Think Tank: Germany is seriously dependent on Chinese products in some areas

Author: None (Language: zh)

Publisher: None

Time: 2023-06-25T-13:27:00Z

Description: According to a research report released by the German Institute of Economics this week, Germany has seriously depends on China's imports in many fields, including some raw materials, chemical raw materials and electronic components. The report calls on the economy to take action as soon as possible to reduce the dependence of these fields, otherwise "the so-called de-risk is just a empty words."

The latest research report released by the German Institute of Economic Research (IW) pointed out that in the fields of laptops, magnets, keyboards, and vitamin C, magnesium and caffeine, the share of products imported from China is particularly high. Can't see the development trend of diversification of import channels at all

(Voice of Germany Chinese website) In 2022, Germany imported from China to the highest level of history. "In some products areas, this is quite dangerous -because China is almost dominant in the market of these products." The latest research report released by the German Institute of Economics (IW) pointed out that especially some raw materials, chemical raw materials and electronics Components, almost no other suppliers can be found except China.

The German government calls for [German Economic Circles to reduce dependence on China](#) Essence But for many industrial enterprises and export-oriented enterprises, [China is an extremely important market](#) Essence Chinese Prime Minister [Li Qiang visited Germany this week](#) And the Prime Minister Salz and his cabinet members held a German -Chinese government consultation.

However, according to the observation of the German Institute of Economic Research, in recent years, new development trends have appeared in Germany and China trade exchanges: "More and more commodities from China to Germany, but in the contrary, Germany's export growth has almost fallen into it. Staggering. "Researchers at the agency found the types of products imported from China.

Taking the data of 2021 as an example, in the 298 products worth more than 10 million euros, more than 50% of the imports from Germany came from China. In 2022, 211 of these products increased significantly.

According to a survey by the Institute of Economic Research, in the fields of laptops, magnets, keyboards, and vitamin C, magnesium and caffeine, products imported from China occupy particularly high. "Generally speaking, in the fields of some raw materials, chemical raw materials, and electronic components, the influence of China's influence can be observed." In these fields, the development trend of diversification of import channels is currently not seen.

More reading: [Which aspect of Germany depends on China?](#)

should not make "de -risk" a empty words

Researchers pointed out that when certain products are indispensable for enterprises, and in the visible future, it is almost impossible to be replaced by other suppliers' products, such a development trend is quite dangerous. In this case, Germany will fall into a dangerous dependence.

The author of the research report of the German Institute of Economic Research also said that it is not a topic that is completely decoupled with China or farewell to China. "As for which areas exist in such danger, the company should find them out with the support of politics now." Otherwise, the so -called risk of de -risk is just empty words. "

Most of the Himalayan glaciers at the end of this century will melt

Author: None (Language: zh)

Publisher: None

Time: 2023-06-25T-15:27:00Z

Description: A new research report shows that due to the warming of the climate, by the end of this century, 75% of the total glacier volume in the Himalayan mountain area of Xingdu Kush/Himalayan may be discharged. This will cause the local 240 million residents to face the threat of floods and droughts.

By the end of this century, most of the glaciers in the Himalayas will be melted

(Voice of Germany Chinese) Studies by a team of international scientists show that ice and snow in the Himalayas are accelerated. According to the assessment of the International High Mountain Development Center (ICIMOD) located in Kandu, Nepal, in the 2010s, the melting speed of ice and snow in the region increased by 65% compared with the previous decades.

"We are losing glaciers, and these glaciers will no longer exist after 100 years," said the center's environmental scientist and reporter Philippus Wester.

Xingdu Kush/Himalayas stretch 3,500 kilometers, crossing 8 countries in Afghanistan, Bangladesh, Bhutan, China, India, Myanmar, Nepal and Pakistan.

The report pointed out that if the temperature increases by 1.5 degrees Celsius to 2 degrees Celsius compared with the previous industrialization era,

by 2100, the glaciers in the entire region will lose 30%-50% of its original volume.

Where [Glacier melting](#) The most depends on its specific location. If the temperature rises by 3 degrees Celsius -this is the result of the current global climate policy, if it continues to continue, the eastern section of the Himalayas, the glaciers in Nepal and Bhutan to the end of this century will lose 75% of its volume.

The flood of the Himalayan Glacier Fracture and Roaring Broke in the Indian Dam

The source of water from 200 million people in Asia

There are 240 million residents living in the Kush-Himalayas. The glaciers of this area are also the origin of the world's top 10 rivers, including the Ganges, India, Mekong, Yellow River, Yangtze River, Ilova River, etc. The total population of these large river basins is as high as 1.65 billion, agricultural irrigation, food, energy and energy, and Economic development depends on the above rivers.

Izabella Koziell, deputy director of the International Gaoshan Development Center, said that the water source of 200 million people in Asia rely on these glaciers and snow. Once this ice circle is lost, the consequences are "unimaginable".

The report pointed out that the flow of 12 rivers that originated in the region may reach its peak in the middle of this century. "Although it sounds more water, because the melting speed of glaciers is accelerating ... However, water often appears in the form of floods, not stable water flow." West said that after the peak of traffic passed, the flow of traffic passed the past past past passed. The amount of river water will become less and less.

At present, many residents in high mountain areas use glacier water and snow melting to irrigate crops. However, the time of snowfall becomes more unstable and less and less. This situation is also very unfavorable to the animal husbandry. Some locals have moved from mountain villages to other places to make a living. The melting of the two large amounts of ice and snow constitutes a danger to the settlement of downstream.

Experts said that this situation highlights "the need for emergency action to protect the climate," West said. "Each small increment will have a huge impact. We really need to make efforts in slowing climate warming ... This is our urgent request."

Tropical Storm in Mumbai, India (June 2023)

(Voice of Germany) El Niopy is a natural phenomenon that changes the global weather model. After a lapse of four years, the soil coming back, which may exacerbate the high -owned food inflation.

Last week, the National Oceanic and Atmospheric Administration (NOAA) Climate Forecasting Center stated that the El Nino phenomenon already exists and is expected to "gradually strengthen" in the next six to nine months, which will bring a new extreme weather period to most regions of the world. Essence

"(The phenomenon of Qiang El Niini again) is quite likely.") Professor Ququ(Harald Kunstmann)Said, "If this happens, it can be expected to have extreme climate and abnormal phenomenon that is usually accompanied by this phenomenon."

The Name of Elnino's phenomenon comes from Spanish El Niño (boy), which refers to the phenomenon that the East Pacific seawater will be abnormally heated every few years. It has promoted the floods of the Americas, tropical storms in the Pacific Ocean, and brought drought to many parts of the world, including southern Africa.

These natural disasters have severely damaged fisheries, agriculture, and other economic departments, and they also exacerbate the impact of climate change. In 2016, the El Nino phenomenon caused the hottest year since the record, and scientists worry that it may lead to [global temperature reached a new high](#).

The El Nino phenomenon brings flood disasters to some areas

Earlier this month, researchers at the EU Copenie Climate Change Service Center found that the global surface temperature increased by 1.5 degrees Celsius by the first time before industrialization, and this was the future temperature limit of the 2015 Paris Climate Summit reached a consensus.

"In June, the heating of 1.5 degrees Celsius is not the same as small." Questerman told Germany. "We may soon exceed this threshold, not only for a few weeks, but also a longer period of time."

El Nino phenomenon brings huge economic losses

Even after the most extreme weather passed, the economic impact caused by El Niopy's season will often continue.

According to the study of Dartmouth College, after 1982-83, the economic impact lasted for five years, with a total loss of approximately \$ 4.1 trillion (3.7 trillion euros).

Researchers said in a paper published in the American "Science" magazine that after the El Niopy season in 1997-98, global economic growth has suffered \$ 5.7 trillion.

Cricaham, a doctoral student of the ecosystem and social project of Datmouth College(Christopher Callahan)Said: "We can say certain that social and economy will never recover quickly after being hit." He said that after the El Nino phenomenon, growth may be affected by 14 years or even longer.

Researchers at Datmouth College found that the El Niopy phenomenon from 1982-83 and 1997-98 led to the GDP of the United States in 1988 and 2003(GDP)A drop of about 3%. Agriculture such as Peru and Indonesia accounted for 15% of the country's GDP, and the GDP in 2003 dropped by more than 10%.

India: Hot to suspend class and rest work

The stuffiness of the "Prayagraj" (Prayagraj "in the northern India made it difficult to continue working. The highest temperature in the area on June 18 was as high as 43 ° C, which was 5 ° C higher than the normal value. The summer of India has fallen from April to June, but in the past 10 years, the summer temperature has become more violent. A government activity held by Mumbai in April died of 13 people, prompting some State to suspend classes for a week.

*#

Asian countries are hot!

Thailand: Urgent ice cubes to dispel summer heat

Asian countries are hot!

Bangladesh: Water can carry boats and can cover the boat

Bangladesh is one of the countries with the worst affected by climate disasters in the world. The children in the picture are in the Buriganga to reduce heat. The country's frequent rumors of the devastating hurricane and flood disasters, and the rise of sea level, also caused one-fifth of the country to face permanent flood threats.

Researchers in Dartmouth estimates that from now to 2029, the negative economic impact of the latest El Niño season may reach \$ 3 trillion.

"Economic impact is firstly fisheries. The industry suffers huge losses due to the rise in ocean temperature." Quinsman told Germany, "Then it will attack large agricultural areas in Africa, South America and even North America. If the harvest is not good and the infrastructure is damaged due to the storm, the insurance industry will be affected."

Food and energy prices may rise sharply

The model released by Bloomberg Economic Research Company this week found that the previous several times of El Niño led to nearly 4 percentage

points in the price of non-energy commodities, and oil prices rose 3.5 percentage points, which weakened global food safety.

Bloomberg found that the inflation rate in Argentina and Brazil was about 0.75 percentage points higher, and the inflation rate in the Philippines and India was half a percentage point.

Worried that the El Nino phenomenon may be the most warmed and caused the highest loss in history. Analysts believe that it may also extend the high inflation of food.

The peak of prices after the new crown epidemic may have passed, but it may take several years to return to the 2% inflation target set by the United States and the European Central Bank.

Germany's largest private loan institution Germany said in a research report last week that more and more warnings about the phenomenon of El Nino have led to a significant increase in the prices of coffee, sugar and cocoa in recent weeks. As the harvest is affected by bad weather, other food prices are expected to follow up.

"(Price increase) may have a particularly negative impact on emerging markets. In emerging markets, foods usually account for at least one-third of consumer expenditure. The geographical location of them is more vulnerable to climate change such as floods, and their geographical location El Nino increased this possibility," Deutsche Bank analysts wrote.

In India, agriculture is the cornerstone of the economy, and the annual monsoon is essential for grain production. Indian Reserve Bank President Das(Shaktikanta Das) Recently, it said: "Close and continuous attention ... absolutely necessary, especially when the expectations of monsoon and the impact of the El Nino phenomenon are still uncertain."

Whether the American public has a good opinion of China and is affected by many factors

(Voice of Germany Chinese) polls can transmit public views and intuitively reflect public opinion in real time, but reflect the "instantaneous" state at the time. The Voice of Germany compared the results of the polls involved in the "American people on the Chinese view of China", which has been conducted by Gallop for many years. The results may reflect how American society views the international status of China and its geopolitical impact on the US geopolitical impact on the United States. Essence

overall observation

Gallop has investigated the overall view of the United States in China in the questionnaire since 1979. This year, the two countries have just established diplomatic relations. At that time, 64% of the respondents held a positive view of China and only had a negative view of only 25%. However, in the next few years, the situation has changed. In 1985, the proportion of Americans who held positive views on China fell to 38%, and the respondents with negative

views rose to 51%. From 1984 to 1985, the heads of state and government head of state and government visited for the first time. Since then, the official interaction and economic and cultural exchanges between the two sides have become more active, and the Americans have significantly improved China's perception of China.

After the Tiananmen incident in 1989, the US officials imposed sanctions on China, and the people's perception of China also reversed. During the year, the proportion of respondents holding a positive view of China fell from 72% to 34% of the negative views from 13% to 54%. Over the years, the proportion has been kept in a stable range, and 45% to 60% of the respondents holding negative views.

In recent years, the US -China relations have declined, and the image of China in the international community has been created, which is also reflected in polls. Since 2018, interviewees with negative perceptions in China have continued to rise sharply, reaching a new high of 79% in 2021, and the proportion of people with a positive perception of China has fallen to 20%. The questionnaire results in 2022 are consistent with 2021.

Who is the largest enemy in the United States

Another long -term survey results show that in the past 10 years, since Xi Jinping's main administration, Americans have increasingly felt that China has pose a threat to the United States.

For "Which country is the largest enemy in the United States?" In this issue, 18% of the respondents thought it was Russia in 2015, and 15% thought it was North Korea. %And 9%.

After 2018, the proportion of people in the United States as the number one hostile to the United States began to rise steadily, [2021](#) Increased to 45%, surpassing Russia (26%), and for the first time before other options. In 2022 and 2023, 49% and 50% of the respondents believed that China was the largest enemy in the United States.

Taiwan Strait conflict risk awareness increases

In February this year, the Associated Press and the Chicago "National Public Opinion Research Center" (NORC) in the United States [polls](#) Also show that Americans have serious attention to China (60% of the respondents) have more concerned about Russia (53%).

Specific to threatening methods and degrees, Gallop's questionnaire in 2023 shows that 66% of the respondents believe that China's military power constitutes a "key threat" to the United States. The relevant proportion is 39% and 46%, respectively. In 2023, 64% of the respondents believed that China's economic power constituted a "key threat" to the United States, and 30% believed that they were "important threats", and in 2015, 40% and 44% were respectively.

For the "Taiwan Strait conflict threatens the interests of the United States?" In 2023, 47% of the respondents believed that this would be "key threat" (23% in 2004). "(51% in 2004).

*##### "Balloon" incident exacerbates the tension between the United States and China

Shooting

A balloon in China fluttered over the United States for a few days. On February 4, the U.S. military shot down in the coastal waters of the South Carolina. The United States has accused China of using balloons for espionage. But China said that this is just an out of control meteorological balloon.

*##### "Balloon" incident exacerbates the tension between the United States and China

search

The shot of balloon fell into the sea a few miles away from the coast of South Carolina. The U.S. Navy and the Coast Guard positioned the areas where the balloon fell, and sent helicopters and ships to sort out the wreckage of balloons in the fall area.

*##### "Balloon" incident exacerbates the tension between the United States and China

salvage

It looks like fishermen are fishing a large jellyfish, but in fact, this is a group member of the US military who is responsible for dealing with explosives. This balloon has a diameter of about 61 meters, and the weight is equivalent to a small passenger aircraft.

*##### "Balloon" incident exacerbates the tension between the United States and China

wreckage

Due to the huge balloon size and uncertainty of its security, the United States eventually decided to shoot down at sea. The water depth of the balloon falling is about 15 meters. The U.S. military is trying to salvage more wreckage in order to more accurately understand the actual use of this flying object.

*##### "Balloon" incident exacerbates the tension between the United States and China

tool

The U.S. military uses special equipment such as underwater drones to search and salvage balloon wreckage. The "Explorer" -class marine measurement ship uses the sound of sound to find the wreckage fragments in the fall area. According to the U.S. military, the search area is about 2.25 square kilometers.

*##### "Balloon" incident exacerbates the tension between the United States and China

In a statement on February 13th, the U.S. Northern Command said, "The salvage team found some important wreckage from the balloon fall, including confirming all the main sensors and electronic devices, and large objects of the overall structure."##### "Balloon" incident exacerbates the tension between the United States and China

upgrade

After the United States shot down China's suspected spy balloon, the tension between the United States and China further intensified. This time, the Minister of Defense of China had rejected the US Secretary of Defense Austin to discuss matters related to balloons. China claims that the U.S. shot down is an over -reaction and violates international standards. The U.S. Department of Commerce will add 6 entities related to Beijing's suspected spy ball plan to export blacklists. In the past few days, the U.S. military has shot down three flying bodies over the Alas California Coast in northwestern United States, Yakong areas in northwestern Canada, and the over -the -world of the US -Canada border.

In the past, those who come to be chased. As the two major economies in Asia, China and Japan are both similar in economic development and

essentially different. The analysis of the same and difference of the Sino - Japanese economy is not only the academic hotspot that the theoretical world is concerned about, but also helps market players and policy makers to optimize long -term strategic choices.

From the entry of the empirical relationship between population structure and economic growth, China and Japan exist in the historical evolutionary stage: Japan in 1990 and China in 2020 in 2020, in terms of the static ratio and dynamic direction of the population structure, they are also high. With a long - term challenge of population aging. From the historical data of major global economies, including Japan, there is a non -linear correlation between the population structure and economic growth. The aging of the population structure will cause economic growth to slow down. However The characteristics of evolution, the ratio of labor to the elderly population has two important data barriers. When this proportion drops to about 7.5 and 4.8, the economic growth rate will move down twice. With the key indicators of China's population structure crossing these two data barriers in turn, China's economic slowdown will be a natural objective trend. Although the deceleration is irreversible, it is still available.

Wagner's rebellion ended Russia and Ukraine and even the world?

June 25, 2023

Image source, reuters

Image adding text,

Yofgen Nihogojin

Russia has experienced chaotic and dramatic episodes. In more than a day, Wagner's mercenaries launched a rebellion and marched towards Moscow, and then the rebellion ended unexpectedly.

Let's briefly review what happened:

Image source, EPA/Rex/Shutterstock

24 hours after chaotic, Moscow ushered in a new day. On Sunday, the military rebellion against Moscow had passed.

The BBC reporter interviewed on the streets of Moscow on Saturday. Several people said that they were not worried about the Wagner Group, although they were still on the way to Moscow.

A Moscow told the BBC that they "haven't seen any tanks yet, so we won't worry."

Another person said that in 1991, the Soviet Union disintegrated, and during the Constitutional crisis in 1993, they experienced tanks on the streets of Moscow, so "we will survive no matter what happens today."

A woman named Galina told Reuters that "this is not scared of this. I have confidence in our president and our people."

But another resident Nikolai said the incident was "fearful". He told Reuters, "This is very disturbing, and this is the case for you and your loved ones."

At present, the threat to entering Moscow has passed, but the safety situation is still tight. The order that residents stayed at home on Monday this Monday were still executed.

The Institute of War (ISW), located in Washington, said that the rebellion of Porigjin may have disappeared, but the Kremlin is now facing a "extremely unstable" situation.

ISW analysts wrote: "The rebellion exposed the weakness of the Russian security forces, showing that Putin was unable to use his troops to eliminate internal threats in time, and further eroded his monopoly on military forces."

This analysis also pointed out that the soldiers of the Wagner Group were warmly welcomed by the Rostov residents on the Rosteov on the River on the River.

Image source,/EPA-EFE/Rex/Shutterstock

Image adding text,

In the rebellion, residents took a group photo with Wagner soldiers.

What are the conditions for retiring troops?

Abdulle Abella Sulov(Abdujalil Abdurasulov)Report from Kiev, Ukraine

The negotiations continued for a whole day, and the result was that Porigo agreed to ease the situation that night.

Belarus President Lukashenko is a close ally of Putin. He talks with Pleigo on Saturday.

As a part of the transaction, Porigerin has been allowed to go to Belarus, and the Kremlin said he would revoke all his allegations to him.

Lukashenko's news office said the negotiation was under the consent of Putin.

As part of the agreement, the Kremlin agreed to revoke his prosecution against the leaders of the Wagner Group, and also provided security guarantees to the Wagner soldiers.

Since the beginning of the invasion, Russia has been using Belarusian territory to attack Ukraine, which has effectively harmed Belarus's sovereignty.

The weakening of Putin's control of power has threatened Minsk's Lukashenko regime, which seriously depends on Moscow.

Putin News Secretary Dimitri Peskov said that Wagner's mercenaries can sign the Ministry of Defense Contract, and soldiers participating in the rebellion will not be prosecuted.

Image source, EPA

Image adding text,

Russia, Belarus, and Ukraine are considered the same nation -Mrs. East. The picture shows Lukashenko and Putin.

Is this the ending of the Pryopin and Wagner Group?

A expert told Broadcasting Corporation that Porigerjin moved to Belarus, and the Wagner soldiers were absorbed to the Russian army, which may mean the end of this infamous mercenary organization.

Andrew D'Anieri, headquartered in the American Think Tank Atlantic Council, said the information from Russia was chaotic and unclear, and it was difficult to say what would happen in the end.

But he also said that Wagner's retreat did not mean that all private military companies in Russia were "out".

"Even if they are illegal in Russia in the strict sense, in the past year, we have seen the surge in such organizations."

Image source, reuters

Image adding text,

In 2011, Porigin was served for Putin.

What can this Ukrainian war mean?

James Nixey, head of the Russian Eurasian project in the Chatham Institute, said Ukraine will benefit from the Russian crisis.

Nixey told BBC that Ukraine is likely to continue to "poke Russia" and try to make internal manufacturing in its domestic manufacturing.

He said that Putin was the worst day for President for so many years.

"He was losing the war," Nixey said.

"This is not to say that Ukraine feels very easy to win ... But this is not what Putin expects after President's president for so many years."

The Kremlin's press secretary Dmitry Peskov said the Wagner rebellion would not affect Russia's military offensive in Ukraine.

Western allies in Ukraine close attention

The New York Times quoted people familiar with the matter and said US security officials received information as early as Wednesday, saying that Prittjin was preparing to take action.

What they care about most is how this will affect Moscow's control over its nuclear weapon library.

The US intelligence agencies have been paying close attention for several months, and the tension between Wagner's leaders and Russian Defense Secretary Shoshugogu and others has continued to intensify.

After this incredible 24 hours, the European Union, the United States, and allies are paying close attention to Russia.

The Pentagon issued a statement earlier, saying that the Minister of Defense Austin(Lloyd J.Austin)In the past few hours, the Minister of Defense from Canada, France, Germany, Poland, and Britain discussed this situation.

The statement said: "With the continued development of the situation, the United States will maintain close coordination with allies and partners."

Austin also said that the United States' support for Ukraine will not change.

At the same time, Canadian Prime Minister Trudeau met with senior government officials on Saturday to discuss the situation where Russia was happening.

After the

incident, Putin is no longer strong

_ Steve Rosenberg_

Bbc Russian Editor

Wagner's rebellion is a watershed, which is a very dangerous moment for Putin.

When you take power for so long, you will think that you cannot defeat, and you can survive in any case.

16 months ago, Putin launched a "special military operation" in Ukraine to "safer Russia."

But in recent months, the Kremlin has been attacked by drones, and western Russia has also been shelled.

And now the mercenaries launch an armed rebellion, marching to Moscow, demanding the withdrawal of the National Defense Minister appointed by Putin, and then they decided to retreat.

This is a surprising 24 -hour. In these 24 hours, Putin faced the biggest challenge to its authority since he came to power more than 20 years ago.

The mutiny was over -after reaching an agreement after the Kremlin and Wagner's mercenary group. The Wagner soldiers can return to the base and will not be prosecuted, but their leader Pleigo must leave Russia and move to Belarus.

As for President Putin, after this incident, he was no longer strong.

See what happened in Rostov -Wagner, a private army has been able to obviously easily seize the control of military facilities in a major city in Russia, and then advance north to Moscow.

As a person behind the rebellion, Porigo can still retreat. Although he tried to overthrow Russia's military leadership, allegations against his armed rebellion had been revoked.

Image source, EPA/Rex/Shutterstock

Image adding text,

Vagna's tanks appeared in Rostov on the Don River in southern Russia.

potential influence far beyond Russia and Ukraine

Joe Inwood

BBC reporter, once reported that Ukraine and African affairs

Porigo may have retreated from the edge of the cliff, but the incident in the past 24 hours will fundamentally change his relationship with the President of Russia.

Pricigo has been known as the "Putin chef" for the catering industry. For many years, he and his Wagner's mercenaries have played a key role in Russia's foreign policy, although it is hidden.

In Putin's unable to publicize or unwilling to do publicly, Wagner was used to conduct military intervention.

For example, supporting Syrian President Bashar Assad and trying to interfere with the 2016 US elections on the Internet, Wagner has played an increasingly important role in some of the most chaotic places in the world.

But the place where the mercenary footprint is the most is Africa.

For example, in Mali, a coup in 2020 and 2021 witnessed the establishment of a military power, and Wagner participated in a large number of long -term Islamic rebellions. Although they thought they were there under the instructions of the Russian government, Wagner was really going to the local area.

In the Central African Republic, it is said that they are helping the government, resisting the rebels, and defending the capital. Wagner is accused of having an invasion of human rights.

Given Vagna's may now seem to be excluded by the Kremlin, what will their soldiers in Africa and their government support?

In addition, Wagner also controls a large number of mineral resources, which is the source of most wealth of the organization.

Since Progojin has fallen out of favor, can he still maintain control of these resources?

Russian mercenary organization Wagner Saturday (June 24) [Launched a mutiny](#) The situation in Russia has fallen into a turmoil, and senior US military officials have canceled their trip to the Middle East that day.

Agence France - Presse reported that Mili, the chairman of the United States Chiefs of Staff, was originally scheduled to go to Israel and Jordan, but a spokesman for the joint meeting of the Staff said that the visit was postponed by the "situation of Russia's turmoil".

In addition, the White House National Security Advisor Shalini originally planned to go to Denmark on Saturday to attend meetings about the Ukraine issue, but also temporarily canceled the itinerary and renamed Camp David with President Biden to President's Resort.

After Russia came out on Saturday, the White House claimed that Biden had listened to the briefing of the news. Two main responsible persons in charge

of the Senate Intelligence Committee also said that they "pay close attention to major conflicts between the Russian army."

After the coordinated negotiations of President Lukashenko, Wagner's head of Perigo has agreed to terminate its action in Russia , And ordered the troops to withdraw from Rostov on the banks of the Russian Nanson River .

State Councilor and Foreign Minister Qin Gang met with Russian Deputy Foreign Minister Ludido in Beijing Agence France -Presse Pictures

The official website of the Ministry of Foreign Affairs of China issued a statement on Sunday with the headline position of the "Minister's Activity". State Councilor and Foreign Minister Qin Gang met with Russian Deputy Foreign Minister Rudenko on the same day. "Opinion".

Although the Russian mercenaries, the leader of the Wagner Group's leader of the Wagner Group, Saturday has withdrawn the armed soldiers marched to Moscow on Saturday, this obvious mutiny move has undoubtedly adversely affected the political authority of Russian President Putin and the Russian and Uchia war. China's official news did not explain the specific date of Rudenko's arrival in Beijing, and the outside world could not know whether

the visit to the important allies of Russia China was related to the Wagner incident.

According to Agence France -Presse, Moscow, the Russian capital, is still maintaining a "counter -terrorism action mechanism" this Sunday, and Pleigo, which was announced to be sent to Belarus, is currently unknown.

The outside world noticed that Putin severely condemned Wagner to launch a rebellion and threatened Russia's "survival" on Saturday, and Chinese officials have not yet made public comments. Song Zhongping (transliteration) of Chinese military experts and commentators told Reuters: "China will support Russia and emphasize not to interfere with its internal affairs." The official "Global Times" criticized the illusion that Western media created Russia's "building is about to collapse".

However, compared with the official silence, Chinese folk public opinion responded to Russia's political situation very different.

According to a report from the Taiwan Central News Agency, after Wagner's mutiny, the "Kitchen" (Vagina Group's leader Porigerin) and the "Kurtam" (Wagner Group) once became a popular vocabulary in China. Some netizens have connected Russian soldiers to the history of Chinese, pointing directly at the Anlu Mountain in the Tang Dynasty, but the goal has changed from Changan to Moscow; and netizens suggested that China should take the opportunity to ask Russia to return to the Northeast territory and other Northeast territory. Huang Anwei, a diplomatic reporter of the New York Times, said through Twitter that if Chinese President Xi Jinping was considering attacking Taiwan, the only incident in the Russian and Ukraine War that re -considered him to attack Taiwan was the change of Wagner.

Volkswagen Shanghai Factory Information Picture

(Voice of Germany) last year, Germany's exported cars and engines exported to China accounted for as high as 20%of the total exports of China to China.

According to a new study from the Institute of Economics of Germany, in the first quarter of this year, the motor vehicle and components exported to China by Germany fell by 26%year -on -year. Big landslide. According to data released by the German Federal Bureau of Statistics in May, in the first quarter of this year, Germany's exports to China fell 12%year -on -year to 24.1 billion euros.

Research from the German Institute of Economic Research pointed out that in view of [China 's strong chase in electric vehicles](#) This trend may be the beginning of the long -term weakening of Germany's exports to China. "The previous advantages are increasingly likely to become a disadvantage." The prospects of Germany's exports to China may be further dim.

About a quarter of the car currently sold in China is already an electric car. But the German brand is at a disadvantage in the competition of electric vehicles so far.

Shanghai has become a city of electric

Volkswagen Group has dominated in the Chinese automobile market for more than 20 years, but with the expansion of China's local electric vehicle manufacturers, Volkswagen's market share in China is shrinking. According to the IT home report in April this year, the danger on the terminal shows that in the first quarter of 2023 [BYD Passenger](#) The cumulative risk of the car surpassed the sum of FAW -Volkswagen and SAIC Volkswagen, and officially reached the first brand of Chinese car sales.

The German "Business Daily" also reported that according to data service providers Marklines and the current insurance data from China. In the first quarter of this year, the sales volume of China BYD Group was about 13,000 more than Volkswagen. BYD sold a total of about 441,000 vehicles, equivalent to an increase of 68% over the previous year. Volkswagen's delivery has dropped by 14% to 428,000 vehicles. Data released by Volkswagen Group on May 4 showed that in the first quarter of this year, Volkswagen Group's delivery in China dropped by 14.5%. Among them, the delivery volume in Huachun electric vehicles was 21,500, a year -on -year decrease of 25.4%.

According to data released by Volkswagen Group (China), the Group's delivery in the Chinese market in 2022 was 3.18 million units, a year -on -year decrease of about 4%, and a market share of 15.1%.

Themes: ['中国经济', '关注']

Keywords: ['中国经济', '贸易', '出口', '房地产', '消费']

Type: Article

What are the links between the property market bubble and the growth of foreign trade? The author believes that the overdraft consumption of the property market has increased China's economy's dependence on exports.

It is believed that the growth of foreign trade is obviously not a lot of good, especially when the export structure cannot be improved, such as the increase in the proportion of high -tech products. For the high growth of China's foreign trade in history, many people in the market and society believe that the environmental problems and resource consumption in China in the past are also caused by excessive exports, especially a large number of exports Ordinary products that cannot reflect the cost of all factors such as environmental and resources -but when the global value chain is in an unfavorable position, the exporting country can only get a small amount of benefits; if it continues to be at the bottom of the "smile curve" of the international value chain It will accumulate the cost of external society to deteriorating.

Revelation caused by the rebellion of the Wagner Corps

Author: None (Language: zh)

Publisher: None

Time: 2023-06-25T14:19:00Z

Description: The rebellion of the private legion Wagner not only highlights the vulnerability of Putin's power model, but also reveals the lack of Russian army and intelligence systems. Putin is no longer impeccable, but does this indicate that his rule is close to the end? The German media gave preliminary analysis.

Videos: []

Id: 66026724

The Wagner Legion evacuated Rostov's scene (taken on June 24, 2023)

(Voice of Germany Chinese) [The mutiny initiated by the Wagner Legion in Russia](#) It has attracted widespread attention from the international community. [Tagesschau column in German TV published an analysis article on this](#) Summarize the four important cognitions that the Wagner Army can get from the incident from rebellion to retreat within 24 hours.

The article pointed out: First, Putin's private military model has failed. In the past, Putin successfully expanded Russia's global influence with the help of private troops such as Wagner, and at the same time, he was able to deny his participation in international conflicts. However, the rebellion of the Wagner Army showed that this model of reliance on the private army has long lost control and greatly threatened the stability of the existing system.

Wagner Group "Rebellion" Head: What is the significance of war?

Second, the rebellion exposed the weaknesses of the Russian army and intelligence systems. Within less than 24 hours, the soldiers of the Wagner Army allegedly approached 200 kilometers from Moscow. In the process, the substantial resistance they encountered was minimal. Although it is not clear whether they can continue to move forward at a similar speed, important military bases, such as Rostov, can control the rebels without effort. The Russian army deployed most soldiers in Ukraine or border areas may be the cause of this. The rapid offensive of the rebels exposed Russia's serious deficiencies in intelligence collection and early warning.

Putin is no longer irreplaceable?

The third point of the "Daily News" column in Germany TV is: the leader of the Wagner Army [Porigoin](#) May be a substitute for Putin. To this end, the article reviewed history and pointed out that in 1992, when some Soviet troops opposed President Gorbachev, the public expressed his opposition to the uprising. But now in Rostov and Vornesh, people have not heard similar situations. The videos circulating on Twitter even showed that some people welcomed Wagner to hire mercenaries and expressed support to them.

The article pointed out that although these videos are initially confirmed, it may be just an individual situation, but this may indicate that the Pleigo and the Wagner forces have become a substitute choice for Russia's dissatisfaction. One possible factor is that Porigoin always goes on the front line, which is in sharp contrast to those military leaders who have rarely participated in the war.

The Wagner Corps soldiers shake hands with the people when evacuating southern theater of Russia

The author said: Successful, cruel soldiers and extreme nationalists, this combination obviously resonates with more and more people in Russia because it is largely in line with Putin's long -term information. Although Russia has persecuted the opponents, nationalism is accepted. This opens a door for people like Porigjin, as long as they follow the established rules. [Rebellion of the Wagner Force](#) It reveals the internal risk and limitations of this model.

In the fourth revelation, the author of the article believes: "Putin's unpredictable image has been ruptured. The hesitation and decisiveness he showed in this conflict is in sharp contrast to the image of his consistently

shaped leaders." At the same time, for Putin This rebellion really made his possibility of ending his rule was also obvious in front of each citizen. Germany's Kerba Foundation(Körber Foundation)Russian -issue expert Leslieschübel said to a "Daily News" to German TV: Today, the idea of being president except Putin may have been formed in people's minds. This topic is now now. It will definitely be the discussion of Russian tea after dinner.

The Malaysian Opposition National Alliance (National Alliance) said that the upcoming six states elections are a referendum of the united government led by Prime Minister Anwar, and believes that if the National League's election is victorious, it means the people reject the current federal government.

Mu Yuding, chairman of the National League and indigenous unity, called on June 12 for the first time on June 12th that Liuzhou voters chose the state as a referendum on the united government, and used votes to express their dissatisfaction and anger for the united government and the current situation.

Liu Hua Cai, Acting Chairman of the State Administration and Chairman of the Democratic Party on Saturday (June 24) in the evening of the "Selangor Rise" Political Lecture of the National Alliance, said that Liuzhou voters should choose the state as a referendum on Anwar, and use the ballot to the horse. The 10th Prime Minister of the country expresses the dissatisfaction of the people.

He said: "Now the people's money is not enough, the price is high, and the Lingji exchange rate against the US dollar is defeated, and now it has reached a new low of RM 4.68. ... Let's take the six states as a referendum against the Prime Minister."

In addition, the Islamic Party's Propaganda Director Kerrili pointed out that the upcoming six states elections may impact the united government of the Federal Federation. He said that the federal government will not change due to the results of state elections, but if the Pakatan Harapan and Barisan Nasional in the original ruling state are defeated by the same unity government, it is enough to destroy the stability of the united government.

According to the Iraqi Party News "Haraka" Sunday (25th), Kyrey said on Friday (23rd) in the national alliance in Malacca: "When we win Samimi Lanzhou, Selangor, and Penang, we also, and Penang, and Penang, and Penang, and Penang, and Penang, and Penang, we also, and Penang, and Penang, and Penang, and Penang, and Penang, and Penang, we also, and Penang, Successfully defending the three states of the Iraqi Party (Kedah, Jilandan and Dengjialou), the unity government will shake even if it does not collapse. "

Kerrili is also a member of the Parliament of Pahang and the Lianqi District Parliament. He said: "Think about it, if they can only be in charge of the central government, but other states are governed by the National Alliance. This will be the people rejected their referendum."

The Wagner Group Army of the Russian Group has entered Rostov's occupation of the Russian Southern Military Command and the General Command of the Russian Invasion. Reuters pictures

This Sunday, Chinese officials Qin Gang, a member of the State Councilor and Foreign Minister, met with Russian Deputy Foreign Minister Rudonke in Beijing for the first time.

The official website of the Chinese Ministry of Foreign Affairs published on the same day, "A spokesman for the Ministry of Foreign Affairs asked the reporter about the Wagner Group incident." China said, "This is the internal affairs of Russia. As a friendly partner of friendly neighbors and a new era of comprehensive strategic collaboration, China supports Russia to maintain stability of the country and achieve development and prosperity."

The outside world noticed that although the Russian mercenary organization's leader of the Wagner Group, Pricigin, has withdrawn the armed soldiers marching to Moscow on Saturday, this obvious mutiny move has undoubtedly caused adverse effects on the political authority of Russian President Putin and the Russian and Ukraine War. Essence China's official news did not show that Rudenko's specific date for arriving in Beijing, and the outside world could not know whether his visit to important Russian ally China China was related to the Wagner incident.

The Russian satellite news agency quoted the Russian Ministry of Foreign Affairs on Sunday that in the news that the Vice Foreign Minister Russia and the Chinese Foreign Minister Qin Gang held talks in Beijing on Sunday, "China' s efforts to stabilize the domestic situation on the June 24th incident on the June 24th Express support and reiterate the interest in strengthening unity and further prosperity in Russia. "

The Russian Ministry of Foreign Affairs emphasized that the bilateral relations between Moscow and Beijing are full of "mutual trust"; "the two sides highly appreciate the status quo of Russian -China relations and confirm that they are willing to work together to continue to strengthen the relationship."

Taiwan's Foreign Minister Wu Zhaozheng Associated Press Information Pictures

According to a report by the Taiwan Central News Agency on June 25, when the geopolitical tension between Taiwan and China continued, Taiwan's foreign minister Wu Zhaozheng publicly called in an interview with the

Australian media that Taiwan and Australia should send martial arts to settle in.

Wu Zhaozheng said that there are similar arrangements in Taipei in the United States, Japan, and Singapore. Taiwan hopes that Canberra will send an officer to the Australian officer in Taipei in order to contact the security authorities in Taiwan.

Wu Zhaozheng revealed that officials in Australia in Taiwan have begun to talk to Taiwan's security departments. This is an "important progress", indicating that Canberra hopes to "understand Taiwan's view of how to prevent the worst situation." He said that the Taiwan government also hopes to send a military officer at the representative office of the Australian Australia.

Hong Kong Police Station Headquarters Wikipedia

On July 1, it will be the 26th anniversary of Hong Kong's sovereignty transfer to China. The number of participants and political demands of the "July 1st

"Parade" in Hong Kong also highlight the social status of this former "Oriental Pearl" in the Hong Kong version of the National Security Law.

According to "Hong Kong 01" quoted Xiao Zeyi, director of the Police Department, Xiao Zeyi has recently confirmed that the police have received a "July One Automobile Parade Application" and are making preliminary assessments to decide whether to issue a notice of not opposing.

After attending the ceremony of the Police Academy on the same day, Xiao Zeyi also stated that as the Chief Executive Li Jiazhao said, the police would strengthen patrols and had a logistics staff to patrol in many dense places. Since Monday, the Hong Kong Water Police has also joined patrol assistance to stop searching.

Hong Kong Chief Executive Li Jiachao recently warned that in the past July 1st, some people have undergone social tranquility and do illegal acts. If someone "rolls" July 1 this year, "creating bad atmosphere or destructive activities" must be investigated for its legal responsibility.

Ning Jizhen, member of the Standing Committee of the Chinese People's Political Consultative Conference and Deputy Director of the Economic Committee Associated Press information picture

Ning Jizhen, member of the Standing Committee of the National Committee of the Chinese People's Political Consultative Conference and deputy director of the Economic Committee, warned at the China Macroeconomic Forum on Sunday that the current foundation of economic recovery is not firm, the production and operation difficulties are relatively large, and there are

problems such as unstable market expectations and insufficient market confidence.

Reuters pointed out that China's economic data in May showed that domestic and overseas demand was weak. As the world's second largest economy, China was faltering after the new crown epidemic. The State Council of China recently held a meeting to discuss relevant measures to promote economic growth, and promised to launch policies in a timely manner in order to take more powerful actions to cope with changes in the economic situation. At the same time, China has also lowered the quotation rate of the benchmark loan market for the first time in 10 months. Although economic analysts generally believe that the People's Bank of China will further take measures to reduce loan interest rates, but because private enterprises and families are unwilling to borrow, the relevant financial easing policies may damage bank banks that are already in response to the pressure of profit margins.

Ning Jizhen pointed out that macro -control must grasp the rhythm, and the first half of the year is about to end. The most important thing is that in the third quarter, the relevant "policy can come out early and come out early, and it can be coming out soon."

Since the start of the Russian and Ukraine War, Sino -Russian relations have continued to warm up. Xi Jinping also visited Russia to meet Putin in March.

(Voice of Germany) Chinese Foreign Minister Qin Gang met with Russian Deputy Foreign Minister Andreyrudenko on Sunday (June 25) in Beijing. According to the Chinese Ministry of Foreign Affairs released the "Ministry of Foreign Affairs spokesman to answer the reporters on the Wagner Group Incident" manuscript on the 25th, China said that it supports Russia to "maintain stability of the country." This is [Porigjin](#) (Yevgenyprigozhin) led by [Wagner Mercenary Group into Moscow on the 24th](#) Later, Beijing made the matter for the first time [comment](#) Essence

The Chinese Ministry of Foreign Affairs stated on the 25th that the Wagner incident was Russia's internal affairs, and China, as Russia's "friendly neighbors" and "new era comprehensive strategic collaboration partners", supported Russia to "maintain national stability and achieve development and prosperity."

Agence France -Presse pointed out that when Vladimir Putin, Russia's President of Russia, was accepted by the amnesty agreement and Prigogin agreed to exile Belarus, Beijing only commented on the turbulent Russian weekend on Sunday evening.

The Associated Press reported that the Russian Ministry of Foreign Affairs stated that during the country's deputy foreign minister Rudenko's visit to Beijing on the 25th, China announced its support for Moscow. According to Russian, "China expressed its efforts to support the Russian federal leaders on June 24 to stabilize the state of the country and reiterate the intention of both sides to double unity and promote the further prosperity of Russia."

The report states that it is unclear whether Ludido's visit to China is in response to the Wagner rebellion.

Russian Deputy Foreign Minister Ludido went to Turkmen to participate in the Cross -coast Summit in 2022.

According to the Chinese Ministry of Foreign Affairs, in addition to meeting Qin Gang during the visit of Ludido, he also held talks with Chinese Deputy Foreign Minister Ma Chaoxu.

According to the statement announced by the ministry, Ludido and Ma Chaoxu agreed that in terms of maintaining the security and stability of the region and promoting the common development of the countries, China and Russia have played an important role in the "Shanghai Cooperation Organization" of member states. As a result, the two countries will strengthen collaboration. Promote the development of the organization.

Ma Chaoxu also said, "under the complicated and severe international situation," China and Russia should communicate in a timely manner to ensure that "the relationship between the two countries is stable and far away, and the common interests of the two sides should be safeguarded."

In recent years, China and Russia have continued to warm up economic and diplomatic exchanges. Since Russia's invasion, strategic partnership between the two countries has become increasingly closer. Although Beijing has always advocated to maintain neutrality in the Russian and Ukraine War, it has also been criticized by Western countries for rejecting to condemn Moscow and its friendly relations with Russia.

Agence France -Presse quoted analysts saying that China is currently overdue in its relations with Russia, and as Moscow is getting more and more internationally isolate, China 's influence is also strengthening step by step.

North Korea is also quite Russia

On the 25th, the Associated Press quoted the North Korean official media to China Society (KCNA) that North Korea fully supported Moscow's response to the rebellion of the Wagner Group.

According to reports, when meeting with the Russian Ambassador to Pyongyang, Alexander Matsegora, North Korean Deputy Foreign Minister Lin Tiantian "firmly believes that the recent armed rebellion in Russia will be successfully suppressed" and said that "the powerful Russian army and the people will definitely Overcoming the test and suffering, and in the face of the special military operations of Ukraine, bravely won. "

The Associated Press reported that Leif Eric-Easley, an associate professor of international research at the University of Lihua University, said that the invasion of Ukraine threatened "Russia's country stability" and "it will have an impact on Russia, China, and North Korea. Therefore," Beijing and Pyongyang officials will definitely be considered to be avoided repeating the mistakes of Moscow Essence "

Wagner Group "Rebellion" Head: What is the significance of war?

Description: Analysis believes that Putin's impeccable and invincible halo has been poked. In addition, except for Putin, the Russian Defense Minister, Chief of Military Staff, and many leaders of the Security Department have not appeared publicly since the mutiny, which caused external speculation. Dmitri Ilovesky/Associated Press Sunday, Russians expressed their support for the Kremlin in Moscow.

Images: ["[25russia-lede...](#)"]

Category: 国际

Type: Article

On Sunday, Russia was filled with confusion and uncertainty, and in the deepest government crisis in 30 years -an open military rebellion -one day

after being resolved, President Putin and the mercenary group leader Ye Fuken Ni Priego did not appear in front of the public.

Although the National Television Station promotes the unity and "maturity" of Russia, the conclusions of the independent commentators who evaluate the loss are that Putin's impeccable and invincible halo has been pierced. Some people questioned why most of the Russian leadership did not show up nor sounded.

In addition to Putin, the Minister of Defense Sergei Shoigu and the Chief of Staff of the Russian Army Valley Glasimov have been from Friday night Bingchang Since the beginning, there have been no public appearance. Many people in the country's security department did not appear in the end.

"Where is the leadership of the Ministry of Defense when the armed forces are close to Moscow?" Yuri Cortonak wrote. He is a small group of influential military bloggers, who expressed support for the Ukrainian war but criticized but criticized. He asked whether foreign enemies can also enter the capital easily?

advertise

Leaders of all countries in the world have also expressed their opinions. State Secretary of State Brinken said on Sunday that Poligal's rebellion exposed Putin's control of power. "This is a direct challenge to Putin's authority," Brillin's "[Facing the whole country] in CBS station"(<https://www.cbsnews.com/news/face-the-nation-full-transcript-06-25-2023/>) » (Face the Nation)The show said.

On the weekend, the leader Pleigo, who was called the mercenary, launched a mutiny against the military leadership, nearly 24 hours He eventually ordered the cancellation. But the damage has been caused, especially because he violently criticized the incompetence of military leaders, and also questioned the reason for the Kremlin to invade the neighboring country first.

Russians -and the whole world -scared watching his armored team is getting closer and closer to Moscow, and hardly encountered armed confrontation, this pose a threat to Putin And worrying that this country with nuclear weapons will break out of civil war.

"Putin and the country were severely hit," Tatiana Stannovaa, the founder of political analysis agency R.Politik. She predicts that this will have a significant impact on the Russian regime.

On Saturday, the Wagner soldiers evacuated from the headquarters of the southern Military Region of Russia and returned to the station. Reuters

Steinnova pointed out that in Putin angrily, it was Poliger, who was "behind the knife behind", stopped as his long -term ally. She wrote that Pritigon "found that he was not ready to play a revolutionary role."

"He was not ready to face the fact that Wagner was about to arrive in Moscow. There, his only choice was 'occupying the Kremlin' -This action will inevitably cause him and his soldiers Ya wrote.

advertise

Filterlabs.ai is a company that tracks Russian public opinion by monitoring social media and Internet forums. A new analysis of it found that Pryigon was also promoted by the Kremlin. In addition, visiting the Telegram channel controlled or supported by Pryigo has become more difficult, and the user reports that the speed of these channels has become slower.

Filterlabs found that the public's support for Porigon and Wagner fell significantly.

"If you want to make Pryigo's action, he needs to get high support in Moscow," [Filterlabs analysis said](#) Essence "Although he has his own support foundation and media propaganda, it has not been realized."

As a result, the two sides reached an agreement.

The Wagner troops will retreat, and Perigon can go to Belarus in neighboring countries and avoid criminal charges. Wagner soldiers will also be pardoned.

The Kremlin spokesman Dmitry Peskov said that the agreement was reached to "avoid bleeding, avoid civil war, and avoid unimaginable conflicts." He did not hint that the mutiny would cause any changes in the Russian military leadership -as Porigo's request -and said Russia would continue to advance military operations in Ukraine.

Last year, Russian President Putin and Belarus President Lukashenko were in St. Petersburg. Sputnik, via agency-presse-getty images

Agreement to resolve hostile operations is considered to be the credit of Putin allies and Belarusian leader Lukashenko. If Putin falls, Lukashenko is certainly difficult to protect himself, so helping his supporters are also helping himself.

"Putin lost, because he exposed how fragile his system was, how easy his authority was challenged," said Pavel Slunkin, former Belarusian diplomat and analyst of the European Foreign Relations Commission. "Porigo challenged, and the attack was so bold. Then he chose to retreat and looks like a loser. Only Lukashenko is a profitable person."

advertise

With the re -evaluating Putin's authority in China and other allies, even if the rebellion was suspended, it may still affect Russia's international status.

On Sunday, Pritigo kept silent. The day before, people saw him driving away from the military headquarters of Rostov on the Rosteov on the southwest city. His troops occupied there during the rebellion. A Russian independent broadcasting company sought a comment from the spokesman for Porigo. The answer was that he had no time for the time being, but he soon began to respond to the media. In addition, as a military leader, the ambition of Porigo may conflict with the intention of Lukashenko, and the latter has always tried to avoid Belarus from being involved in the war.

On Sunday, the road to Moscow was blocked by roadblocks. Maxim shiPenkov/EPA, via shutterstock

"For Lukashenko, it is very dangerous to let Wagner stand in Belarus," said Belarus Political scholar Dmitry Borkhnuts. He had taught at an elite university in Moscow and later became an opposition event person.

"Porigen is a" Z "patriot," Borkines said. The "Z" letter has become a symbol of the Ukraine conflict. "He supports this war and wants to create an empire, but Lukashenko is afraid of such an empire."

advertise

In the slogan of "Wagner" in the local resident, Wagner soldiers [left one after another](#) The military fortress on Rostov on the banks of the river. I don't know where they will go.

This mercenary organization has served as a pioneer in some of Russia's most efficient military operations in Russia. They claim that they are facing a decision: either submit to the Russian Ministry of Defense, which they openly despise and [controlled by them](#) Either it was disbanded.

Russian Defense Deputy Minister of Defense Nicholas Pankov said on June 10 that many of the country's "Volunteer Corps" need to sign contracts with the Ministry of Defense before the end of this month. A few days later, Putin

told a group of pro -military bloggers that the contract should be signed as soon as possible.

Porigen did not intend to bow his head to the Russian military commander, and he often criticized the latter's incompetence. "No one will sign these contracts," his [Declaration] on June 14th Statement It is expressed in it.

By Sunday, he did not know if he could still do it.

For Ukraine, although this mutiny may affect Russia's war actions, analysts believe that if the Russian army is not forced to withdraw the front line to prepare Moscow, today's situation is not too much opportunities.

On Sunday, the rescue staff searched in Kiev's apartment. One day ago, a high -rise building was hit by the missile. Five people were killed in the attack. Brendan Hoffman for the New Yorktimes

The Russian offensive continues. Local officials said that before dawn, the Russian army shot a five -story apartment building in Hermuson, southern Ukraine, causing a 44 -year -old man to die and a woman trapped under the ruins.

Ukraine President Zelei seized the opportunity of this brief rebellion and reiterated his information again, that is, Ukraine was fighting in Europe on behalf of Europe with a turbulent neighboring country.

advertise

"Today, Russia's leaders have lost control over everything," Salianzki said in a video speech on Saturday night. "Complete power. Old chaos. There is no predictability at all."

Although there was no name for the name, Zelei Sky mocked Putin.

"I want to say in Russian: The man in the Kremlin is obviously very scared. He may be hiding somewhere and dare not show up," he said.

The Wall Street Journal reported that China expressed interest in Taiwan's elections when he visited China. Reuters information.

According to a report from the Wall Street Journal, a person familiar with the matter revealed that the US Secretary of State Brillin's recent talks with senior Chinese officials during the recent visit to China, Taiwan's upcoming presidential election has become an important issue. The report said that Beijing tried to understand Washington's interest in Taiwan's elections and

expressed their concerns to the Democratic Progressive Party's presidential candidate to Brinkel.

The Wall Street Journal reported that these people know that people know that Chinese officials have hinted that the political position of Taiwan Vice President Lai Qingde may exacerbate the tension of Taiwan Straits and further damage US -China relations. Chinese officials obviously want to be able to fight for American cooperation. They mention(George W.Bush)How to send a warning to another Taiwan President and DPP leader Chen Shui - bian. The above -mentioned persons said that during the meeting last week, Chinese officials asked Bronken whether the United States had vested benefits for the results of the Taiwan election in January next year, and whether Americans regarded the DPP as friends.

These insiders said that when answering these questions of China, Brintken reiterated the position of the US government, that is, during the election of Taiwan, the United States will be impartial and do not support any intervention in the election process.

At present, neither the Chinese Ministry of Foreign Affairs and the US State Department have not returned to the reporter's comment request.

Gates and Musk why are they received in China in China

At 2:17 am on June 26, 2023

Image source, getty image

Image adding text,

Beijing Street TV is playing Xi Jinping to meet with Gates.

In half a month, Tesla's CEO (CEO) Elon Musk and Microsoft founder Billgates visited China successively. High -standard receptions aroused attention -Musk, in the 44 -hour visit to China, densely met with Chinese Minister of Foreign Affairs Qin Gang, Minister of Industry and Information Technology Jin Zhuanglong, and Minister of Commerce Wang Wentao.

Reuters quoted people familiar with the matter and said that Musk also met with Chinese Deputy Prime Minister Ding Xuexiang before leaving China, and the meeting did not appear in public schedule and foreign reports. Ding Xuexiang has long been considered Xi Jinping's chief of staff. After the 20th National Congress, he ranked among the Standing Committee of the Politburo and served as the executive vice prestigious of the State Council.

Bill Gates sat with Xi Jinping and talks face -to -face. Xi Jinping said to him, "You are the first American friend I met in Beijing this year." Previously, Xi Jinping met with Gates twice in Boao, Hainan. The first visit to the United States in 2015 also met with him in Seattle.

Tim Cook, CEO of Apple, visited China in March. At that time, he met with Chinese Prime Minister Li Qiang and was officially elected from Li Qiang at the "two sessions."

But on the other hand, well -known foreign companies such as Deloitte, Micron, Bain, Mingz, and Anstela Pharmaceutical in Japan have been densely suppressed by the Chinese government this year. The U.S. Chamber of Commerce also issued a report saying that it is increasingly worried about the negative impact of geopolitical disputes on the business in China.

So why do Gates and Musk enjoy super -standard treatment in China? Why do the Chinese government treat different foreign companies differently? Under the increasingly tense relationship between China and Europe and the United States, do Chinese and foreign companies still need each other?

"Catfish Effect"

"Tesla and Apple are like 'catfish'. A scholar who has been teaching in business schools in China and Hong Kong for a long time introduced to the BBC in Chinese that the sardines in the fishing boats were almost dead. They were all alive, because the captain threw a catfish inside to stimulate the desire to survive, but survived. This is the "catfish effect", that is, in an

ecosystem, a strong man is introduced, which will inspire the weak to become stronger.

[Video-1-Link:/WS/AV-EMBEDS/CPS/ZHONGWEN/SIMP/World-65981944/P0DVV8F5/ZH-HansS]](<https://www.bbc.com/ws/av-embeds/cps/zhongwen/simp/world-65981944/p0dvv8f5/zh-hans>) **Your equipment does not support playing multimedia materials** video plus injection text,

Tesla's price cut twice in March to protest

Tesla is particularly the same. As the earliest and fastest companies in this industry, after entering China, the entire industry chain has been required to be low -cost. Zeng Yuqun in the Ningde era complained that Tesla is radically requested that they have fallen cost. It also dropped again.

This "catfish" has made China's entire electric vehicle industry chain less cost and higher efficiency. Although the domestic market competition has intensified, its external competitiveness has strengthened.

"In the process of in-depth participation in globalization, China has won the title of 'World Factory' very early. However, China has very few self-owned industrial manufacturing products occupy a place in the international market. Of course, there are many, but this is all home appliances, and it cannot be regarded as a large industrial manufacturer. "Anbang think tank said in an analysis sent to BBC in Chinese that the problem reflects that although China is a manufacturing industry with large-scale manufacturing capabilities Big power, but not a real manufacturing power.

"This situation has begun to change now, and it first appears in the automotive field," said Anbang Think Tank.

Image source, getty image

Image adding text,

Musk arrived in China by his private jet, and this trip was highly confidential.

In fact, China has become the world's largest exporter of electric vehicle. According to data from the International Energy Agency (IEA), about 35% of the global exported electric vehicles in 2022 came from China, and this ratio in 2021 was 25%. This year, the volume continued. In April, the export of new energy vehicles in China reached 91,000, an increase of 1028.5% year-on-year, an increase of 29.4% month-on-month, accounting for 31% of the passenger vehicle export volume.

Similar examples also occur in the smartphone industry. In 2007, Apple launched a cross-era smartphone iPhone. At that time, Cook was the core trader behind the Apple's supply chain system. Apple continued to send top technicians from China to buy customized devices for billions of dollars for suppliers to buy billions of dollars for billions of dollars for suppliers, so as to drop billions of dollars for suppliers to buy more than billions of dollars for suppliers, so as to throw billions of dollars for suppliers to buy more than billions of dollars for suppliers to buy customs billions of dollars for suppliers, so as to throw billions of dollars to suppliers. Developing some exclusive technologies; even in order to achieve the integration of laptop shells, Apple bought almost all of the world's most advanced CNC machine tools in the world, and they appeared collectively in Chinese factories a few months later.

When Cook first appeared in the CEO position in 2011, only eight Chinese companies in the 156 suppliers of Apple. Under his governance, in the top 200 main suppliers of Apple in 2020, 96 Chinese manufacturers reached 96.

These companies involved in the Apple supply chain system are called "fruit chains" companies. They cover important components such as screens, antennas, sensors, and cameras. After the Apple buying period, they can sell technology to Chinese companies.

Although the saying "Apple eats meat and drinks soup" in the industry, under the blessing of this supply chain, China's smartphone companies reached the pinnacle of 522 million units in 2015, accounting for 40% of the global market.

Under the influence of Apple, this "catfish", Chinese mobile phone manufacturers have used half-years in a relatively high-end field for eight years. China hopes Tesla can also achieve similar effects.

Image source, getty image

Image adding text,

Cook visited China in March. In addition to Prime Minister Li Qiang, he also met the Minister of Commerce Wang Wentao.### "Stolen Fire"

"For China, Bill Gates is more like a 'stolen fireman'. There may be exaggerated components, and many people may disagree. But he comes earlier enough, and when he comes, it is the giant posture." The above scholars say.

"Fire stolen" comes from Greek legends, that is, Prometheus, stolen fire species from the sun god Apta for human beings.

In 1994, Bill Gates arrived in China for the first time and promoted Windows 95 into the Chinese market.

In China at that time, computers were fresh stuff. They even heard the Internet. Until 1995, Ma Yun, who was 31 years old, first came into contact with the Internet. At this time, Bill Gates was 39 years old. The position of the richest man in the world has been maintained for 13 consecutive years.

Just two years later, the Microsoft Asia Research Institute settled in China. This is the second basic scientific research institution opened by Microsoft overseas. It is the largest research institution in Microsoft outside the United States.

This decision has benefited the Chinese science and technology industry, because this research institute has later become the "Huangpu Military Academy" in the Chinese science and technology industry, and has produced a long string of well-known scientific and technological talents: Li Kaifu, Zhang Yaqin, Shen Xiangyang, Zhang Hongjiang, Huang Changning, and Huang Changning,,, Huang Changning, Huang Changning, and Huang Changning, and Huang Changning,, Huang Changning, Huang Changning, and Huang Changning,,, Huang Changning, Huang Changning,, Huang Changning, Huang Changning,,, Huang Changning, Huang Changning, Huang Changning, Huang Changning,, Wang Jian, Li Shipeng, Lin Bin, Zhu Wenwu, Tang Xiaou, Sun Jian, etc. Behind them are Baidu, Alibaba, Shantang Technology, Viewing, Xiaomi, Tencent Science and Technology News, and other Chinese cloud computing and artificial intelligence fields Essence

But when these occurred, Bill Gates retired from Microsoft in 2008 and turned its main energy to the Bill and Melinda Gates Foundation to start charity.

The outside world rarely noticed that Gates still retained a title at the time, the chairman of the US Tyra Energy Corporation. There was a contact with Chinese leader Xi Jinping through this company.

In 2014, the website of the National Energy Administration of China published an article entitled "Bill Gates Talking Nuclear Energy". In this interview, Gates said, "It is Tyra Energy Company This company has an innovative design that can greatly improve the safety performance of nuclear energy, so that nuclear energy can be a very exciting way, which can provide large -

scale, safe, and clean energy. "Gates said that this nuclear energy technology is doing the line. The wave reactor and hope to successfully build a demonstration sheet by 2023.

[Video-Link:/WS/AV-EMBEDS/CPS/ZHONGWEN/SIMP/World-65981944/P09742vj/ZH-HansS]](<https://www.bbc.com/ws/av-embeds/cps/zhongwen/simp/world-65981944/p09742vj/zh-hans>) **Your equipment does not support playing multimedia materials** video plus injection text,

Bill Gates: Reaching the global greenhouse gas zero emissions "will be the most powerful thing humans have done."

Less than a month after being elected as the President of the State in 2013, Xi Jinping attended the Hainan Boao Forum for Asia and met Bill Gates during this event.

In 2015, Xi Jinping talked with Gates again in one -on -one in Boao. In the same year, Xi Jinping visited the United States for the first time after he came to power. One of them was Gates's Big Camp Seattle. There, the two had private talks. According to the documentary "Decoding Bill Gates", this talks were a breakthrough, and the two sides signed a contract. In September 2017, Gates and China Nuclear Group set up a joint venture with Global Innovation Nuclear Energy Technology Co., Ltd., each holding 50% of its shares. It seems to be bound to build the first fourth -generation nuclear reactor in China to build the first fourth -generation nuclear reactor.

However, after Trump came to power, the Sino -US trade war also started at this time, and the bilateral relations between China and the United States deteriorated rapidly. On October 11, 2018, the U.S. Department of Energy announced the "Framework of the United States' Nuclear Energy Project for China". In the ideal fetus of the fourth -generation nuclear reactor in China, Cat, in this regard, Gates' partner in Tyra energy said, "We have always knew that there will be a political impact, but never thought it was from our own government".

Visiting China in 2019, Gates did not meet Xi Jinping. Since then, the new crown epidemic broke out. In February 2020, Xi Jinping replied to Gates and thanked him for his support for the prevention and control of the new crown pneumonia.

In the following three years, under the leadership of Xi Jinping, China experienced strict control, "white paper revolution", and economic turbulence;

Gates was trapped in a scandal of associated with sexual criminals, as well as divorce with his wife Melinda.

In 2023, the two met again after a lapse of four years, but in public reports, they did not mention energy cooperation again.

"I put a Microsoft Research Institute in China in the 1990s. In the past few years, I wanted to put a new type of nuclear power plant in China, so I called him 'stolen people'." The above scholars said that in the final analysis, China wants to be a big country, whether Cook, Musk, or Gates, can help China get rid of the low level of the industry and complete the "big country dream", and can be received by hyperpost.

Image source, getty images

Image adding text,

Unlike many peers, Apple has a huge market share in China.

Demand and vigilance under Sino -US relations

It is not difficult to observe that not all foreign capitals can get water like American companies such as Tesla and Apple.

Colmraffrty, chairman of the American Chamber of Commerce (AMCHAM China), told the Chinese media that the global anti-risk capabilities of SMEs and US-funded enterprises are relatively weak, so many of the epidemic have closed Chinese business; coupled with strict control in recent years In the following, it is even more difficult to enter China on the spot. New decisions to enter China or expand production and investment are even more difficult. Few new enterprises enter China.

Foreign companies seem to be worrying in China. According to data from the Statistics Bureau of China, the total profit of industrial enterprises above designated size in the first two months was 887.21 billion yuan, a significant decrease of 22.9% year-on-year. Among them, foreign companies, Hong Kong, Macao and Taiwan business investment enterprises decreased by 35.7%, the largest decline.

In addition, since this year, Deloitte, one of the world's four major accounting firms, has been severely punished in China; the Shanghai office of Bain, the world's three major management consulting companies, has been assaulted by the police; on May 21, China announced the blockade of the Meiguang chip. Order; March, the Beijing police raided and closed the US Survey Corporation Mintzgroup in Beijing.

The "AMCHAMCHINA) recently released the" 2023 Annual Business Survey Report in the United States and Chinese Enterprises in the United States "shows that 49% of member companies believe that they are more" unpopular "in China compared to the previous year. The consumer industry is as high as 56%.

Some are active choice; some are passively suppressed.

"Some people leave, and some people come, such as Musk's Tesla, large - scale investment in the Chinese market. This represents a very different understanding of Western entrepreneurs in the Chinese market." Chen Gong, the founder of Anbang think tank, said to BBC in Chinese. [China Promoting State -owned Enterprises Disable the "Four" accounting firms or decouples with international investment Foreign capital faced by foreign investment from Volkswagen to Delois Bein's epidemic in China Several things you need to know in China and the United States signing audit supervision and cooperation agreement * Why does the US -China Semiconductor War entering the artificial intelligence AI chip in Deepwater District become the key](#)

Image source, getty images

Image adding text,

The picture shows the Tesla factory (information photo) under construction in 2019.

"China's attitude towards different foreign investment is also 'clear love and hate'. The foreign investment that is not waiting is to sum up: the natural monopoly industry, involving security." "In the natural monopoly industries such as oil, telecommunications, banking, electricity, and aviation to build a huge state -owned enterprise group, the others completely withdrew. In these industries, there are very few private enterprises in China, not to mention foreign companies.

And financial security and communication security, and there is a controversy in China and the United States involving audit drafts. The consulting company has been identified by the Chinese side to play the role of commercial spies, so that more and more foreign companies are involved in the increasingly tense confrontation between China and the United States.

Tian Yumiao, a professor at the University of West Prudential Liverpool University, told BBC in Chinese that the Chinese government may be the most pragmatic political institution in Chinese history, and "Sun Tzu's Art of War" pays attention to "divide and rule". Therefore, for some American

companies and individuals who are positive for China's economic and social development, China will distinguish between companies and individuals who have taken the "sanctions".

"Sino -US economic decoupling is actually a very small event. The Chinese side can choose to decide with, how to decide, and when will it be decoupled." Tian Yumiao said.

There is also a voice in Chinese social media that, for investors, risks are not Sino -US relations, but confidence in Chinese policies and economy. Chinese leaders may solve the confidence of individual enterprises through high standards, but the confidence of overall foreign capital needs more policies in good faith.

Musk's visit to China may just prove this statement. On the first day of his visit, Tesla's stock price rose 5%, and the market value increased by nearly \$ 25 billion, making him return to the world's richest man. But at the same time, there was no big improvement in China's A -shares, and the RMB against the US dollar was still falling.

The Ukrainian army has increased its offensive and tried to recapture the control of Bachmut City (Reuters)

Ukraine has accused the Russian army of plans to bomb the Zapolo Nuclear Power Station. At the same time, the Ukrainian army has increased its attack on the Eastern Front on Sunday, trying to use the "chaos" caused by the Wagner troops in the Russian rebellion crisis, while the US President Biden Biden served Discuss the progress of counterattack with Ukraine President Zeelianzki.

At this point, US Secretary of State Anthony Brinchen believes that Ukraine's counterattack may last for several months, and Russian President Putin said he is the best priority to consider the success of Ukraine's military operations.

Kirilo Budanov, director of the General Administration of Intelligence of the Ministry of Defense in Ukraine, said Russia approved a plan to bomb the Zarper nuclear power plant.

Budhov has confirmed that Russia has set up a lure -killing device in the cooling pool of nuclear power stations. If it stops running, it will cause the reactor to melt within 10 hours to two weeks, and the explosion will trigger nuclear disasters.

Ukraine President said earlier Sunday that the world's insufficient response to the explosion of the Khahofka Dam was sufficient, resulting in a terrorist attack on Russia to launch a terrorist attack on the Zapoloz Hotel.

At the end of February 2022, the Russian army controlled the nuclear power plant in southern Ukraine within the first few weeks of the war.

Ukrainian attack

Regarding the news of the battle, General Alexander Sierski of Ukraine ground forces said that the Ukrainian army was marching towards Bachmut and pointed out that the Ukrainian army attacked the equipment and vehicles of the East Russian army and caused losses.

Subsequently, a spokesperson for the Eastern Ukrainian combat commander said that his national army occupied the Lord in the Bachurut region, launched an attack on the enemy, and emphasized that the Ukrainian army has pushed 600 meters to 1,000 meters from north and south from Bachurut today.

On the other hand, a Peninsula TV reporter monitored the intensive military operations of the Ukrainian army to the Bachurut region of Donetsk Province, eastern Ukraine.

The reporter reported that the Ukrainian army strengthened its positions in northern and southern Bachs.

Earlier, the Deputy Minister of the Ministry of Defense of Ukraine announced that the Ukrainian army attacked 6 towns in northern and southern Bach at the same time.

Similarly, the commander of the third brigade of the Ukrainian army, Andre Bettzki, said that the Ukrainian army carried out what he said in the West Bank of the "Nortston-Donbass" on the south of Bachurut Clean up.

Andre Bertitzki said, "Our fighter has defeated the 3rd Battalion of the Russian Federation 57th Guard Motorization Infantry Brigade", and he also emphasized that 30 Russian armed men were killed, 50 were injured, dozens of people, dozens of people, dozens of people Captured.

On the Russian side, the spokesman of the South Russian cluster Vaham Astefayev said that the Russian army repelled the offense launched by 10 Armor vehicles in Ukraine to Bachmut.

Astefieiev added that his troops repelled the four attacks near Bachmut and destroyed a infantry force on the axis south of Donetsk.

In Halkov, the Russian Western spokesman Sergei Zipinski said that his troops launched 11 missile Attack.

The Russian "Redovka" website released a video clip, saying that the video was the goal of Harkov's Ukrainian organization.

and Zelei

Regarding political progress, the White House stated that President Joe Bayeng discussed the progress of Ukraine's counterattack with Ukrainian President Zelezzky and reiterated Washington's support for Kiev.

Ukrainian President Zelei said that the incident in Russia exposed the weakness of Russian President Vladimir Putin, and emphasized that he discussed these in the telephone conversation with US President Joe Biden on Sunday riot.

In a statement, Zelei called on a statement to put pressure on Russia worldwide, and said that he and Biden also discussed defense cooperation focusing on strengthening remote weapons.

Against this background, Ukraine Minister of Defense Oleksey Pitzonikov said he discussed the turmoil of Russia in the telephone conversation with US Secretary of Defense Oandin on Sunday, saying that the Russian authorities were "weak", and the Russian authorities were "weak" and He also pointed out that things are "moving towards the right direction."

Leznikov added that they also discussed Ukraine's counterattack and strengthening the Ukrainian armed forces.

Speaking

Earlier, US Secretary of State Anthony Brinkeng said that Ukraine's counterattack is still in the initial stage and may last for several months, and the Ukraine has everything to success.

Brinkin added that Ukraine's counterattack was progressing smoothly, and emphasized that Russia has dispersed due to the crisis of Russia, creating additional advantages for Ukraines.

U.S. Secretary of State Brillin said, "We do not have a complete information about Russia, nor have we seen any military leaders being fired. I think Russia's riots may last for weeks or months."

Since June 4, the Ukrainian army has launched a counterattack in the eastern and southern parts of the country, and has been confirmed that 8 cities and

villages have been regained, especially the two provinces of Donetsk (East) and Zaporizhzhia -(southeast).

Kiev acknowledged that the progress of its troops was slower than expected and confirmed that the main operations had not yet begun, while Moscow said that the Ukrainian military had suffered heavy losses and did not make significant progress.

Putin's priority matters

On the other hand, Russian President Putin said that Russia is capable of achieving all the plans and tasks it formulated, including special military operation plans for Ukraine and economic plans for the country.

Putin added that Russia also attaches importance to economic development while strengthening national defense capabilities.

Fifty years after the end of the Vietnam War, the unblasted bullets were still

discovered(Peninsula TV Station)In central Vietnam, when the 62 -year -old Ho Sy Bay turned the soil in his own garden, he encountered something harder than sand or soil. He brushed away carefully, realizing that he was staring at an unbroken missile.

Although SY was not sure whether the fuse was still intact, he still picked up the bomb and carefully placed it in the bushes on the side of the vegetable field.

SY told the Peninsula TV at the home of Guangzhi Province, "I discovered it last Thursday." He also said that he immediately informed local officials. "Sometimes I also find other objects. After the war, I started to work in waste collection and discovered many types of explosives. As early as 1975, when I was 20 years old, I would use a metal detector to find larger explosives and I would use a more explosives and and I used a metal detector to find greater explosives and and I used a metal detector to find greater explosives. Sell it. "

Behind SY's house is a crushed ruins of a church. During the Vietnam War, the North Vietnamese soldiers had hid there. The building became the goal of continuous bombing of the US military. The United States supported the South Vietnam government of Saigon (now Ho Chi Minh City).

He found a place where the remains of Vietnamese soldiers found in the garden, saying, "Around 1979, I found a corpse nearby." The remains have been taken away by the authorities.

The 62 -year -old Ho Sybay found an unsteady missile in his garden. Later is a destroyed church. During the Vietnam War, the North Vietnamese soldiers hid there, making it the target of the American bombing attack.(Peninsula TV Station)The United States launched more than 1 million bombing attacks in the 20 -year conflict and threw about 5 million tons of ammunition to this Southeast Asian country. About one -thirds of ammunition did not explode when impact, including bundle bombs.

It has been more than 50 years since the last American soldier left Vietnam on March 29, 1973, but tens of thousands of explosives are found every year, usually only a few inches under the soil.

"The Reality of War"

Guangzhi Province was divided by the Northern and South Vietnamese - African military districts, and it is still the country with the worst pollution in the country. Since the end of the war, 3,500 people in the province have died in the accident. The last time was in 2022, when a farmer found a bomb in the field. After he picked it up, the bomb exploded in his hands.

SY added, "Seeing so many accidents, I did a long period of waste collection, and I stopped." However, although he experienced this, he was not angry: "My feeling is the same as others. This is the reality of war. "

The MAG Consulting Group (MAG) is a non-governmental organization headquartered in the UK. It has been working in Vietnam since 1999. Currently, it has 735 employees in the country. After SY called the local hotline, the organization came to remove the bomb in the garden.

Every day, the staff of the Lei Lai Consulting Group will use a metal detector to search for the entire area to find an unblocked undertaken bullet to ensure the safety of the land and prepare for agriculture or development. In 2022, the organization destroyed 14615 bombs and cleaned more than 10 square kilometers (3.86 square miles) of land.

The staff of the Thunder Consulting Group use the ring probe to search for unwanted bomb in Zhaofeng County(Peninsula TV Station)In the nearby Xuan Vien Village, a group of local children 8 to 12 years old found an unusual object while playing near the muddy ditch.

The village chief Tran Duy Vinh told the Peninsula TV that the children had finished football and thought they could catch some fish.

Vinh said, "Then they discovered a explosive, picked it up, and then came up. They didn't know what it was, and started playing it."

Vinh immediately dialed the government hotline. The local authorities could request organizations such as the thunderbodic consultation team through

the hotline and the Vietnamese military to clear the unsteady bullets. He said, "Everyone here has this number."

Dinh Ngoc Vu, deputy director of the Guangzhi Provincial Bomb Land Morning Action Center (QTMAC), is responsible for operating the hotline. He said, "I think this work will help the trauma of the war from two perspectives."

From 1993 to 2020, the United States' projects in Vietnam invested more than 166 million US dollars, focusing on the problems left over from the war, such as clearing landmines and unexploded bombs and providing explosive risk education.

During the formal visit to Vietnam in April, US Secretary of State Anthony Brinken said that Washington is committed to solving the problem of war.

He told reporters, "Even if we focus on the future, we will continue to work together to clear up the unprepared ammunition. Next month, we will complete a search of Guangzhi Province, which is severely bombarded."

International non-governmental organizations and the Vietnamese military have cleared unparalleled bombs on land of 173 square kilometers (67 square miles). It is estimated that it will take 13 years to clear the province's explosives in the Bomber Land Morning Action Center of Guangzhi Province.

He added, "We are continuing to carry out important humanitarian work in order to find the whereabouts of the missing persons in the war, including improving the ability of Vietnam to identify the identity of the disappearance and the deceased."

At the end of the Vietnamese war, none provinces were not polluted by unbound bullets. Sarahgoring, Director of Vietnam, said that nationwide, there have been more than 100,000 casualties across the country.

These two boys encountered an unblied missile while playing in Xuanvien Village(Peninsula TV Station)After discovering the unblied bomb, the staff of the mine -Laupa consulting team would either destroy them in the place where ammunition was found, or the ammunition was transported to the demolition location to be destroyed safely.

Ta Quang Hung, the technical field manager of the organization, has been working on the organization since 1999. Previously, as farmers in rural areas that were severely contaminated by unwanted bombs.

He told the Peninsula TV, "I grew up in a area with a large number of unblied bullets. When I walked out of the house, I would encounter them."

When he was a child, HUNG found explosives and played them, but did not know what it was. HUNG and his friends will throw small explosives on the wall or target. Who can hit it first. Fortunately, adults caught them and stopped their dangerous games.

But not everyone is so lucky.

He recalled another memory of the mid -1970s. At that time, his two relatives (women married to his house) worked together in the field.

He said, "We evacuated during the war, but after liberation, we immediately returned to our field to work. They found that the explosives were together. It may be 40 mm grenades or cluster ammunition, they died."

NGO Vanlinh, the team leader of the Thunder Consulting Group, is going to destroy the ammunition and grenades of HA TAY village(Peninsula TV Station)Although the fatal cultural relics of these Vietnamese war have still taken away the lives of many people, the organizations committed to removing the unwavering of the land on the land not only provided the Vietnamese people with opportunities to take action, but also provided an opportunity to accept the past.

Thai Van Ninh has been working in the mine -up consultation team since 2015. When he was six years old, his 12 -year -old brother was killed because of his unwavable bullets.

He said, "When I started working for the first time, I was afraid of dealing with the bomb because my brother was killed by a bomb. But after the training, I realized that my work could save my life."

On the evening of the 24th local time, the Wagner Army and the public on the streets of Rostov. Street Audio-1-link: [@stream](https://www.rfa.org/mandarin/yataibaodao/junshiwaijiao/Gt1-0626202333527.html) The initiative of the Russian Wagner mercenaries not only caused the turbulence of Russia, but also attracted the attention of the Chinese people, and even sounded the alarm to responding to emergencies in Chinese high -level military incidents.

China's official first plays for the "Wagner Group Incident" for the first time in Russia: China and Russia are full of "mutual trust" * Russia's Wagner stops the rebellious leader Pleigo will go to Belarus ** Wagner

"Rebellion" in China Hot Search First Russia's Wagner mercenaries initiated a mutiny and attracted attention from countries. Wu Qiang, a Beijing current affairs commentator who focused on the situation in Russia, said in an interview with Radio Asia on Monday (26th) that although the coup in Wagner Group has not been successful, it has had three aspects of the Russian situation. The foundation foundation has been shaken:

"Deep cracks occurred between his private country and the private army, which not only exposed the nature of his private country, but also exposed the nature of the war. It was launched by the private army in 2014, violating the aggression of international law, extreme Relying on the Wagner Group, and this kind of mercenaries have abducted Russia's defense army, the Russian country and people, and the fate of Russia. "

Wu Qiang said that when this mercenary inverted Ge Putin means that the war has ended, and it has also begun to sound the funeral clock of the Russian private state system: "War, in fact, has entered the final state. Make full preparations. The impact of this unsuccessful coup on China is huge and far-reaching, just like this war began to fail in Russia and the dilemma of lasting war, its shock was a series of shocks. "

On June 24, 2023, on the streets of Rostov on the Russon River, the founder of Wagner's private mercenary group Porigin (right) sat in a military vehicle to take a group photo with the local civilians. (Associated Press) In the past few days, the Chinese people are discussing the causes and evolutionary process of this mutiny. Some netizens have left messages to support Putin, but more netizens have issued documents to comment on Putin. The WeChat public account "Thinking Totovir" wrote in the article that Wagner's rebellion ended within one day. Wagner's entry speed exceeded expectations, and the Kremlin's response was exceeded expected. Faced with the forced palace of the warlords, Putin was first -day rebellion and then revoked all the allegations. Poliger's appointment below retreated all over the whole body after the capital of the soldiers. What is even more terrible is that Pryigo moved for more than a thousand kilometers within a day, but he did not encounter any resistance. The Russian army and the people along the road watched without any sleeves. In the critical moment, no one came forward to defend the government. This shows that the Russian government is losing people's hearts.

The image of Putin's strong man is the most tense to destroy China

Current affairs commentator Cai Shenkun said that although the military coup of the Wagner Group's military coup was dramatic, it did not really end. The image of Putin's "strong man" has been greatly challenged: "If there is a military leader to continue challenging him in the next step, what should he do? Until this war, this situation is very unfavorable to Putin. As for the impact on China, whether it is Chinese leaders or military, it should be highly nervous. Both people and the military will be very nervous. "

Cai Shenkun believes that once the Taiwan Strait has a crisis, Chinese politicians should have no confidence in responding to the new situation.

"New York Times" diplomacy reporter Huang Anwei posted on June 24 in his Twitter, quoting the Xinhua News Agency reporting about the Wagner's mutiny incident, "If there is a single incident in the Russian and Ukraine War This is the incident. "He believes that it is not a mercenary issue in China. Assuming that Xi Jinping is watching how a long -term war has a mental impact on a country," now we know that he has about the Chinese PLA The loyalty problem is sensitive, and his anti -corruption extends to the PLA. "

The current international environment of the Chinese army has no confidence to win the battle

Former Chinese Naval Command Lieutenant Colonel Yao Cheng told this station that before the Russian mercenary mercenary Wagner Group's mutiny, Chinese officials had strengthened their control of the army, including new regulations and prohibiting military and local governments exchanges. He said: "The generals of the army are still sober. They believe that the start of war to the outside world is surrounded by the world, no matter where they fight, there is no chance of winning. Sorry for the soldiers who were sent to death. Second, the general would lose the black hat if the general would not win, so the Chinese army is generally reluctant to fight. Xi Jinping has seen this problem. "Reporter: Ancient Pavilion Editor: Chen Meihua Xu Shuting Jiayuan.com Editor: Ruizhe

Experts believe that despite the rapid subscription of the mercenary rebellion, Putin's ability to control the regime has been strongly questioned.

(Voice of Germany) [After the end of the Russian Wagner Group's rebellion](#) Ukraine President Volodymyr Zelenskyy and a number of national leaders talked about it on Sunday (June 25). Reuters reported that Zelenskyy and US President Joe Biden talked about the latest development of Russia and how the rebellion affected the Ukrainian counterattack process and regional security issues. The two countries also exchanged opinions on how Ukraine strengthened the impact of troops and rebellions on the Russian army.

Zelenski told Biden that the rebellion of the mercenaries "exposed the weakness of the Putin regime."

Earlier, Zeleki also talked to Polish President Andrzej Duda and Canadian Prime Minister Justin Trudeau, which talked about the dangerous situation of the largest nuclear power plant in Europe and the occupation of Zaporizhzhia, as well as in Lithuania. NATO Summit.

Born in 1961 in Leningrad, the current St. Petersburg. He has served in Soviet prison for 9 years for robbery and fraud. After being released from prison, he started making hot dog food cars in his hometown and set up a catering company Concord to provide catering for the national banquet. This kind of cooperation brings him the title of "Putin Chef". In 2014, Porigin founded a private mercenary "Wagner Group".

*

Wagner Legion

Wagner's mercenaries involved in Ukraine for the first time in 2014 to help Russia illegally annexes the Crimean Peninsula. After Russia's full invasion of Ukraine in February 2022, the fighting power of the Wagner Corps in the fierce battle in eastern Ukraine became an important military asset of the Kremlin. The source of the soldiers comes from Russia's retired officers, police, and prisoners who want to be released in advance. Foreigners can also join in addition to NATO countries and Ukraine. His commander Ulin worshiped German musician Wagner, and the legion was named.

*#

佣24 -hour short -lived riot

Porigo does not accept the leadership of the Ministry of National Defense

The Wagner Legion has been active on the front line of the war, such as playing an extremely important role in Bachmum's surrounding war. However, in recent months, fierce quarrels broke out with the senior executives of the Russian army, and believed that the Ministry of National Defense did not provide enough ammunition supply during the Bach Murut Campaign. Husbands should be responsible for the large number of casualties of the Wagner Mercenary Soldiers. Since June, the Russian Ministry of Defense demanded that the mercenaries have signed an agreement to obey the

command before the end of the month. This seems to be tantamount to disarm, and the contradictions have been further intensified.

*#

佣24 -hour short -lived riot

?

On June 26, the Russian Defense Minister Shao Yigu, who was accused of "incompetence", was named "incompetent" on TV, explaining that he inspected the frontline troops, but no time and place were not explained. However, people are more concerned about the whereabouts of Porigerin. According to the agreement reached with Belarus, he should go there. Reached? His journalist informed, "Porigerin asked everyone. Once you can send and receive information, he will answer everyone's question."

*#

佣24 -hour short -lived riot

How many people will follow him?

In theory, he can take his mercenaries to Belarus. Not sure how many people will follow him. However, the business of the Wagner Legion is all over the world. Libya, Syria, Africa, and Venezuela in Latin America are the place where the mercenaries are made. Soldiers who were on the battlefield allegedly could get 5,000 US dollars per month. Porigabin claims that there are still 25,000 troops, and the US intelligence unit estimates that this number should double.

Agence France -Presse reported that at the beginning of the incident, Putin made a television speech, accused Purigjin rebel, and vowed to punish the perpetrators and criticized them to push Russia to the civil war. However, just a few hours later, he accepted a negotiation agreement to implement amnesty for Porigerzin and his men, and agreed to exile Porigin himself to Belarus.

Roberterson, an associate professor at the International Relations of the US Military Academy, told DW that Putin "allows a person who has just been declared by him yesterday that he had the crime of betrayal, which was equivalent to retirement and escape from Belarus." "".

A 5 -minute rebellion, why do the president talk about the civil war? "" "

Albek added: "On the other hand, if Poriger does not die, all people who intend to destroy the security order in Russia will feel that they can be able to be prominent."

Former Russian Prime Minister Mikhailkasyanov told DW: "This (amnesty) agreement is regarded as a compromise, but in fact, this is the defeat of Putin's defeat. His high -level politicians will no longer regard him (Putin Putin) For those who can protect their interests, their power and regime will be questioned. "

On June 24, Wagner hired mercenaries to launch an armed rebellion, and Putin approved this move as "betrayal." The picture shows the residents of the Rosteok City on the River.

Person has analyzed from DW that Putin has been establishing a "control system" for many years -that is, coercion or buying high -level elites to obtain support, so as to consolidate the power, [however(<https://www.dw.com/zh/zh/车臣军起兵勤王-普里戈津普京错了/a-66021500>)"Show this system how weak this system is."

"Putin cannot curb the power struggle between Purigjin and the regular defense department and the army," Person said: "I think he is losing his control of the system (referring to internal elites). The method obviously begins to fail. "

US Secretary of State Antony Blinken publicly stated after the incident that the rebellion showed that Putin's authority had "cracks". French President Emmanuel Macron said that the rebellion "highlighted Russia's internal differences and the vulnerability of its army and auxiliary troops."

help Ukraine counterattack?

Agence France -Presse reported that analysts believe that the Wagner rebellion not only damaged the image of Pujing, but also increased the morale of the Ukrainian army.

On the day (24th) on the rebellion of Russia, Ukraine had stated that the riots would provide "windows of opportunities" for the counterattack of its army. But Moscow insisted that the rebellion would not affect its actions in Ukraine.

On the weekend, the Russian army continued to attack Kiev on the occasion of the rebellion; the mayor of Kiev claimed that 5 people died.

However, Pierrerazoux, the academic director of the Mediterranean Strategic Research Foundation (FMES), told AFP that the rebellion would inevitably hit the morale of the Russian army in Ukraine.

But La Zu also warned that Ukraine still had to improve the safety of the Belarusian border, because the Wagner Corps may also influx from Belarus, "this may be the content of Poligerjin and Putin."

Wagner Group "Rebellion" Head: What is the significance of war?

Extremely high -temperature rainstorm invades China, Xi Jinping's self -sufficient agricultural wishing scene is impacted

Creator: NICOLE HONG

Publisher: <https://www.facebook.com/nytimeschinese>

Published Time: 2023-06-26T03:52:56+08:00

Description: The heavy rain in Central China has caused severe damage to wheat harvest, highlighting the risk of climate shock to Xi Jinping's self - sufficient self -sufficiency to promote Chinese food supply. Analysis states that China may be forced to import more wheat this year, leading to further increase in global food prices. Lu Boan/Xinhua, Via Getty Images this month, rural areas south of Guangxi were affected by heavy rain. Chinese officials warned the increasingly serious threat of extreme weather.

Images: ["[00china-food....](#)"]

Category: 中国

Type: Article

In Central China, the pouring rains began in late May and poured the wheat

field. As more and more wheat grains begin to black in the rain, it is no longer suitable for human consumption. The government mobilizes the emergency team to do its best. In a wide range of circulation [video](#) Among them, a 79 - year -old farmer in Henan Province wiped his tears while checking the damage.

This abnormal heavy rainfall highlights that the climate impact is threatening President Xi Jinping's goal of promoting China's food supply self -sufficiency. Local officials said the rainfall caused the wheat harvest for ten years [the most serious damage](#) Essence

Ensuring that China has the ability to feed 1.4 billion people is the key to Xi Jinping's leading China to move towards the super nation. In recent years, the tension with the United States, the popularity of the new crown virus, and the war against Ukraine have caused greater fluctuations in global food prices, which has exacerbated the urgency of Chinese crops in China.

Food prices in China have not reached the level of other major economies, but officials are worried that their food supply is vulnerable to global impact. Last summer, the prices of Chinese pork, fruits, and vegetables soared, prompting the government to [putting strategic reserve pork](#) To stabilize the price. Subsequently, the leader reiterated that the safety of food was the top priority.

advertise

According to local news reports, in recent weeks, thousands of pigs in the rice fields in the rice fields in Guangxi Province have died of extreme high temperature due to extreme high temperature. The Tianjin fire department received a notice to spray water on the stroke of the truck. Officials warned that extreme high temperature and floods would damage wheat crops in northwestern Xinjiang.

In a country, which has caused the dynasty to be turbulent due to famine, the Communist Party in power also realized that meeting basic needs is a prerequisite for political stability.

In early June, farmers are harvesting wheat in Zhumadian City, Henan Province, China. Josh Arslan/Reuters

Last year, in order to control the spread of the new crown virus, the government had a severe blockade on Shanghai with a population of 25 million, and food shortage became an important reason for riots. Online videos show that residents fight for food to grab food in streets and grocery

stores. In national protests against China's "clear zero" policy, protesters shouted "Don't have nucleic acids, have to eat".

Chinese farmland is already shrinking because of rapid urbanization pollution large soils, and the government sells rural land to developers. The uneven distribution of north -south water resources in China has caused some crop planting areas to easily suffer drought, while others are easily attacked by floods. The Ukrainian war threatened China's wheat and fertilizer imports. The trade war from the United States in 2018 has made China buy soybeans and other foods from the United States [higher cost](#) Essence

Xi Jinping regards food self -sufficiency as a issue that is related to national security. He often says, "Chinese people's rice bowls must be firmly brought in their hands at any time." He set the "red line" that the country must retain 1.8 billion mu of cultivated land. , And [Waste the food to declare war](#) , Especially food waste in restaurants. The Chinese government often pointed out that it has to support one -fifth of the world's population with less than 10%of the world's arable land.

This month, in Luhe City, Henan Province, farmers fertilized in the just harvested wheat fields, and corn is now planted in wheat fields. Qilai shen for the new york times

In order to create more stable food supply, China has reserved crops and purchased more overseas farmland. It has been developing [heat -resistant rice variety](#) , GM soybean and new seed technology, this effort has triggered the United States to propose allegations of intellectual property theft.

"People's Daily" article on Monday said that Xi Jinping had "special emotions" for farmers and focused on increasing farmers' income. Last month, he visited a wheat field in Hebei Province, where farmers were trying to improve grain output by planting drought -resistant wheat varieties.

advertise

In the official Xi Jinping inspection video, local officials demonstrated bread and noodles made with new varieties of wheat. "President Xi wants us to be happier and happier," a local farmer in the video [Said](#) , "Let's work harder."

But the impact of food supply related to the weather is a more difficult challenge.

"You can implement more regulations to curb local governments to sell cultivated land. You can subsidize farmers," said Liu Zongyuan, an international political economy researcher at the US research institution of the

US research institution. "But extreme weather will not only cause damage, but also the cost of solving this problem is also very high."

This month, the record of recorded records led to [Beihai City] in southern China [Beihai City](#) Floods occur. In some areas of China, including major cities such as Shanghai and Beijing, this month has experienced high -temperature weather that is abnormal this month. This month, some regions have temperatures exceeding 41 degrees Celsius.

However, floods in Henan Province and the surrounding areas of central China constitute the latest concerns about food safety. These areas produce more than three -quarters of wheat in the country. On Wednesday, a farmer in Luohe planted soybeans in the just harvested wheat field. Qilai shen for the new york times

"In the harvest season, wheat growers are most worried about continuous rainfall," said Zhang Hongzhou, a researcher at the Nanyang University of Technology in Singapore. "This happened at the worst time."

When rainfall comes, farmers are preparing for the start of this year's harvest, and rainfall causes some wheat to germinate. This reduces the quality of wheat, is not suitable for processing flour, and is usually sold as animal feed at a lower price.

advertise

It is unclear the degree of crop damage this year. Analysts say that the decline in wheat gantry may force China to import more wheat this year, thereby raising global food prices.

China is the largest wheat producer and consumer country in the world. People in the city are increasingly purchasing Western bread and desserts, and the demand for wheat has increased with income. The soaring of Chinese meat consumption also requires more wheat to be used as animal feed.

In order to cope with the rainfall in Henan, the Chinese government [funding](#) 200 million yuan is used for disaster relief, helping to dry the harvest tide food, and arranged the flooded fields. Rural [Official](#) Established a 24 -hour hotline for farmers, and [urged local governments](#) To find a business buyer for damaged wheat that is still edible.

A peasant was watering the just harvested wheat field and was taken in the Luohe River. Qilai shen for the new york times

The official media said that the government's efforts have minimized the losses of farmers. The recent "People's Daily" promoted harvesting progress in the front page. National Television CCTV played a 15 -minute video clip, showing that government officials remind farmers to harvest as soon as possible.

China has a global impact on food security. It is largely because it has a large amount of food inventory, including the US Department of Agriculture estimated that about half of the world's wheat reserves. Last year, US officials accused China of accusing of food inventory, which led to rising global food prices, especially in poor countries. In response, China accusing the United States Inciting the global food crisis, saying that the US sanctions against Russia have damaged the export of wheat in African countries.

The exact quantity and quality of Chinese crops inventory are regarded as national secrets, so it is difficult to measure the stability of China's grain supply. For example, although the official data of the country often shows a record high of wheat output, analysts question Data reliability.

advertise

But in January 2022, the government revealed some rare information.

In response to the accusations of China's hoarding food in Western countries, the official newspaper "Economic Daily" published a comment article It is revealed that China's wheat and rice reserves are sufficient to meet the food needs of the people across the country at least 18 months. The article implies that this is a reasonable inventory.

"Prepare Yu, for the country," the article wrote.

Luohe farmers are planting soybeans. The trade war with the United States began in 2018, leading to a higher cost of buying soybeans and other foods from the United States. Qilai shen for the new Yorktimes

Is the Wagner soldiers changed to Putin's "survival crisis"?

Creator: ANTON TROIANOVSKI

Publisher: <https://www.facebook.com/nytimeschinese>

Published Time: 2023-06-26T04:51:57+08:00

Description: Although the crisis of soldiers is lifted, Russia's stability has nowhere to find. Putin has encountered the biggest challenge of his authority so far, and has lost his reputation for maintaining stability. The weak attitude has also weakened his decisive leadership image. Roman Romokhov/Agency France-Presse-Getty Images Sunday evening, members of the Wagner Corps are preparing to evacuate the Southern Military Region headquarters and return to Rostov on the Don River.

Images: ["[25russia-anal...](#)"]

Category: 国际

Type: Article

Over the years, President Putin has been advertised as a stable guarantor in Russia and a firm guardian of the state status.

In the past weekend, Russia's stability has nowhere to find, and Putin himself does not know where to go. Facing [the biggest challenge encountered by personal authority in Russia 23 years](#) After issuing a brief statement on Saturday morning, Putin disappeared from the public vision.

During his disappearance, the stunned Russians wondered how the quasi - military organization leader Yefgen V. Pleigo launched an armed rebellion on Saturday and even threatened Moscow's security. This is also the uneasiness of the future of the Russian president: what does the failure to stop the rebellion from the security of Russia and the stability of his personal power?

On Sunday, Russians who were related to the Kremlin were relieved, because the rebellion in Pleigo did not trigger a civil war. But at the same time, they also believe that Putin looks weak in this matter, and to some extent it may become a lasting impression.

advertise

The Moscow newspaper editor Constantine Remurkov, who has mastered the Koya Line Newspaper, said in an interview that what seemed to be unimaginable is now possible: that is, Putin's confidant may try to convince him not to participate in the Russian president of next spring next year. Election to seek re -election. He said that considering the situation of Saturday, Putin has completely lost its position as a wealthy wealth and security guarantee.

"Putin's power can bring the concept of stability and ensuring security on the 24th," said Remachukov. "If I was sure Putin would run a month ago, because it was his right, then what I see now is that the sense of security of the elite class is no longer sure."

Photos provided by official Russian media show that Putin delivered a TV speech on Moscow on Saturday. Sputnik, via reuters

"Stability" is the Cremlin in the referendum in 2020 [the slogan of shouting](#) The referendum continued to be re -elected for two times until 2036. Putin also claims that Russia's national security is his main motivation for his invasion of Ukraine.

Even during the 16 -month war, the Kremlin palace will focus on maintaining the normal normal state of China. Putin rejected the request of the hardliners to announce martial law or close the Russian border. For the elites, the new business opportunities of Russia's economy during war, and the domestic

market that suddenly got rid of many Western companies has become a compensation for Western sanctions.

But such an abacus was broken by Prygon's provocative provocation of the Kremlin last weekend. As the leader of the quasi-military organization Wagner, Pricig appointed people to seize a military headquarters in southern Russia, and sent troops to Moscow north to vowed to enter the capital. The crisis was resolved on Saturday night, and Perigon agreed to withdraw the army, which caused him and his troops to be relieved.

The imminent crisis was lifted. But during this period, Putin lost more than just his reputation of maintaining stability: the fact that Poigo and his troops have not been punished have weakened Putin's decisive and unwilling leadership image.

advertise

Russian military bloggers' reports on Parigen's troops shot down the Russian combat aircraft also deepened this impression. After Poligon's appointment and questioning the legitimacy of Putin's launch of the Ukrainian war, Putin also called him a traitor. But as the two sides reached an agreement to end the crisis, these sins seemed to no longer exist.

Experts say that Putin does not look at the country as firm as before. The external opponent quickly seized this pain point.

On Saturday, when the Wagner Group withdrew from the city of Rostov on the Russon River, the mercenary leader Yafugen V. Porigo left the headquarters of the Southern Military Region. Alexanderrmochenko/Reuters

State Secretary of State Brillin said on Sunday that [Poliger's rebellion](#) It was exposed to Putin's control over power. "This is a direct challenge to Putin's authority," Brillin's "Facing the People" in CBS(Face the Nation)The show said.

One of the confusing questions about this crisis is why Putin allows [Poligon's open conflict with the Russian Ministry of Defense](#) Fermented for several months without solving. Porigon had no choice but to criticize and degrade the Russian military leadership.

Two Kremlin insiders said that fundamental speaking, this crisis is a product of an disordered and nearly chaotic rule. The word "Bardak" (chaotic) of Russian vividly summarizes this situation. Due to the discussion of political sensitive topics, the two insiders asked anonymous.

They said that the decision to dispose of Porigen's reconnaissance was made in a hurry on Saturday. For a few months, Putin and its core power circles have been delaying time, and have not found ways to deal with the disobedient mercenary head.

advertise

"This problem can be said to be ignored," Putin's unified Russian Party country Duma senior member Constantine Datuylin said in an interview. He also said that the risk brought by Pritigo "failed to deal with timely -maybe it was hoped to let it resolve itself."

Zatulin believes that Putin finally stabilized the situation because he approved the end of the rebellion and avoided a fierce battle outside Moscow. But he also acknowledged that this incident made everyone embarrassing- "No powerful figures can benefit from it."

"This is a proof something wrong "Zutuylin said." The problem was exposed so much during the war, which was of course harmful. "

Political analysts, who had served as a consultant for the Kremlin, said that for Putin himself, this mutual mutual change may trigger a "crisis of survival."

"He has always been proud of Russia's national unity and political stability," Markov said. "This is why they love him. But all the results have become mirror flowers and water."

The newspaper editor of Romchkkov said that the uneasy mood caused by the rebellion of Poriga had permeated the entire capital. He said that he knew some Russian celebrities that fled Moscow on the day of the rebellion.

Romchukov said he did not leave, but on the day of Saturday, he did not drive Mercedes or Bentley, because the troops that were afraid of Porigon would be confiscated if they really arrived in Moscow.

advertise

Putin's system does show amazing toughness in some ways. The sanctions did not defeat Russia's economy, nor did it promote the transfer of Russia's leading commercial tycoon and opposed the Kremlin. Despite the huge casualties of the war, the propaganda machines and iron -fist suppression of the dripping water generally suppressed the public's objections to the war.

Therefore, some experts believe that it is too early to predict that the collapse of this system is too early.

"In the eyes of us Western observers, the situation of yesterday was serious disability, and it was very severe," said Hannah Nort, a very senior researcher at the Center of Strategy and International Research. "But it turns out that this disorder state can be quite durable in such a system."

Modified Time: 2023-06-25T23:47:99+08:00

Description: Cao Xin: Li Qiang's trip to Europe opened a brand new content of China's diplomacy, which is the popularity of China's "de -risk" wave in the West.

Images: ["[000185564_pic...](#)"]

Themes: ['中欧关系', '关注']

Keywords: ['中欧关系', '中德关系', '脱钩', '产业链']

Type: Article

Warm reminder from FT Chinese website: If you are interested in the content

of more FT Chinese website, please search for "FT Chinese Network" in Apple App Store or Google Application Market and download the official applications of FT Chinese website.

The State Council of State Council Li Qiang's European trip last week was another strengthening of Europe's diplomacy, which became the focus of attention of world public opinion. There are no exceptions: the major mainstream media in the United States concentrated the "de-risk" of China's "de-riskization" of China, while the European media are relatively objective, and there are fewer phenomena of one side.

However, Li Qiang's trip to Europe has opened a brand new content of Chinese diplomacy. This is: the "de-risk" wave of China's "de-risk" wave for Western public opinion. It is particularly noteworthy that this authentic name is not a propaganda or diplomatic department that starts in China, but was initiated by politicians such as Chinese Prime Minister. The significance is naturally different.

Reveal and break "de-risk" **

First of all, Li Qiang clearly revealed and criticized the essence of China's "de-risk" view in various important occasions in various important occasions in various important occasions. After the EU Chairman Feng Delin officially put forward this position in the European Union in April this year, this was the first time by Chinese Prime Minister to express his position.

According to Germany, Li Qiang said when he visited Germany: "Implement discrimination measures in the name of risks to restrict or exclude other countries, which violates market principles, fair competition rules, and rules of the World Trade Organization."

In addition, he also specifically stated at the closing ceremony of the China - German Economic Cooperation Forum last Tuesday that he opposed the reality of "de-risk" and the "detachable break chain".

For example, Li Qiang said: German cars have taken the lead in the Chinese market. He has worked in the local area for a long time. The official car that the official provides him is a German car. "We don't think there is any risk." Li Qiang also introduced: In China, he went to the hospital for a computer tomography (CT) inspection, and also used Siemens's instrument.

According to Xinhua News Agency, Li Qiang said on Monday with representatives of German enterprise representatives such as Siemens, Volkswagen, Mercedes-Benz, BMW, and Bathf, and said that understanding

that all parties have their own safety concerns. It is important to reasonably define and prevent risks." Can't artificial exaggeration 'dependence', and even the interdependence and unsafe simplicity."

Li Qiang's above -mentioned statement in Germany has a serious statement of stance, and there is also a peaceful side of facts and reasoning.

European and American media said that when "de -riskization" became the mainstream of Europe and the United States policies in China, Beijing tried to persuade Europe. Economic globalization and interdependence were inevitable to prevent "de -risk" evolving into "de -China".

When visiting France, Li Qiang's expression of "de -risk" is different.

Xinhua News Agency reported: On June 21, Li Qiang mentioned at the Sino - French business community in Paris that China and France's good political mutual trusts see stability, certainty, and common development opportunities in mutual dependence, while. Not risk.

He praised the French government against the confrontation and decoupling chain of camps, and called on Sino -French entrepreneurs to firmly support economic globalization and jointly maintain the stability and toughness of the China -French, China -Europe industry chain, and supply chain.

The reason why Li Qiang's expression of "de -risk" is different from France and Germany because the two governments have different policies for China. The key to this difference is that the French policy of China is relatively independent and has an independent tradition. Some political parties within the German government are deeply influenced by the United States' policy on China. This difference reflects a concept that China's official has always emphasized, that is, specific analysis of specific issues.

In addition to Li Qiang's position explained in European diplomatic activities, international public opinion also has a point of view of Li Qiang's position.

On June 20, the World Newspaper Industry Sidica website published an article entitled "Risk of Risk", the author is Karl Bern.

The article states that the word "de -risk" is attributed to the abandonment of the word "decoupling". "Delayed" said it was a long time until the facts proved that almost no one supported a complete break between China and the West. It is neither desirable to cut off all connections with China, or even feasible, so everyone has chosen a much vague concept.

The article pointed out: But this new political speech has a deeper meaning, and it implies that there is inherent risks in trade with China. Western leaders are increasingly worried that China will use trade or other economic ties to put political pressure on Western enterprises or countries.

The article asked: When the election still exists, is the risk of losing trade in the future, is it a reason to avoid trade now? People usually do not commit suicide in order to reduce their fear of death.

The article believes that Chinese officials have pointed out that there is no substantial difference between "de-risk" and "decoupling". They make sense. Unless Western strategists get rid of the routine of only one new popular word, and instead clarify what it contains and does not contain, this kind of speech may be greater than benefits.

This means that the "de-riskization" view is not widely recognized by the European and American public and public opinion, and it still has the opportunity to eliminate the impact of this view. In addition, the view of "de-risk" investment in the United States is actually established, and it will definitely have a market in South Korea and Japan in Europe and even Asia.

European and American differentiation has an exacerbation trend

In addition, in the past week, major European and American countries focusing on economic and trade relations with China, and there has been a trend of exacerbation of positions.

First of all, the European Commission announced a new trade principles on Tuesday on Tuesday, which aims to curb China's ability to squeeze the European economy and prevent European companies from exporting to China with military-related technology and may bring advantages to China. The policy is still in the early stages, highlighting the EU's sought of consistency with the United States in restricting China to enter the sensitive market and obtaining industry secrets.

However, according to the New York Times report: Diplomats said that in terms of important economic relations with China, Germany, France, Italy, and the Netherlands, which have the largest economic power in China, are not in a hurry to accept the EU may have destructive intervention. These concerns may cause the European Commission's proposal to be diluted.

The newspaper also said: The meeting held on Tuesday was relatively low-key and avoided obvious problems: the German economy depended on

China. That is, more than 1 million German jobs directly depend on China. Almost half of German manufacturers rely on some parts of its supply chain.

Subsequently, the "Voice of Germany" was quoted from Germany's "Mirror Weekly" reports that not only in the European Union, but even in the German government, there was a major analysis in relations with China.

It is reported that according to the "Ming Mirror Weekly", it is learned that the German Green Party Chairman Roberthabeck has been appointed by the German Economic Minister since the end of 2021. The government guarantee amount invested by German enterprises in China has reduced 5 billion euros. (Same as the same, about 7.38 billion yuan).

"Mirror Weekly" believes that this is part of the Habeck and the Economic dependence on the Green Party. At the open level, the Ministry of Economic Affairs of Habeck and the Federal Economic Affairs of Economic Affairs emphasized that over the past few decades, the government provided by the government has excessively concentrated in China, leading to "excessive concentration of federal budget risks." But all this is also likely to be based on the ideological orientation of the Green Party: the ruling party strives to promote the foreign diplomacy and economic and trade policies dominated by values, and is no longer dominated by economic benefits. However, the German Chamber of Commerce told the author that large German companies in China do not care about the German government's investment guarantee subsidy, and small and medium -sized enterprises may care. This means that it is difficult to limit German investment guarantee subsidies in Chinese companies in China, and it is difficult to limit German companies to increase investment in China.

Another thing that is worth noting is that the German government's new strategy for China has not been released. The Ministry of Foreign Affairs and the Ministry of Economic Affairs of the Prime Minister's Palace and the Green Party still have significant differences in many issues. Sources in the government circle said that the long -awaited document was unlikely to be released before the summer vacation.

All this happened last week was obviously related to the visit of European Prime Minister's visit to Europe. While Li Qiang faced Habeck during Germany, he hoped that the German would not adopt "discriminatory means", otherwise it would only damage the "healthy economic development". This shows that the view of "de -risk" itself is very fragile, because it has a large gap with facts.

Xie Wenfei, an objection of Hunan, was ruled by the crime of provoking trouble and sentenced to four and a half years in prison. Volunteer provides/file photos [Audio-Link](#):

[@stream](https://www.rfa.org/mandarin/yataibaODAO/renquanfazhi/gf-06262023050432.html)

Xie Wenfei, a dismissal of Hunan, who had been detained for more than three years, was ruled to be guilty of provoking trouble and sentenced to four and a half years in prison. Following the outside world, whether he would be transferred to Chishan Prison to serve prisoners who had been abused prisoners and forced labor.

Hunan activist Xie Wenfei was sentenced to 4 years and 6 months in prison for "provoking trouble" * Xie Wenfei supported the family members of the Hong Kong Democratic Games and was intimidated by the assault lawyer Beijing quietly launched the two sessions to maintain stability measures Xie Wenfei in crime of provoking trouble * Hunan Civil Games

Xie Wenfei was arrested and involved in Wuhan epidemic Xie Wenfei's brother Xie Fengchun confirmed to this station that Xie Wenfei personally called him a few days ago to confirm that he was convicted of provoking trouble by the Hunan Court of Hunan, when he could not hire a lawyer. None of the trials before and after were not arranged for family members to attend the scene.

Xie Fengchun: "Xie Wenfei used the mobile phone of the receipt of the Zixing Detention Center to talk to me. After four and a half years, it will be released from prison on October 30 next year. It (authorities) will not ask us (lawyer), (representing Xie Wenfei) It is the official lawyer. Now there is the right to speak. "

Xie Wenfei, who was originally from Luzhou, Hunan(left)In recent years, he has been active in Guangdong and is known for its active participation in street resistance. (Yuan Xiaohua is exclusively provided) Xie Wenfei, formerly known as Xie Fengxia, was sentenced to four and a half years in prison for inciting subversion of the state power for inciting subversion of the state power. In 2020, about one year after he was released from prison, he was taken away by Luzhou Public Security in the residence and detained at the Zixing City Detention Center. It is understood that under the pressure of the authorities, the family members were forced to relieve the commission of lawyers at least three times.

Xie Wenfei's good friend Yuan Xiaohua said that after the release of Xie Wenfei, Xie Wenfei continued to express his views on the current politics. He also issued a article to mourn Lin Zhao, a person who had disagreed.

Yuan Xiaohua: "Including Lin Zhao's commemorative (article), including remarks on the epidemic, and often expressing their views or opinions on the current situation. Perhaps his movement in all parts of the country may make them fear, fear, and hate. "

The dismissal person Yuan Xiaohua (pictured) believes that the friend Xie Wenfei was repeatedly sentenced to the "general account" of the authorities. (Yuan Xiaohua is exclusively provided, the shooting date is unknown) **Xie Wenfei is reported to be transferred to Chishan Prison**

Taiwan's human rights worker Li Mingzhe, the head of the public welfare organization "Changsha Fulian" Cheng Yuan, and Ou Biaofeng, an disagreement from Hunan, were suspected of being treated inhumane during his prison in Hunan Prison in Hunan. According to the "Rights Resources Network", Xie Wenfei will also be transferred to prison prisons that are said to be specially contained in political prisoners, but their families have not yet confirmed the news.

Yuan Xiaohua: "No matter Cheng Yuan or Ou Biaofeng disclosed in the Chishan Prison, it is really worried about their corporal punishment, abuse, and forced labor."

A person who was anonymous based on security considerations revealed that Xie Wenfei was repeatedly sentenced to the possibility of being retaliated by the authorities because he had a previous department.

People familiar with the matter: "After he (Xie Wenfei) was released from prison, in fact, the local relevant departments would still have some humanity to help his personal life. On holidays, he would condole But Xie Wenfei's personality is relatively upright. He will be very polite, and blocks them into the door with a harsh attitude, and will also throw the things they brought over. "

Xie Wenfei, who was originally from Luzhou, Hunan, has been active in Guangdong in the past ten years and is known for its active participation in street resistance. In 2017, he won the "Freedom Spirit Award" by the American Civil Organization "National Self -All -League" to praise him his efforts to promote the freedom of democracy in mainland China.

Germany Demagi issued a notice from Chinese users to the machine tool to add a sensor. Network picture [Audio-Link](#):

<https://www.rfa.org/mandarin/yatabaODao/JingMao/GT2-06262023062707.html/@stream> As the saying goes, the heart of harm is indispensable; German machine tool company DMGMORI recently notified its enterprises in China to add a sensing device for each machine tools in China from April 1. If the location of the machine tool is moved, the sensing device will be launched, and the machine will be locked, causing inability to use it,

and the factory authorized representative to unlock. This incident caused heated discussion among netizens.

Foreign Minister: Large enterprises should reduce dependence on dictatorship China Germany successively prevented Chinese enterprises from acquiring two semiconductor companies

Recently, DMGMORI, the third in the world, issued a notice that requires RMS (machine tool relocation security) device for each machine tool from April 1, 2023, especially for all Chinese machine tools in China. Add position sensor.

The above news caused a heated discussion. A video of Douyin.com said that the machine tool in China increases the position sensor, as long as the movement machine cannot be used: "After the machine is moved or disassembled, the RMS will automatically start the machine tool and stop the machine tool. After use, it can only be restarted by DMG or its authorized representatives. If the machine tool is found to be due to unauthorized technical exports or violations of export restrictions, it may be rejected. One means of two supplies. As an industrial parent machine, the machine tool can be a civil product or a military product. Therefore, the imported high -end five -axis machine tool can be said to be handcuffed. "

The netizen said that before, the selling machine tools would send people to the door from time to time to understand whether the machine tool was still in situ. Later, a perception sensor was installed. Once it was moved, it could not be used. He said that the use of these high -end machine tools in China is restricted, and it can't help but sigh whether it is too bullying.

Demagi was sold to Chinese machine tools, and once it moved, it was locked. (Network picture/ancient pavilion provided) **Most of China's imported high -end machine tools are used in military industry**

Mr. Chen, a mechanical engineer who was unwilling to disclose his name in Gansu, China, told this station that German companies are afraid that China will use its machine tools for military products: "For military industry, early civilian imports are more. More, because the precision processing car tools used in China basically use one or two companies in the world, because this kind of machine tool is different from ordinary machine tools, and it is so used in so many. Basically, others know what you bought Use. The business address of the purchased enterprise and the lathe must be written in the contract and register with the other party. "

Mr. Chen said that most Chinese companies purchased high -end machine tools in the purchase contract must explain to foreign companies as civil

products and do not process military products. For example, he said, "Take the Russian and Ukraine War, Sweden purchased the F16 fighter, and the property rights belong to you, but if you want to sell it to Ukraine, you need the United States to agree. The United States does not agree that you cannot sell it."

The explanation of Demagi in a notice is "to prevent the machine tools from being illegally transferred to an individual or country that may threaten international security." It also wrote "If it is found that it is determined that the machine tool is an unauthorized technology export or violates the applicable application The export restrictions have the right to refuse to restart the machine tool. "

Panasonic high -end household production line will evacuate before the end of the year

Professor Yang Haiying, a professor at Shizuoka University in Japan, said in an interview with this station that in addition to worrying about these lathes in the production of military supplies, German companies are also worried about the production of products that are restricted by international implementation of China: "Used on unmanned planes, aircraft carriers are waiting for upside down Now that foreign countries want to be dangerous in China, but on the one hand, they want to do business in China. Because there was a high -end product before, China has always wanted, and the West has never been given. "

In addition, Japanese companies are accelerating the evacuation of China. "Japan Economic News" reported last Friday that Japanese multinational electrical manufacturer Panasonic Holdings decided to move the middle and senior domestic air -conditioning production lines sold in Japan from Guangzhou, China before 2024. Panasonic, the president of the research and development and production of Panasonic, said, "In order to provide products near the market, it was decided to return to Japan to produce. Of course, it was also aware of the risks of geomorphology (geopolitics) of the United States and China. "

Warm reminder from FT Chinese website: If you are interested in the content of more FT Chinese website, please search for "FT Chinese Network" in

Apple App Store or Google Application Market and download the official applications of FT Chinese website.

Do you want to choose the news major and have been searched many times during the Dragon Boat Festival holiday.

Among them, the controversy is the famous saying of the Internet Red Education Expo. Who is Zhang Xuefeng? His people set up a professional "postgraduate master" for the majority of parents of parents. In late June, the scores of the college entrance examinations across the country, how to choose volunteers and other issues of college entrance examinations will not decrease. What information does not expose the dispute over the college entrance examination? In the era of inner scrolls, ordinary people are under great pressure, and the most precious of the victims, perhaps the possibility of the next generation.

Professional priority: the result of the inner volume society

The college entrance examination is large, especially for the Chinese, most people have heard the most from a young age, "thousands of troops and thousands of horses squeeze the Duguqiao" or "one test for life". Under such circumstances, the volunteers of the college entrance examination can probably expose the most authentic emotions and demands of the Chinese people, and also expose the trend of social thoughts. Which of the trend is preferred? According to the investigation of China News Network in 2023, "Fill in the College Entrance Examination Volunteer Priority" survey, 36% of netizens believe that priority should be given to specialty, and only 16% of netizens believe that the school should be given priority.

Behind the emphasis on professionalism, on the one hand, the result of the perfect division of labor in the market economy, on the other hand, the more important reason is the result of employment orientation. The economic trend has declined, employment pressure is the first, and the employment problems of young people are exceptionally prominent. The unemployment rate has exceeded 20%, which means that one of the five of the young employment population in 16-24 is unemployed. This change is inseparable from the macro background. When the economy is high, everyone has a lot of room for mental space. You can think about interest and professional possibilities. When the economy slows down, the stock competition becomes the main line. Most people put their livelihoods first. At this time, professionalism is preferred to become the mainstream choice for most people.

In such an upsurge, Zhang Xuefeng, as the postgraduate instructor of the professional background of Zhengzhou University for water drainage engineering, is popular because he can hit the pain point of the times -he knows his positioning, that is, the most suitable suggestion for ordinary family children to recommend The professionalism, the so -called appropriate, is very clear at the moment, is a good life. Regarding the controversy of the outside world, Zhang Xuefeng once responded, "If the family is excellent, choose more, there is no wrong problem!But most families, the conditions are not so good, choose the one that is suitable for you, and let yourself eat it. Fan!Instead of based on the discipline, I do n't consider the actual situation. I do n't target anyone any major. I just give suggestions based on the employment situation!The child cannot find your job and is not your teacher, but your parents and your mother!"

Just like most education and training industries, employees seem to be children. In fact, the key to seizing marketing and positioning is to win parents. So what is the group he faced with a group? The children of the college entrance examination are basically post -00s, and their parents are mostly post -70s and 60s. Deng Xiaoping resumed the college entrance examination as soon as possible. Many people's fate was rewritten. The post -70s and 60s were one of the biggest beneficiaries. The post -70s and 60s are also a generation of traditional education, but they often experience the conservation, not the result of the planning, but the helpless natural result - their own parents are often struggling to live and food, and there are many children in the family. Unable to carry out "chicken baby" or dense education for children today.

As for their own professional reports, because they and their parents' parents are extremely lacking background knowledge and professional guidance. Many times they are confused. Many people are actually quite ignorant about how employment their majors are. However, the era when the post -70s and 60s and even the post -80s growing adults are exactly the era when China's economic growth is the fastest. Therefore, their professional choices may not limit their choices. Whether or not they choose their favorite majors, they are mostly in the tide of market economy tide. Floating and heavy, divided into a cake.

As a result, they constitute the backbone of the middle -income group that rose in China's reform and opening up, that is, the middle class in people's mouths, that is, the so -called soft class. The educational philosophy they receive is also different from the former generations. It is more imported

products. "Happy education", "respecting children's interest", and "being friends with children" may be the most guidance for parents of this generation.

What is ironic is that when they managed to get used to this set of educational rules that have nothing to do with themselves, even after they invested heavily, when their children reached the college entrance examination, they faced a severe test of survival and faced tremendous competition pressure. They may inevitably feel the sense of shuttle between time, and everything seems to return to their young times -the pressure of making a living is so huge. Even when children fill out the college entrance examination volunteers, personal interests often become the earliest factor.

In this way, a generation of people, their children not only faced the decline in the class, but even the freedom of choice seemed to be much less than they were. Who is this?

Good professional is likely to be pseudo proposition

"In the future, what major is good?" For choosing professional matters, many people come to consult me every year and ask too much, so that I don't want to talk more. The problem is that professional priority is really a good strategy in the future? not necessarily.

Looking back on the various booms and waves we have experienced in these years, there are professional pits, and the more popular majors, the more likely it is to be eliminated in advance.

For example, in the era of the 21st century, the 21st century is biotechnology. Many students have learned biology. As a result, the biology is really counter-work. Many times they need to study for a PhD and it is difficult to graduate. Before and after the WTO, I said that the era of international trade is coming. Many of them study international trade. As a result, I found that there are not so many international trade waiting for you to talk about it, not to mention that the foreign trade industry is not so glorious. For a while, the myth of the popular insurance actuator was popular. After reading it, it was found that it was difficult to say that the development of China's insurance was not as popular as expected. For another example, the topic of cyclical, if the stock market is good, the major of finance and economics is popular. The scores of first-class financial colleges are even better than the unpopular major of Tsinghua University or Peking University; when you encounter a bear market when you graduate, it will be miserable. The construction industry that used to be popular is now the most difficult industry to find a job.

Earlier, in the 1980s, "learning mathematics well, not afraid of traveling all over the world", but there are also saying that missing missiles are better to sell tea eggs; in fact, liberal arts have also been popular. It is even more popular. Today, you may think that the data related to the data is good, but the related majors may soon be replaced by the machine.

What is the conclusion? It is basically unlikely to predict a good professional. There is a basic law -a popular professional, and the possibility of popularity in the future is very low.

In the past thirty or forty years, China is basically a process of continuous stirring of society, so it has changed too quickly; now it is not easy to predict future professional paths to predict future professional paths. In an era of changes, it is difficult for us to predict well, and in the era of generation artificial intelligence such as ChatGPT, prediction is even more difficult. Not to mention, the professional settings of Chinese universities are often the heritage of Soviet universities, excessive refinement, and serious lag. So the question is, how to choose the college entrance examination volunteer?

The volunteer of the college entrance examination cannot be sorted by the triangle: school, city, professional

In the volunteer reporting of the college entrance examination, similar to economics, there is also an impossible triangle, that is, good professional, good schools, and good cities. In this case, then I will tell the conclusions first, the first choice of the school, the second choice of the city, and finally a good professional. why? Because who you learn from, in fact, what you learn, more important, and good professional, many times are false questions.

Back to a fundamental question, choosing a good profession is actually choosing a relatively reliable future. Doctoral doctoral academics are a very few people, which is another gameplay; for most people, choosing a major is to find a good career future to graduate.

The importance of a good school is beyond doubt, so why should you put the city in a very important position? Looking for a good job, in fact, like buying a house, the location is the most important. Therefore, consider the city you want to graduate. From graduation employment considerations, it is not just to think about it, but to be suitable for you. In fact, if you are from small and medium -sized cities, you can go to the coast and big cities to see it, which is more eye -opening; even if he is a person in first- and second -tier cities, you will go to work in your hometown in the future and change to a city to see it.

Changing the city is actually to understand different lifestyles, which is equivalent to half of studying abroad. Westerners emphasize that young people travel to study, but they are not all burned by money, but let young people come into contact with different civilizations in different world -a bit similar, such as Japanese scholars studying Chinese history, and found that many founding emperors of China were born in The place where the regional dividing line is so easily grasped naturally. If you are from Zhejiang, even if you want to work in Hangzhou in the future, it is also an experience when you come to Shanghai to school; if you are from Shanghai, go out of Shanghai and study in Beijing, even if you work in Shanghai in the future, you have to work in Beijing. Not more knowledge.

A friend used to say a case before. If you are a Shanghai native, "If you are going to elementary school in Fuwai, the middle school to the talent is in Shanghai New University, then the square is not more than 1 kilometer. You think this day How boring? "Friends who are familiar with Shanghai should know that Foreign Foreign Language School is the Foreign Language School of Fushan, and Jincai Middle School and Shanghai New York University are all in Pudong. He also has a classmate of Zhejiang University, that is, Wen San Road Primary School Middle School and then Zhejiang -Daxi Campus.

As mentioned earlier, they are cities, not schools, nor professional. why is it like this? Because finding a job, where is it, what is more important than learning. Big cities have more high -quality job opportunities. If you are near the water tower, it is easier to locate them.

Whether it is useful or useful, especially when entering the industry, the major is knocking on the stepping tiles. But most of the thresholds in the world are for people outside the threshold. If you are within the threshold, your professional is no longer important; if someone recognizes you within the threshold, the threshold is not so important -this may not necessarily say that the relationship is pulled. In other words, many times, good jobs do not require professional counterparts, comprehensive abilities, and framework vision, which is more important.

For example, the financial industry, many people think that they are financial backgrounds, at least economics -related, but after deep understanding, they find that there are all one line, and it may not be worse than the science class. As for the media, let alone say that the news was born, and this wave of disputes also revealed shortcomings. What is the problem? Most jobs are dry middle schools. The knowledge of university is just a background board. A

piece of white paper may be better than the unsuccessful semi -finished product. The conclusion is that who you are, what you learn is more important. In the final analysis, everyone's destiny is a self -choice.

Future education

In this era, the rules in the past are being broken, and education must also change their thinking.

Exploring the essence of education, whether or not it is added with duck education or packaging of quality education, I personally think that the essence of education is to screen, screen qualified persons, and screen people who do not fall behind. The core is that we must strive to become a few people in the fierce competition market. To win in the internal competition, it is not more obedient. First of all, you should avoid repetitive and low -level competition. Listening to other people's words to choose a static professionalism, it is a way that seems easy to be eliminated. Of course, this suggestion does not apply to everyone, for people who are interested in expanding their growth and achievement.

I will deal with different people in my work. I have seen people and experiences of so many circles, and I found that who is, what is more important than learning. This is not to say that a person can change his life against the sky, but a personality, luck, and starting point. It often determines the path of a person. They are becoming more and more important than personal abilities. The ancients talked about life and said, "One life, two games, three feng shui, four accumulation of yin and virtue and five reading." You see, reading is behind, what is even more so. In a soft class society, the possibility of counterattacks in the class is decreasing, and the possibility of decline in the class increases. What does this time mean to individuals? Survival is easy and developed. The key to why the words such as inside rolls, small towns, and 985 waste are now popular. The key is that when you have a good profession, you cannot guarantee smoothly as in the past.

You may ask if there is an opportunity to overtake the curve, so, but there are people who have such abilities, and no one needs to have an idea for him. A netizen of a public name "Xu Jin Economic Man" concluded- "The top candidate has their favorite majors, secondary candidates for their own suitable majors, high -ranking candidates, and other people to choose to choose majors." This sounds a bit too strong, but it makes sense.

Back to the professional problem, since everything can be wrong, it is better to be a little more than the Buddha. For parents, let children choose a major

that they can at least accept. The important thing is that at the same time, choose a visible city at the same time and find a school with your own capacity range, so that the field of vision will be different. Finally, no matter what major choose, whether you like it, you must do the line, which is the basic requirement. This is actually the beginning of what kind of person you will be. Human path is self -made. The most important learning is the habit of developing self -learning. This is the basic skill of our time **Note: This article only represents the author's own point of view. ashes-18**

On the second day when the Russian mercenary organization Wagner Group rebelled the drama, the Russian President Putin and Wagner's head Priggen Ren None of them appeared publicly, increasing the uncertainty and confusion of the Russian situation.

The New York Times reported that after Putin made a short TV speech on the country on Saturday (June 24) in the morning, Sunday did not appear publicly on Sundays, and Pryigo's whereabouts were still unknown.

On the other hand, official Russian media have accused and degraded Pleigen, but some criticisms on Putin and others have begun to surface.

The Kremlin Sunday's "This week", the official position was clarified at the beginning, saying that "the launch of armed rebellion in Russia will not get social support." Dmitrykislyov, an anchor and senior cultural propaganda

director, said in the show: "During the war, the crime of tradition was serious crimes."

The show followed up [National TV Speech on Saturday morning on Saturday in Putin](#) Putin said, "splitting unity is a knife behind Russia", but he did not mention Pleigen's name.

More than eight hours after Putin's speech, all Russian news media suddenly issued a statement of Palace spokesman Pedkov, saying that President Whitelle Lukashenko came out to mediate under the consent of Putin.

Criminal proceedings that launch armed rebellions in Ligo](<https://www.zaobao.com/realtimeworld/story20230625-1407576>); To recognize Wagner's previous services to Russia, the government will not take any action on the Wagner soldiers participating in the incident.

Peskov also said that although Putin had previously vowed to punish those who participated in the mutiny, the "higher goal" of the mediation agreement was to avoid confrontation and bleeding. The Wagner soldiers who did not participate in the mutiny will sign a contract with the Ministry of Defense.

Kie Lava's Sunday report showed that the Uprising of Pryigo did not receive the support of the public. In short, it concluded that Perigon was a traitor, and his rebellion was meaningless to Russia's unity.

NTV, another state -owned channel of Russia, also echoed the position of Ke Palace's "This week" in a summary report. It also mentioned that [the American intelligence department has already mastered the Wagner's brewing of a mutiny](#) But remained silent, implying the participation of foreign forces.

Russian state -owned television stations are the main source of news from the older generation, but young Russian young people mostly use social media to apply Telegram, but the news and comments on this platform are not all reliable.

A group of influential and war -supporting Russian bloggers were in a dilemma. On the one hand, they admired Pryigon and Wagner mercenaries, but on the other hand, they were frustrated by Porigen's rebellion.

Where is the Russian military leadership when a mutiny occurs?

A blogger named Yuri Kotenok shouted loudly on Telegram and asked where the Russian military leadership disappeared when the mutiny crisis disappeared.

The Russian Minister of Defense, who has been violently criticized by Pryo, and Grassimov, chief of military staff, has not appeared or delivered after the mutiny.

Although analysts outside Russia believe that the rapidly calming mutiny has greatly damaged Putin's standpoint reputation, and the Russian official media did not expect to regard this day as a comprehensive victory of Moscow.

However, there are still a few people in Russia that the problems exposed by the one -day mutiny need to be resolved urgently.

At 11 am on June 23rd, the Russian mercenary organization Wagner Group's head of Perigo released a series of stickers on the social media platform, questioning the Kremlin's motivation for launching the Ukraine War, and accused Russian Defense Minister, Shi Yigu ordered a fatal fighter aircraft to be fatal. Air strike. At midnight on the same day, the Russian Federal Security Agency launched an investigation against Pritigen for armed rebellion.

The Wagner forces controlled Rostov on the River on the 24th at 7:30 on the 24th, and went north to Moscow to Moscow all the way. Putin made a TV speech nationwide at 10 am, calling on the country to unite the war in Ukraine and its allies, saying that "split our unity is to stab the knife behind our country and the people."

At 8:30 pm on the 24th, a dramatic turning point in the Russian mutiny, Under the mediation of President White Ros, President Lukashenko Poligon agreed to stop the army of Moscow and exile in exile. As a exchange, Pryigon and Wagner soldiers were guaranteed to be safe. According to the analysis, although Putin quickly resolved the crisis, the armed rebellion had exposed his fragile situation.

The Chinese government announced the launch of the "Youth Employment Service Tackling Action" to save the youth unemployment rate (data photo)

(Voice of Germany Chinese) [China's unemployment rate is high In May, a 20.8% historical high](#) Essence In order to alleviate the dilemma of "graduation and unemployment" of fresh graduates, the Ministry of Human Resources and Social Security (Ministry of Human Resources and Social Security) announced that it will implement a half -year employment counseling plan from July to December to assist in college that has not yet found jobs that have not yet found jobs. Graduates and unemployed youths jobs.

Chinese official media CCTV reported on the 25th that the Ministry of Human Resources and Social Affairs stated that this plan called "2023 college graduates such as college graduates such as employment service tackling operations" will strengthen policy implementation, service guarantee, rights and interests, difficulties and help, and strive to allow let "Unlimited graduates with willingness to employment" and "registering unemployed youth" have

achieved employment or employment preparation activities before the end of this year.

The report states that the plan will require the administrative units and human -social departments of all localities in China to list a list of job search guidelines, and to conduct a full inventory of registered young people registering unemployed youths before the end of June; The list must be completed by the end of July.

All local governments will also launch real -name services for these two types of youths, provide professional guidance, job promotion, skills training or employment opportunities, and hold recruitment activities such as specialized graduates, online or face -to -face, and promote the "15 -minute employment service circle". , "Home Door" Employment Service Station and other services to achieve the goal of "recruitment and positions from time to time".

Weibo netizens hold skeptical attitude

However, Weibo netizens did not pay for this policy promoted by China. DW tried to search for related news on Weibo and found that the netizens left a message below the relevant reports were mostly suspicion of this "tackling operation".

Some netizens said that the employment situation of Chinese youth has been sluggish for a while. The government did not launch the rescue plan until recently, so that he had a feeling of "waiting for a long time and waiting for this?" And Chinese netizens said: "You don't have a look at it either Do you still recruit people now? "And think China's economic environment is not optimistic The management has no need for talent, and the government has more employment media activities. It is also unsuitable. The gap between the government's policy and reality made netizens sigh: "Can you open your eyes and see us and float in the sky every day?"

The picture shows a youth job hunting event held in Beijing in 2022.

In addition, there are many messages pointed out: "What is the number of people in the postgraduate entrance examination this year?" Some netizens said: "So love employment, cancel this year's postgraduate entrance examination. Everyone goes to employment. What are the exams?" Many messages show The research institute has become a means of escaping from fresh graduates.

Earlier, Henan Provincial Department of Education Department on May 30, the "Henan Province 2023 college graduates' employment" 100 -day sprint

"action plan" It is mentioned that "the graduates of the zero employment family and the long -term unlimited graduates are dynamically cleared." What do you think of people? Do you have so many opportunities in the market? Do graduates want to work? Two weeks later, if you have unemployment, do you get an accountant to clear zero? "

China Youth Employment is unprecedentedly difficult

In the past 20 years, the rapid growth of China's economy has created a large number of job opportunities, but with the shift from China's dense manufacturing to a high -tech export -oriented economy, the rising rate of the youth unemployment rate is far more than other population groups; the Chinese government is in the current government; the Chinese government is in the market. During the epidemic period, he vigorously suppressed science and technology and education, causing a large -scale layoffs to hire enterprises with higher education young people, which even worsened the situation.

In response, the "Asian Labor Review" researcher and executive editor Kevinlin recently told DW: "For young people in China, it may now be the most difficult period for re -employment or finding the first job in the past 20 years." [Part of analysis] It is believed that the Chinese employment market meets a large number of graduates every year, and its real scale of its youth unemployment rate has been covered by the government for decades. At the end of the 1990s, China's university enrollment rate increased significantly, and the number of new students increased by more than 40%within a year. By 2021, there were about 44 million undergraduate students in public colleges and universities in China.

The British "Guardian" reported that such a dilemma has made young Chinese people make many special actions, such as taking "lying" and stuffing the diploma into the trash can, etc. The Chinese people poured into the temple for soul comfort. The report quoted the data of tourism websites that the visit rate of temples in some scenic spots has increased by 367%compared with the same period last year, and about half of them are "post -90s" young people.

The Greek Democratic Party won with obvious advantages in the second round of parliamentary elections, and voters gave the reformist Mizotis as the Prime Minister for four years.

Xinhua News Agency reported that the Greek Sunday (June 25) held a second round of parliamentary elections. The Greek Ministry of the Interior announced the statistical results of 97.97%of the votes late at night. The right of the new Democratic Party in the middle won the election with a 40.56%voting rate and obtained 158 seats of the 300 parliamentary seats.

The second -ranked radical left -wing alliance won 17.83%of the votes and 48 seats, and the third -ranking pan -Greek socialist movement won 11.86%of the votes and 32 seats. There are five other party's votes of more than 3%, and they can enter the parliament.

Greek President Sacraroperu will authorize the new Democratic Party leader and last Government Prime Minister Kyriakos Mitsotakis to form a new government.

The 55 -year -old Mizetakis was a former banker, and he vowed to "advance faster on the road to reform needed by Greece" and promised to bring more prosperity to everyone during the second term.

Greece held a parliamentary election on May 21 this year. Because there were no political parties obtained over half of the seats and the top three political parties failed, the second round of elections were held on June 25 in accordance with the election law. The second round of elections adopt the "floating ratio reward seat system". The reward seats increased with increased votes, and up to 50 reward seats can be obtained.

North Korean leader Kim Jong -un (second from right) inspect nuclear weapons(Peninsula TV Station)On Monday, June 26, North Korea accused its neighbors of the south and the United States pushing the tensions of the Korean Peninsula to the "edge of the nuclear war", similar to the Korean War that broke out in the early 1950s, and stated that it would continue to enhance self -defense capabilities.

A research report published by the American Institute of Foreign Affairs of North Korea compared the current military tensions of the region to the eve of the Korean War (1950-1953), and criticized the Washington and the Seoul simulation of anti-Communist military confrontation and speech threats.

In an English report released by the official Central News Agency of North Korea, the Ministry stated that "this kind of aggression in the United States has further intensified the military tensions of the Korean Peninsula and Northeast Asia. The edge of the war. "

The report believes that the United States "has more resolutely adopted a shocking hostile action than ever this year, arbitrarily violated North Korea's

sovereignty and security, and has reached the point where it can no longer tolerate."

On the occasion of the anniversary of the outbreak of the Korean War, Pyongyang held a demonstration against the United States.(European News Agency)

World War

The report from the Ministry of Foreign Affairs of North Korea warned that the Korean Peninsula War "" will quickly expand into the global war and the world's non -precedent thermal nuclear war, which will cause the most disastrous consequences to peace and security in the region and other parts of the world. "

According to the report, Pyongyang "will continue to speed up efforts to enhance self -defense capabilities to protect its sovereignty, unless the United States abandon its outdated hostility policy and continuous military threats to North Korea."

On Sunday, June 25th is the 73rd anniversary of the Korean War. The main North Korean newspaper "Labor News" stated that "the United States has continuously deployed strategic nuclear assets such as nuclear submarines

and strategic bomber on the Korean Peninsula, which exacerbates the tension of the Korean Peninsula."

The newspaper focused on the "ambition to invade North Korea in the United States", emphasizing that military exercises between the United States and its allies are similar to the situation before the outbreak of the Korean War.

The newspaper stated that today's North Korea is no longer the North Korea during the Korean War. "Over time, the revenge of the Korean people is increasing." It added that if the United States triggered the Second Korean War, it would lead to the end of the United States itself.

It believes that this is "the inevitable result of the long -term strategy of seeking global hegemony."

On the 73rd anniversary of the war, the Pyongyang authorities organized large -scale demonstrations to condemn the United States.

According to the North Korean Society, about 120,000 workers and students participated in the rally organized by the capital.

A photo released by the official media shows that the people in the stadium are crowded. They hold a banner, saying "the entire mainland of the United States is within our range" and "American colonists are peaceful destructors."

A Chinese female owner of a women's clothing store in the capital of Grandan Dan Prefecture, Malaysia, was issued a ticket by law enforcement officers in the Belong Balu City Council, because she wore T -shirts with shorts and shorts in the store.

Xingzhou.com reported that the incident took place at 11:10 am on Sunday (June 25). The female owner named Li who received the ticket said that she has been in a women's clothing shop for more than two years. She has always worn T -shirt shorts for business. In the past, she worked like this in a barber shop and had not received a ticket.

"My women's clothing store, customers are mainly Chinese women."

At that time, she begged the law enforcement officers, and the other party did not merge, and issued a ticket directly instead of a warning letter first.

According to the penalty, the Council of Boalu City Council quoted the 2019 Gejulu City Council Commercial Trade and Industrial Government Regulations.

Lin Guangsheng, a member of the Gejulu city, confirmed that the law enforcement officer of the city council was confirmed. The Jilandan Hall of China will plead with the Grandan government for the woman who receives the ticket.

Huang Baojun, Datuk, Datuk of the Jilandan Hall of China, said that the city council should not issue a ticket immediately, and should be given a warning first. He did not agree with law enforcement officers to issue a ticket because of the owner wearing shorts. However, he also suggested that female owners should not wear too short pants when they are in business.

"Jilandan is the belonging to the Islamic Party. Although everyone enjoys freedom of dressing, we must also respect each other. Respect the different cultures and customs of each state."

In any case, Huang Baojun said that it would affect the impression of tourists' impression of Jilandan. He reminded everyone to pay more attention to avoid re -acting similar to unpleasant incidents.

Rosenatz, the chairman of the Gejulu City Council, said that if the female owner wore ordinary shorts, there was no problem, but her wearing that day was completely different from the photos of Facebook.

A photo passed to Starzhou.com on Rosnatz, showing a woman wearing a pink T -shirt, the length of the T -shirt to the thigh, covering her shorts. A female law enforcement officer next to me is watching some documents.

When asked how short shorts were "not dignified", and the specific content of the 34th (2) (b) of the regulations of the Battle of Balu City Council's commercial trade and industrial local governments in 2019, he said lightly when he avoided the matter. Will be handed over to the city council secretary to follow up.

According to other channels from Xingzhou.com, the relevant provisions can also be applied to non -Muslims, that is, owners and employees must be "dignified", but the provisions do not clarify the specific definition of dignity.

China expressed support for the Russian authorities' "rebellion" operation

Creator: 储百亮

Publisher: <https://www.facebook.com/nytimeschinese>

Published Time: 2023-06-26T09:36:44+08:00

Description: China issued a statement to support Russia to "maintain national stability and achieve development and prosperity." Earlier, Russia's deputy foreign minister met with officials in Beijing in Beijing. Neither of the two countries showed whether Xi Jinping and Putin had talked about whether there was a brief rebellion. Reuters Saturday, the Wagner mercenary soldier withdrew from the headquarters of the southern military region in Rostov, Russia.

The Chinese and Russian governments stated on Sunday that China agreed

with Russia's measures to ensure the stability of the country after a brief rebellion in Wagner's military forces.

"China expressed its efforts to support the Russian federal leadership on June 24 to stabilize the country's situation on June 24, and reiterate the hope of strengthening Russia's unity and further prosperity," said the Russian Ministry of Foreign Affairs on Sunday. Ludido held talks with Ma Chaoxu, deputy minister of China Foreign Ministry in Beijing.

A statement issued by the Chinese Ministry of Foreign Affairs later also supported Russia's "stability". "This is the internal affairs of Russia," the department in the statement Speaking. "As a comprehensive strategic collaboration partner of friendly neighbors and the new era, China supports Russia to maintain stability of the country and achieve development and prosperity."

China is the most important economic and diplomatic partner of Russia. Putin and Chinese leader Xi Jinping vowed to create a "endless" cooperative relationship in early 2022. However, neither countries have stated whether the leaders of the two sides have talked about whether they have had a brief rebellion this time.

Reuters reports that Zelei Sunday (June 25) said that the Russian mercenary organization's head of Vagna Group Pleigor [rebellion "Exposure" the "weakness" of Russian President Putin](#) Essence He said that he and Biden "discussed the counterattack process of Ukraine and the situation of Russia, and the world must put pressure on Russia until the restoration of international order."

Zeelianzki also said that he and Biden also discussed the expansion of defense cooperation between the two sides, especially in terms of remote weapons, strengthening coordination before the NATO Summit, and the preparation of the "Global Peace Summit" he promoted.

On the same day, Zellezki also called Trudeau, and he informed Trudeau the "threat situation" faced by the Zaparo Nuclear Power Station occupied by Russia. Zeleis basically warned earlier week that Russia considers this nuclear power plant "[terrorism" behavior to release radiation](#)" , But Russia denied this allegations.

"Ukraine's partners must show the principles at the NATO summit held by Vilnus." NATO Summit will be held in the Corinus capital of Lithuania in July.

After the call of Zelei and Dudong, a similar statement also issued a statement.

According to the White House, Biden and Zendiski discussed the "recent incidents in Russia" and the counterattack of Ukraine. Biden reiterated that the United States' support for Ukraine will unwavering and will provide Ukraine to continue to provide security, economic and humanitarian assistance.

Trudeau said on Sunday that after the rebellion of the Wagner Group's rebellion quickly calmed down, he discussed the security situation of Russia with Zelegski.

Trudeau wrote on Twitter: "Canada insists on standing with Ukraine to provide the Ukraine people with their support."

The brief rebellion of the Wagner Group highlights the fragile power of Putin

Creator: PETER BAKER

Publisher: <https://www.facebook.com/nytimeschinese>

Published Time: 2023-06-26T10:32:58+08:00

Description: As Ukraine launched a counterattack, the chaos caused by this short -term soldier could lead to the failure of the Russian war. However, unstable power may increase Putin's unpredictability, and US officials are still anxious about nuclear threats. Sergei Ilnitsky/EPA, Via Shutterstock Russian President Putin delivered a speech nationwide during his attempted soldiers last Saturday. U.S. officials believe that a mutiny is evidence that Putin's status has been weakened.

Images: ["[24dc-russia-1...](#)", "[24dc-us-russi...](#)"]

Category: 国际

Type: Article

For more than a year, the minds of US officials lingered around a question

they dare not publicize: Will the war that Russia messed into Ukraine in the end will eventually cause President Putin to collapse?

In this chaotic weekend, it seems that the above concepts are no longer so incredible. However, although the direct threat formed by Yofgeni Porigo's mercenary rebellion seems to have ended, this short -term mutiny shows that Putin's control of power is more vulnerable than at any time since he took office 20 years ago. Essence

This may be the most turbulent moment since Russia's invasion of Ukraine. The consequences of the mutiny have made President Biden and US policy makers facing both opportunities and dangerous. Just as the Ukrainian army is launching a long -awaited counterattack, domestic chaos may lead to the failure of the Russian war. Essence

"For the United States, the attention of the Russians is dispersed. This is beneficial. This will weaken their military plans in Ukraine and make them unlikely to continue to provoke new problems in Syria and other places," McCane's international leadership Executive Director of the Institute of Li and former US Department of Defense, Ivelin Fakas, said. "We are most concerned about ensuring that professional soldiers maintain control of all nuclear facilities."

Although the armed conflict that moved to Moscow this time was short, it was the most eye -catching power struggle in Russia for more than 20 years. Before, the attempts against Mikhail Gorbachev had previously occurred in 1991, as well as In 1993, Boris Yeltsin and the last show of the parliament. But unlike those two, Washington did not have a special favorite party in this power struggle. Purig is no more friendly than Putin to the United States.

Biden's response to this crisis did not respond, he chose to be cautious instead of publicly. Public development sounds may provide Putin with a handle that allows Putin to blame foreign conspiracy. Whenever Russia encounters trouble, this is the common saying of the Kremlin. Biden delayed the departure to the David Camp. At a restaurant in the White House (Wardroom, is now used as a temporary war room, the actual war room is being renovated) with senior consultants The leader called.

President's national security adviser Jack Shalvin, in order to accompany Bayeng to David, canceled the trip to Denmark to fight for support for Ukraine, and held a meeting that was originally scheduled to be held in Denmark through a video. General Mark Milly also canceled visit to Israel and Jordan. However, in addition to reiterating the support of Ukraine, the US

government has maintained silence. While watching the development of the situation, officials have studied information to understand what is happening.

Although the U.S. government has been drafting the emergency plan for a long time, it has been the same as others on Saturday. In addition to the traditional source of information, it also relies on social media and other online resources to obtain solid information from Russia. , Interpret it.

U.S. officials are particularly concerned about Russia's nuclear arsenal, and they are anxious about the unstable countries that have the ability to destroy most regions on the planet and feel anxious. But a senior US official said that the government did not notice any changes in Russian weapons layout, so it did not change the US nuclear situation.

"Things have developed quite fast, so it is difficult to know where it is, but for the United States, the two major problems are the command and control of nuclear weapons, and the impact of more territorial efforts on Ukraine's liberation." Russian expert James Goldgael said.

Andreia KFC-Taylor, who has now worked at the New American Security Center, has long been Russian intelligence analysts. She said that the United States has limited ability to influence the Russian incident and should focus on preventing violence and chaos.

"Washington should avoid promoting the deep -rooted fear of Russia, that is, the United States or NATO will seek to use this confusion," she said. "This will be very important for Moscow to prevent excessive reactions, and in the long run, it is important to do this to do this with a stable relationship with a future Russia."

Regardless of what US officials think, they have regarded Russia's incidents as evidence of Putin's status. For a few months, they have been following the quarrel with the continuous upgrading of the leadership of the Russian Ministry of Defense on the management of the Ukrainian war. Like others, they want to know why Putin tolerate such an open objection. They guess this Whether the President of Russia is for his own political purpose, it secretly encouraged this quarrel.

Yofgen Pricig took a photo with a civilian on the streets of Rostov on the Don River, and his troops then evacuated the local. Associated Press

But last Saturday, the White House and US national security agencies have basically not doubted Pleigo's arbitrary damage to Putin. Porigon was an important assistant to Russia's president. He planned to interfere with the 2016 US presidential election. Now, he has publicly refuted all the reasons for Putin's launch of the Ukrainian war, and denies that the invasion is Russia's legitimate response to the so-called Ukraine and NATO threat.

Moreover, with the launch of the crisis last Saturday, Putin compared the situation to 1917 when he gave a speech nationwide. It was the last year of the last Tsar government's collapse in a bad war. This comparison only encouraged people to grow people. The image of the leader of the Kremlin's out of control to the country. Putin threatened to destroy Perigo, but reached an agreement with the latter a few hours later, which strengthened a reality: Putin no longer greatly permits Putin for the use of force on Russia.

"It is very clear: Putin looks very weak," said Arina Polyova, director of the European Policy Analysis Center in Washington, but she added that the collapse of the Putin government will also bring its own danger. The United States and its allies "should focus on supporting Ukraine, and at the same time formulate plans for all possible situations, including the collapse of Putin

regime, the government is replaced by the right right, this faction is more cruel and more restrained in the Ukrainian war."

Even if Putin continues to be in power, policy makers are worried that if Putin feels that he is forced to the corner, he may become more elusive.

"Weakness can trigger Putin's more dangerous behavior," Hong Bopei, who had served as the US ambassador to Russia during the presidential period of Trump(Jon Huntsman Jr.)explain. "Putin's" Winning "has a new turmoil, which can be used from all angles."

Russia's civil strife has brought unbeatable comfort to Ukraine. Ukraine has been working hard to drive the invaders out of its territory with American weapons suppliers and intelligence officials, but its long -awaited counterattack progress has slowly.

The Wagner Group's mercenary organization led by Porigon has been regarded as the most effective Russian power on the Ukrainian battlefield. However, as the organization has appealing leaders in exile in Belarus, the mercenary is being absorbed by the Russian Ministry of Defense. The group may no longer be the fierce combat troops.Indeed, Kurite Walker, who was the U.S. Ambassador to NATO and Ukraine, said that Pleigo's citizenship marked the beginning of the end of the Ukrainian war and Putin's term, although the agreement reached by Putin and Pleigo was interrupted The march to Moscow.

"Don't believe in retreat," he said. "This is preparing. Pricigen wants to be regarded as a hero of Russians while fighting for more support and putting forward requirements. The Putin government will not let him go. Express. "

In Walker's words, there will be "more boots falling down."

North Korea pointed out that the recent situation in the Korean Peninsula is similar to the 625 war (that is, the Korean War) period, and North Korea will continue to promote nuclear military strengthening policies.

The Yonhap News Agency reported that the North Korean Society said on Monday (June 26) that the North Korean Institute of Foreign Affairs and the US Institute said in a report that affected by the anti -Korean military confrontation and threats of the United States and South Korea, The military political situation is the same as before the Korean War broke out in the 1950s. It means that the United States' good behavior will push the military tensions of the Korean Peninsula and Northeast Asia, which has been pushed to the edge of the nuclear war.

The US Institute of Foreign Affairs of North Korea also said that this year the United States has focused on infringing the autonomy and security interests of North Korea, and the severity and risk of the situation have reached a situation where they are no longer tolerated. Only the strong self -defense nuclear deterrent power can fully protect the balance of power on the Korean Peninsula, guard the peace and stability of the region, and prevent the war from erupting again.

The Institute said that the United States' anti -era of the enemy's policy and military threats will not be eliminated for a day, and North Korea will accelerate the implementation of self -defense national defense to strengthen policies and continue to exercise the state's legitimate self -defense rights.

Analysts believe that North Korea's above advocacy aims to push the responsibility of improving military forces to the United States, and find excuses for further provocation in the future.

On June 25th, the 73rd anniversary of the Korean War broke out, and anti - American rally was held throughout North Korea on the same day.

Yeiven Porigo, the head of Wagner's private military company, led an armed rebellion in Russia on Saturday and claimed that his troops had entered a

area within 200 kilometers from Moscow. The following is the development process of the incident.

On Friday at 11 am

Pricigen questioned the reason for the war

On Saturday, Yofgen Niopogo in a video screenshot was appointed. Concord Group/Telegram, VIA Agency France-Presse

Beginning at 11 am in Moscow time on Friday, Pricigen posted a series of posts on social media, questioning the Kremlin's motivation to launch the Ukrainian war, and accused Russian Defense Minister Sergei Shoyu in order to conduct a fatal air strike on the Wagner soldiers. Essence "It is necessary to stop the sin of the country's military leadership," he said in a recording he released around 9 pm.

Friday at midnight just

Russia ordered the arrest of Porigor **

Russian security agencies have issued a series of statements on official media to condemn Porigen. The Federal Security Agency of Russia's main intelligence agency investigated Perigo in armed rebellion.

Video circulated on social media showed that the armored vehicles of the army and the National Guard were deployed in Rostov on the banks of Moscow and Don River, and Perigen said that his soldiers were moving there.

Saturday 7: 30

Wagner Army Occupy Rosetov on the River on River

Despite the defense measures, the Wagner army still occupied Rostov on the banks of the River, and almost no resistance was encountered. At around 7:30 in the morning, Perigo posted a video from the regional military headquarters, claiming to control the main cities' facilities. Video on social media show that the armed Wagner soldiers are incorporated into the hustle and bustle of the metropolis: they control the traffic at the main crossroads, walk around the city with takeaway coffee, and order fast food.

Reuters

Saturday morning

Wagner Army Promote from Moscow

As Wagner consolidated the control of Rostov on the banks of the River, his army pushed north to Moscow. A series of armored vehicles and troops seemed to start from Rostov. Another column crossed from the occupied

Ukraine and entered the Volneri region in northern Russia. They rarely encountered resistance and seemed to shot down some Russian military aircraft along the way.

Saturday at 10 am

Putin made a national speech

On Saturday, Putin delivered a TV speech in Moscow. The picture shows the official Russian media. Sputnik, via reuters

Putin delivered a TV speech across the country to demand unity across the country to deal with the war he said against Ukraine and its allies. He said: "The division of our unity is to stab the knives behind our country and the people."

Saturday afternoon **

Wagner team arrives at Yeliez

Wagner's armored columns passed through the Volnes. They did not enter the major cities, but stopped by the roadside of Yedrez, a small town of Leditz, about 400 kilometers south of Moscow. The column includes tanks, armored vehicles, at least one self -drive rocket launcher and a large number of troops. At this moment, it has almost no resistance.

Saturday night 8: 30

Unexpected agreement

The official Belarusian media unexpectedly announced that the country's President Alexander Lukashenko has negotiated with Porygo, and the latter agrees to stop his troops forward. In the audio message, Porygin said that his troops had entered 200 kilometers away from Moscow and were returning to their training camp by "U -turn".

Saturday night at 11:00

Pricig left Rosteov on the banks of the River **

On Saturday, Russia, Wagner's private mercenary group evacuated from the southern military district headquarters and returned to the base camp.

Reuters

The Wagner troops left Rostov on the bank of the River, and some residents came out to show support. Porygin was sitting out of the city in a rigorous black SUV.

The person in charge of Wagner, Eveni Pleigo, left his headquarters.

On June 21, the gas explosion of the Fuyang chain barbecue restaurant in Xingqing District, Yinchuan City, Ningxia, killed at least 31 people. Wang Pang/v Nianhua VIA AP Audio-1-Link: [@w](https://Woohoo.Hair dyeing.org/mandarin/Asia Pacific Report/Human Rights Law/It seems 1-06262023081806.html) In the past two months, the Chinese media have

disclosed at least eight and more than 50 people's death. In this regard, the Minister of Public Security Wang Xiaohong ordered the implementation of strict summer inspections.

Official confirmation: major dead injury accidents occurred in Ningxia and Inner Mongolia Xi Jinping requested investigating the Yinchuan explosion accident * Yinchuan barbecue restaurant explosion 31 dead 7 people rescue **** Around the Dragon Boat Festival, there were many explosions in China. According to comprehensive media reports, on the morning of May 1st, a fire fire occurred in the Luxi Chemical hydrogen peroxide production area located in Shandong, and huge mushroom clouds emerged at the scene, causing 9 deaths, 1 injury, and 1 loss. On May 26, Langfang, Hebei, Langfang, Hebei The explosion of the Zangtun Police Station in Dacheng County caused 4 deaths and 2 lost contact. The incident was suspected of having to store illegal firecrackers. On June 13, two communities in Tianjin exploded, causing 3 deaths and multiple people to be injured. The suspect used fireworks to use fireworks. The firecrackers committed the crime.

On May 1st, an explosion accident occurred in Liaocheng Luxi chemical hydrogen peroxide production area in Shandong. Officially reported that the accident caused 9 deaths, 1 injury, 1 loss. (Twitter screenshot/provided by Xia Xiaohua)

Ningxia barbecue restaurant gas explosion 31 dead Lanzhou petrochemical plant flash explosion

On the evening of June 21, the gas explosion of the Fuyang chain barbecue restaurant in Xingqing District, Yinchuan City, Ningxia, killed 31 people and was injured in 7.

Overseas Epoch Times reported that on June 22, a sudden explosion accident was reported by Yingkou Iron and Steel Factory in Liaoning, which caused at least 4 deaths and 5 injuries; The explosion accident caused the house to collapse, the four were buried, the two were injured, and the two were seriously injured.

In addition, the official CCTV disclosed that a petrochemical company in Xigu District, Lanzhou City, Gansu City flashed on the evening of the 24th, and the thick smoke spread a few kilometers away. After the accident was suspected to be concentrated to a certain concentration, it was detonated by Minghuo or Electric Spark.

On June 24th, a flashy accident occurred in a petrochemical company in Xigu District, Lanzhou City, Gansu. (Screenshot of Internet Video/Provided by Xia Xiaohua) Major cities such as Beijing and Shanghai also launched a major investigation of safety accidents. On the 25th, the State Council of China decided to establish a "621" major gas explosion accident investigation team.

Minister of Public Security in China: Investigation and rectification of public safety hazards

The Minister of Public Security Wang Xiaohong ordered the video conference on the national public security organs on the 25th to conduct in-depth summer public security and combat centers, deepen reverse osmosis, disruption, anti-terrorist, anti-division, anti-cult struggle, and resolutely defend political security; adhere to and develop new new new; Times "Maple Bridge Experience", effectively investigate and resolve various contradictions and disputes; strictly prevent and control the overall social appearance, strictly implement mechanisms such as the joint police patrol and rapid response of the Public Security Armed Police; Rectify the tackling and strictly prevent public safety accidents.

Wang Xiaohong (Reuters), Minister of Public Security 

[¶\(Images/rfamandarin/2023-06-26T10-56-00-04-00/000006.png\)](#) Disaster experts and professors of the Department of Architecture at the Department of Architecture of Taiwan Mingchuan University were interviewed by Radio Asian Radio in Liberty, stating that eliminating hidden dangers must come from the front line of security prevention, and public power must be effectively involved in exclusive inspection and drills. How to respond after the explosion of the Chinese public security and armed police is an outer surveillance. The relevant safety measures must be established at the same time, otherwise they will only cope with more accidents and can only maintain order outside.

Taiwan disaster defense expert: eliminating hidden dangers must come from front-line safety precautions

The price of the king said: "Whether there is enough risk awareness for the education and training of the front-line staff. Once the situation is encountered, how to notify and start the entire strain disaster procedure in the limited time, all rely on the ability and energy of the front line. If this risk is on this risk. The signal cannot be read, and there are only crisis treatment and emergency response in the back. "As for the flashing accident of the Lanzhou Petrochemical Factory, 80 % of the king's prices were judged that 80 % of them were artificially negligible, involving the source of explosive items,

transportation, manufacturing, equipment, etc., and whether the manpower and capabilities were sufficient: "All public security incidents will not suddenly explode suddenly There must be signs and spiders that can be followed. It is likely that the monitoring team of the factory or the safety strain group does not consciously or ignore these signals, and it will accumulate to a certain energy to cause incidents. These negligences are links that must be improved. "

Original firefighters: Bringing of the industry, security, water release, etc. must be eliminated

Gong and Jian, a person in China, said that he had done a contract -based firefighter in China: "The fire protection power is very large, and the fire prevention inspection of the Fire Department has serious problems in corruption. For each inspection, just a soldier like me, you can receive high - end smoke that is directly stuffed to you at one time, and sell about 1,000 yuan for second -hand stores. You can imagine how much the higher -level bribes are responsible for the inspectors. ? I have seen it with my own eyes. Those who were inspected were publicly stuffed with red envelopes to fire inspectors. It was thick and stacked, at least 10,000 pieces. "

Gong Yujian said that most of the public safety accidents were caused by human disasters because they did not check in strict accordance with fire regulations. If the ranking is truly implemented, it can reduce the disaster.

Gong and Jian also revealed that China's fire brigade is equipped with full - time fire correspondents and the missionary center to handle press releases. The news that can be on the media is very small rescue. The disaster is either pressed down to silence or only the size of the tofu block. The traffic bridge collapsed in his city, and the authorities organized the province to rescue the province. However, how many people who were killed under the bridge were still national secrets, and local media had almost no reports.

06262(<https://www.rfa.org/mandarin/yataibaodao/gangtai/ec-06262023071450.html/@@stream>)In the "National Security Law", the critics who were difficult to appear in Hong Kong have tried to start another stove in the past three years. Through the online platform, they continue to assume the role of the fourth power overseas and supervise the operation of the Hong Kong government.

Hong Kong's fighter two -year four -year: Former Apple Daily reporter set up online media to serve Hong Kong people Hong Kong 612 Fourth Anniversary Special Report: How can overseas discrete Hong Kong people condense their heartpower?

On the eve of the Hong Kong "National Security Law" in 2020, the 31 -year -old Hong Kong satirical current disadvantage "Headline News" was suspended. Host Wu Zhisen and Zeng Zhihao moved to the United Kingdom and Taiwan respectively to open the YouTube Channel and continue to comment on Hong Kong's current politics.

Wu Zhisen (pictured left) and Zeng Zhihao (right) put on the costumes prepared by the fans, and returned to the Queen Mother and Xiao Haozi in the "Headline News", so that Hong Kong people regained their old memories. (Photo by Chen Zifei) There are more than 500,000 households in their channels. Wu Zhisen said that after the National Security Law, there is almost no time to comment in Hong Kong. It is difficult for the media to play the role of the "fourth power" to supervise the government. Overseas reviews can fill this gap.

Wu Zhisen: "There are still many Hong Kong people who are very concerned about the development of current affairs and Hong Kong. They are not willing to be covered in the drums and want to continue to understand the environment in which they are. "Watchdog", but many Hong Kong media have been cut off, because everyone knows that now it is just 'and thin mud', news and comments will only be brought gently, the media can no longer speak, in Hong Kong, in Hong Kong, in Hong Kong, in Hong Kong. We cannot hear these news and interpret these news, and we have room for comments according to facts. These Hong Kong people think that it is worth listening and can provide them with real information. "

Zeng Zhihao: The mainstream of the online evaluation program is Mandarin Hong Kong Cantonese Review Demand in Cantonese Rating increases development space

Zeng Zihao said that although there are many different comments on the Internet, there are not many hosts who use Cantonese and Hong Kong styles.

Zeng Zihao: "YouTube of the Chinese World, many of them talk about mainland China, maybe Xi Jinping, Xi Jinping, and Xi Jinping every day. Hong Kong is relatively small. I also need to pay attention. That needs are still there, so overseas comments are a bit like the concept of foreign purchasing. I am in Hong Kong, but my vision is not absent in the world. You can buy some comments. I hope that it is funny, or I want to listen to the bed division. I feel that this can really have a lot of market demand. "

Zeng Zihao: "Today's" British and Taiwan Club "is different from different. We have changed from 'Yingtai Association' to the 'Shanxi Society'.

For the first time, Wu Zhisen and Zeng Zihao were broadcast live in Taipei, attracting dozens of people at the scene, and more than a thousand people watched it online. (Photo by Chen Zifei) Wu Zhisen and Zeng Zihao will cooperate live broadcasts every week, allowing the audience to recall the memories of "Headline News". For the first time, they lived on the scene in Taiwan for the first time, attracting dozens of Hong Kong people from different places to participate in Taipei. There were thousands of people watching online.

Wu Zhisen: When overseas continues the "Headline News" style, it commented on the channel for Hong Kong people to miss Hong Kong.

Wu Zhisen: "You can't estimate how far the audience is from. A listener had been played in Croatia for many years. He wanted to say the Croatian's cultural conflict on the show. Because they did not have the opportunity to be locally, they could share them in Cantonese. In the alien life, they want to share on our programs and platforms before they have the opportunity to find their identity. This platform can create this effect, which is expected. "

Zeng Zihao said that there are not many online programs that arrange audiences to call and share. Their shows used the popular program mode back to Hong Kong to make the audience find the feeling of Hong Kong people.

Zeng Zihao: "When we do a show every week, everyone's favorite is my call in(See the phone) link. Later, we found that the audience had a lot of opinions to express, or they had a lot of emotions in their respective life fields, and they needed to be vented. There was a callin link. They cherished, warmed, and

communicated. Overseas needs to find themselves from Hong Kong people. We are really so -called 'weconnect' to give them virtually(connect)Essence "

** Zeng Zhihao: There are too many red lines under the national security law.

Zeng Zhihao said that in overseas, it is difficult to escape the influence of the National Security Law. If you want to continue to make time -judges, you can only make a decision between Hong Kong and freedom of speech.

Zeng Zhihao: "Continue to continue, that risk is getting farther and farther from Hong Kong. I still retained the space in the Ming Pao in Hong Kong. When you are supplied overseas, you are really free to write down. You will encounter some red lines in Hong Kong. As a result, you will make a choice. If you have this psychological preparation, the risk of returning to Hong Kong will increase. connect."

Wu Zhisen said that the red line of the National Security Law is uncertain, political review is pervasive, and the issue of people's livelihood issues involves politics, so that everyone's risk values are different every day. It can only be said that they do the same work in Hong Kong overseas and do the same work in Hong Kong. The risk is relatively low, but no one can accurately evaluate.

New crown traceability: The American intelligence report shows that the internal differences of Huafu, the "zero patient" vote for the disease

11:07 am on June 26, 2023![] Image source, reuters

Image adding text,

The new crown traceability problem has been arguing in the United States for a long time, and it is also an important part of affecting the deadlock of Sino - US relations. The Wuhan Virus Research Institute is one of the focus of controversy.

A decryption report in the United States shows that the intelligence circle failed to find direct evidence, which proved that the 2019 coronary virus (COVID-19; Neo-Crown Virus disease) originated from the Wuhan Virus Research Institute of the Chinese Academy of Sciences, but at the same time, it cannot be ruled out.

The report from the Office of the National Intelligence Director (ODNI) stated that the American intelligence agencies agreed that the new crown virus was neither genetically modified nor the laboratory domestication. But the possibility of viruses from nature or laboratory still exists.

On the occasion of the report, the Wall Street Journal quoted the Washington Intelligence Circle that the three researchers of the Wuhan Virus Research Institute were the new crown "Zero Patient", and the two of them actively came into contact with the well-known American academic magazine "Science" and denied the relevant statement.

The new crown traceability problem has been arguing in the United States for a long time, and it is also an important part of affecting the deadlock of Sino-US relations. The Ministry of Foreign Affairs of China (June 26) states that the United States should "disclose the situation of Detrickburg and the biological laboratory set up around the world, giving the people of the world a responsible explanation."

Brinken visited China and Biden's "dictatorship" Sino-US relations "one week under the" lip, tongue sword "New crown virus traceability: top Chinese scientists say they should not exclude laboratory leaks 着眼于实验室泄漏，我们是否找到了“动物起源”的新皇冠病毒？Was the virus leaked from the laboratory, did it happen before? The Communist Party of China summarizes the prevention and control of the epidemic with the "major decisive victory", and some analysis says that the warning disagree is warned Chinese officials, including former Chinese Ministry of Foreign Affairs spokesman Zhao Lijian, have repeatedly identified that the new crown virus is about 80 kilometers north of Washington Fort Detrick military base "Manufacturing" inside. But these recognitions did not provide specific evidence.

Chinese Foreign Ministry spokesman Mao Ning said at a routine press conference: "" laboratory leak poleness' cannot be" the joint experts of China -WHO visited the relevant laboratory in Wuhan and came up with in-depth exchanges with relevant scientific researchers. The authoritative scientific conclusion is accurately reflected in the joint research report of the China -WHO's traceability, and has also been widely recognized by the international and scientific communities. "

"The United States should immediately stop the politicalization, toolization, and weaponization of traceability issues, stop planting discredit, dazzling the pot, and dumb the doubts of their existence, and respond to the reasonable concern of the international community as soon as possible ... Give the people of the world a responsible explanation. "

[Video-1-Link:/WS/AV-EMBEDS/CPS/ZHONGWEN/SIMP/Science-66020211/P09llsln/ZH-Hans]](<https://www.bbc.com/ws/av-embeds/cps/>

zhongwen/simp/science-66020211/p09llsln/zh-hans) **Your equipment does not support playing multimedia materials** video plus injection text,

June 2021: BBC's "News Night" investigated the theory of leakage in the Wuhan Laboratory, interviewed a number of experts, and analyzed the reason.

Investigation of the intelligence agency, what are the new discoveries

In March, the US Congress passed the bill to order information about the intelligence agency to decrypt documents about the Wuhan Virus Research Institute within 90 days. The Office of the National Intelligence Director published the decryption document last Friday (23rd).

This 10 -page long report said : "Because two assumptions (natural or laboratory) relied on a large number of assumptions or facing contradictory report challenges, the Central Intelligence Agency (CIA) and other agencies still cannot determine the accurate source of COVID-19."

The report pointed out that four U.S. government agencies believe that the virus is infected with humans from animals, and the other two organs -the Energy and FBIs (FBI) -still believe that the virus is leaking the laboratory.

According to the survey report, the US intelligence circle has not been able to exclude the new crown virus comes from the laboratory, but all intelligence agencies agree that the new coronal virus does not originate from the development of biochemical weapons.

[Video-Link:/WS/AV-EMBEDS/CPS/ZHONGWEN/SIMP/Science-66020211/P0ds0nwk/ZH-HansS]](<https://www.bbc.com/ws/av-embeds/cps/zhongwen/simp/science-66020211/p0ds0nwk/zh-hans>) **Your equipment does not support playing multimedia materials** video plus injection text, According to the report, the Wuhan Virus Research Institute and the Chinese military have cooperated with coronary virus research due to public health needs, but did not involve any infection that can produce new coronary virus.

However, the report also proposed that scientists at Wuhan Virus Research Institute built different coronary viruses "chimelas" and used the Reverse GeneticCloning technology, which made the hidden intentional modification possible.

According to the report, some researchers may not take sufficient biological safety guarantee measures during the operation experiment before the new crown epidemic.

Wuhan Lab "Patient No. 0" refers to "fake news"

However, according to the report, the U.S. Intelligence Institute had unknown laboratory accidents that have occurred in the Wuhan Virus Research Institute.

The report pointed out that the accident occurred in the fall of 2019, and several researchers were infected. However, the report also believes that they are infected with other diseases, and some symptoms do not match the new coronal virus disease.

Image source, AFP

Image adding text,

Shi Zhengli insisted that researchers named "Zero Patient" did not contact the living virus.

American "Wall Street Journal" quoted American intelligence sources last week The infected researchers in the accident were Hu Ben, Yu Ping (transliteration) and Zhu Yan (transliteration). Show the news blog "Public" with the purpose of anti -mainstream media

[Public](<https://public.substack.com/p/first-people-sickened-by-covid-19>), And said that three were researchers for Wuhan Virus Research Institute.

Among them, Dr. Hu Ben is an associate researcher at the Wuhan Virus Research Institute. According to the official website of the Institute, its research direction includes new pathogens of bats and rodents. "The Mass" quotes Dr. BroadInstitute, a post -doctoral researcher at the Massachusetts Institute of Technology -Harvard University, and Dr. Dr Alinachan, a molecular biologist. The proud door was regarded as his successor.

Science magazine said that he received a letter from Hu Ben and Yu Ping Essence Hu Ben wrote in the email: "Recently, news about the so -called" Zero Patients "is completely nonsense."

"I didn't get sick in the fall of 2019, and I had no symptoms of new coronary virus. My colleagues and my colleagues received the new coronal virus (SARS-COV-2) antibody detection in March 2020, all of which were negative."

Yu Ping described the allegations as "fake news". "Science" magazine quoted her: "In the fall of 2019, I have no illness nor any new crown symptoms."

The two also denied any living virus experiments.

[Video-3-Link:/WS/AV-EMBEDS/CPS/ZHONGWEN/SIMP/Science-66020211/P09cfx14/ZH-HansS]](<https://www.bbc.com/ws/av-embeds/cps/>

zhongwen/simp/science-66020211/p09cfx14/zh-hans) **Your equipment does not support playing multimedia materials** video plus injection text,

April 2021: David Nabarro, the WHO New Crown Special Envoy, said that from the past experience, the traceability of the virus rarely finds clear road signs.

Medical journal "Infection, Genetics and Evolution) [Once in February 2019](#) After publishing the study of the same type of viruses of Bat spread and atypical pneumonia (SARS; Sas, Saus), Hu Ben and Yu Ping also participated in the study.

"Science" magazine said that Shi Zhengli confirmed the magazine's statement via email, and said that Hu Ben, Yu Ping and Zhu Yan had only used RNA to extract genetic sorting, and did not contact the living virus.

The magazine also quoted the French National Science Research Center (CNRS) researcher Dr FlorenceDébarre, a researcher at the National Science Research Center (CNRS) who has participated in the virus data of Wuhan South China Seafood wholesale market.

Wuhan South China Seafood wholesale market is the first place where the new crown virus cluster is infected. Supporters of laboratory leaks pointed out that the Wuhan Virus Research Institute is only a 40 -minute drive from the South China wholesale market.

Dr. Dabare said that she had an open attitude towards laboratory leaks. Now she believes that the new crown virus comes from nature and take the initiative to play with the laboratory leaks on the Internet. [Zeng Yujia is one of the targets of Dabre's public counterpart](#) .

American politics to send artillery to the Biden government

John Ratcliffe, who served as the director of the National Intelligence, responded to the latest decryption report during the president of Donald Trump, responded to the latest decryption report, accusing the current president Joe Biden and its government "continuously confusing audiovisual".

Ratclyve said in a statement: "Laboratory leakage is the only theory that is supported by science, intelligence and common sense."Image source, reuters

Image adding text,

In the bill of Biden (left) signed a Congress requesting the decryption investigation report in March, he said that his expectations were consistent with Congress, and the more information he could distribute, the better.

The joint investigation conducted by the Chinese government and the UN World Health Organization (WHO) in early 2021 believes that the laboratory leakage theory is "extremely impossible." This conclusion caused the WHO to suffer violently Many experts believe that such a conclusion cannot give enough answers, and only more questions are derived.

The Broadcasting Corporation of the United States reported that the Republican House of Republican House Intelligence Committee chairman Miketurner and the President of the Special Group Committee of the New Crown Virus Brad Wenstrup, the President of the New Crown Virus. The decryption report increases the credibility of the laboratory leakage theory.

"The Communist Party of China and the Chinese PLA must be explained solemnly with the Chinese PLA."

"While we are grateful for the report of the Office of the State Intelligence Director, the search and survey of the source of the new crown virus disease must continue."

However, some experts believe that for the new coronal virus disease that leads to nearly 7 million people around the world, its real source may never be known.

Analysis: Iraq's new budget may be greater than profit

Author: 半岛电视台

Publisher: Al Jazeera

Type: Article

Iraq's new budget may be greater than favorable

The Iraqi National Assembly passed the federal budget in 2023, 2024, and 2025 on June 12. At this time, it was established for nearly eight months from the new government of Prime Minister Mohammed Sudani.

This year's budget was the largest in Iraq, reaching 19.89 trillion in Iraqi, and was calculated about \$ 153 billion at an official exchange rate. The budgets in

2024 and 2025 will remain unchanged unless the cabinet requires any modification and is approved by parliament.

The government uses the 2019 Financial Management Law for the first time, which allows the law to formulate a budget for up to three years. Iraq has not only progressed slowly through budgets, but also has not passed the budget at all in the past nine years -in 2014, 2020 and 2020, and 2020, respectively 2022.

Although the budget in 2023 is only half a year, people can rest assured that the budget will be covered in the next two years to ensure that the government will hold the next federal election at the end of 2025 and have a budget before the provincial parliament elections in this year.

The federal budget also allows the government to provide funds for local investment projects and hire hundreds of thousands of public sector employees, which has a positive impact on the Prime Minister and its governing alliances and increase their ability to elevation in the two upcoming elections.

ambitious but at stake

However, Iraq's economy and budgets are seriously dependent on oil, which has caused both of them to be unstable, and almost all national income comes from oil sales. In 2022, Iraq earned a record 115.6 billion US dollars from oil, but oil is an unstable commodity. Although Iraq is the second largest member of the output, it does not control the global oil market, nor is it not, nor is it not Relevant decision makers of OPEC.

This makes Iraq easily affected by the unstable oil market and the output decision -making decisions of other OPEC member states, especially because the budget is based on the ambitious oil prices of \$ 70 per barrel. If the price falls, it may cause a series of economic dilemma and Public anger.

The budget requires hiring more than 500,000 Iraqi this year. This is not the first budget to recruit large -scale public sectors. At least 4.5 million employees in the public sector in Iraq are overwhelmed.

The government's office is overcrowded, and the organization is chaotic, which further slows down the speed of bureaucracy. This year's large -scale recruitment will also bring a pension burden on the future government.

In 2022, Iraq earned a record 115.6 billion US dollars (AFP)

If the government wants to increase more employment in 2024 and 2025, it only needs to vote for parliament. Therefore, it may increase more jobs in the next two years.

Like many countries in the region, Iraq's social contract is based on the recruitment of public sector. Citizens are expected to work in the public sector when graduating from college. Article 22 of the 2005 Constitution of Iraq stipulates the right to work. But people generally think this means government positions.

Since 2003, the public sector has increased four times, and current salary accounts for more than a quarter of the budget of 2023.

The way Iraqi Hussein formed after the steps of Saddam Hussein in 2003, as if the country can still afford this arrangement, and this is for political interests. In the Kurdish region of Iraq, we use the asylum network to establish contact and legitimacy with the people of the New Iraqi country.

Therefore, the millions of Iraqi people were hired to the public sector. This is something they have used to, but fortunately, there is a new political sponsorship.

Regardless of whether it is for the right to vote or the belief in the right to work in the public sector, even independent candidates and new political parties have advocated the recruitment of public sector, and even the improved political movement after the protests in October 2019, and is unwilling to implement it. No matter how important these reforms are.

The reforms that are often discussed by experts but rejected by the public are restricting the recruitment of public sectors and stricter taxes.

The protests that occurred from October 2019 to March 2020 called for economic opportunities, ending corruption and political reform, which led to advance election and new election law, but the political system itself did not have systematically changed.

What makes things further complicated is that the protesters continue to ask for employment. In some cases, a few independent members have participated in these protests.

Reconstruction of the country

Infrastructure expenditures are the focus of new budgets, and the budget distributed the development and reconstruction funds to specific fields.

The Sindal and Nini Plain Reconstruction Fund provided 50 billion Denal (\$ 38 million) to rebuild in areas that were destroyed in Islamic State (ISIS). 76 million US dollars) for Kah's service items, the west bank of the Dagr River will build the Darvesh Bridge, laid streets, and repair public space and parks.

75 billion Denal (\$ 57 million) is used to revitalize the swamp land in the southern provinces in the south.

In addition, there is a reconstruction fund for the most poor provinces, with a amount of 500 billion Denal (US \$ 381 million), which aims to improve infrastructure, medical care, electricity and education services such as health care, electricity and education services. This is a "Islamic State". It affects the supplement to the existing reconstruction funds in the area.

However, Iraq's records of federal budgets are not the best. The latest budget execution rate passed in 2021 is 79%, and wages and pensions are given priority.

Iraq's foreign exchange reserves reached a record high, and no longer need to pay Kuwait's compensation in 1990, but there is no vision for how to invest in these wealth, and the budget still has deficit.

Expanding the public sector actually helps to further slow down Iraq's bureaucracy, which hinders the implementation of development projects. In order to solve this problem, economic reform is necessary, but these reforms have not been carried out in the budget.

For example, the economic policy department of the Prime Minister's office did not allocate funds. Therefore, although Iraq has just passed the biggest budget ever, its director is still seeking external funds.

The current government may only perform the recruitment commitment of the former government, but there are no obvious reasons not to include economic reform into the budget algorithm.

If the public recruitment is frozen or the upper limit is written into the law, it is not forced by the administrative order of the Prime Minister's office, it will be more difficult to reverse.

The huge budget scale makes it difficult for Iraq to seek foreign aid for development aid or economic reform. The improvement of Iraq's security situation and stability may attract foreign investment. For example, the TOTALENERGIES transactions in Iraq are worth \$ 27 billion, of which Qatar Energy Company owns 25%. Stocks.

However, if there is no economic reform and the budget is not much different from before, it is difficult to prove to foreign investors that Iraq is a good choice. This budget covers three years, which is forward -looking and emphasizes infrastructure and reconstruction. This is positive, but its indifference to economic reform will increase pressure on future budgets and government.

Blingken visited China, and the CCP refused to restart military dialogue. This attitude of Zhongnanhai shows that the Chinese Communist Party wants to continue to expand the army and further challenge the international order, and military dialogue will undoubtedly hinder the planning of the Communist Party of China. It can be judged that the Cold War between China and the United States will not be

relieved due to diplomatic dialogue; on the contrary, the Cold War between China and the United States will continue to upgrade in the expansion of the army and intelligence warfare confrontation. But does this mean that the war comes? This article analyzes the true meaning of the Taiwan Strait area and the war with the war. Why can Taiwan be able to gain peace in the Cold War of China and the United States, but it will inevitably destroy peace about the CCP.

1. What stage of the Cold War between China and the United States?

Although the Chinese Communist Party has always criticized the United States to have the Cold War thinking, and US Secretary of State Brillings also emphasized that China and the United States are not currently in the "Cold War" relationship, but coexisting competition and cooperation, but in reality, the relationship between China and the United States has become increasingly upgraded by the Cold War to upgrade towards the Cold War. Move the direction. The initiator of the Cold War of the China and the United States is undoubtedly the CCP; the upgrade promoter of the China -US Cold War is still the CCP. In fact, the Chinese Communist Party's position in this regard is that international rules and international order must be arbitrarily decided, "I can provoke it, you do not respond; I can foul, you are not allowed to resist", otherwise you have "cold war thinking"; This is just a copy of the international relations of "only the officials of the state officer to set fire and not allowed the people to light", which is a declaration of the new red power hegemonism in the 21st century.

I published an article published in this station on June 16 this year, "The Cold War in China and the United States", introduced the process of igniting the CCP's ignition of this Cold War, and from early 2020 to the present. Confrontation, quickly extended to the level of diplomacy and high -tech; once the Sino -US confrontation was locked to the high -tech level, this new cold war was finally shaped into a standard comprehensive cold war, so the CCP could not withdraw.

Recently, the Cold War upgrades made by the Communist Party of China have once again become the center of international attention. On June 3rd, a military confrontation between China and the United States had another military confrontation. Normal routes created a risk of collision, which is a threat to often play with Soviet submarines in the Cold War of the United States and the Soviet Union. In terms of intelligence war, the Communist Party of China imitates the Soviet Union's practice during the Cold War of the

Soviet Union, set up a long -term electronic listening station in Cuba near the United States, and blatantly steal the military telecommunications intelligence on the East Coast of the United States. At this level of standard Cold War Intelligence War, the CCP's approach is also the "homework" of the Soviet Union in the Cold War of the Soviet Union.

Why are the CCP not afraid of their own expansion and preparation activities and repeated violations of international regulations at sea and air, and the way to create dangers and frictions, will they "wipe the guns and fire" and cause a hot war? The reason is very simple. The CCP knows that the red power of a large country with a nuclear weapon to the United States will not cause the United States to fight back, because in the cold war state, the two sides "wipe the gun without fire" are the highest criterion; Once a big country of nuclear weapons occurs, once a hot battle occurs, the nuclear war and the earth can be destroyed. Zhongnanhai uses this cold war hidden rule of "wiping guns without getting angry" to continuously test the bottom line of the United States and step by step. Brosky repeatedly told Xi Jinping that the two sides should set up a "Guardrail" at the military confrontation level, and to ensure that "the gun does not go away."

2. China's true intention to seize the international waters of the South China Sea

Why did the Chinese Communist Party prevent the US military from conducting normal patrols in the international waters of the two Gonghai in the South China Sea and the Taiwan Strait. What are the underwater in the South China Sea, the CCP does not want to let the United States investigate? A report from the National Security Media "Multidimensional News", which was closed last year, published a report on March 4, 2020, the title is "Decoding China Strategic Nuclear Submarine South China Sea Sea", and the underwater is silent ". Due to Xi Jinping's anti -Xi forces in the Ministry of National Security, "Multidimensional News" has been closed, and now only one of the articles reprinted by a Chinese website in the United States can still be seen.

This article has clearly stated the strategic purpose of the CCP's strong occupation of the South China Sea Sea area: "The key is that the South China Sea belongs to the 'Fortress Sea in China' ... After the mid -1970s, the Soviet Union proposed the 'Fortress Sea District' Strategy, that is, the strategy of the sea area, that is, In a certain sea area, we heavy soldiers have defense and create a sea fortress. The launch position of the ballistic missile

nuclear submarine is set in the fortress area to enhance the 'secondary nuclear strike' capability ... China has chosen two legs to walk, which will break through the island chain blockade and enter to enter. In the Western Pacific, it is also necessary to establish the 'Fortress Sea District' ... The Chinese military has made the South China Sea into China's "Fortress Sea" - The ballistic missile nuclear submarine launch position. The deep water depth of the South China Sea Basin is from 3,400 meters to 3,600 meters, which is very suitable for large submarines such as ballistic missile nuclear submarines. China 's control over the Xisha Islands, Zhongsha Islands and the reclamation of the Nansha Islands have greatly strengthened China' s control over the South China Sea Basin. ""

It can be seen that the CCP occupies the reef in the South China Sea and builds seven artificial islands in order to protect the strategic nuclear submarine that protects from Yulin Army Port in Sanya City, Hainan Island. Intercontinental missiles carried by this strategic nuclear submarine can attack the western and central and western regions from the deep -sea nuclear warheads, constitute a nuclear threat to US national security. It is because of such a strategic nuclear submarine "Fortress Sea Area", the CCP provoked the United States one after another to provoke military threats.

The first direct movement of the CCP's military cold war in China and the United States was the direct naval fleet to the United States to perform a exercise near the Pacific Midway in early 2020, and the "Sword refers to Pearl Harbor"; while the Chinese Communist Party built a strategy The Nanhai "Fortress Sea" of the nuclear submarine dispatched nuclear submarines from there, crossed the bus strait, entered the Western Pacific and even the Central Pacific, which was the second major action that the CCP threatened the United States. The "Liren" of the CCP's "rising southward"? "Introduced in". **Three, and battle: Whether there is a Cold War, the opposite meaning**

Because the Chinese Communist Party has never clarified the key hidden rules of "wiping guns without fire" in the cold war state internally, so that for the Cold War in China and the United States, Chinese "pink" are often a war. As a result, sometimes the CCP. Will have to let go of the wind to destroy the "fire" a little. For example, I pointed out in the article "The Communist Party's long -term strategy of Taiwan and the current" forced uniform "intention published on this station on May 30 this year. To face the "four -line operation", must our army be cautious? ", Indicates that the PLA cannot lightly start the war in the Taiwan Strait. It has been more than two months

after this article was published. When I wrote this article, it was still spread on domestic websites. This is the "fire extinguishing" action of the CCP's internal promotion.

Although Taiwan is located at the front line of the Cold War in China and the United States, there are many misunderstandings and misunderstandings in Taiwan. The most typical of these is the selection slogan such as "votes for votes and youths on the battlefield"; its related publicity also emphasizes that "votes are voted in the wild party, and there is no war." This slogan is a misunderstanding or deliberate interpretation of the current situation, because this type of slogan completely reads the international situation in Taiwan, and it is completely ignorant of the Cold War of China and the United States. However, in the face of such deliberate misleading, many young people in Taiwan have "eaten" it, so that the pre -election polls have obvious tendency to identify with this statement.

The author feels that it is necessary to analyze the peace and war under the Cold War, so as to clarify the righteousness. When it comes to the threat of war provoked by the Communist Party of China, everyone only sees the threat itself, but it is often impossible to see that the military threat itself does not mean the war, and the war is different from the hot war and the Cold War. The Cold War is a war. Is there peace under the Cold War? For decades of the Cold War of the United States and the Soviet Union, the World War I did not break out; it was precisely the Cold War of the United States and the Soviet Union, which brought up to 40 years of peace to the earth after World War II.

Many people only stare at the words in the Cold War, and when they hear the Cold War, they think of the hot war, so they feel that the Cold War is also a battle, not as good as peace. In their minds, the word Cold War has a total of two characters. It is a virtual word. However, the facts are just the opposite. The word of the Cold War is just a word, and the cold is the core concept. Because the purpose of the Cold War is to avoid the war and avoid the world's hot war, which is said by General Yu Beichen, a member of Taoyuan County and Major General Yu Beichen. The history of the Cold War in the United States and Soviet Union proved that the Cold War did successfully curb the popularity, so it brought peace to the world. Therefore, when it comes to the Cold War, the important core is to put the vision on the cold characters of the Cold War.

The Cold War has always been launched by the Communist powers with nuclear weapons. Since the United States still cannot discourage the Communist regime to stop the threat of war, Taiwan's opposition party is not qualified to talk about peace and talks. The Chinese Communist Party launched the Cold War. Like the Soviet Union, it was not Taiwan, but the United States; in the Cold War of the Sino-US Cold War, it was not a third party on both sides. If there is no Cold War in China and the United States, there will be no international obstacles to Taiwan's martial arts; in that case, war will destroy peace. However, after the Cold War in China and the United States has taken shape, the United States has to take the security of East Asia, especially Taiwan as its own strategic goal. To this end, it will support Taiwan with the allies. Both have begun to adjust the deployment to achieve this strategic goal. In this way, Taiwan under the Cold War of China and the United States has the possibility of peace, just like West Germany in the Cold War of the United States and the Soviet Union.

Four, American characters in the Cold War of China and the United States

Since the CCP thinks that the military strength has increased, it has the ability to launch the Cold War between the United States and the United States, so in this world, only the United States can hold it up. The United States, which has nuclear weapons and is the number one military power, has no other choices except to stop the war threat of the Communist Party's regime; otherwise, the world will repeat the mistakes of the Pacific War, and once again face the Indo-Pacific region caused by the Greater Japan Empire's southward strategy. War.

For the United States, the only strategy that can confront the CCP's ambition to expand its external ambition is to force the Communist Party to fall into the international confrontation under the Cold War. In the end, this pattern will allow the Communist Party to gradually fall behind in the process of expanding the army and the economy. In this regard, the disintegration and disappearance of the Soviet Union gave us the clearest conclusions.

In fact, after the CCP ignited the Cold War of China and the United States in early 2020, the United States' attitude towards the CCP's military threats at the beginning was as slow as the early Cold War of the United States and the Soviet Union. President Trump first initiated a trade war on tariffs on the CCP, while using diplomatic means, hoping that the CCP would change the practice of large-scale theft of American smart property rights. The Chinese

Communist Party has not greeted the United States and the Snake in the United States.

After Biden took office, the United States faced the increasing military threat of the Communist Party of China and had to deal with it. This has the saying that the US military may explode the war on the Taiwan Strait. At this time, the CCP believes that it is necessary to rely on increasing military threats to let the United States retreat. As a result, the Communist Party of China has stepped up the threats of military aircraft and martial arts, and expanded its threat of the Pacific Water Fleet in the Pacific Water. This allows the United States to speed up military layout and diplomatic mediation, and to stabilize the stability of East Asia with the allies, including Taiwan.

In the cold war, the CCP not only poses that it will never give up, but also facing the United States. For example, the CCP's intelligence war on the United States has recently been upgraded to a military monitoring station in Cuba, and there are large spy balls through the United States. In terms of military confrontation, the CCP has completely denied international marine regulations and forcibly announced that the Taiwan Strait and the South China Sea are its. To the sea, for this reason, it also deliberately threatened U.S. warships with warships by warships in the Taiwan Strait. All these provocations can only increase the advancement of the Cold War in the United States.

Just as I mentioned by my article "The Cold War in China and the United States" published on this station on June 16, the upgrade of the Cold War will inevitably lead to a scientific and technological war. Blocking tactics in key technology, such as cutting off the CCP's way to expand the army from the West to expand the army. This is the origin of the US -China chip war.

In terms of security in Taiwan, the formation and upgrading of the Cold War in China and the United States is crushing the CCP's attempt to attack Taiwan. The current situation is, "There is something in Taiwan, that is, there is something in the United States, Japan has something to do, and the country has something to do."

This situation is actually the possible kind of hot war that the CCP tries to attack Taiwan, which is transformed into a long -term cold war. Of course, this Cold War is not the Cold War between the Communist Party of China and Taiwan, but the Cold War of the China and the United States. The main burden of the most important burden in the Cold War of the China and the United States is because the United States uses huge military and nuclear

bomb reserves to compete with the CCP, forcing the CCP to not resort to force. In this sense, the United States has a huge risk for this second Cold War, and Taiwan has become a beneficiary country in the Cold War of the Sino -US Cold War. Back behind and economic dilemma, it was no longer unable to maintain the scale and speed of the expansion of the army. In the end, the Cold War between the United States and the United States ended with the victory of the United States.

5. Taiwan: Cold War Insurance peace, seeking peace and destroy peace

The above analysis shows that Taiwan facing the Communist Party's threat of force, in fact, there is only one kind of peaceful opportunity, that is, in the state of the Cold War of China and the United States, to keep Taiwan with the help of this Cold War, stabilize Taiwan's economy and society, and obtain a relatively peaceful peaceful peaceful peace, to obtain a relatively peaceful peaceful peaceful peaceful peace, and to obtain a relatively peaceful peaceful peaceful peaceful peace, to obtain a relatively peaceful peaceful peaceful peaceful peace, and to obtain a relatively peaceful peaceful peaceful peaceful peace, to obtain a relatively peaceful peaceful peaceful peaceful peace, and to obtain a relatively peaceful peaceful peaceful peaceful peace, to obtain a relatively peaceful peaceful peaceful peaceful peace, and to obtain a relatively peaceful peaceful peaceful peaceful peace, living environment. In the early days of World War II, the nuclear weapons had not yet been born, so the Japanese Empire dared to launch the hot war at sea and land without any fear. Today's Cold War between the United States and the United States is a comprehensive confrontation between the two nuclear powers. In the war end of the East Asian light -up popularity. The CCP tries to create the chaos in the international order in East Asia and the Indo -Pacific region. In Taiwan to seek survival in troubled times, it is impossible to seek peace from the invaders. It can only defend East Asia's peace with the United States and its allies who maintain India and the United States. Therefore, today's Taiwan has no idea that the Chinese Communist Party, who is inconvenient to subvert the international order of the Pacific region, attempts to annex Taiwan, and the United States and its allies who resist the intention of the CCP's aggression to maintain the so -called "equivalent". Because if Taiwan goes to Beijing to "seek peace", it will only be forced to join the CCP's camp against the United States and its allies. It will be the biggest betrayal to Taiwan, and British Prime Minister Chariot is a hundred times more dangerous than Hitler's signing of the Munich Agreement before World War II.

Since the CCP cannot attack Taiwan forces for a period of time, it wants to use Taiwan's existing political forces to strive to achieve the goal of "peaceful liberation" as soon as possible. Therefore, as long as it is a person who is

good at shaking hands with the CCP, he wants to use it. The good nature of the red power has never changed. Regardless of how soft Taiwan puts its posture, the CCP will only be pressing and threatening Taiwan to seize Taiwan as the ultimate goal. In the face of a red regime such as the Communist Party of China, Taiwan cannot "move" and cannot escape. Only the allies are relying on allies to protect peace.

In the context of the Cold War in China and the United States, Taiwan's self - protection and peace can avoid the popularity or "peace liberation" from the Communist Party of China. If Taiwan kneels to the CCP for mercy, gives up national defense, and accepts unification, then the CCP will inevitably take the opportunity to occupy Taiwan; and further use Taiwan as a forward base to squeeze the United States out of the first island chain. After the short -term "peace" of the unified process, Taiwan is very likely to be pushed into the sea of fire caused by the Chinese Communist Party.

Taiwan is proud of its own democracy and freedom, but the historical juncture such as the Cold War of the Sino -US Cold War is the first "springboard" and the first forward base that was locked by the Chinese Communist Party in this Cold War. Election at the beginning of the year. Since the democratization of Taiwan, there has been no election as this election, which is so important to Taiwan's life and death. In the previous elections, voters could care about "party rotation", because different political parties' internal policies would not let the country hurt their bones; this election still played "party rotation" or "change the party to change the party to look at it. The slogan ", but covering the fact that each voter must care about. The foreign policy of different political parties may directly be related to the existence of the country in Taiwan. If you are in a big deal, you can't treat it anymore.

Due to the failure of thunderstorm weather and the US Federal Aviation Administration's facilities, the Washington and New York had suspended most of entry flights on Sunday (June 25) in the East Coast of the United States.

Reuters reports that the Federal Aviation Administration (FAA) said that flight services in the Washington region have been restored after the communication equipment is switched to the backup system, but several New York airports that have delayed flights due to thunderstorms have not recovered.

FAA said that the Atlanta Hatthafeld -Jackson Airport, Philadelphia Airport, Newval Free Airport, New York Kennedy Airport and Laguadia Airport all issued the "ground grounding" instructions due to thunderstorms.

According to information about the flight tracking website Flightaware, 39%of the flight delays have taken off at Newcastle Free Airport, and 47%delayed flights from Laguadia Airport.

On October 12, 2022, during the 20th National Congress of the Communist Party of China held in Beijing. Reuters picture [AUDIO-LINK:

<https://www.rfa.org/mandarin/yataibaodao/Zhengzhi/hx2-06262023075842.html/@stream>] (<https://www.rfa.org/mandarin/yataibaodao/zhangzhi/hx2-06262023075842.html/@@stream>) Chinese official media disclosed this Monday that the authorities are planning to legislate to strengthen patriotism education, and use the so -called "Xi thought" as a

guidance. Some comments believe that this is aimed at strengthening brainwashing education for adolescents and facilitating Xi Jinping to crack down on dissidents politically.

[Xi Jinping initiated the "spiritual baptism" scholar: the alien will be eliminated](#) **[The Civilization Practice Center in the new era blooms everywhere](#)** **["Xi thought"? Return to personal worship: The Central Committee of the Communist Party of China ordered colleges and universities to learn "Xi Jinping's Works Selection"](#)**

According to Xinhua News Agency, the draft of the "Education Education Law of the People's Republic of China" was first submitted to the Standing Committee of the National People's Congress for review on June 26. This draft incorporates patriotic education into the national education system and highlights the education of schools and families with young people and children; On major festivals and other activities, patriotism education is carried out by rituals such as lining the national flag, singing national anthem, and constitutional oath, and specific provisions are made.

Zang Tiewei, a spokesman for the Standing Committee of the National People's Congress of China, stated at a press conference on the 25th that the "Draft Patriotic Education Law" was guided by "Xi Jinping's new era of socialism with Chinese characteristics in the new era", and adhered to the patriotic, loved party, and socialism. Unity, take the main point of maintaining the unity of the motherland and the unity of the nation, and the Chinese dream of achieving the great rejuvenation of the Chinese nation as a clear theme.

Taiwan's Zhongshi News Network pointed out that in recent years, there are many public opinion incidents related to patriotism in China. Zhang Zhanhan had taken photos at the Japanese Yasukuni Shrine and was blocked after being exposed; the Chinese government set up a "Patriotic Education Demonstration Base" in the country, and has reached 585 as of 2021.

Hu Ping: Legislative Patriotic Show the CCP's conscious type bankruptcy

Xinhua News Agency reports that the formulation of patriotic education law is of great significance to inspiring the spirit of the nation and uniting the people's forces.

Hu Ping, an honorary editor -in -chief of the "Beijing Spring" magazine living in the United States, accepted an interview with Radio Free Asia and pointed

out that the Chinese authorities have been internally and outside the Patriotic flag for a long time, showing that the CCP's consciousness has completely bankrupted. The purpose of the above legislation is to combat and suppress various political opinions in China.

China Celebrate the 70th anniversary of the founding of the People's Republic of China (Reuters) Hu Ping said: "Of course, love party loves Xi Jinping and 'not to be discussed', and you have to claim all the thoughts he doesn't like to be patriotic, saying that you sell the country and traitors. "

Hu Ping mentioned that in the past, the magic weapon that the Communist Party crashed with aliens was to deduct the "counter-revolutionary" hat, but the word counter-revolutionary is no longer popular, and the Chinese Communist Party has canceled it to subvert the state power and provoke trouble. The extensiveness of the form is simply adding the so-called patriotism.

Hu Ping analyzed that another role of the Chinese government's patriotism education law was brainwashing tools: "Authorities are still promoting Marxism, Mao Zedong Thought, Deng Xiaoping theory, emphasizing Xi Jinping's thinking, and the vast power of the Mao era, so take it. Patriotism is a supplement to strengthen the control of young people in this way. "

Taiwan scholars: China is afraid of setting up color revolution internally

Wu Jianzhong, Secretary-General of the Society of Taiwan Tao Lue, accepted an interview with this station and said: "This is the first patriotic education law in the world. Obviously, for the CCP, it is urgent to maintain the national unity of the country. China) The State Council has promulgated the "Outline of Patriotism Education in the New Era".

Wu Jianzhong pointed out that the Chinese Communist Party is facing economic and political turmoil internally, and the prospects for the war of the Russia and Ukraine of Foreign Russia are very worried that the color revolution has occurred. Even if there are already patriotic education demonstration bases in various places, it is still not enough, and they must be accepted by legislation.

Wu Jianzhong said: "There are many Chinese threat theory and Chinese collapse theory on the public opinion Internet, which threatens the CCP and must condense such a consensus through patriotic education regulations. For example, the Dragon Boat Festival just passed, the Chinese Communist

Party made Qu Yuan as a patriotic poet's thinking. Propaganda, this is a thought education for the Communist Party."

Wu Jianzhong said that the Chinese Communist Party believes that students' understanding of patriotic education only stays in books and has no practice at all, so she has enhanced patriotism in social education. However, when students enter the society, they face actual problems. If the economy can be sufficient, whether the judicial can be fair, the authorities tried to make up for the so -called "patriotic consciousness" after young people left the school.

The picture shows a camera installed by Hikvision Company's headquarters Agence France -Presse information picture

The British spy war series "Code 007" made the British intelligence agencies in the sixth names. The British media "Sunday Post" recently disclosed that the monitoring camera made by China was installed in front of the six headquarters of the British military.

It is reported that these cameras were manufactured by China Haikangwei's company. The company has been disabled in US federal buildings on the grounds of national security. On the street light.

Security experts warn that these cameras can rotate at 360 degrees and can be zoomed at a maximum of 165 feet. It may be used by Beijing spy to monitor all the personnel in the headquarters of the British Foreign Intelligence Agency.

In addition, the reporter also found that Hikvision's camera was installed in front of the Walker Hall subway station, and it may be recorded to get off work in the six military conditions.

The report pointed out that the Hikvision Camera near the six places of military conditions was installed by the local Lamberst Parliament and used to monitor traffic and bad behaviors in the region.

Some former British Army Intelligence officials said that these cameras constitute a very serious security risk. The data they collected may be intercepted by the Ministry of Security of China, and the camera outside any British intelligence institution building is high priority for them to them. The official called for removing these cameras.

In addition, the Sunday Post also disclosed the installation of military camps and venues throughout the country.

The options on the poster (AFD) candidate Robert Sesselmann (above) and the current regional chief of the right -wing CDU (CDU) Jürgen Köpper (below) (below)

(Voice of Germany Chinese website) Officials of the election management agency announced on Sunday (June 25) that the right -wing option party (AFD) won the district council election for the first time in Germany.

Sonneberg, located in the central town of the former East, chose the option party (AFD) candidate Robert Sesselmann, and gave up the current region of the right -wing Kimino (CDU) Jürgen Köpper.

According to election officials, in the final election in Sonneberg, Turus, Cecilman won 52.8% of the votes and obtained the absolute majority required for winning the election.

The region's population is about 57,000, which is one of the smallest regions in Germany. Nevertheless, this victory is a major breakthrough for the extremely right -wing party.

Optional Party Tulin Gen is listed as extreme right extremists by the German domestic intelligence department. All mainstream parties vowed not to form a joint government with the party.

Optional Party Tu Linden Gen Division leader Hawke(Björn Höcke)Welcome to the victory, and said that this shows that the party has recently been strong.

He said: "Then we will prepare for the East state elections, where we can truly create a political earthquake." He refers to the state council election in the Eastern Saxon, Turinen and Brandonburg.

In Sonneberg, Robert Sesselmann (middle) and Optional Party Tragnae's hardliners (left) and the Options Party Parliament Chairman of the Party Parliament Chairman who won the district council election. Tino Chipala(Tino Krrupalla)### **How do other party factions react?**

Turinen Minister of the Interior, the Central Left -Wing Social Democratic Party(SPD)Member Mel(Georg Maier)Describe the results of this election as "alarm signal issued to all democratic forces".

He called for the interests of the party to work together to defend democracy together.

Josef Schuster, chairman of the German Jewish Central Committee, said that although not every option party voter has a very right -wing point of view, the party itself is the case.

"This is the watershed that the democratic political forces of this country are unacceptable at all." He said to the "Editorial Department of the German Internet News Media" (RND).

The International Oschidin Commission was also shocked.

Huobina, Executive Vice President of the Commission(Christoph Heubner)Said: "Today is a sad day for Sonberg, Germany and the entire democracy."

"Most voters have obviously bid farewell to democracy and intend to choose the extreme right -wing destructive party led by the Nazi elements (Hawk)."

**** Democratic Alarm bell**

Earlier this month, in the finals of the first round of elections, Cecilman failed to win at only a few percentage gaps.

The German options party candidates have so strongly shown the alarm nationwide. All other major political parties, the Socialist Party, the Green Party, the New Liberal Liberal Democratic Party and the Socialist left-wing party-all support the option party's competitors. Essence

Although it is the highest political position on the political stage of this area, the impact of the position itself is not great, and the power is quite limited. Even if the option party's Cecilman was elected, many of his responsibilities were only the laws of state or federal parliament at the local level.

However, the Optional Party obtained political power in any way to worry the critics, and they believe that the party is revenge and anti -democracy.

The German domestic intelligence department divided the options of the party map and its controversial hardliners leader, Hawk, the high -wing extremist.

The German Trade Union Federation (DGB) also urged voters to vote for conservative candidate Copper.

The CDU claims that the campaign is rough and disgusting, and false information has spread on social media.

Optional Party's Milestone

The victory of the German Overseas Party on Sunday is widely regarded as a milestone of the extremely right -wing party.(<https://www.dw.com/zh/zh/德国向右转选项党与社民党的支持率齐平/a-65809300>)Essence

As the Social Democratic Party, environmentalist Green Party and the Liberal Liberal Democratic Party composed of the China Left -Wing Federal Federal Government showed signs of internal signs, the option party received a new wave of support. However, even so, the main challenges from the Prime Minister of the Social Democratic Party, the main challenges of the Social Party, still comes from the right -wing CDU. Former Prime Minister Merkel's public opinion support rate was slightly lower than 30%.

In 2017, the German Options Party held the flag of anti -immigrants for the first time entering the Federal Parliament. Recently, the party has always criticized Germany to support Ukraine to resist Russia's invasion.

The 19th National Congress of the Chinese Communist Youth League CCTV video screenshot

Last week (June 22), the Nineteenth National Congress of the Chinese Communist Youth League just closed announced that it would deeply understand the decisive significance of the "two establishment". "Two establishment" refers to the establishment of the core position of Xi Jinping's Party Central Committee and the core of the entire party, and establishing the guiding position of Xi Jinping's new era of socialist thought with Chinese characteristics.

Immediately after, this Monday (June 26), Xi Jinping talked collectively and delivered a speech collectively in the new leadership team of the Central Committee of the Communist Youth League in Zhongnanhai. He demanded that the Central Committee of the Communist Youth League has thoroughly implemented the CCP's requirements, better condensing the young generation of the young generation around the party, and continuing to promote the construction of a strong country and the great cause of national rejuvenation.

These messages are obviously not treated among netizens. Outside of China's online firewall, netizens left a message under the tweets of the relevant news. Some people say, "Scared, brainwashing methods have been upgraded again." Others said, "Two people who have cheated their corpses and return their souls." Some people say, "How did the last" two "? There is not much more one more!" Some people said, "Employment can't be solved, let's send it to the mountains and the countryside. " This immediately reminds the news that the unemployment rate of youth unemployment in recent months has continued to rise.

In recent years, China has been walking forward with hand brakes, which is not just the influence of clearing the zero policy.

(Voice of Germany Chinese website) The investigations made by Germany in June of the Chinese Chamber of Commerce and the Chinese EU Chamber of Commerce showed that they ended [Zero Policy](#). After that, the hope of China's strong rebound in the economy has been shattered. More than half of the German companies are expected to develop this year's development this year's level last year or even lower than last year.

Although business expectations seem to be dim, more than half of German companies (55%) intend to continue to invest in China in the next few years. However, during the new crown epidemic in 2020 and 2021, more than 70% of German companies who were willing to continue to invest in China. 62% of the companies that insist on investing without considering all issues, saying that this is mainly to maintain its competitiveness in the Chinese market. However, almost one of the four companies expressed their hope to reduce investment, which is significantly higher than the epidemic period.

60% of the interviewed companies expect the market environment to deteriorate, and more than 40% of companies are worried that geopolitical tensions will lead to consequences such as sanctions or export control. For

the Ukrainian war and [potential Taiwan conflict](#) The uncertainty brings [low industry emotions](#) Essence Almost a quarter of companies believe that Beijing's efforts to become more independent of foreign markets, which is also a reason for reducing investment.

One -fifth of companies hope to invest more in countries outside China. And more than 16%of companies have set plans to completely withdraw from China in the worst case.

negative record of business environment

A survey made for 570 companies showed that most European companies believe that China has lost its glory as a business place. Yanci, President of the EU Chamber of Commerce in China(Jenskelund)It is said that China's business atmosphere is "the lowest stage we feel."

Although the clearing policy has ended, foreign capital [confidence in China's economic prospects](#) It is fading. At the same time, profits are also declining. In the face of increasing risks and unpredictable environments, 64%of European companies interviewed said that doing business in China became more difficult. This proportion set a record. Limited market access is a major problem encountered in Chinese foreign -funded enterprises. The restrictions set by the government are also another difficulty in complaining of enterprises.

In addition, Chinese domestic companies and foreign companies often lack fair competition. A quarter of European companies complained that forced technology transfer was encountered.

Jeargwuttke, former chairman of the German and EU Chamber of Commerce, confirmed in an interview with the Voice of Germany in BASF's long -term executives, Germany and the EU Chamber of Commerce, which can clearly feel the increasingly fierce nationalist line promoted by Chinese party and state leaders Xi Jinping.

He said, "There are strong nationalism in some areas: we no longer need foreigners, so we will not let them enter the market."

World Economic Engine Make no longer foreign companies want to evacuate the Chinese market?

China Lost its original glory

Yan Ci, the current president of the Chinese EU Chamber of Commerce, said that no one expected the supervision environment to be improved in the next five years, and the crisis of confidence has not ended.

In an interview with the Voice of Germany, Wudk said that China now emphasizes retreat and self -defense compared with previous open policies. However, there is a fundamental problem that Xi Jinping wants to implement the isolated policy- "China must be independent of the world as much as possible, but at the same time I hope that the world depends on China. Of course, this is not commensurate with globalization."

However, what role can Europeans play in trade and industrial policies?

"Of course, the Chinese will continue to cultivate big companies that bring them technology and employment opportunities. This is the case in the fields of automobiles, chemicals, and mechanical engineering."

He emphasized: "In 2022, EU companies' exports to China were 23%higher than the exports of Switzerland. More than 6.4 million containers were shipped from China to Europe, but only 1.6 million containers were transported back to China from Europe. In many sense, China's dependence on our market is much higher than our dependence on the Chinese market. This is a very depressed thing, because the market is already large enough. "

In recent years, China has been walking forward with hand brakes, which is not just the influence of clearing the zero policy. "There are still many problems with market access restrictions on market access," said Western companies are difficult to operate. "

Federal MP: "Chinese characters are complicated"

漸 gradually rose

Stanleydruckenmiller, a well -known hedge fund manager and a billionaire investor, has previously known for its firm conviction in China's economic growth. But in early June this year, he scratched China from the list of investment destinations. Drucken Miller believes that following Xi Jinping's political route, China may miss the lofty goal of catching up with the economy and surpassing the world's largest economy and the United States. At the

Bloomberg Investment Conference, Druckenmire depicts a dim picture of China's future.

He said: "If (China) does not have high -level power change, the economy will lose vitality." He said that even if there is any obvious improvement in China this year, it is just a sudden and short -term energy explosion, just like you Edible high sugar things are the same. "We expect that sugar has increased and some strong growth in the next 6 to 9 months. But in the long run, I don't think they (Chinese) are the main challenges to the United States in terms of economic strength and growth." Germany Rukemler said.

And Wudick described a more diplomatic description of China's economic policy dilemma. He said that in an economy that strives to overcome serious aging problems, and in the case of major problems in the real estate industry, under the circumstances that local government liabilities and small banks may face the threat of bankruptcy, China may try to restore its previous open opening up Sexual, and then re -execute the idea of "priority to ideology". He said that for European companies, this is not the worst of all options.

Anti -drug warning signs written in Chinese are erected on the border between China, Laos, and Myanmar. Reuters information picture

According to the Chinese official media China News Agency, the Supreme Court of China disclosed at a press conference on Monday (June 26) that a new trend of crime of source drugs in China has intensified through international logistics delivery, land bypass or seas smuggling drugs.

Li Ruiyi, president of the Fifth Court of Criminal Trial of the Supreme Court, introduced at the meeting that from 2018 to 2022, the number of drugs in the first trial of the Chinese courts continued to decline: Fall 63%in 2018.

The top 10 provinces in the first trial of the court's trial of drug cases are still mainly concentrated in Southwest, South China, East China, and Central China. However, the "Golden Triangle" is still the main source of Chinese drugs. After the overseas drugs are blocked through traditional channels, the number of cases of smuggling drugs are used to use the truck with customs clearance or use throwing and digging. Drug conditions are intensified.

On the other hand, the export of drug supplies from other countries from China is increasingly valued by the international community. The U.S. Department of Justice sued four Chinese chemical manufacturing companies and eight individuals last Friday (June 23), accusing them of illegal trafficking for pre -chemicals to make Fentanyl. However, the Chinese Embassy in the United States issued a statement on Saturday, accusing the United States of stemming in China on the problem of anti -drug, illegally sanction Chinese companies, and seduced and prosecuted Chinese citizens.

Shao Mingliang, a disabled dismissed from Nanjing, Jiangsu, was criminally detained by the authorities for criticizing the government's remarks. (Minsheng observation)

According to overseas "rights protection network", Shao Mingliang, a disabled disagreement from Nanjing, who was released in March this year, was illegally arrested by the police and was tortured by the police.

It is reported that the police at the Pearl River Police Station of the Nanjing Public Security Bureau Pukou Branch were arrested and detained from the

Gulou Hospital in the early morning of June 17 without any reason. Shao Mingliang was released on June 20, but she is still under house arrest.

Shao Mingliang strongly condemned the police's behavior. He said, "All behaviors are completely illegal, authentic political persecution, personal persecution! So far, I still have not given an administrative penalty document! I kept handcuffs in the interrogation chair until I was thrown to my house and threw it on the bed. I still handcuffed for about half an hour. I didn't give me a meal all day. This is standard torture, torture, abuse, and human rights!"

Shao Mingliang was sentenced to four years in prison for his presence. He was tortured for a long time during prison. In August 2022, the prison side had weighed him with the stretcher, with only 86 pounds in total. Shao Mingliang once said with emotion that he smelled the "smell of corpse" on his body, but did not expect to survive.

The British Department of Defense said that the British and other allies have trained more than 17,000 Ukrainian recruits in the past year to assist Kiev's invasion against Russia.

Agence France -Presse reported that in June last year, nine partnerships such as Canada, Australia, New Zealand, and Norway launched a training program called OperationInterflex. Weapon operation, battlefield emergency and patrol tactics.

The British Department of Defense said on Monday (June 26) that after five weeks of hard training, these recruits from all walks of life have "changed from civilians to soldiers."

Britain originally planned to train 10,000 people, but now it has expanded its goals. It is expected that 30,000 people can be trained by 2024.

The British Department of Defense said, "The British armed forces have kept close communication with Ukraine to improve and develop courses according

to the most needed skills on the battlefield." Intelligence shows that this training "has a significant impact on the combat effectiveness of Ukraine."

Plames: G minor first piano quadruple

Brahms made a total of three piano quadruples. The first piano quadruple of the G minor is a lying creative thinking, with a shocking indoor music work, with rigorous layout and personal emotions.

Plames: G minor first piano quadruple

The preliminary draft of the first piano quadrangle of Brahms was completed in 1855, but the real completion of Quanqu was 1861. During the period, Brahms changed his manuscript and accepted the review by the female pianist Krara Krara and violinist Johmm. The song was held in November 1861.

The first piano quadruple of the G minor is a iconic creative thinking, with shocking indoor music works, with rigorous layout, rich form, beautiful melody, full of personal emotions, reflecting the composer's feelings, depression, and sincere sincere and sincere , Passionate and unrestrained multiple character.

In 1937, the Austrian composer Arnold Sonberg (1874-1951) re-assigned the four-acting instrument of Brahms and adapted it into a music played by the big orchestra. Please listen to the performance of the West Germany Broadcasting Symphony Orchestra, which is the commander, the violinist, and the composer Christian Machera. In an interview, he praised Xun Berg's arrangement of this beautiful music to reflect the personality of every instrument on the stage and create wonderful music together.

Welcome to subscribe to the Voice of Germany "Classical Music Wind" to listen to more outstanding classical music performances.

中央纪委国家监委宣传部副部长、一级巡视员郝宗强接受中央纪委国家监委审查调查

According to the website of the National Commission for Discipline Inspection of the Communist Party of China, Hao Zongqiang, deputy minister of the Propaganda Department of the National Commission for Discipline Inspection and Propaganda Department of the Central Commission for Discipline Inspection, is suspected of serious disciplinary violations and is being reviewed and investigated. Screenshot of the China Discipline Inspection Commission website

According to the website of the National Commission for Discipline Inspection of the Communist Party of China, Hao Zongqiang, deputy minister of the Propaganda Department of the National Commission for Discipline Inspection and Propaganda Department of the Central Commission for Discipline Inspection, is suspected of serious disciplinary violations and is being reviewed and investigated.

According to Caixin.com, Hao Zongqiang is the fourth official of the Central Commission for Discipline Inspection. The other three are Cui Yunan, a first - level investigator of the 13th Investigation Office of the Central Discipline Inspection Commission of the Central Commission for Discipline Inspection. Liu Ran, deputy director of the inspection room, first -level inspector.

The CCP's disciplinary inspection and supervision system has carried out the education and rectification of the cadre team from February this year. Li Xi, member of the Standing Committee of the Political Bureau of the CPC Central Committee and secretary of the Central Commission for Discipline Inspection, said at the time that it was necessary to insist on investigating and punishing "two -sided people" and resolutely prevent "under the light". On June 19, the website of the State Supervision Commission of the Central Commission for Discipline Inspection also published comments on "Release the Blade of Blade to the Either Strict to the End".

It is worth noting that for many years, China's disciplinary inspection and supervision system has been investigated for suspected serious disciplinary violations, but the corruption issues within this system have not been effectively curbed. There are senior officials being checked.

Moscow Center was once blocked

(Voice of Germany in Chinese) The Wall Street Journal published an analysis article saying that the end of a brief change in Russia made Beijing relieved. This crisis marks the worst challenge that Putin has encountered in Russia in the past 23 years, and it is also a "uncertain moment" for Chinese leaders Xi Jinping.

The author pointed out that Xi Jinping shaped Sino -Russian relations into a fortress against the United States in the world, and placed his personal relationship with Putin at the center of the fortress. Now, Russia is chaotic, [Putin's authority seems to be weakened](#) It's right. "This is exactly the risk of the Chinese government's most worried about the Russian and Ukraine War."

Carnegie Russia Eurasian Center(Carnegie Russia Eurasia Center)Temurumarov, a researcher, said: "This is the pessimistic situation that Putin is worried about when he starts to attack Ukraine, that is, Putin's decision will eventually destroy the stability of the Russian regime."

The article quoted Wang Yili, a professor of international relations of Renmin University of China, said that among the Chinese people, many people worry that Putin's political status is unstable, and Russia's political turbulence may affect China.

Wagner Group "Rebellion" Head: What is the significance of war?

Nationalism -Moving Stone and smashing your feet?

Pei Minxin, a professor of political science at Claremont McKenna College and a Chinese issue, compared with Putin, Xi Jinping's power control is more stable, and the CCP's ruling system and the Russian ruling party are even more indispensable. On the same day. However, the Wagner mutiny still highlights a few risks that cannot be ignored, which will make Xi Jinping be vigilant:

"First of all, the most important thing is to ensure the political loyalty of the Chinese army, especially the senior commander." Pei Minxin wrote a column of articles written by Bloomberg that Xi Jinping compared with his two predecessors, in consolidating the control of the army's control of the army's control of the army, It has been far away. "Although some preventive measures will reduce the combat effectiveness of the army, Xi Jinping may think that this cost is worthwhile and can prevent infidelity in the crisis."

Secondly, Beijing will prevent competition between different departments of the army as soon as possible. According to the article, because the Chinese Communist Party's control of the press and the army is deeper than Putin, the risk of public political struggle between high -levels is much lower. Nevertheless, this is another danger that Xi Jinping is unwilling to face in the conflict.

In addition, this incident reminds Xi Jinping that "nationalism is a double - edged sword", because extreme nationalists can use more radical and good words to overtake the political strong man in power, "just like [Porigo](#) "What you do for Putin." The author believes that Xi Jinping has begun to reduce this risk by restraining his subordinates: the new foreign minister Qin Gang generally avoided the "wolf" statement, although he faithfully executed Xi Jinping, did not have no Xi Jinping did not have no such thing as Xi Jinping did not do not. Complex foreign policy.

Interview: The Russian and Ukraine War will not change the consideration of China's attack on Taiwan

may lead to "extreme situation"

Feng Yujun, director of the Russian and Central Asian Research Center of Fudan University, told the South China Morning Post that an isolated incident would not have a direct impact on China -Russia relations and even China itself, but the overall international situation, including the direction of the Russian and Ukraine War, the future development of Russia's future development. Determination and geopolitical challenges will have a profound historical impact on China.

Some Chinese scholars believe that Beijing will learn from politics and military lessons from this incident, especially on the issue of Taiwan relations. "South China Morning Post" quoted a mainland researcher who was unwilling to be named, and pointed out that if the frontline of the unified Taiwan actions failed in major military operations, such as the unified Taiwan operation, it may encourage the rise of unofficial military organizations. "Chinese leaders must be prepared for it. Prepare this risk."

However, he added that, given that there are no mercenaries in mainland China and a unified leadership of the army in the army, a "extreme situation" that Chinese leaders must consider are whether the failure of large-scale military operations will lead to the division of military forces.

"New York Times" Edward Wong also posted a post saying, "In the entire Russia -Ukraine War, if one thing can promote Xi Jinping to re-consider the attack, that is, the Wagner Group's anti-water." Huang Anwei It is said that it is not a mercenary issue in China now. "I think Xi Jinping is observing how a protracted war brings unexpected consequences to a country." "We know that he is sensitive to loyalty in the PLA. Anti-corruption extends to the PLA."

Huang Anwei also pointed out that people who are in this position in Xi Jinping often think about the people -whether it is the grassroots of the society or the elite class, how to view the potential weakness and legitimacy of their power. This is related to the attributes of this system, "I speculate that the white paper movement makes this problem more prominent."

Japan has already set September 3 as the "Memorial Day of the War of War of Japan" on Russia's legislation, and protested to Russia, saying that the move would incite confrontation.

Reuters reported that Matsno Matsuna, the Secretary -General of Japan (June 26), said: "The Russian legislation will not only arouse the anti - Japanese emotions of the Russian people, but also cause the Japanese people's anti -Russian mood."

He called Moscow's move "extremely regrettable."

On September 2, 1945, the Japanese representative signed a surrender letter to the allies on the US warship Missouri, which was analoged in Tokyo Bay. On September 3, it has been regarded as the end of World War II.

Russian President Putin signed a bill on June 24 to rename the "End of World War II End of the World War II" on September 3 and renamed it "Memorial Day and End of World War II".

According to the legal interpretation documents, Russia launched Ukraine "Special Military Action" Later, Japan and Western countries jointly launched a unreasonable operation against Russia. The change of the name of the anniversary on September 3 was one of the" countermeasures. "

On June 24, 2023, the video speeches recorded by the head of the Wagner Group on Rostov on the Don River. Associated Press picture [Audio-Link:](#) <https://www.rfa.org/mandarin/pinglun/wangdan/wd-062620230455.html/>

[@@stream](#) The Wagner Corps, which began on June 24, has evolved like a roller coaster of 24 hours. At the beginning of the development, many self - media and netizens were too excited and expected. As a result, it turned into a farce and made the outside world a shock. There are already a variety of comments on the incident itself. I won't go into details here. I only talk about my opinion on a few related issues:

The international political storm changes, we must be calm, and it is not appropriate to draw conclusions prematurely. I have a "36 -hour law", which is willing to encourage you for ingenuity. That is, I suggest that everyone can calm down for 36 hours before judging. Sometimes we make mistakes, that is, putting our wishes at the first position of the basis for judging, which can be understood but absolutely unprofessional. Let the bullets fly for a while, it will always be the only rule for us to judge.

The head of Wagner, Priggin, has now gone to Belarus. It seems to be calm, but in any case, this is a heavy blow for Putin, and this blow from his past loyal followers Priggin is a very playful thing. Because this once again proves: Any dictator will have a dilemma or nightmare that cannot get rid of, that is: he can never determine who is the most trusted person. For dictators, there are no eternal allies, and those who are most likely to betray them are often those who think they are most trusted, especially those who behave like their slaves. Priggin's betrayal of Putin was a warning to the dictators including Xi Jinping: Don't believe in those slaves, the most likely to rebellion is slaves.

Now, some public opinion cares about a question: Once Xi Jinping has a war against Taiwan, will China have the same change? Under my Twitter and Facebook, the mainstream opinion will definitely happen. I personally have different opinions, and I think the probability will not happen. Why?

First: Wagner Group is an independent military force, and China has no independent military power. China's military forces do not have its own financial source, and the army is highly dependent on the central government, and even local governments cannot use military crickets to affect the army. In addition, personnel mobilization is frequent, and it is difficult to form a political influence. Although the army is not nationalized, it has been dynamic, which is different from Russia. At the time, Yeltsin could mobilize the army to bombard the parliament. In 1989, Zhao Ziyang was the first vice chairman of the Military Commission, but he could not mobilize a soldier. During the Cultural Revolution, the marshals of the army were extremely opposed to the Cultural Revolution, and there was no mutiny. You may be able to say that there was Mao Zedong's prestige at that time, but now Xi Jinping's control of power is no less than Mao Zedong.

Second, even if there is a voice or even power that is dissatisfied with Xi Jinping within the army, the muzzle has caused the system to collapse. Unless there is a group of troops that really have idealist pursuits, it is possible to see the Chinese democratic army general. But the current

Chinese army is an important member of the Communist Party of interests. The system is down and there is no benefit to the army. Why do they rebel? Even if the war failed, they were not their children, and they had no reason to overthrow the totalitarian system that they lived. A netizen said well: In China, whether it is a coup or a soldier, the party has achieved victory in the end, which can change China.

Third, of course, we also have to see that this time the Russian mutiny explained that the war continued for too long, and everything was possible. This is the same for China. Therefore, Xi Jinping's future deployment of the Taiwan Strait War will definitely seek a plan to end military operations as soon as possible. I don't think he will be scared by the Russian soldiers this time. On the contrary, he will learn more lessons. Now that Xi Jinping will be more cautious to treat the military attack plan because of this, I think it is unparalleled. Taiwanese and the world should not pin their hopes on Xi Jinping's rationality.

In short, what happened in Russia this time reminded us that when analyzing the political development of totalitarian countries, we should not underestimate the explosive power of uncertain factors, and at the same time, we should not underestimate the toughness of the authoritarian system.

(The article only represents the personal position and point of view of the special commentator)

This year's May 1st Labor Day just passed. Yushun Electronics Co., Ltd., located in Changzhen Community, Yutang Street, Guangming District, Shenzhen, a labor conflict broke out

because the factory was relocated by the local community within a time limit. The workers were dissatisfied with the compensation plan given by the factory, and [Gathering the Changzhen Community Party Mass Service Center for help Essence](#)

Some workers sent out from the scene [video](#) From the "Party Mass Service Center" and "New Era Civilization Practice Station" brand, the camera slowly moved to the five -star red flag on the top of the building. Intersection

[Yushun Electronics Co., Ltd.](#) Established in 2004 and listed in 2009.

As early as 4 years ago, [In 2019, Yushun Plant received a written notice from the Changzhen Community](#), Make a relocation within 3 years. Three years later, in February last year, the company received a written notice from the Changzhen community, requiring the lease relationship before May 31 last year, and August 10th. The lease of Yushun Factory's plant did not expire until July 2024.

So, for the first time in 2019, the company has received the community relocation notice for almost 4 years. Has the Yushun Factory Trade Union conducted negotiations on the compensation plan on behalf of the employee?

In addition, the factories were relocated to the Changzhen community, and the Changzhen Community Trade Union Service Center worked with the Community Party and Mass Service Center. So, is the Changzhen Community Trade Union on the relocation plan that may affect the rights and interests of the workers, and negotiate with the community service center to ensure that the interests of employees can be guaranteed during the relocation process?

In particular, the Changzhen community requires the Yushun plant to relocate before the lease expires, which will inevitably affect the factory's operation, thereby affecting the company's ability to make reasonable compensation for workers. Does the Changzhen Community Trade Union participate in the negotiation of the company's participation in the enterprise and the Changzhen community on behalf of Yushun Factory. It is suggested that the Changzhen Community suspend the lease early to make additional compensation to the enterprise to ensure that the company has the ability to make reasonable compensation for workers?

Furthermore, when the workers have gathered in the Changzhen Community Party and Mass Service Center (office with the Changzhen Community Trade

Union) for help, do the community unions come forward to represent the workers and negotiate with the community and the factory?

Half a year ago, on December 13, 2022, Yushun Co., Ltd. issued the relocation [Announcement](#) It is mentioned that employees will follow the factory area to relocate and fail to follow the factory area relocation personnel. The company will legally terminate labor relations in accordance with the relevant provisions of the labor law.

So, in the next half of the year, the Changzhen Community Trade Unions, Yutang Street Trade Unions, Guangming District Trade Unions, and the Shenzhen Federation of Trade Unions, each to avoid the situation of the situation.

According to the data, the Yutang Street Federation of Trade Unions announced a legal service that cost 170,000 yuan last year [work plan](#) Essence This plan was announced in September, and in October, the goal was that by the end of 2022, the coverage rate of legal consultants in the first and secondary community trade unions in the street reached 100%. Level - level labor communication and negotiation mechanism.

So, did Yutang Street Federation of Trade Unions assist Yushun Electronics Co., Ltd. to negotiate the relocation compensation plan in accordance with the work plan that he formulated and announced?

There is another thing. In June last year, [more than 50 workers in Yushun plant have complained](#) At the Shenzhen Housing Provident Fund Management Center, the factory said that the factory had not paid the housing provident fund for front -line production workers. Before that worker went to the Provident Fund Management Center to complain, did he come to the union for help and ask the union representative workers and the enterprise to complete the supplementary payment through negotiation?

The Yushun Factory was established for 19 years and was listed for 14 years. It did not pay the housing provident fund for front -line workers. Are the corporate unions, Changzhen Community Trade Unions, Yutang Street Unions, and Guangming unions knowing this?

Please listen to these questions and talk to the Changzhen community staff.

Fuxing dams threatened the safety of the Egyptian people, and experts warned the fourth water storage in danger (Anado News Agency)

Ethiopia is about to start the fourth water storage of the Fuxing Dam. Observer believes that this has a serious threat to Egypt's share in the Nile Water and calls for a strong response immediately.

Ethiopian Foreign Minister Delike Miconin said that Fuxing Dam is currently close to the fourth water storage and emphasized that "the first three water storage did not hurt the downstream country, and so is the fourth water storage."

Satellite images show that the water level of the Bashu Lake has dropped by about 10 meters, and the amount of water leakage is about 7 billion cubic meters. It is expected that Ethiopia will increase the height of the middle corridor to prepare for the fourth water storage.

Ethiopia has announced the willingness to start the fourth water storage of the dam, just coincides with President Abdul Farita, President and Ethiopian Prime Minister Abi Aiham at the "New Global Financial Convention" summit Smiling scenes, conflicts broke out recently, and if diplomacy failed again, the Egyptian authorities responded to the most serious crisis alternative to threaten the country.

dual risk

Dr. Abbas Salaki, a professor of dam and water resource professor at the College of Africa Research in Cairo, said that the fourth water storage of the revival dam has caused many dangers to Egypt, the most important of which is equivalent to the total water storage in the past three years. The volume is 17 billion cubic meters, while the dam reservoir lacks this number. In addition, Ethiopia to carry out similar work on other dams in its territory will bring serious risks to Egypt and Sudan.

Abbas Saraki emphasized that the risk of the fourth water storage is not less dangerous than the third water storage. The third water storage causes a significant decline in high dams for high dams, because the water level of Lake Nasser is reduced, and at least steam is steaming. About 10% of the water loss stored in the form and leak below the surface.

In an interview with Peninsula TV, Saraki warned that Egypt's loss of 1 billion cubic meters of water means that the agricultural field loses \$ 1 billion per year.

He pointed out that the four water storage of Fuxing Dam caused the loss of about 18 billion to 25 billion cubic meters of Egypt, which prompted Egypt to implement multiple compensation projects, cost billions of dollars, and damaged the Egyptian economy.

Egyptian experts criticized Ethiopia's "charges" that did not harm downstream countries on water storage operations, and said that relying on alternatives to respond to the damage of the rejuvenation dam, it does not mean to acknowledge the facts.

Regarding Egypt's stance on the fourth water storage, Salaki expects Cairo to continue to carry out political and diplomatic efforts to achieve a binding legal agreement and point out that Egypt tried to arrange for the international stage to pressure the Siabeba on Asia, and So as not to cause damage to it, rather than being attracted to the conflict between the highest interests and national institutions that may harm the highest interests and state institutions.

The Minister of Water Resources and Irrigation of Egypt Muhammad Nasal Ding Alam said that he was surprised to the "official disregard" of the fourth water storage of Fuxing Dam on Ethiopia, although the water safety of Egypt constituted "Extremely dangerous."

Muhammad Nasar Ding Alam said in an interview with Peninsula TV that he was worried that Ethiopia would try to use this situation to impose a factor, although he signed an agreement with Egypt and Sudan in Uganda.

At the same time, the former minister emphasized that Egypt is a big country that can protect its own interests. It has proven this in a more difficult situation. Essence

Between Egypt and Sudan

On the other hand, Muhammad Hafitz, a dam and river experts, predicts that if the two lower water outlets of the rejuvenation dam will be kept open until the end of the flood, this means that the completion of the fourth water storage will be delayed, not 9 It ended in mid -month, but was postponed until the second half of October.

Muhammad Harfz explained that it confirmed that Ethiopia plans to use the bypass flood channel as an alternative to the intermediate corridor. After the fourth water storage is completed, drainage with Sudan and Egypt. Baba did not close the downstream outlet in the fourth water storage process, and then seized the water flow from the Sudan for the next few months, and 8.5 billion cubic meters of water storage of its dam reservoir. This requires the fourth water storage of Sudan in Ethiopia Start storage at the same time.

The expert told the Peninsula TV that the fourth water storage will end after the storage is equivalent to 43 billion cubic meters, including Sudan's share. Crisis occurs at the remaining 9 billion cubic meters.

Muhammad Harfz explained that in the past four years, the scale of the floods of the green Nile River is much greater than the average flood, and the Egyptian government has done a good job in managing Lake Nasser, but it has lost the lake during the "Kuir" flood. Most of the amount of water stored, and the specified share (estimated at least 55.5 billion cubic meters) has decreased, a decrease of about 10 billion cubic meters from 2016 to 2018.

Various response methods to choose

Former Egyptian Foreign Minister Assistant Masum Malzk said that there are many choices for the development of these situations, including continuing diplomatic pressure on Ethiopia through relevant international and regional institutions, and retaining this issue in front of Ethiopia.

The Egyptian diplomat emphasized that it is necessary to emphasize that the rejuvenation dam will cause damage to international peace and security. This

is something that Egypt must pay attention to, because it is necessary to establish a closer relationship with African countries.

Masum Malzk pointed out that Egypt is needed to strengthen diplomatic contact with large powers led by the United States, the European Union, China, and Russia, because these countries have close relationships with Ethiopia and use this to pressure them to ask them Accept the signing of a binding legal agreement on the Ethiopian Renaissa Dam to protect the rights of upstream and downstream countries, as well as the need for Arab countries to intervene and promote Ethiopia's "listening language". Damage, Egypt will remain silent, so Ethiopia has made a strategic error.

China Electric Vehicle Group, which is known as the "Tesla Killer", has experienced global sales declines in recent months and has attracted the attention of the industry.

Weilai Group launched a SUV with only half of Tesla's similar cars in 2017, which was sought after by the outside world. However, according to the Wall Street Journal, the fierce competition in the electric vehicle market in recent years has seriously affected the profits of automobile companies and affected the entire supply chain. At the same time, the weak consumption and the end of China's car purchase subsidy policy, electric vehicle sales have no longer the trend of explosive growth before.

Weilai's situation is not unique, Weima Automobile(WMMotor)Most of the production has been suspended earlier this year, and a large number of employees have been fired; Raydin car, which is famous for only \$ 4,000(Folutinaut)Apply for bankruptcy in May. Xiaopeng Automobile, a Chinese electric vehicle startup in the United States, has been declining since September last year.

At the same time, foreign car brands, including Ford, are also setbacks in the field of electric vehicles, and are still struggling to catch up. Only Tesla still ranks second in the Chinese market.

On the other hand, BYD, China's largest electric vehicle manufacturer, has sold a total of 900,000 units from January to May this year, including hybrid vehicles, which accounts for 38%in the Chinese new energy vehicle market; The ideal car delivered a total of 100,000 cars in the first five months.

sitting on the ground and are doing the final test for the factory operation. According to reports, Volkswagen(Volkswagen)It is planned to stay in China in cooperation with a Chinese chip manufacturer to avoid the influence of the US chip ban. Reporter Guo Yanqi shooting/RFA information

In order to reduce the political risks brought about by Sino -US tensions, Western companies are increasingly inclined to divide its business in China.

According to the Wall Street Journal, Volkswagen in Germany(Volkswagen)It is planned to stay in China in cooperation with a Chinese chip manufacturer to avoid the influence of the US chip ban.

Japanese sanitary product manufacturer Langju Group(Lixil)In the reorganization of its supply chain, production in China for China, and production in North America for the United States.

However, for this "island" business strategy, the chairman of the Chinese EU Chamber of Commerce Yan Yan(Jenskelund)The evaluation said that the extra cost of trying to establish two independent value chains is too high, especially for small and medium -sized enterprises, it may be unbearable. However, a survey of the European Union Chamber of Commerce on Wednesday showed that a quarter of the members of the Chamber of Commerce have experienced the decoupling of headquarters and Chinese business in the past two years. The influence of decoupling also involves developing independent information technology or data storage for China and other parts of the world.

The report also pointed out that Western companies are facing China's increasingly stringent data security regulations, forcing them to separate data storage in China.

But on the other hand, Western companies localize or isolation in Chinese business can make the company's response to the local market more sensitive and better compete with local Chinese companies.

Zhang Guilin, the original director of the State-owned Assets Supervision and Administration Commission of the Beijing Municipal Government
Web image

According to the Beijing Municipal Commission for Discipline Inspection, Zhang Guilin was "double-opened" (expels the party, public office) by Zhang Guilin, the former director of the SASAC of the Beijing Municipal Government.

Zhang Guilin is 60 years old. He has worked in Guangxi and served in the Ministry of Agriculture. He has served as deputy director of the Management Committee of Zhongguancun Science and Technology Park. In March 2018, Zhang Guilin was transferred to the party secretary and director of the Beijing Municipal SASAC. In November last year, it was announced that it was investigated for suspected serious disciplinary violations.

In China's official report, Zhang Guilin was accused of collecting and reading books with serious political issues; accepting gifts and consumption cards that may affect fair execution of official duties; Interests, illegally accept others' property.

In recent years, Chinese officials have been accused of publicity and reading books with serious political issues. At the end of 2020, Chen Zezheng, the former executive deputy mayor of Changsha City, Hunan Province, Li Zhong, former deputy mayor of Huainan City, and chairman of the CPPCC, and Li Bin, the former executive committee of the domestic safety defense detachment of the Public Security Bureau of Chongqing City, was accused of entering the country from abroad. Xu Shiping, former president of Shanghai Dongfang.com, was announced to expel party membership and public office two weeks ago, and was also accused of collecting and reading prohibited books and magazines.

Type: Article

On June 16, 2023, Ogunlan, Nigeria, workers stood next to the container to collect oil leakage waste (Associated Press)

The new oil leakage of the Nigerian Shell Factory pollutes farmland and rivers, destroying the livelihood of the Niger Delta fishery and agricultural community. The region has long suffered environmental pollution caused by the petroleum industry for a long time.

National oil leak detection and response agencies(Corporation)Tell the Associated Press that the leakage incident comes from the cross -Niger pipeline operated by Shell. The pipeline is through the community in the Augnen Lalem area. The headquarters in London has been facing Local resistance.

The oil leakage has not been determined, but the photos released by the activists show that the farmland and the water surface are defiled by oil, and dead fish falls into viscous crude oil.

According to data from the United Nations Administration of Environmental Planning, although there are often leakage accidents in the region due to the lack of maintenance and pipelines, activists claim that this is a "major event."

Fernetfas Donatone is an environmental activity person. Its non -profit organization is responsible for monitoring the leakage of the Delta region. He

said that this is one of the worst situation in Ogunlan in the past 16 years. " Start on June 11.

"The flood lasted for more than a week and rushed into the Okulu River -this river was connected to the Atlantic Ocean, which influenced several communities, which caused several communities and caused several communities, which caused several communities and caused several rivers. More than 300 fishermen are displaced. "

Donaton said that the tide further deepened the oil to about 10 kilometers (6 miles) near the country near Harcott, the capital of the country.

More than 20 years ago, due to the deadly riots caused by residents' protesting environmental damage, shell company stopped Ogunlan's production, but Cross -Nerr pipeline still transported crude oil from the oil fields in other regions to the export pier through the community in the region.

Director Director of Nosdra Idris Musa(Idris Moses)It is said that the leak has been controlled, but it is dealing with the influence of the leakage of the farm and the Oukuru River, and said that the project runs through the community and has now fallen into stagnation.

Mouza accused the residents of saying, "Response delay," and added, "but the project is in progress."

This obvious ride originated from the distrust and dissatisfaction of the Niger Delta region with a rich Platform of the Niger Delta. The region is mainly the home of ethnic minorities. They accused the Nigerian government marginalized.

Activators said that the income of Africa's largest economy relies largely on the Petroleum resources of the Niger Delta, but the pollution caused by this production makes residents unable to obtain clean water, damage agriculture and fisheries, and increase the risk of violence.

In 2020 and 2021, NOSDRA recorded a total of 822 oil leaks, causing 28003 barrels of oil to the environment.

NIGERIA

Multiple oil spills in the Niger Delta region

Oil was first discovered in commercial quantities in 1956 in Nigeria, and there have been multiple oil spills in the Niger Delta since then. In the last ten years, there have been 9,828 episodes documented, according to the government's spill detection agency.

Year	No of Spills	Major Spills	Spills with no Estimate	Spills with no JIV*
2011	1059	2	359	218
2012	1135	4	391	179
2013	1666	1	762	450
2014	1521	8	540	284
2015	920	4	268	158

Source: nosdra.oilspillmonitor.ng

Many oil leakage incidents occurred in the Nigerianian -Hill Delta region. In 1956, Nigeria first discovered the amount of commercial oil. Since then, there have been multiple oil leaks in Niger Delta. According to the data of the government leakage testing agency, in the past ten years, it has been recorded in the past ten years. 9828 Petroleum leakage incident

Donaton said that the community was very angry about the destruction of the shell equipment caused by the disruption of the shell equipment, and was worried that the regulatory agency and Shell would blame the residents' destruction behavior. "

Petroleum companies often blame the leakage incident on young people who are indignant in the affected communities, which may evade their responsibilities.

Shell said it is working with a joint investigation team composed of regulatory agencies, Ogunlan residents and local authorities to determine the reasons and influence.

The Shell stated in a statement that the response team of the shell "has started, and according to the safety requirements, [mobilization] to the scene to take the environmental protection, personnel and equipment safety possible action."

NOSDRA confirmed the results of the joint investigation, but the cause of the leakage has not been announced.

Donatone said hundreds of farmers and fishermen who were cut off their livelihoods would insist on restoring the environment and then compensated.

At the request of the Nigerian government, the UN Environmental Planning Department conducted an independent environmental assessment of Ogunlan and released a report in 2011 to criticize the pollution of Shell and the Nigerian government in 50 years. Clean up.

Although the government announced its cleanup in 2016, there was almost no evidence that the ground had been recovered, and the government said that the lawsuits of community protests and local activists hindered progress.

Legandi Miti, a senior Ogany Environmental Protection activity and the former chairman of the Oguni people, said, "For the Niger Delta and other regions of Africa, the credible cleaning work is originally a lighthouse. But there is no credible cleaning work, "he added," this is a covering behavior, we can't see its influence. "

On June 16, 2023, in Ogunlan, Nigeria, workers stood next to the container to collect oil leakage waste (Associated Press)

The German and Lithuanian troops held a joint exercise under the NATO framework in Lithuania, code -named "Griffin Storm"

(Voice of Germany) German Defense Minister BORIS Pistorius announced on Monday (June 26) that it plans to permanent 4,000 soldiers in the NATO alliance.

Pistoris was visiting the Cladee of Lithuania, and he said: "Germany is ready to permanently stand in a strong journey in Lithuania." He also said that the corresponding facilities needed for this.

German Defense Minister BORIS Pistorius

Earlier, Germany had a reinforcement camp composed of about 1,000 soldiers in the Anta Army of Lithuania.

Vernis has repeatedly called on Berlin to send more combat forces. The country and [Russian Flying Land Territory Kalinenrad](#) border. In June 2022, Germany promised to send a complete tourist guard Lithuania to prevent it from being attacked.

However, Berlin has failed to fulfill its promise to date, and believes that the troops can quickly dispatch from the German base without having to stop in Lithuania permanently.

At present, only the brigade's command post is stationed in Lacra in Lithuania, and there are about 20 German soldiers. The remaining troops are stationed in different locations in Germany.

? Russia Lithuania fights

NATO joint exercise in Lithuania

Pistolis is inspecting the NATO joint exercise held by the German and Lithuanian troops in Lithuania, which is codenamed the "Griffin Storm". Germany will transfer 1,000 soldiers and 300 tanks of the 41st mechanized infantry brigade to the "Fo Popo Merry" brigade to Lithuania to participate in the exercise. The focus of the exercise is to defend the NATO East Wing.

This is the third time for such exercises. The current exercise is planned to last until July 7.

The exercise area in Pabred is less than 200 kilometers away from Galinenrad. Pistolis will watch the exercise with the ambassadors of NATO Secretary -General Stoltenberg and the ambassadors of the North Atlantic Council of NATO. Lithuanian President Sata and Secretary of Defense Anusaus Cascus will also attend.

Earlier on Monday, President Natasa said that the Wagner rebellion in Russia showed that the Kremlin regime was unstable and could affect the security of the region.

"Wagner Group's transfer to Belarus to establish a stronghold may become another (worrying) factor," he said.

Rebuilding Hong Kong outside Hong Kong -BNO for two years, how can discrete Hong Kong people continue to speak in the UK? Interview with Cheng Xiang: How should people preserve real Hong Kong history

The human rights organization headquarters in London "Hong Kongwatch" held a "silent auction" in London on Saturday (24th). Fifteen Hong Kong artists in overseas donated their works to exhibit and auction, including Hong Kong people The familiar A Tu, Huang Zhaoda, Zhang Jiali, and the dripping waves are related to Hong Kong's history and culture.

The most popular among them is the two oil paintings "Egg Tart" and "Egg Tart Movement" created by the Hong Kong couple artist who moved to the UK. The scenes of the "egg tart umbrella" were sold for 820 pounds and £ 620, respectively.

Last Hong Kong Governor Pengding Kang's image of the people deeply rooted in the hearts of the people

Before the transfer of sovereignty in Hong Kong in 1997, Peng Dingkang walked many times to the streets of Hong Kong to taste egg tarts. The image of love and the people became a collective memory of Hong Kong people. He kindly called him "Fat Peng", and also stimulated Hong Kong artists. Drinkling uses egg tarts as ideas and creates two works.

The "Tart Tart" created by the artist "Drumming waves" was sold at the highest price. (Stone photo) "I think egg tarts are a good symbol. In addition to Pengding Kang like to eat, they are also very popular civilian foods in Hong Kong. What does it represent? Citizen, very willing, I will not feel high. "

On July 1, 1997, Pengding farewell to Hong Kong, sitting on the "British Nia" left, and waved goodbye to Hong Kong people in the rain. The dripping waves also turned the Hong Kong people's reluctance into the painting "egg tart".

During the "Umbrella Movement" in Hong Kong in 2014, when Peng Dingkang attended the Oxford Debate Agency, he accepted the yellow umbrella sent by the students to him, and was also spoiled in the "egg tart movement". For the dripping waves, in addition to the beauty of the old Hong Kong, these two paintings are more important to preserve the history of Hong Kong.

More than a dozen Hong Kong artists donated their works to support the auction. (Stone photo) Lin Li said: "The current power of power likes to rewrite history too much, and even educators exaggerate that Hong Kong has been governed by the United Kingdom rather than 'colonies', so exaggerated things can be said. The two paintings can at least show that 'Fat Peng' is our last Hong Kong Governor. When it is still a colony in Hong Kong, and he likes to eat egg tarts, it is such a simple message. Our history. "

"Blossom Everywhere" Hong Kong Democratic Movement blooms everywhere

Huang Meiyu, a Hong Kong artist who has been in Britain for more than 20 years, donated the work "BlossomeveryWhere" for this auction. With a glass can, it contains colorful paper flowers and posted almond grains with slogans. Essence

Hong Kong artist Huang Meiyu and her work "bloom everywhere." (Stone photo)

"Hong Kong Supervision" founder BENEDICTROGERS told this station that he hopes that the event can unite overseas Hong Kong people, and the funds raised as "Hong Kong Supervision" will continue to conduct human rights in Hong Kong in the UK and Canada in the UK and Canada. Work and follow up the issues that Hong Kong immigrants follow.

Marial posted on her communication software Telegram account: "The National Army forces Rivnopol back to our control. Let us continue to advance."

There are two rural communities in Donetsk, both of Donetsk. Both of the two places are near the front line of Russia and Ukraine. Vlyka Novosilka. Marial did not explain which Ryovorpier was recovered by the Ukraine.

However, according to the Ukraine's previous three -sided bread, Ryovorpier, who copied Great Nonovarka, may be inferred that the place where Marial called the recovery was the Ryovorpier, not another place.

Ukraine launched a counterattack against the Russian troops in the southern and east of the southern and east this month.

Although Ukraine began to deploy more Western weapons and chariots, President Volodymyr ZELENSKYY still admits that the progress is expected rapidly.

However, the Ukraine has made breakthroughs in the Mokri Yaly River River in Donetsk, Da Nuoshlca, to regain the Ukrainian army on behalf of the Urp for recovery.

On the 16th, the Russian army confirmed that the two sides fought for the Ryovor Pills, and the official launching the summer counterattack was just 2 weeks before the Ukraine.

Maria Earlier summarized the situation last week that the Ukraine troops recovered 17 square kilometers of lost soil and accumulated a total of 130 square kilometers of land. Among them, the largest area was south of Vuhledar, including Ruiffer, including Ruff Noipil is inside.

The Swiss Federal Intelligence Agency (FIS) believes that the spy activities of Russia and China have a great threat to Switzerland

(Voice of Germany) The Swiss intelligence department said on Monday (June 26) that Russia's invasion of Ukraine has caused the country where many international organizations are located to become the center of Russia and Chinese spy activities.

"Russia destroyed European-based peaceful order." The Swiss Federal Intelligence Agency (FIS) said in its annual report. FIS is responsible for the stealing work of Switzerland.

FIS said: "The effectiveness of maintaining peace and security international organizations such as the United Nations or European security and cooperation organizations continues to decline; there is no sign of indicating a stable world of a stable world."

Overall, Switzerland's security situation is being affected by the increasingly fierce competition between great powers The Ukrainian war exacerbated this competition.

FIS said that the world is shifting to the bipolar world order shaped from the United States and China.

But at present, Russia's war in Ukraine will still be the focus of Switzerland's security environment.

FIS said: "Foreign (mainly Russia and China) spy activity is still very high to the composition of Switzerland."

The agency said, "In Europe, Switzerland is one of the countries with the largest number of Russian intelligence officials who carried out activities under diplomatic cover. Part of the reason is that Switzerland is the role of many international organizational hosts."

The European headquarters of the United Nations and the headquarters of multiple UN agencies are located in Geneva.

There are usually hundreds of diplomats gathered in various meetings of these institutions in Geneva.

FIS said that this year, Switzerland took over the rotating chairman of the Security Council, "adding spy threats facing Swiss individuals." These Swiss people are dealing with the archives of the United Nations Security Council and making decisions.

The agency said that the Ukrainian war forced it to expand its surveillance scope to areas that have rarely received attention so far, such as the Turkish, India and Eurasian Economic Unions because Russia is using companies in these countries to purchase.

Brinken: Speaking of dialogue dislike if you don't like

(Voice of Germany Chinese), after the US President Biden said that Xi Jinping was a dictator, State Brillings stated in the latest interview [supported Biden's statement](#) Essence Sunday (June 25) [In the United States CBS "in the" National Interview Program](#) Brinken said, "The president's speech has always been very frank and very direct. He expresses very clearly, and he is also talking for all of us."

Brinken emphasized, "I told my Chinese colleagues during this trip that we will continue to do what you don't like, saying what you don't like, just like you will continue to do what we don't like, saying that you don't like what we don't like, saying that If we don't like it, the same. "

Last Tuesday (June 20), when a fundraising event in California, [Bayeng talked about the "balloon incident" that made the already intense Sino -US relations continued to fall into the freezing point](#) He said, "Xi Jinping's particularly angry reason was that when I shot down the balloon filled with two

spy equipment, he did not know where it was." They don't know what happened, it should not be its destination, because the wind has deviated from the route. "

One day before Bayeng's speech, Secretary of State Brosyl, who visited Beijing, met with Wang Yi, the first leader of Chinese diplomatic affairs and the foreign minister Qin Gang, held talks with Chinese President Xi Jinping. Active signs, Biden himself also gave Bolling's visit to China to give "he did great" and believe that Sino -US relations are "walking on the right road." It is conceivable that the "dictator" remarks make Chinese seniors very dissatisfied.

On June 21, a Chinese Ministry of Foreign Affairs spokesman Mao Ning said at the press conference that Biden mentioned the dictator when he mentioned that "the United States' remarks were extremely ridiculous, irresponsible, seriously violated the basic facts, seriously violated diplomatic etiquette, and seriously violated the Chinese side. Political dignity is an open political provocation. China has strong dissatisfaction with this and resolutely oppose it. "

In the Sunday interview program, Secretary of State Blinger did not show the meaning of deliberately diluting the presidential speech. He said, "The main purpose of this visit to China is to bring more stability to the relationship between the two countries. I think that China also has obligations to deal with this relationship responsible to ensure that the profound differences between us will not evolve into conflict. "

He believes that China and the United States now have established a [better way to communicate](#) [How to perform this](#) [Will hand over the answer sheet to people in the next few weeks or months](#) .

What details are eye -catching?

Don't spread red carpet, just give the red line

The trip to Beijing was the first visit to China in five years in the United States Secretary of State, and it was also the highest -level official to visit China after the Bayeng government came to power. However, when Brintken arrived at the Beijing Capital International Airport, there were no red carpets, no one presented flowers, and the Chinese officials who were present at the scene were Yang Tao, the director of the North American Oceania, which was relatively low -level. Interestingly, there are still a few red lines on the ground floor, and the photos on the scene just captured the moment when Brincayan

stepped on the "red line". As Sino -US relations are in a historic trough, all of this seems to be symbolic. However, some experts pointed out that except for Hillary Clinton as a Secretary of State's visit to China in 2012, when the Chinese side paved the red carpet for her, when the U.S. Secretary of State Cry, Tillerson, and Pompeo arrived in China, there was no red carpet in the apron, and there was no red carpet. Essence

What details are eye -catching?

Blingken arrived in Beijing on the morning of June 18, arrived at the Diaoyutai State Guest House in the afternoon to talk with Chinese State Councilor and Foreign Minister Qin Gang. However, "News Network" broadcast by CCTV on the 18th did not report the matter. Regarding Brillin and Qin Gang's 6 or 7 hours of talks, the Chinese official media Xinhua News Agency and others only reported the Chinese position that Qin Gang expressed with his teachings, but did not say anything. Xinhua News Agency said that Qin Gang said, "At present, Sino -US relations are at the lowest valley since the establishment of diplomatic relations", and emphasized that "the issue of Taiwan is the core of China's core interests", "it is also the most prominent risk."

What details are eye -catching?

Analysis: Pay the way for Xi Jinping to attend the San Francisco APEC Summit in November

After talking with Qin Gang, Brinken wrote in Twitter that the two sides discussed how to manage the relationship between the two countries in charge through open communication channels. The U.S. State Department issued a statement stating that Brinken emphasized the importance of maintaining smooth communication channels on both sides and proposed to cooperate with China on some issues, but at the same time, the United States will continue to protect the interests of Americans and safeguard the rules -based international order. The Wall Street Journal had previously analyzed that one of the driving force for the recent recovery of dialogue in the United States and China was the Asia -Pacific Economic Cooperation (APEC) summit scheduled to be held in San Francisco in November. Beijing

hopes that Chinese President Xi Jinping will attend the meeting and pave the way with US President Biden.

*#

What details are eye -catching?

mask meaning

What details are eye -catching?

suspense revealed

Until the last moment, whether Xi Jinping, the Chinese President and the Supreme CCP leader, would have been a suspense. On the eve of Brinken's arrival in Beijing, Chinese Chairman Xi Jinping met with former Microsoft President Gates, saying that he was an old friend, and said that he always hoped to be on the American people. Analysts believe that if Xi Jinping does not see Blink, then Sino -US relations will be even more worrying. If you see, the relationship between the two parties is expected to be further ease. Xi Jinping may also have a formal visit to the United States when he goes to San Francisco in November to participate in the APEC summit.

*#

What details are eye -catching?

Blinger to complete the main goal of this trip

According to usual, the US Secretary of State visits China, and Chinese leaders will meet with it. However, there are exceptions, such as when Plingken's former Pompeo visited China in October 2018, Xi Jinping did not see him. At that time, the Sino -US trade war had debuted, and US Vice President Pence had just delivered a tough speech on China. The relationship between the two sides was very tense. Today, Xi Jinping's visit to China after the Chinese balloon invaded the US led in the Great Hall of the People, which means that China and the United States will maintain high - level communication, and Brinken also reaches the "frankness, direct and direct, and directly, and directly announced by China to visit China. The main goal of constructive "discussion. During the talks, Xi Jinping was sitting in the middle, and the long tables on the left and right hands were sitting on Sino - US officials. Neither Xi Jinping and Brinken were wearing masks, and Qin Gang and Wang Yi, who had not wearing a mask during the meeting with Brinken, wore masks like other officials.

S & P underwriting Chinese economic prediction experts talk about how to alleviate employment difficulties

Author: None (Language: zh)

Publisher: None

Time: 2023-06-26T14:26:00Z

Description: The rating agency's S & P is lowered by 5.2% of China's economic growth this year. Professor of the School of Finance and Management of Frankfurt said to the voice of Germany that economic recovery can not be achieved by a button. He specially called for relaxation of restrictions on the supervision of high -tech fields, saying that it was also related to employment issues of youth.

Videos: []

Images: []

Subject: 经济纵横

Subjects: ['专题报道：中国经济何处去？']

Keywords: ['中国经济', '失业率', '青年失业率', '经济增长', '高科技', '阿里巴巴', '腾讯', '应届毕业生']

Id: 66036410

(Voice of Germany in Chinese), one of the three major rating agencies has lowered its forecast for China's economic growth this year, from 5.5% to 5.2%. This is the first global rating agency to reduce the forecast of China this year. However, before, the main investment banks including Goldman Sachs also lowered relevant forecasts, and Goldman Sachs dropped from 6% to 5.4%.

The Chinese government sets about 5% of the target of this year's economic growth. The growth of the first quarter of this year was 4.5%.

In a statement in Sunday, S & P finger, consumers and real estate market confidence in the real estate market, leading to economic recovery. This is China's economic downturn The main risk.

After canceling the strict zero -clearing policy of three years, the world's second largest economy has recovered, but the speed has slowed in recent months. In May, real estate investment fell again, and the growth of industrial

output and retail industry was lower than expected. The officially announced youth unemployment rate reached 20.8% of the record.

Consumers take time to recover confidence

Professor Horsstlöchel, a School of Frankfurt Finance and Management, told Germany: "A economy does not say that a button can be recovered. It must be seen that the Chinese government's strict control policy for more than two years has caused the economy to fall into a lot Large degree of paralysis. Now you need to restore people's confidence. For example, in the field of consumption, growth is also very slow This is a clear signal that shows that consumers have no real confidence in the future of the Chinese economy. In addition, the world economy's support for China's exports is not as good as the past. "

Professor Limotor's analysis believes that whether it is the impact of the economy during the previous period of control or the news of the high unemployment rate of youth, it has affected people's consumption confidence and is more willing to save money. The geopolitical tension between the United States and China also brings uncertainty.

Experts believe that the strict measures and consequences of the epidemic period will still take time to disappear.

Limited development in the field of high -tech also affects the employment of youth

On the issue of unemployment rate, Professor Roller said that the severe manifestation of the problem is that young people who have received three to five years of college education have to accept jobs that are far lower than their education level. This will bring dissatisfaction. In addition to the impact of strict new crown measures on the economy, the cause of this situation also has such as further supervision restrictions in the high -tech field in recent years](<https://www.dw.com/zh/zh/中國推 ai 管理法-人工智慧也要姓黨/a-65275966>)related. As a result, this area has to lay off or recruit so many fresh graduates because its growth is no longer so fast. Such structural problems also play a role. For example, Alibaba, Tencent, etc. have been under pressure in terms of data and antitrust laws in recent years. Its market value has also shrunk significantly. Operating performance is no longer as straight as in the past.

should support the private economy and attract foreign investment

S & P believes that if China wants to promote the economy, possible measures include relaxation of restrictions and down payment thresholds, expanding loans and infrastructure financing, and financial support for consumption.

Ning Jizhen, member of the Standing Committee of the Chinese People's Political Consultative Conference and deputy director of the Economic Committee, called on a group of policies to promote the rise of economic recovery on weekends. "The macro policy is small", he said, "Policy can come out early and can get out early."

Last week, China lowered its loan benchmark interest rate, the first time in 10 months. Two weeks ago, the central bank lowered the short -term and medium -term policy interest rates.

Professor Limorie said that the central bank's interest rate cuts can help promote investment, and because China's inflation is very low, it can bear such measures. In addition, it is estimated that it will stimulate the economy through fiscal policy and infrastructure projects. However, measures to deal with structural issues are also important, such as increase support for private economy Further attract foreign investment and restore restrictions on high -tech fields.

2021 Chinese Science and Technology Enterprise: Internal and Exorganization Dilemma

Technology stocks are founded

With the tightening of regulatory policies, the market value of Chinese technology companies has continued to shrink, which has exacerbated the market's concerns about the slowdown in China's world's second largest economy, and investors' emotions are generally affected.

*#

2021 Chinese Science and Technology Enterprise: Internal and Exorganization Dilemma

Anti -monopoly and data security

Since the end of 2020, Beijing has increased its supervision of Chinese technology companies on the grounds of antitrust and guarantee data

security. In addition to being criticized and interviewed, many technology companies are fined to varying degrees. After 20 years of loose control, the Chinese Internet industry has been deeply damaged.

*#

2021 Chinese Science and Technology Enterprise: Internal and Exorganization Dilemma

Common features

Some experts have noticed that mostly the controlled enterprises are capable of collecting a large number of user information and obtaining platform companies with absolute advantage in the market. Maximilianmayer, a professor of global science and technology policy at Bonn University in Germany, analyzed the Voice of Germany: "The purpose of this movement is to strengthen the supervision of large Internet companies and its data processing methods."

*#

2021 Chinese Science and Technology Enterprise: Internal and Exorganization Dilemma

down the altar

Not only did technology companies encounter severe damage, but the founders of these companies themselves also felt the power of the government's heavy punch. The first one was Alibaba's founder Ma Yun. In late October 2020, Ma Yun high -profile attacking the Chinese financial supervision system. Soon after, Alibaba's financial business -the listed plan of Ant Group was stopped by the Chinese regulatory agency. Ma Yun faded out of the public vision.

*

Wealth Reconstruction

Xi Jinping, a Chinese national leader, put forward the goal of "common prosperity", and the Chinese technology industry giants have expressed their full support. For example, Tencent and Alibaba will invest 50 billion and 100 billion yuan respectively to help "common prosperity." According to external analysis, the Chinese government uses suppression to promote technology giants to share their wealth with employees and consumers, and reduce the gap between the rich and the poor in politics.

*#

2021 Chinese Science and Technology Enterprise: Internal and Exorganization Dilemma

dual pressure

Under the dual pressure of China's reins tightening the "network security" reins and the United States held up the "accountability law of foreign companies", it was only officially announced that it was officially announced that it was officially announced by the China Internet -Ending Car Drops of the New York Stock Exchange at the end of June this year. "The first shot of large Chinese Internet companies from U.S. stocks. All in all, on the one hand, Chinese companies, which are listed in the United States, have to face strict review of Chinese regulatory agencies on the one hand, and on the other hand, they also face more rigorous risk disclosure requirements in the United States.

*#

2021 Chinese Science and Technology Enterprise: Internal and Exorganization Dilemma

blocked by the United States

While "soft technology" enterprises encounter China's supervision, "hard technology" companies such as Huawei and DJI are more restricted from abroad. For many years, the United States has not only been committed to eradicating Chinese equipment such as Huawei in its country, but also trying to convince other countries not to buy related equipment. "Safety Equipment Act"(Secure Equipment Act)It is one of the latest actions made by the US government to combat China Telecom and technology companies.

*#

2021 Chinese Science and Technology Enterprise: Internal and Exorganization Dilemma

Another example of tightening the restrictions on Chinese technology companies is to include Chinese artificial intelligence giants Shangtang Technology on a blacklist. The US government said that the company on the list provides support for China's military development. This week, the US Treasury Department also included a number of Chinese companies on the entity list, including the world's largest commercial drone manufacturer DJI

innovation and multiple biotechnology companies. It is strictly forbidden to invest and export technology on the list Essence

Last week, the top edition of the three major state -owned securities newspapers quoted that economists said that the central bank might continue to relax monetary policy. On Sunday, the English version of the Global Times reported that many graduates went to the temple to burn incense to alleviate the anxiety of finding a job.

According to Reuters, the market is widely expected that the regular meetings of the Political Bureau of the Communist Party of China in July are expected to announce policies that stimulate the economy. The Shanghai Huabao Trust Economist Nie Wen (transliteration) said: "The government is allowing the state media to express more appeals in order to prepare for the public opinion (the upcoming Politburo) meeting to improve psychological expectations for more stimulating measures. "

Kyodo News Sunday (June 25) quoted the insiders that the Japanese government had stated to the Liberal Democratic Party of the ruling party that if the purpose of use belongs to the five fields of non -fighting such as "alert" stipulated in the current system, even if there is a lethal weapon with lethal power Can also be exported. This includes the "reconnaissance alert vehicle" with the land self -defense team equipped with the machine gun and the mine -sweeping ship of the Maritime Self -Defense Force.

It is reported that the Japanese Defense Minister Hamada Yinyi said at a press conference that the "three principles of defense equipment transfer" and the use pointer that stipulated export rules did not mention whether it could export the weapons with the ability to kill. Make a judgment individually.
"

The insiders of the Japanese ruling party proposed to relax restrictions, mainly considering that Japan and the United Kingdom and Italy decided to

jointly develop the next generation of fighters. Cooperation means that Japan can no longer strictly adhere to the combat equipment developed by third countries.

According to Japanese regulations, Japan only allows exports or transfer and "rescue", "transportation", "surveillance" and "minesweeper" and other military equipment exports that do not include the purpose of killing.

Alibaba's Cloud Computing Center in Hangzhou

(Voice of Germany) "Frankfurt Report" published a comment article entitled "PekingSalbtraum", pointing out that Russia's Wagner's mercenaries were incident, which not only made Beijing feel nervous because of worrying that Russia was in chaos, but also made it possible to make Xi Jinping has doubts about the stability of his power, and even affects him [Murder of Wu Tong Taiwan](#) Essence The author wrote:

"What happened in Russia may once again make the Chinese leadership like a nightmare, which is the second time for more than 30 years. This leader tried to convince the world that he was strong and unintended. In 1991 (The same as China) system collapse, and the entire country has disintegrated. Now in Russia, the leaders have been questioned. The lesson in Beijing in 1991 is to make the people live a richer life, but at the same time, it will be politically accepted politically. Keep control. Private troops like Wagner, Chinese party and state leaders Xi Jinping will never allow it to exist.

However, he may also ask himself at the moment of no one: if he is in chaos, can he really be right? All state institutions maintain trust.

The world should not be sent to China to relax internal political control. If Xi Jinping can use Putin as the experience of the army's commander, it is a good thing to think about whether it is necessary to attack Taiwan for a military attack. Ukraine's 16-month action shows that the objective disadvantage can also resist stubbornly, causing the invaders to be in a serious predicament. Although Taiwan does not have the depth of territory like Ukraine, who can say that this small island country cannot do all this? If Taipei is obvious to good armed forces, it will be an effective deterrent to those good warriors in Beijing. "

The mutiny of the Wagner Corps also makes Xi Jinping nervous?

Dangerous "Smart City"

The "Sunday World News" published a guest article entitled "Why China's Smart City is so dangerous?", Pointing out that China uses artificial intelligence to manage cities. One of the weapons is a comprehensive monitoring of citizens. Relevant technology has been exported to many other countries.

"In China, people are fascinated by intelligent networked machine systems, which is clearly reflected in China's monitoring design. This technology makes monitoring residents more convenient and is in [smart city](#) The direction of (Smart Cities).

Chinese officials have installed a large amount of sensing equipment in various types of space in the city, and set up many called '[urban brain] called' [urban brain](#) '(Citybrain) command center. These centers are collected and used by artificial intelligence to analyze all data in the city, and show them to the staff and urban managers in the digital cockpit in the digital cockpit.

The vision of 'city brain' is influenced by the party's leaders, scientists and industry. President Xi Jinping regards it as the key to making cities smarter through artificial intelligence, big data and cloud computing.

China has announced that 500 cities have announced that they will build smart cities. China is also committed to expansion in regional and global. Alibaba's smart city technology has been exported to Kuala Lumpur in Malaysia. "

Kuala Lumpur in Malaysia introduced Alibaba's smart city system

"Many cities that have introduced Chinese smart cities will lose their sovereignty on their own data, because the use of artificial intelligence in this system is too complicated to fully understand. In addition, there are many questions that there are no answers: city brain networks with global interactive city interaction What will it be? Where will it be made? Who's the interests of the city's brain network? What technical standards and algorithms will follow? "

The author of the article, Valentinweber, is a researcher at the German Foreign Policy Association (DGAP). One of the research points is network security. He believes that smart cities can help China get sensitive data in other countries. The higher the intelligence of export monitoring infrastructure, the easier it is to carry out spy activities, and the higher the influence of China in related areas.

"Once China and the territorial disputes between Malaysia or other countries in the region have developed into an open state of hostile. From the mid - term, the Alibaba city brain positioning monitoring facilities and data streams in Kuala Lumpur can be integrated into the battle map of the Chinese Air Force fighter aircraft "

The author believes that "in 2023, we are still far away from the large -scale network of urban brain. Nevertheless, the political decision makers of democratic countries should still realize that China' s geopolitical characteristics of exporting smart city projects to foreign countries. "

Ye Jingzhong, Dean of the School of Humanities and Development of the Chinese School of Agricultural University, publicly criticized the society's various chaos at the graduation ceremony recently, encouraging graduates to "surround the power, do not extinguish the light and beautiful light."

Screenshot of the official website of the School of Humanities and Development of China University of Agricultural University [Audio-Link:](#)
[@stream](https://www.rfa.org/mandarin/yataibaodao/renquanfazhi/kw-0626202312034.html)

Recently, a dean of China Agricultural University publicly criticized a variety of chaos at the graduation ceremony

and encouraged graduates to "surround the power and do not extinguish the light and beautiful light." But then the content of this speech was deleted on the Chinese Internet. Why does the voices about citizenship touched the sensitive nerves of the authorities? Under the high unemployment rate of young people at the moment, can Chinese graduates who are about to enter the society are awake in front of power?

China "leftovers blind box" is widely welcomed by young generations *

China National Bureau of Statistics: work for one hour a week, even employment ** China 's youth unemployment rate in May will innovate

high economic data weakness At present, as the graduation season of Chinese universities, as many as 11.58 million college graduates are about to step out of the campus and enter the society to make a living. At the same time, the unemployment rate of urban surveys from 16 to 24 in China in May of China reached 20.8%, a record high.

In order to alleviate the unemployment of young people, the Ministry of Human Resources and Social Security issued a notice on the 25th (Sunday) that it will start the half -year "2023 college graduates such as young people and other young employment services" to pass a number of assistance measures Let these young people can achieve employment or participate in employment preparation activities before the end of the year.

Dean of China Agricultural University Ye Jingzhong's graduation speech was deleted

On the occasion of whether college graduates are worried about whether they can squeeze into the harsh employment market, Ye Jingzhong, Dean of the School of Humanities and Development, Chinese Agricultural University (referred to as "Chinese Agricultural Adults College"), " Do not extinguish the light of true and beautiful ", which arouses public opinion.

According to the "Chinese Digital Age" report of overseas online media, the hospital was in [Official WeChat public account] on June 21(<https://mp.weixin.qq.com/s/vox6KDdHGvRImPC0EVB8dg>)The full text of Dean Ye Jingzhong's speech was published. But as of now, this article is Netease , Sohu , Know almost The reprints of multiple media platforms have been deleted.

In response to this speech, Chen Chuangchuang, a director of the National Autonomous Federation of Students and Scholars of the United States, told this station: "I still admire the speech of this dean. In fact, in the current

China, let them speak some truths, especially so big that is so big In the environment, it is very difficult. "

Tang Jingyuan, a commentator of the American current affairs, said: "His speech has touched the institutional contradiction of the CCP, that is, power is omnipresent, and power surrounds everyone."

Ye Jingzhong: Keep awake in the siege of power

So, what did Dean Ye Jingzhong talk about in his speech? According to the publication of the Agricultural Adults College, Ye Jingzhong pointed out in his speech that from a world perspective, he often felt that the "three views" were broken, the bottom line was penetrated, and his imagination was serious. In this era, he especially wanted to tell the graduates: "Keep remaining in the siege of power!" Because he was worried, "You will" follow the customs in the siege of power ", gradually obsessed with power, lost self, confused, confused Life. "

Ye Jingzhong took the recent social incident, for example, a action of the power system can allow the harvester to lift a long team on the highway, reclaim the green water and green mountains into terraces, and turn yesterday's "returning farmland to forest" to today's today to today "Returning to forests and returning to farming"; more serious, power may also create omnipotent illusions, so under the light of light, "forcibly transformer" and "refer to mice as duck".

Ye Jingzhong also talked that the rules and training of power can make people rigid and numb. For example, he said that a student works in a pollution control department in the south and manufacture a large amount of data reports every day. The only requirement is to ensure that the data meets the standard; a student works in a supervision department in the west. Relief, but many villagers in many villages have not even heard of scanning the code; a student is responsible for food safety supervision in somewhere in the east, and takes half a minute in front of the rural supermarket for half a minute. "Delivery".

Tang Jingyuan told this station: "He (Ye Jingzhong) involves the power of the CCP government has seriously violated any public space and private fields that any normal society must have, so it will cause such a 'finger rat The state of duck' or thousands of horses. "He pointed out that the distortion of the entire Chinese social atmosphere is because of the omnipotent and intervening of government power, distorting the normal ecology of society.

Regarding the power issues mentioned by Ye Jingzhong, Chen Chuangchuang told this station: "In fact, the core reason is that there is no political right in the hands of the Chinese people, no votes, and no change in government rights." He believes that the unemployment problem of young people in China is also because of the problem of unemployment of young people because of the unemployment problem. During the past three years, the wanton for power has seriously harmed the national economy.

Ye Jingzhong: Do not extinguish the true and beautiful light in the siege of power

During the speech, Ye Jingzhong told the graduates that although everyone was difficult for everyone to be alone under the temptation, domination and rules of power, "I still hope you don't become 'delicate' because of the attractiveness of power, don't want to be smooth, don't want to do not want It becomes arrogant and arbitrary because of the control of power, and do not become numb and confused because of the rules of power. Because you will always be the beam of light in the eyes of the teacher. "

Ye Jingzhong also mentioned that power is not essentially different from or bad, but the practice of power may bring both lying and creating false, making bad evils, rotten than ugliness, but also to achieve integrity, good, good, and aesthetic.

He encouraged graduates: "In the face of the siege of power, I can't ask you to hit a hard wall like an egg, but I hope you can retain the true and beautiful soul in the fragile shell; I hope you will not extinguish the soul deep The light of the real goodness and beauty; I hope you will keep the courage to run freely towards the real, goodness and beauty, and even if you fall down, you can smile. Your running may allow more people to get equal Freedom, let more people be respected. "

In response to Ye Jingzhong's appeal, Tang Jingyuan believes: "What is refracted behind the call is to hope that students can maintain an independent thinking ability and do not easily cater to or obey their power. From the perspective of the CCP authorities or systems, this is obviously that it is obviously that it is obviously that it is obviously Acknowledged with them. "

However, Tang Jingyuan also believes that in a social atmosphere of "all power -centered", especially if graduates are facing the pressure of huge employment survival, it is very difficult to maintain independent thinking ability and the bottom line of human beings. big.

Chen Chuangchuang emphasized that maybe when these young people encounter huge survival difficulties in the future, they will be forced to reflect on how to change this kind of power and strive for the most basic rights for themselves. At that time, China's political change could come.

On Saturday, the leader of the Russian mercenary Wagner, the leader of the armed rebellion, Poligon Prigozhin Press Service Via AP

On Saturday, the Russian -Russian mercenary Wagner, the leader of the Russian mercenaries, suddenly delivered an audio speech on Monday (June 26), and called the rebellion "uprising", indicating that there was no intention to overthrow the Putin regime. Essence According to the New York Times, this audio was published in the Telegram group.

The British "Guardian" issued the audio selection of Porigjin's speech on the website. In his speech, Porigaba emphasized that this operation shows that

Russia has serious problems in territorial security, and the uprising operation is based on social requirements, because Russia's military leadership in Ukraine has failed.

According to the New York Times report, Porigjin explained in his speech that this operation was to protest the Ministry of Defense forced his troops to sign an agreement with the government. action. But when seeing that continuing to protest may lead to bleeding from Russia, Wagner stopped action.

According to the "Guardian", Porigjin also said that his troops would resist being annexed by the Russian Ministry of Defense and refused to sign a contract; at the same time, Wagner may even be allowed to continue to act in Belarus.

In his speech, Porigjin also accused the Russian regular army's shells of Wagner, saying that the uprising was to prevent the Wagner army from being destroyed and pursued the responsibility of those officials who made a lot of mistakes due to their unprofessional behavior.

At the same time, he also claimed that the Wagner army entered Russia in Russia is a demonstration of Russia's invasion of Ukraine. If Wagner was allowed to take an invasion, he could complete the task in one day. The Russian Minister of Defense, the Minister of Defense of Russia, showed up earlier on Monday. A video showed that he visited the cutting -edge command post of the Western Army.

Prodigin did not show his location, nor did he reveal whether he would exile in Belarus in accordance with the agreement reached with Belarus leader Lukashenko.

Russian President Putin delivered a speech at 10 o'clock local time on Monday night Reuters pictures

After the Russian President Putin was suspended after the rebellion of the Wagner troops on Saturday, he did not show up for about two days. Until 10 o'clock local time on Monday night, he suddenly delivered a speech through television. The British Sky News broadcast the speech in real time.

In his speech, Putin emphasized that he would investigate criminal responsibility for the organizers of the rebellion on Saturday. He emphasized that everyone knows that it should be. He said that this was a criminal crime, weakened the country, and was a threat to the country from the outside.

He also said that the rebellion organizers violated those who were forced to be involved in the organization. This suicide behavior is a new Nazis. Their purpose is to let Russian soldiers slaughter each other. They just want to kill soldiers and ordinary people, and to split Russian society. They want to retaliate for their failure. But they did wrong.

At the same time, the Russians also know that the vast majority of the Wagner army is loyal to Russia. They defended Donbas with their courage. And they finally turned around in the rebellion to avoid bleeding from Russia. Thanks to these decisions to suspend the operation and avoid the soldiers who have bloody conflicts. Putin hopes that these soldiers can contact the Ministry of Defense or return to their own homes. The Russian government will abide by the previous oath. It depends on the choice of these soldiers. At the end of the speech, Putin thanked the Belarusian President Lukashenko for mediation of this rebellion and helped Russia to restore peace.

According to the Broadcasting Corporation (BBC) earlier on Monday, many Russian media disclosed that Porigin was still investigated for trying to organize armed rebellions, and criminal cases against Pleigo have not been revoked. According to a report on Sunday (June 25) on the Peninsula TV website, the main points of the agreement between Putin and Lukashenko, a spokesman for Kremlin spokesman, mentioned that ending criminal charges against Porigett, He will then go to Belarus.

Earlier on Monday, the leader of the Wagner Force Purigjin released a 11 - minute speaking audio through social media, emphasizing that he did not intend to overthrow the Putin regime.

Incidents where airport staff members of the United States died after being inhaled by passenger aircraft engines, US regulators were investigating.

The National Transportation Safety Commission (NTSB) issued a statement on Sunday (June 25) saying that a passenger plane of Damei Airlines flew from Los Angeles to San Antonio, Los Angeles in the evening of Friday (23rd). The engine is still running, "a staff member is inhaled in the engine."

The statement said: "The National Transport Safety Commission is continuing to collect information about the incident."

According to local media reports, the worker hired UNIFI Aviation, which signed a land service contract with Damei.

Damimi Airlines told San Antonio Media that the company was "deeply sad" about the incident on Friday night and "under investigation by the authorities."

Unifi Aviation also said that this is a "tragic accident" together. "According to our preliminary investigation, this incident has nothing to do with the operating process, security procedures and policies of Unifi."

Malaysia [Six State Elections](#) Nearly, the National Front (Barisan Nasional) and the Hope Alliance (Pakatan Harapan), which belong to the unity government, have recently "turned over the old account" to affect mutual trust. After the Prime Minister Anhua came forward to appease, the Barisan Nasional Chairman Ahmad Zahi and the Secretary -General of the Democratic Action Party Lu Zhaofu agreed to face the elections of the six states together.

The Barisan Nasional and Pakatan Harapan members have recently accused each other for various "old accounts". This includes Penang's second deputy head of Lamashami on May 31 that MCA and the National University's party's appeal in the six states caused a rebound.

Pan Jianwei, a pre -Public Propaganda Secretary of the People's Bank of China on Friday (June 23) [Refers to the Barisan Nasional, UMNO and the indigenous unity party as the "Corruption Alliance"](#) It caused Umno

dissatisfaction. General Secretary Ma Qing also advocated MCA on Sunday (25th) that MCA should not participate in the six states elections, nor should they vote for the "arrogant candidate" from the UMNO and the DPP party.

When Ahmad Zahi was questioned on Monday (26th) at the press conference, he described the current cooperation between the Barisan Nasional and the Pakatan Harapan. He also urged the members of the Barisan Nasional MCA, the National University Party and the Sabah People's Solidarity Party, etc., and should not create any subject under the tension situation of the current six states elections.

He said that the main leaders of the Barisan Nasional Party agreed to ignore the personal remarks of individual party members, otherwise it will cause a negative impression of no consensus between the party's party alliances of the ruling team. "I thank the leaders of Mahua, the National Party and the National Party, and the Sabah People's Unity Party for supporting (united government) to face the coming state selection. The cooperation between the Barisan Nasional and the Pakatan Harapan is currently the best stage."

When the Secretary -General of the People's Bank of China, Lu Zhaofu, also echoed Ahmad Zahi when he was questioned on Monday on Monday. Lu Zhaofu said that Ahmad Zahi has promised to face the six states elections with the DPP party. As for the individual opinions of others, they do not need to be ignored.

Russian Prime Minister Mashassjing said that Russia's stability is facing challenges and must continue to unite and support President Putin.

Reuters reported that Mashass Beijing called on a government conference on TV on Monday (June 26) that when facing Western countries' attempts to destroy Russia, it should be united. This is believed to be the first public comments of senior Russian government officials since the end of the Wagner Group's mutiny of mercenaries.

"Under the current circumstances, the most important thing is to ensure the sovereignty and independence of the country, and to ensure the safety and well-being of citizens. To this end, the unity of the entire society is especially important; The unity of all power and support the president. "

Michase also criticized Western countries in his speech. "As the president pointed out, the entire Western military, economic, and information machines are almost targeted at us."

Monday (June 26) points:

Pre -trading focus:

International Business Machinery Company will acquire software company APPTIO for about \$ 5 billion. (Reuters)

Morgan Chase said that Amazon is expected to achieve the fastest delivery service ever this year. (Reuters)

Amazon (Amazon.com Inc) (Nasdaq Stock Exchange code: AMZN)

JP. Morgan analysts Doug Anmuth and Bryan M.smilek boldly predict that Amazon will replace Walmart in 2024 and become the largest retailer in the United States.

If this prediction becomes a reality, this will be a huge change in the retail industry in the United States. The US retail industry will transform into a new retail industry with high e-commerce penetration, short delivery time, and high "stickiness". Morgan Chase even predicts that this year Amazon's total

commodity transactions (GROSSMERCADISE VOLUME (GMV) will increase by 11.6 % year -on -year to \$ 477 billion.

This growth prediction of JP Morgan Chase shows the confidence of Wall Street stock market analysts for e-commerce toughness. Although e-commerce companies such as Amazon had a great prosperity during the epidemic, they did experience a difficult year last year.

In the analysis of Amazon's report, Anmeus and Smallhrak said: "It may be affected by macro pressure, physical retailers, and transformation of overall channel retail after the epidemic. Since the first time, the growth rate is more than 10 % for the first time, only 8.5 % year -on -year. "

This year, Amazon's GMV continues to grow, mainly because of its grocery and clothing. The product category with insufficient market penetration rate has achieved a very steady growth, and its rapid delivery services are increasingly the highlights of the industry. Amazon is also expected to realize the fastest delivery service ever this year.

In addition, Morgan Chase also predicts that by the end of this year, Amazon will have about 300 million Prime members worldwide. In 2021, Amazon had more than 200 million Prime members worldwide. In other words, the increase in this just two years is indeed eye-catching.

In addition to huge members, Amazon also has huge control in the e-commerce market. Morgan Chase analysts predict that by the end of this year, the company's e-commerce market share will reach 42.2 %, a year -on -year increase of 106 basis points.

38 analysts in Tipranks are quite optimistic about Amazon. Among them, 37 were rated to "buy" Amazon's shares, and one of them gave "holding" rating, and the average target price of the first -year period was \$ 139.80.

NATO Secretary -General Stoltenberg said that Wagner hired the mercenaries for the weekend [Bingchang](#). It shows that Russia has made serious strategic mistakes in the war in Ukraine.

Reuters reported that Stoltenberg said on Monday (June 26) to reporters when visiting the capital of Lithuania, "The incident on the weekend was Russia's internal affairs, and once again showed that President Putin illegally annexed Crimea's major strategic mistakes against Ukraine's war. "

Prygo went north to Moscow to advance to Moscow on Saturday (24th). However, the dramatic turning point appeared that night. Under the mediation of President Loshenkosko, Prygo agreed to stop the army Moscow and exile in exile. As a exchange, Perigor Ren and Wagner Group soldiers were guaranteed to be safe.

Stoltenberg said NATO is monitoring the situation of Beres and condemned Moscow to announce the deployment of nuclear weapons there. "We did not

see any signs show that Russia is ready to use nuclear weapons, but NATO will be vigilant." He also said that NATO's deterrence is enough to protect the safety of the people in a "more dangerous world". Stoltenberg guarantees the continuous support of NATO to Ukraine at the same time.

Germany is preparing to permanently deploy a army brigade of about 4,000 people in Lithuania to cooperate with NATO's plans to strengthen the East Wing defense after the invasion of Ukraine in Russia.

Reuters reported that German Defense Minister Pistoris told reporters when he visited Lithuania's capital Vilnius on Monday (June 26): "As a NATO member country and the largest economy in Europe, Germany adheres to commitments and defend the East Wing. "

Pistoris did not give the garrison's specific time, but it shows that the prerequisite of the garrison is that the necessary infrastructure must be in place. Germany once said that Lithuania takes several years to build the military camps, family housing areas, warehouses and enough training venues required by the garrison.

Pistoris emphasized that such deployments cannot be completed within a few months, and they must cooperate with NATO plans.

Lithuanian President Sata said that his goal was to be in place in 2026 at the latest.

Russian Mercenary Organization Wagner Group's head of Perigo Ren ended [Bingchang](#) Later, the first speech stated that Wagner marched to Moscow to rescue himself, and at the same time protested against the invalid ways of the Ukrainian war, not to overthrow the Russian leadership.

Porigon released a 11 -minute audio through the Telegram application on Monday (June 26). It will no longer exist.

He also said that the Wagner troops decided to end the mutiny and turn around and return to the camp to avoid letting Russian soldiers bleed.

Wagner launched a mutiny last Friday (23rd). After mediation by President White Ros, Poriger agreed on Saturday (24th) to stop waving the army Moscow and exile in Bairo.

However, Pryigo's whereabouts were unknown after evacuating the Russov Russian army headquarters on Saturday. He did not explain where he was in the latest audio.

Japan plans to assist the Asian country to build a meteorological disaster warning system.

The Kyodo News Agency reported on Monday (June 26) that the Ministry of Environment of Japan plans to support the construction of a "early warning system" that use satellite data and other meteorological disasters in the Asia - Pacific region, and will be extended to more than half of the countries that will be extended to Asian in 2025.

Global warming has caused abnormal weather risks such as heavy rain and heat waves to become increasingly severe, which can help developing countries with weak response to reduce losses.

The Japanese government plans to allow Japanese companies to participate in the project and establish a consultation meeting of government -civilian cooperation consultations participating in about 50 companies including

meteorological forecasting services and property insurance to investigate and establish a business model for local needs.

The early warning system will use satellite and other meteorological disasters to ensure the safety of regional residents and reduce industrial losses.
