that she was pregnant -although the so-called "discovery" was actually after she had symptoms of major bleeding and was taken to the emergency room of the hospital.

The doctor told Anna that even if the fetus could survive, she would face high risk pregnancy.

Anna and her husband returned home. It was the most difficult day in her life. She just wanted to lie down and hug her dog. But Lulu was unwilling to get close to her.

To protect privacy, the Voice of Germany used a pseudonym in this article. Anna said that she was very angry at the time, and she felt that Lulu was very indifferent to her throughout the stage of her physical discomfort.

"Since we adopt it, it sleeps next to me every night, but now it is unwilling." Anna recalled. "It is only willing to sleep next to my husband. After the day,

the fetus in Anna stopped her heartbeat. Anna felt that she had never rely so on, but Lulu was still unwilling to approach her. The abnormal behavior of the dog caused her a heavy blow.

"I think the dog should give the owner unconditional love," she said.

Dogs can smell the change of the owner Hormone

A few days after Anna underwent the curettage surgery, Lulu's behavior returned to normal. Now it is "more loving". As Anna's body is gradually cured, it likes to snuggle with the hostess again.

But how can the dog's behavior have such abnormal changes?

"The dog can smell the smell of hormones, and the owner will change the smell during pregnancy or abortion," explaining the dog coach Sissy Leoniekreid. After graduating from the University of Wakhunnn University in the Netherlands, she founded a "dog college" in Germany.

When the dog is confused or at a loss, it may temporarily alienate you

Crede pointed out that changes in hormonal chemical levels will affect the behavior of dogs. But this is not the only possibility of Anna and Lulu.

"People will change their behavior after experiencing abortion, such as depression, and even sadness. Dogs cannot understand this change, and they also need time to adapt." Cred analyzed.

And this is exactly the case between Anna and her dog.

"Now I know, Lulu must be very confused at the time. But I was just angry at that time," Anna said.

Cred said that when the owner's hormones are re -adjusted to the normal level after a change like abortion, the dog's behavior will return to the same way. Usually, it takes a few weeks to adjust the behavior of dogs, but sometimes it only takes a few days, just like Anna's poodle Lulu.

Dogs are more spiritual than pregnancy test sticks?

Because of the sensitive sense of smell, search and rescue dogs can find the lost people in the forest, or survivors buried under the earthquake ruins Essence They can also be to identify patients with cancer or long -term new crown sequelae by olfactory.

Smell the new crown virus? Dogs can!

"Before I found that I was pregnant, Lulu began to refuse to get close to me," Anna recalled.

For many years, Creded, who had been on the hundreds of thousands of dogs and his owner, said that when the smell in the air changed, the dog could be sensitive.

"For dogs to know what these changes mean, we have not proved scientific data, but from the perspective of their behavior, we can judge that they obviously know that something is different from the past." Creded added.

From pseudo -pregnancy to guard dog behavior

Ben Nidik is a fitness coach from Bonn, Germany. He firmly believes that the pet dog Meile at home aware of his wife's first child.

"Meile suddenly created a certain urge to build a nest." Ben Nidic said, "It has a lot of plush toys and created a comfortable corner for himself. It looks like it is pregnant."

The changes in the behavior of pet dogs during pregnancy also include sudden relying on pregnant women, sticking her all day, or excessive protection of her.

"Dogs may become very desire to control and protect, and even people who do not allow it to sit next to the pregnant owner." Pet dog expert Cred said, "They even facing the noise from outside Bark loudly. "

She suggested that when a dog appears such anomalous behavior, he can seek help from pet dog behavior experts. Because such behavior abnormalities may increase after the baby is born. An American researcher conducted a survey in 2014 and found that some dogs will have jealousy to the owner's newborns.

"(In this case) The first reaction of the dog must be sympathetic understanding." Cred said, "When a baby is about to be born, this is an uncertain situation for dogs. Humans sometimes cannot adapt to this situation -but dogs have much weaker control of emotions, so it will become nervous and even nervous. At this time, the most important thing is to show understanding. "

Let your dog be prepared for your baby's birth

If you are pregnant, then you better let the dog prepare for the arrival of the new family members.

You can first let the other members of the family feed the dogs or take it out for a walk. In this way, even if you can't do these things because of your fatigue during pregnancy or postpartum, your dog will not feel much change.

In addition, it is also a good way to let the dog learn to adapt to the baby's voice, so that they "will not jump up or barking when you are holding the crying baby", Crede suggested.

However, she also reminded that the newborn should not have a room with the dog alone.

According to the news on the 10th, due to the upgrading of tensions in the United States and China, Microsoft Corporation will transfer its top artificial intelligence experts from China to Canada to work, which may impact Chinese scientific and technological talent training.

According to the Financial Times (Financial Times), sources who understand this plan pointed out that the Microsoft Researchasia headquarters in Beijing has begun to transfer top artificial intelligence (AI) experts from Beijing to Vancouver from Beijing to Vancouver, Canada. And apply for a visa.

It is reported that the plan will affect 20 to 40 employees. A person close to Microsoft said that Microsoft's new laboratory at Vancouver has entered experts around the world. There are not many Chinese employees transferred to Canada this year.

It is understood that this so -called "Vancouverplan" person pointed out that this move is a response to the increase in political tensions in the United States and China, and it is a defensive means to prevent the Chinese technology group from digging top talents. The Chinese technology industry urgently needs AI researchers to develop the Chinese version of chat robot ChatGPT.

Two researchers in the Microsoft Institute of Asia said they rejected the recent job opportunities provided by China Network Corporation and are applying for a visa to move to Canada.

However, the decision to transfer top AI talents to other countries may annoy Beijing. China has always tried to attract high -tech talents who have worked overseas to return to China with excellent subsidies and reputation.

According to Microsoft's public posts in WeChat last September, Microsoft has 9,000 employees in China, more than 80 % of which are software engineers or engaged in research and development, and plan to hire 1,000 people in the future. Due to a large part of the engineers stationed in China, they have invested in developing global products, and if the United States and China further have evil, it may cause Microsoft to fall into a difficult situation. A person close to Microsoft pointed out that Microsoft may also transfer some outstanding engineers from China in the future.

On the 9th, the US government banned the import of Chinese printer manufacturers Nazda and a Chinese chemical company product on the grounds of suspected violations of human rights.

The U.S. Department of Homeland Security (DHS) stated that Ninestarcorp, the fourth largest printer manufacturer in the world on the website, and Xinjiang Zhongtai Chemistry Co., Ltd. were involved in the Chinese Uighurs and other persecuted groups. Commercial behavior is excluded from the US supply chain.

Comprehensive foreign news reported on the 10th that according to the statistics of UN experts and human rights organizations, more than 1 million people have been locked in the re -education camp in Xinjiang, western China in recent years, mainly for Uyghur and Muslim ethnic minorities. Education "training and abuse. And China denies all allegations about abuse.

The Chairman of the Chinese Congress and the Chinese Commission (CECC), the Representative Chris Smith, and Senator Jeffmerkley said that the operation "provides a clear guidance to the supply chain of the US company, so it is very important, but At the same time, it also pointed out that forced labor products such as "car parts, solar panels, artificial fibers and clothing" still continue to enter the US market.

Senator Marco Rubio said that although the Ministry of Homeland Security announced that it was worthy of praise, it was necessary to take further actions.

The US Department of Homeland Security stated that these actions were part of the "Uyghur Forced Labor PreventionAct (UFLPA", which signed legislation in December 2021. At present, there are 22 companies on the UFLPA entity list. The Ministry of Land and Safety said that after the implementation of UFLPA for nearly a year, they have checked products worth more than \$ 1.3 billion.

Nashida and eight subsidiaries in Zhuhai, as well as Xinjiang Zhongtai Chemistry, has increased to the physical list of UFLPA.

The French Lyon International Banner Festival will be held on September 16, 2023 Network Screenshot/French Lyon International Banner Festival official website

According to Taiwan media reports on the 10th, under the obstruction of mainland China, the organizer of the Lyon International Banner Festival in France has made it clear to a cultural organization in Taiwan that it cannot accept its application for its participation in this cultural activity. This also exposed Beijing's blockade and suppression of Taiwan everywhere.

Yang Peiyu, president of the "Lyon Terrace Culture Association", based on Lyon, France, said that this is just a "simple cultural activity and why he does

not understand why he rejected Taiwan." Yang Peiyu was very surprised by the decision of the event organizer.

The Central News Agency report quoted a Mr. Huang, a surname Huang of the Lyon Terrace Culture Association, said he wrote a letter to inquire about the application procedure last October and submitted the application. The organizer stated that he would discuss with the participants in the previous session and ask him to contact him for a while. Mr. Huang said that he has contacted the organizer many times since January this year, but did not get a clear reply.

Until the end of last month of last month, the organizer informed that the meeting had been discussed on the phone, but the application was rejected because of the pressure on China. The organizer explained that the Chinese groups participating in the event put pressure on them to prevent the Ryangtaike Culture Association from participating, otherwise they would withdraw from the event.

The Central News Agency reported that China even threatened to call the police. The organizational direction of the Lyon Taike Culture Association proposes that it can register and register without using the Taiwan flag and participate in the flag festival activities.

The International Banner Festival is an event organized by the Lyon City Festival to display different cultural characteristics of different countries and regions once a year. The 18th Lyon International Banner Festival is held in September this year.

(Voice of Germany Chinese) Hong Kong's counterfeit Central Movement will be on the 4th anniversary of the expiration of June 12. On Saturday (June 10), nearly a thousand people participated in the "Adverse Wind Wind Wind Seeing Hong Kong" parade in Taipei and several international non-governmental organizations in Taipei, calling on all walks of life to continue to pay attention to the current situation in Hong Kong. The march organizers include Hong Kong Border City Youth, Taiwan Hong Kong Association, Taiwan Human Rights Promotion Association, International Amnesty Organization and other groups.

The fourth anniversary of the delivery, the Taiwanese civil society group held a Hong Kong parade in Taipei

Despite the intermittent rain, the enthusiasm of the participants continued, the parade walked from the Square Plaza of Taiwan University to the Free Square archway. Many people wore black clothes in black in Hong Kong in

2019. According to the organizer of Hong Kong Border City, about 1,000 people participated in Saturday's parade.

In the Taipei Free Square, the participants shouted "Restore Hong Kong, the Revolution of the Times", and urged people not to forget Hong Kong's backbuilding sports. The parade also sang the non -official eulogy "Wish to Back to Hong Kong" in the 2019 democratic protests, and this song has been banned in Hong Kong.

Participants hold the "Resistance Ritual" slogan

The chairman of the Hong Kong Association of Taiwan was moved by Taiwan's acceptance of Hong Kong immigrants and democratic people. Sanpu called for "care about Hong Kong, refusing to forget", not forgetting democratic protests that happened in Hong Kong, and not forgetting those who are still trapped. He also said that the most important thing today is to work together to prevent China from penetrating into Taiwan's democratic autonomy.

Although the weather is not good, nearly a thousand people still go to the streets of Taipei to participate in the parade

Li Mingzhe, a non -governmental organization worker who had been detained by China for 5 years, also appeared in a parade and published a short lecture. According to the Central News Agency, Li Mingzhe said that the anti - China Movement not only had an impact on Hong Kong, but also had an impact on the world, because at that time, Hong Kong was the first line of the global anti -China hegemony and the first battlefield in the world. It conveyed the world and two systems that China did not comply with their promises. The report quoted Li Mingzhe: "This kind of behavior that does not comply with the rule of law is to show human rights internally, and it is the rule of all the world."

On June 10, nearly a thousand people participated in the "Overwind to Hong Kong" parade in Taipei

The initiator and legislator Lin Yizuo of the "Taiwan Congress Hong Kong Friendship Connection" of the "Taiwan Congress Hong Kong Friendship Connection" also said that although the remarks of the Chinese government's rule are free, the groups of Hong Kong people and the ports of Ting Hong Kong continued to lobby internationally to enhance the international internationally. Following more countries have promoted measures to oppose China's oppression and solidarity in Hong Kong. He pointed out that following

the US, the United Kingdom, Canada, Australia and other countries formulated a bill sanctioning major foreign government officials and their assistants, Taiwan also recently passed the "Amendment to Entry and Exit and Immigration Law". Understanding human rights actors enter the country. "Under the cooperation of the world democratic camp, it can give the dictatorship a greater pressure and allow the oppressive people to get the strength."

When Britain transferred Hong Kong sovereignty to China in 1997, the Beijing government promised that Hong Kong was free to "50 years". However, the Beijing authorities have continuously tightened their control over Hong Kong and caused democracy many times. In July 2020, Beijing issued a rigorous "Hong Kong National Security Law" to further suppress the objection.

Participants in the parade call not to forget what happened in Hong Kong (Germany, Central News Agency, etc.)

After the BBC reported that after the US Department of Justice's prosecution of the Trump confidential document case on Friday (June 9), Trump violently attacked Smith, who was responsible for investigating his case on his social media platform.

Trump posted a photo of Smith in TruthSocial, saying that Smith "is Trump Hate -a psychocho with a mental problem, and he should not let him handle any cases related to 'Justice'" at all. " Essence

Trump's personal attack on Smith was exactly the same as his personal attack on Manhattan prosecutor Alvin Bragg.

Prague was a prosecutor who paid a sealing fee for porn actress Daniels during the 2016 campaign president. The judge responsible for the trial of the sealing fee recently warned Trump and his lawyer to attack the prosecutor on the social media platform.

Trump also posted another post on Friday to know why President Biden was prosecuted because he did not collect confidential documents because he did not collect confidential documents when he served as Vice President in Obama.

In November last year, Bayeng's private lawyer found a group of confidential documents during the office of "Pennsylvania Bayeon Diplomacy and Global Participation Center" in the think tank "Pennsylvania's Bayeon Diplomacy and Global Participation Center", and informed the matter to the National Archives and handed over documents. Essence

After that, a few documents with confidential labels were also found at Biden's house. Biden promised at the time that he and his team would fully cooperate with the investigation of the incident.

In January this year, Trump also found a small number of confidential documents in the home of Vice President Pence.

The U.S. Department of Justice conducted an investigation of the confidential documents of Biden and Pence. The Ministry of Justice just ended the investigation of Pence's confidential documents on June 2nd. Based on the "result" of the investigation, it would not have any allegations to Pence.

China's youth unemployment rate reaches the highest history

(Voice of Germany Chinese) For Annie (pseudonym) and many other young people, survival in big cities in China is like an endless struggle.

"Young people are particularly difficult to find a job now, and the level of income has begun to decline." The young woman who was unwilling to disclose a full name told the Voice of Germany.

Although since the end of last year, the Chinese government has abandoned the strict zero -epidemic prevention policy, the overall economic situation has recovered, but [youth unemployment rate](#) Still at the highest level of history. Official statistics show that in April this year, about 20.4% among groups 16 to 24 years old are unemployed. Compared with the unemployment rate of 5.2% of the overall employment population, the unemployment rate of young groups is almost four times higher.

In addition, with the arrival of the graduation season, millions of university graduates will also enter the employment market.

"In the next few years, the problem of unemployment of young people in China may only become more and more serious." Sahzadqazi, executive

director of the "China Beige Book". The headquarters in New York is committed to providing independent survey data on the Chinese economy.

According to statistics from the Ministry of Education of China, Chinese college graduates are expected to exceed 11 million in 2023

In the past 20 years, China has maintained its continuous economic growth. However, as the economic development model has shifted from the low -cost processing industry to the pillar of high -tech and service -oriented industries, the unemployment rate of young people is rising at a higher rate than other ages.

There is also one factor that produces negative effects, that is, during the epidemic, the Chinese government has combined and rectified technology, education, entertainment, and real estate industries, which aims to strengthen the country's control over large enterprises. This has led to the technology industry giants including Tencent, Alibaba, Sina, etc. have announced significant layoffs in recent months -and these companies are often employed by young people who have received higher education.

New crown epidemic caused a blow to the service industry

For millions of [young college graduates](#) In terms of lack of attractive employment opportunities, it has become a cruel reality they have to face.

"Many people lose their jobs during the epidemic, and when they are trying to find similar jobs in business, finance, media and technology industries, they will find that many of the well -paid positions are for those who have worked for several years. The experienced person was prepared, and Annie told Germany.

According to the investigation and research by the US Investment Bank Goldman Sachs, in the economic downturn, young people are more vulnerable to affected because their work experience is relatively less. In China, this disadvantage was worsened by the new crown epidemic, and the service industry was particularly serious.

"Decent work" is getting less and less

The above -mentioned Goldman Sachs report also mentioned that the skills obtained by college graduates in colleges and universities are often deviated with the skills required by enterprise employers. This phenomenon is particularly obvious in education and sports industries.

Some experts have pointed out that the lack of "decent work" is common in China and other countries in the world. "People often say that college graduates do not want to work in the factory, but the current trend of China and the world is that they have less and less decent work -this means that they can provide high work guarantee, salary and benefits. Elifriedman, a generous and enabled young people to stand in a large city in a big city ", and the Chinese laborers market developed as the focus of the Chinese labor market as the focus of research.

Vinson (pseudonym) is a young Chinese in his 20s. He told a Voice of Germany that since the epidemic, many companies have required employees to extend working hours, but at the same time, they have to reduce wages or no more wages. Faced with such changes, many of his friends chose to give up struggle and lay flat. Some people are brewing "Run" abroad.

"Run" culture reflects questioning of the system

In order to reduce the unemployment rate, the Chinese government introduced a fifteen -point plan It includes providing vocational training for young people, promising to increase employment in state -owned enterprises, and support young people to start a business.

"China Blood Book" executive director Kazaki said these measures are important, but Beijing also needs to focus on the vitality of restoring private enterprises and SMEs, so as to create more investment and employment.

Although young people do not seem to have a political threat to the Chinese government, experts agree that young people in some cities may realize that in today's China, "national power is not limited."

Professor Friedman of Cornell University pointed out that young people's urge to "moisturize" may also show that they lack confidence in China's political system. "If they lack confidence in the stability of the system, and at the same time feel that they have no ability to change the status quo, then leaving may be a rational response to this situation."

One -quarter fourth -year German students cannot complete normal reading (Voice of Germany) Heinz-Petermeidinger, Chairman of the German Teachers Association, believes that German primary schools should cancel English classes, and teachers should use this course to improve their children's German reading and mathematical ability.

In an interview with the Deguanglian ARD on Friday (June 9), it is wrong to use English lessons as a key subject for primary schools. "We believe that English classes are optional. You can focus on reading lessons and other ... Education in elementary education, we must pay more attention to some basic knowledge, such as reading, writing and arithmetic."

Chairman of the German Teachers Association Matteoge

Where does this suggestion come from?

Midinge's statement was proposed after the International Primary School Reading Survey (IGLU) last month. The test results show that compared with

their peers in many other countries, German elementary school students have poor performance. A quarter of German fourth -year students cannot complete normal reading Essence

Another test -educational trend reported by students in the fourth grade last year showed that the children's mathematics and Chinese ability deteriorated significantly. Midinge said that in some cases, primary school students can retain the English class of elementary school students. However, he believes that in 70%to 90%of students with immigration background and almost no German level, it is more meaningful to focus on German rather than English.

Malaysia Avant -garde Kelly met Mu Yuding, Chairman of the Turkish Unity Party next week, and explained to Muyudin whether he decided to join the Turkish Party.

"Malaysia Today" quoted the "Star" report that Kelly revealed in the show with the podcast of the former Umno Propaganda Director Sha Liu that he would meet with Muyudin next week and related to Muyudin's invitation to the party.

Kelly did not provide other details or the date of the two.

Kelly also said in the podcast show that he had not been politically unrelated to the former Ministry of Defense Senior Minister Xishan Mu Ding in the near future, nor did he involve any conspiracy. "I have known Heshan Mu Ding for a long time. I have participated in politics, because he took me to UMNO."

Kelly said that he told Heshan Mu Ding that he would meet with Muyudin to let Murdin know whether he decided to join the Tuling Party.

On January 27 this year, the UMNO Supreme Council fired 44 party members, including Kelly, and Hishan Mu Ding was one of them frozen for six years.

Muyudin confirmed last month that the Turkish Party Party was lobbying Kelly to join the party, and he would be the highest director of the party as soon as he joined the party.

Although many political parties beckoned to Kelly, Kelly said recently that joining his party requires a lot of adaptation, and he also considers the establishment of a new party.

A study by the University of New South Wales in Australia believes that with the increase in marine temperatures caused by climate change, more than three -quarters of corals around the world will be ill in the next century, which will seriously affect the marine ecosystem.

Xinhua News Agency reported that unlike albinization, coral diseases are caused by damage by coral immune systems, and most of the sick corals will die. With the death of corals, the ecosystem of the entire coral reef will be affected.

Australia studies and analyzed 108 research on coral health, compared with the disease of corals with the changes in the temperature of the marine surface temperature. Researchers have found that the prevalence of corals increases with the rise of the ocean temperature. In the 25 years of 2018, global corals have doubled to 9.92%.

The model of this study predicts that according to the current heating trend, in the worst case, the prevalence of global corals in 2100 will reach 76.8%.

Researchers say that corals are a sensitive creature. The temperature, salinity and water quality of the seawater will affect the survival of corals. The rise in marine temperatures will cause corals to "feel pressure", affect the immune system. At the same time, the rise in marine temperatures has also enhanced the reproductive ability of pathogens such as fungi and bacteria, increasing the risk of coral being infected.

Berke, a doctoral student of the University of New South Wales, who led this study, said that coral reefs play an important role in marine ecosystems, which is also closely related to the development of fisheries and tourism. Coral disease is an important reason for global coral death and coral reef degeneration. The model of this study shows that even if the ocean heated up at a more conservative rate, the situation will continue to deteriorate. This also highlighted the importance of quickly taking action to slow down climate warming.

Research from the University of New South Wales in Australia has been published in the monthly journal of Ecological Communication.

Chechen's receiving Chinese armored vehicles caused by fear of invading Ukraine's doubts Associated Press Picture

After uploading the online film of Chinese armored vehicles this week, Chechen President Kadrov caused Chinese equipment to be used to support Russia's military operations.

According to the Wall Street Journal report on the 9th, Russian President Vladimir Putin ally, Ramzankadyrov's encrypted communication software Telegram, appeared on the 7th. There were no armed armored troops in the film. Cadrov provided soldiers and equipment for Russia in the Ukrainian war, but the use of these Chinese armored vehicles was still unable to confirm.

These armored troops are designed for multi -purpose functions for limited military operations and police town atrocities. The roof can be installed with weapons, which is manufactured by Shaanxi Baoji special auto factory by the northern Chinese military contract.

The current film of Chinese armored vehicles also caused other doubts, including the intention of Kadrov uploading the film.

Shaanxi Baoji Special Automobile Factory did not respond to email questions. The Chinese Ministry of Foreign Affairs stated that it was unclear and emphasized that China complied with its "not arched fire or fueling" policy. The Kremlin did not respond to the request immediately.

The Wall Street Journal cannot confirm when and how they enter Chechen, and what they use.

According to the Institute of International Peace of Stockholm, armored vehicles were the second largest export military products in China last year, with an export value of 392 million US dollars, second only to the aircraft \$ 73 million. Data show that China exports many national armored vehicles, including Afghanistan, Cambodia and other countries.

The British government said that Ukraine and Russian forces have made their own progress in the warfare front lines in southern and eastern parts of Ukraine.

Reuters reported that the British Ministry of Defense issued a statement on Saturday (June 10) saying: "The Ukrainian troops may make good progress in some areas and penetrate the first line of defense in Russia. In other regions, Ukraine's progress is relatively slow. "

Ukraine said a fierce battle occurred on Friday (9th) in the Eastern region. A military spokesman said the Ukrainian army recaptured more territories near the city of Bachurut.

Russia said that Ukraine's counterattack has failed so far. However, Ukraine insisted that he had never said that the counterattack had begun.

The British Ministry of Defense said that the Russian army in different regions was different. "Some troops believe that it has launched an effective motor

defense operation, and the others retreated in some kind of chaos, and more and more reports said that when the Russian army retreated, it was casualties after the landmark area buried."

According to Agence France -Presse, according to the report released by the supervisor's office and entitled "What happened?" In the first 4 months of 2023, there were 3406 women's missing cases, but only 1902 were found, and they still found them, and they still found them. 1504 people's whereabouts are unknown.

Isabelortiz, deputy director of the supervisor's office, said that the disappearance of women should be regarded as a "urgent crisis" in Peru with a population with a population of 33 million. She also said that the country has not taken any action to avoid such incidents.

She criticized that "the authorities have not disappeared (mainly abduction and abduction) as the priority agenda."

According to reports, more than 5,380 women were missing in Peru in 2022, most of which were minor girls and teenagers, and this number decreased by 9.7% compared with 2021.

According to multiple non-governmental organizations, the police and prosecutor's office did not fully investigate many cases because they believed that these women were voluntarily left home.

The floods caused by the destruction of the Khahofka Hydropower Station in Hermuson, southern Ukraine are fading.

Tas Society reported on Saturday (June 10) quoted Hermuson's agent of Chief Executive Saldo, saying that the water level near the new Carhofka near the Khahofka Hydropower Station decreased by 3 meters from the previous day, and it is still compared to it. The normal water level is 7 meters high. The drainage and garbage cleaning work of urban areas began. According to Russian Hydropower Corporation estimates, the Dieber River, located below the Khahofka Hydropower Station, may fall to the normal water level by the 16th.

Saldo said that as of the morning of the 10th, more than 6,000 residents had evacuated from the affected areas, including 235 children and 81 inconvenient operations. He added that more than 1,700 of the evacuation personnel lived in a temporary residence, and 62 were hospitalized.

[Khahofka Hydropower Station was destroyed on the 6th](#) As a result, the reservoir dam was decided, and the water level in the lower reaches of the Dieber River rose sharply, causing serious ecological and humanitarian risks.
