In a speech in the European Parliament, Shawrtz said that with the

improvement of the status of Africa, Asia, and South American economies, the world order of the 21st century will be "multi -pole" rather than "poles or tritinal".

(Voice of Germany Chinese) German Federal Prime Minister Shulz on Tuesday (May 9) called for more global cooperation under equal conditions in the European Parliament in Strasbourg, instead of trying to turn the European Union into a good The third "world power" in the United States and China.

He said: "Those who still miss European strong dreams and serve the fantasy of power are still in the past time."

Schäuble said that with the improvement of the status of Africa, Asia, and South America, the world order of the 21st century will be "multi -pole", not "two poles or """.

Federal MP: "Chinese characters are complicated"

The German News Agency pointed out that this expression of Shulz is in sharp contrast to the positions of other EU leaders. French President Recently, Europe has called for international forces that are in hand with the United States and China.

In his speech, Shulz called for the EU's geopolitical positioning to negotiate with new free trade agreements and partnerships under equal conditions.

He said that the new partnership established by Europe and Asia -Africa and Latin American countries should "abandon the European -centric view of the past decades", solve the problem of food security, eliminate poverty, and protect the climate and environment.

Shulz believes that the Southern Common Markets formed by Argentina, Brazil and other countries, Mexico, India, Indonesia, Australia, and Kenya should all be called partnerships to sign a free trade agreement with Europe.

He emphasized: "Europe must invest in the world."

When it comes to the relationship between the European Union and China, Shulz said that despite the changes in the relationship between the two parties, he still regards Beijing as a partner. He said: "The relationship between us and China can use 'Come and describe. But it is obvious that China is now increasing as a competitor and a systemic opponent. "

Shulz also said that he supports the European Union Chairman Feng Delin's previous EU will not be decoupled with China, but it should be Essence

To prevent potential crisis EU formulating plans to promote the diversification of rare earth supply chain

Shulz also mentioned that "the United States is still the most important ally in Europe." In his speech, he also talked about the needs of the EU's internal reform, including the reform that the EU must make in order to accept more countries to join the European Union. The EU currently has a total of 27 member states.

Salz called on Europeans not to be scared by Putin's "power show". He warned Russian President Putin that in the future, "what is not immersed in the glory of nationalism and desires the power of the empire." He said history will not defeat the future.

He appealed to European councilors: "Let us unswervingly support Ukraine - as long as it has this need." The Ukraine is currently paying the price of life for its mad behaviors.

When talking about issues related to immigrants, Shulz called for an agreement to reach an agreement on the European asylum system as soon as possible to provide better opportunities for normal immigrants while protecting the external boundaries.

On May 9, 2023, the surveillance camera can be seen in front of the office building where the official Capvision Information Technology Company is located. Reuters picture The Chinese intelligence department is setting off a anti -spy movement against domestic consulting companies. The national security agency in Suzhou surveyed Kaisheng Rongying's local branch.

Chinese revised "Anti -Spy Law" Bain's search attracted the attention of the United States *

According to the FX168 Finance Newspaper quoted Chinese official media reports, China launched an anti -spy operation on the illegal behavior of the consulting company and accused Kaisheng Rongying, which provided professional consulting and research services to facilitate the leakage of national secrets. On Monday (8th), Jiangsu Provincial Television reported that Suzhou's national security agencies visited Kaisheng Rongying's local branches and asked the company's employees. It is said that the joint law enforcement operations were uniformly deployed by relevant national departments and were carried out simultaneously in Shanghai, Beijing, Suzhou, Shenzhen and other places.

Beijing independent commentators said in an interview with this station on Tuesday that the authorities' move was to warn the West to intimidate the West: "One is to intimidate the people and the other is to wake the West. Bar up with the West. "

Official media report quoted a police officer that some companies frequently contacted the staff of government agencies and the national defense department to obtain sensitive data illegally and hired the industry consultation experts with high compensation to illegally obtain various sensitive data in China. National security constitutes a major risk.

Although official media did not explain which country the "overseas intelligence agency" refers to, some comments believe that it mainly refers to the United States. Zhang Shengqi, who lives in the United States, said in an interview with this station on Tuesday that according to his years of experience in Beijing for many years, the probability of leakage incidents occurred in the system. Most of those who mastered the secrets were retirees of military -civilian enterprises. He said: "In the system, there are enterprises with scientific and technological and military industry, and many of the technologies sold are military -to -civilians. They sell these technologies to make money. Many people with cooperative relationships with Chinese military companies. They are trying to find outside Buyer. "

Zhang Shengqi said that these buyers sell manufacturing technology to foreign countries based on Myanmar, Cambodia, Iran and other countries: "When I was in Beijing, I saw these old cadres looking for buyers, saying that these technologies were stolen from the United States. Decrypting, military

transfer. Let's look at those countries in the world to buy these technologies and products. These technical products were originally stolen from the West. He sold it to countries that are more backward than China."

China's newly revised Anti -Spy Law will take effect on July 1st, and commented that this has made China's diplomacy and business relations with the West moreolate. Zhang Shengqi believes that this is mainly to conduct patriotic education for domestic people, not overseas, but objectively weaken China's business environment.

** The new version of "Anti -Spy Law" will deter the West before taking effect on July 1

In addition, CCTV reported that the police officer of the Shanghai National Security Bureau said: "Kaisheng Rongying Information Technology Co., Ltd. has more than 1,000 customers, spreading abroad." It also said that "from 2017 to 2020, Kaisheng Rongying accepted hundreds of overseas abroad. The company remitted more than 2,000 times, with an amount of more than 70 million US dollars. "

Capvision Information Technology Company (screenshot screenshot of the Reuters/CCTV) Ma Ju, a senior current affairs commentator, believes that the Chinese security department has recently launched investigations such as the United States, Japan and other Western countries in Beijing, Shanghai, and Shanghai. Affects the safety considerations of major consortia in China. He said: "These consulting companies have branches in all countries in the world, and there are no problems in China for so many years. Suddenly there is a problem now. I believe that everyone who knows the Chinese system is

very clear. There are so many bones at this section. There is a problem with the company. "

Kaisheng Rongying Monday(May 8th)In the evening, a statement was issued on its WeChat account that the company would resolutely adhere to national security policy and take the lead in guiding the healthy development of the industry.

According to the data, Kaisheng Rongying was established in 2008. It is China's leading industry expert knowledge service provider, expert networks and customer groups all over the world. According to the information of Fhstrisana, according to income, in 2020, Kaisheng Rongying is China's largest industry expert knowledge service provider.

Qin Gang's meeting with Bernus was the official meeting of the highest level

of the United States and China after the Indonesian harassment meeting last year.

(Voice of German in Chinese) China Foreign Minister On Monday (May 8), it was said that stabilizing Sino -US relations after a series of "wrong words and deeds" made Sino -US relations "re -meet the ice".

According to the Chinese Ministry of Foreign Affairs, Qin and the United States Ambassador to China in China specially emphasized that Washington must correct the handling of Taiwan issues when meeting with Nicholasburns, and "stop continuing to hollow out the" one China principle "to stop supporting the" Taiwan independence independence. " "Split forces".

When asked about Qin's remarks, the US State Department spokesman Vedant Patel said Bernes had privately expressed the United States' policy to China, especially "Washington officially acknowledged Beijing, not Taipei.

Patt said at a routine press conference that Bernus talked about the fields of cooperation between the two countries, including climate change, global health and food security. He also said that U.S. Secretary of State Brillin still wants to visit China, "it will plan and work hard under the condition of conditions permit."

He said: "We hope and intend to keep the communication channels unobstructed ... Continue to stand with our friends and allies in the Indo - Pacific region to promote our common prosperity, security and values."

Patt also emphasized: "We don't intend to change the status quo -this is not a way to adopt the United States."

Last year, the then President of the House of Representatives of the United States The relationship between the two largest economies of China and the United States fell to the lowest point. In response, Beijing cut off part of the interaction with the United States, including the formal communication channels between the two army.

The Chinese Ministry of Foreign Affairs said after the Qin Gang and Bernus meeting that the priority was to stabilize Sino -US relations and avoid "spiral decline" to prevent any accidents on both sides. The relationship goes out of the predicament and return to the right track. "

The outside world regards whether the US Secretary of State can visit China smoothly as the temperature indicator of the relationship between China and the United States.

Sino -US relations are unstable

Last November, And promised to have a more frequent dialogue, which eased the tension between the two sides.

But in February this year, China " "Ast time appeared in the United States, the relationship between the two countries returned to the tightness, and US Secretary of State Brillings canceled the Beijing visit to respond.

This is also Qin Gang's so -called and since he worshiped. "A series of wrong words and deeds in the United States have destroyed the positive momentum of the hardships of Sino -US relations ... " ,"

The US ambassador to China, Burns, mentioned the necessity of Sino -US stability relations on Twitter. He said: "We discussed the challenges faced by US -China relations, the necessity of stable relationships and expanding high -level communication."

Qin Gang's meeting with Bernus was the meeting between the highest -level officials in the United States and China after the Indonesian habit last year.

Beijing Nikko International Trade Center Logistics Bills on the China and Russia flags Agencence France -Presse According to Chinese customs data, in the first four months of this year, China 's trade with Russia increased by more than 40 % year -on -year, and the import and export of the“ Belt and Road ”countries also increased, but exports to the United States have significantly fell.

*** * China and Russian trade rose and Ukraine sharply** According to the Hong Kong 01 report, the China Customs General Administration released statistics on May 9 showing that from January to April this year, China-Russia trade volume increased by 41.3%year-on-year to \$ 73.148 billion. Among them, China exported US \$ 33.686 billion in Russia, an increase of 67.2%; China imported 39.462 billion US dollars from Russia, an increase of 24.8%.

** Russia's battle has been sanctioned by Western sanctions in China.

Nobel, an associate researcher at the Taiwan Institute of Defense Security, was interviewed by Radio Free Asia that Russia's invasion of Ukraine was embarked down and sanctioned by Western countries. Many things in Russia wanted to buy with China. China became the biggest beneficiary. "White gloves".

The China Customs General Administration also pointed out that China import and export 461 trillion yuan in imports and exports to countries along the "Belt and Road", an increase of 16%year -on -year. Among them, the five Central Asian countries such as Kazakhstan, and the import and export of Western Asia and North Africa countries such as Saudi Arabia increased by 37.4%and 9.6%, respectively.

Shi Jianyu pointed out that how much the number of numbers released in China cannot be confirmed. Many countries have not announced data in March and April. If the authenticity is to be proved, it is correct to compare it.

Shi Jianyu said that the significant increase in the amount of imports and exports in China and Russia was the reason for the increase in the number of "Belt and Road" countries. The data released by China are particularly highlighting the improvement of import and export trade with countries along the "Belt and Road", which has the purpose of propaganda.

China emphasizes that the import and export of import and export of the "Belt and Road" countries: Publicity role

Shi Jianyu said: "It mainly expresses it. Although Western countries, the United States, Japan, and South Korea sanction high -tech and embargo have little impact on China, because China has in the 'Belt and Road' and other countries such as Asia, Africa Europe, and other countries. The amount of import and export is also very large. It does not need to rely on the United States, Japan, and Europe to maintain its ability to import and export. (Chinese data) is mainly used for publicity, which is very obvious. "

Shi Jianyu mentioned that for more than a year after the Russian and Ukraine War, Russia announced that the national GDP has not fallen too much, indicating that Western sanctions are invalid, and it is normal to decline during the epidemic. Some people want to replace those countries that were originally imported and exported to Russia, then China is of course equal to replacing their roles. Therefore, there are many imports and exports to Russia and Eurasia. Volkswagen products, consumption luxury goods, high -tech industries, etc.

Shi Jianyu said that the rebound after the unblocking of China was not surprising. With the development of the Russian and Ukraine War, what would change and whether it could continue to grow is the focus of observation. As for the decline caused by decoupling, it is foreseeable whether China wants to work hard for a few years.

According to Chinese customs data, China's imports and exports to ASEAN were 2.09 trillion yuan, an increase of 13.9% year -on -year, accounting for 15.7% of China's total foreign trade. In the first four months of China, exports to the United States fell 14.3% year -on -year and imports fell 2%. According to data, Reuters has a trade surplus of US \$ 98.58 billion in the first four months of the United States.

Scholars: The increase in China's export is the order of the rushing outbound epidemic control order

Taiwan's Cross -Strait Policy Association researcher Wu Sezhi was interviewed and analyzed by Radio Free Asia. China's exports this year will inevitably grow much compared to last year, mainly because of the seal control measures in the past two years, which has caused many factories to stop production and stop work. Many Chinese companies are completing and digesting for international orders in the past.

Wu Si Zhi said: "On the other hand, many foreign companies look at the changes in the Chinese market, and the export of related production machines and funds from China will also drive China's export growth. By the end of the year and next year, whether the growth trend of this export can be maintained, it can be maintained, and it can be maintained. As a whole, whether the foreign trade relations can restore the past stable growth trend in the past. "

The United States prohibits exports of key components in China, Taiwan's import and export to China will also decline

Wu Sizhi mentioned that the demand for processing and industrial upgrading will drive the connection of import and export. Many key components and machine tools in China need to be imported from foreign countries. In the past two or three years, the United States has continuously blocked China on technology and has prohibited from exporting to China in the semiconductor industry, especially high -end chips. Technical restrictions, and many countries such as the United States, have doubts about Chinese stealing technical stealing in China, leading to a decline in China's imports.Wu Sezhi mentioned that China also showed a similar situation in attracting imports. The restrictions on related industries in China have led to a significant decline in China's imports, and the decline in April is nearly 8%. Whether the decline will continue to expand, it will be very related to the situation of China's internal economic development.

Wu Sizhi emphasized that the internal economic development of Chinese countries has not moved in the direction of industrial upgrading or is limited to a certain degree, and the demand for imports will decline. Furthermore, many foreign companies have lost confidence in China's operating market, and the external movement of foreign companies will also affect the overall needs of China's import.

Jiangsu Listening: I hope that the disassembly of the wall can help the Chinese people receive free information. Hope to increase communication satellites and medium short waves. Many people still use radio to listen now. I hope the whole world will be united to help the wall. There are still many people using smart speakers. Smart speakers must be identified and face recognition to make nine calls a day, so I feel very uncomfortable. If you do not pass your identity and face recognition, you can only call a few times a day, which is serious and very inconvenient.

Intersection Listening to friends: China has introduced new policies, "retreating to forests and farming", "digital RMB" and "agricultural management team" and so on. "Returning to the forest and returning to plow" reminds people of the previous "big steel refining and steel", and took the cooking pot to refining steel, and finally a bad tail. "Returning to forests to plow" may be because of fear of shortage of food. It may be that China is now tense with many countries. I am afraid that I can't buy food. "Digital Renminbi" is to monitor the people, and the other is the state treasury empty, and the money to hide the corrupt officials at home must be forced. But corrupt officials have heard the wind, and they have begun to turn the money to Hong Kong first, and then transfer to foreign countries. The "agricultural management team" is the same as "urban management", and farmers will suffer. This will force farmers to rebel. The ability of Chinese leaders to govern the country is very problematic. The people suffer in it.

Intersection Listening to friends: Regarding the Russian and Ukraine War, Chinese netizens were controversial. In fact, many military people, and those who have studied in Ukraine, think that China should stand on the side of Ukraine. Because Ukraine has important assistance in Chinese military technology.

The contract between Messi and Paris St. Jendan (PSG) will expire in June. According to an anonymous source who is familiar with the content of the contract, Messi will have the former Real Madrid striker "C Ronaldo" Rona Rona Cristiano Ronaldo turned to the Saudi Professional Football League, and said that the matter was "a foregone conclusion."

However, Jorge MESSI said that his son would only make a decision to the future at the end of the season.

Messi's father wrote on the community media Instagram: "Never reach any agreement with any team next year."

"Before Messi and Paris St. Jendan end the league, they will not make a decision. Once the season is over, it will analyze and see the situation, and then make a decision."

35 -year -old Messi is the Saudi Ambassador of Saudi, and is expected to leave St. Jendan, Paris after the end of the season. He did not agree to the Saudi country last week and was suspended for two weeks by the Paris St. Jendan owned by Cada for two weeks.

Lao Messi said: "There will always be rumors. Many rumors use Messi's name to increase their infamous names, but there is only one in fact. We can assure you that Messi has not reached an agreement with anyone. There is no signing, and there is no agreement, so I have to talk about it after the season. "

Cristiano Ronaldo's Al Nassr who joined the Saudi Professional League in January this year, signed a approximately about 2025, is said to exceed 400 million euros (about NT \$ 13.5 billion).

Messi joined St. Jendan in Paris in 2021, but after the team was eliminated in the Champions League 16 consecutive season, the supporters were dissatisfied with his performance.

The 7th Golden Globe winner led Argentina to win the World Cup in Cada last December, which is the highest glory of Messi's career.

Expert: Female breast X -ray photography screening should be done from the age of 40

Publisher: 法新社

Modified Time: 2023-05-10T06:50:04+00:00

Description: (Agence France -Presse, Washington, 9th) The U.S. influential health institution "American Prevention Working Group" announced today that women should receive breast cancer breasts X -ray photography from the age of 40 instead of 50 years old. The life of thousands of people.

Videos: []

Images: ["[000000.png](#)"]

According to official data, breast cancer is the second largest common cancer in the United States and the second cause of women in women. It takes about 4,200 women and 500 men's lives each year. African -American mortality rate is 40%higher than white women.

The "U.S. The Preventive Services Taskforce", which is appointed by the US Department of Health and Public Services and consisting of the independent expert group. The policy can save 19%of life.

The working group said through a statement: "After mastering the latest and wider scientific information of breast cancer under the age of 50, we have

expanded our previous suggestions and encouraged all women to be screened every other year from the age of 40."

Based on evidence, the latest suggestion of the US prevention working group is classified into a "B -class" with a higher level.

Wanda Nicholson, vice chairman of the work team, said: "Ensuring African women from the age of 40 is an important step, which is not enough to improve the medical inequality we face in breast cancer."

This proposed proposal is suitable for women who have "general risks" in breast cancer, including people with family history or other risk factors such as family history or dense breasts; about half of women have tight breasts.

There are four objects that are not applicable: those with a history of breast cancer, those who are at high risk due to specific gene markers, have received high -dose radiation therapy from a very young age, or those who have found high risk lesions in sliced examinations.

The working group stated that as for the pros and cons of people over the age of 75, there has been uncertainty.

As for women with dense breasts, whether it is necessary to accept additional ultrasonic or MRI examinations, and as a reinforcement measures that have poor effects on them as breast X -ray photography, the working group pointed out that more research is required in this regard.

Breast cancer tumors can be removed through surgery as early as possible without removing the entire breast.

The Jewish Hall of Jewish Island is the oldest Jewish Hall in Africa. Each year attract hundreds of Jews from Europe and Israel to come to pilgrimage.

Tunisia's Ministry of the Interior also said four other tourists and five security personnel were injured in shooting.

The Tunisian Ministry of Foreign Affairs confirmed in a statement that two of the two dynasties were Tunisian and 42 -year -old French, but their names were not disclosed.

Tunisia's Ministry of the Interior pointed out that the murderer first shot a colleague and took the bullets, and then went to the Jewish Hall. There were hundreds of people at the scene participating in the annual pilgrimage. At that

time, the event was close to the end. Tunisia's Ministry of the Interior did not call the case a terrorist attack, but only stated that "the investigation is still continuing to find out the motivation to find out such cowardly attacks."

Canada Prime Minister Trudeau's latest speech did not show weakness to Beijing (information photos).

(Voice of Germany Chinese) Canadian Prime Minister Justin Trudeau said on the 9th that it will not be "frightened" by China's countermeasures and the decision to expel Chinese diplomats. Tattoo is opposite. Earlier, a Chinese diplomat was accused of trying to intimidate the Canadian Conservative Congress, Zhuang Wenhao, and his relatives in Hong Kong. As a result, Canada announced that it was expelled from the Chinese diplomat and Beijing immediately made countermeasures.

Trudeau said, "We know that there will be revenge, but we will not be scared. We will continue to take all necessary measures to protect Canadians from foreign interference." He emphasized that Canada will issue a clear signal, indicating that it should be expressed that it should be the case, indicating that the signal should be issued, indicating that it should indicate that it should indicate that it should be expressed that it should indicate that the signal should be expressed. The country will not accept foreign interference. "No matter what they (Beijing) make a choice next, we will not be scared."

On the same day, the Chinese Ministry of Foreign Affairs was asked about the incident at a regular press conference. A spokesman Wang Wenbin said that China is "completely legitimate and necessary." He responded that "China interference in Canada's internal affairs" is completely nonsense. "It emphasized that China never interfered with other domestic politics and

warned Canada that if "provocative" is not stopped, "China will resolutely fight back."

The Chinese Ministry of Foreign Affairs announced on Tuesday (May 9) that the Canadian Consular Consular Zhen Yihui was listed as a "unpopular person" and asked her to leave China before May 13.

Canadian Foreign Minister Joli said at a meeting of the Congress on the 5th that Canada was considering driving Chinese diplomats in addition to calling the Chinese ambassador. Four days later, she announced the deportation.

Canada announced in a statement that Zhao Wei was "unpopular". He was accused of trying to intimidate Michaelchong and Zhuang's relatives in Hong Kong, because Zhuang Wenhao has always criticized Beijing's Xinjiang Victoria policy in February 2012, and puts forward the behavior of Beijing in February 2012, calling Beijing's behavior "Race extinction".

"We will not tolerate foreign countries in any form of interference in our internal affairs." And said, "Diplomats in Canada have been warned that if they are engaged in this type of behavior, they will be sent back to China."

Zhuang Wenhao said that it should have been dealt with this way. He said, "I hope this not only shows to the People's Republic of China, but also shows to

other autocratic countries in Canada. The threat activity is completely unacceptable."

The Chinese Embassy subsequently issued a statement, accusing Canada of violating international law, "catering to the hype of anti-China forces", and said that this move destroyed Sino-Canadian relations.

The Canadian government spent a lot of time to decide whether to expel Chinese diplomats. Julie and Prime Minister Justin Trudeau had warned Beijing that there would be a rebound in this.

Trudeau, who participated in the coronation ceremony of King Charles in the UK, said in London on the 7th: "This is a serious and important issue ... This is an unspeakable decision. The Foreign Minister is dealing with this problem very, very cautiously."

Event source

The Canadian Global Post recently reported that the US Think Tank Strategy and International Research Center (CSIS) in 2021 showed a news that the Chinese government is studying how to intimidate Zhuang Wenhao. After the report was exposed, the Canadian government confirmed that it was expelled from Zhao Wei. Zhuang Wenhao also criticized the Canadian government to see Beijing's intervention in domestic affairs.

Juli said last week that expulsion may cause Beijing revenge, threatening the security of Canadians and the prosperity of the country, but it should be done.

She wrote: "This decision was made after carefully considering all relevant factors ... We still firmly believe that defending our democracy is the most important."

Reuters reported that Zhuang Wenhao's incident was the latest attempt for the Chinese government to interfere in the Canadian internal affairs in recent years. Previously, Beijing also tried to interfere with the Federal elections in Canada's 2019 and 2021. Responsible for investigation, including whether to conduct public investigations.

China has previously insisted that it does not interfere with the internal affairs of other countries, but it said it will respond to the so -called provocative behavior.

On May 9, German Foreign Minister Belbak and Chinese Foreign Minister Qin Gang held talks in Berlin.

(Voice of Germany Chinese) The two communicated on the Ukrainian issue. China warns that if Chinese companies have been sanctioned by the European Union for business in Russia, Beijing will take "necessary measures" to safeguard legitimate rights and interests; Germany stated that maintaining "neutrality" in Russia and Ukraine's conflict, that is, standing on the side of Russia.

Since Russia's invasion of Ukraine, China has continued to maintain close economic and trade exchanges with Russia. The European Union believes that this will weaken its sanctions against Russia. On Wednesday (10th), EU member states will hold a meeting to discuss the 11th round of sanctions on Russia, Essence

Agence France -Presse pointed out that although the European Union did not specify its so -called "third country", EU officials had put forward concerns about some transactions flowing to Russia through China and Iran in the past period of time.

The German Press reported that the European Commission Chairman Ursula Von Derleyn visited Kiev on the 9th that she noticed that some "unusual trade flows" are growing. "If we see that the goods flow from the European Union to the third country, Then finally enter Russia, we can propose sanctions on these goods to the member states. "

A document checked by Agence France -Presse states that the European EU administration will be at the discussion on the 10th, [] Because these companies are suspected to sell these technologies to Russia.

Due to Foreign Minister

On the 9th, Belbak stated at the joint press conference with Qin Gang that the EU hoped to ensure that the existing sanctions on Russia would not be "subverted in a roundabout", but she refused to disclose any that may be able to start China to China. Specific sanctions.

Belbak said that countries should be committed to avoiding the Russian arms dealers obtaining goods related to war. "We hope that all countries, including China, use the country's influence on its company to achieve this purpose." And emphasized that this sanction is a specific company that provides key components to Russian arms dealers, not the country.

After the talks of Germany and Foreign Minister, a joint press conference was held together.

However, Qin Gang warned the European Union to punish Chinese companies because of Russia. "China resolutely oppose (other party) based on its own law to engage in long -arm jurisdiction and unilateral sanctions on other countries," he said. If the EU takes action to sanction Chinese enterprises, China "will take necessary measures to resolutely safeguard the legitimate rights and interests of Chinese enterprises." Essence

Qin Gang emphasized that China did not sell weapons to the "Ukrainian crisis", and all exchanges were "handling the export of military and civilian uses carefully in accordance with laws and regulations". Chinese enterprises and Russian transactions belong to "normal communication and cooperation" and should not be subject to being subject to Influence.

"The Ukrainian issue is highly complicated. Simplification and emotionalization are not solutions," Qin Gang said at a joint press conference. "Only by maintaining calmness and creating conditions for political solutions is the way out." And called on Germany to "play a leading role." Programs are proposed to build a "balanced" European security framework.

but Essence She said: "" Neutral "means standing on the side of the invaders." Since the Russian and Ukraine War, Beijing has not accused Russia on this matter and depicts himself in the middle cubic cubic cube; last

month, Chinese President Xi Jinping also talked to the President of Ukraine, and said that he would send a special envoy to visit Wu.

The role of China played in the Russian and Ukraine War

Qin Gang: German -China Relations should be "de -risk"

According to the press release of the Ministry of Foreign Affairs of China, Qin Gang said at a joint press conference on the 9th that the relationship between Germany and the European Union and the European Union should be "risky". Before action, you should first think about "what is risk and where is the risk" Essence Qin Gang warned that if Germany and China "cut off chain", it will cause a serious spillover effect and will seriously affect the German economy. "These are the real risks that need to be paid attention to!"

Earlier, German Chancellor Olafscholz talked in a speech at the European Parliament that "competition with China will definitely increase, but he also supports the position of the European Commission's chairman Feng Delin, that is, Europe needs to from China to China. There are "clever reducing risks" instead of following the urging of the United States and taking a tough route for China.

In addition to the Ukraine crisis, the statement issued by the Chinese Ministry of Foreign Affairs also mentioned Taiwan. The statement says, "Taiwan's return to China is an integral part of the international order after World War II. Any party that sincerely hope that the Taiwan Strait is peaceful and stable, and the party that is truly committed to maintaining international order should effectively adhere to the principles of the first China and resolutely oppose all the" Taiwan independence "acts. ","

This is the second meeting of Director Germany and Foreign Minister in one month. Last month in Beijing, Belbak said at a joint press conference after Qin Gang that Germany was still committed to the "one -China policy", but she was also worried about the situation in the Taiwan Strait. And the "military confrontation upgrade" on both sides of the Taiwan Strait will be a "terrible scene" for the entire world.

Berlin and Beijing have recently tight relations.

Essence The outside world speculates that this is related to the visiting Minister of Education, which belongs to the party.

At the meeting, Qin Gang also told Belbak that Lindner's temporary notice of visiting China was canceled due to the change of the "emergency schedule"

of the Chinese Minister of Finance Liu Kun and said that the incident "should not be explained too much." He added that Beijing still welcomes Lindner to visit as soon as possible.

(webpage Screenshot) Current affairs commentators Bi Xin said in an interview with this station that after the end of China's epidemic, the market environment has not improved, and corporate talents have weakened. Related industries must re-adjust their business: "The market must have a new shuffle again. The economic model may not be suitable for the model before the epidemic. Because Lin Ying is a talent output and input platform, the current model of talent flow has been disrupted. As many foreign

companies withdraw from China, it is because of China's domestic demand market. Weak, so he will give up China. "

The Lingying workplace platform mainly helps users to connect professional opportunities and assist employers to find ideal candidates. Chinese experts said that Lingying, as a foreigner and pioneer of the social workplace in the Chinese Internet market, encountered "not acceptable to soil and water" in the Chinese market, and at the same time received strong pursuit and fierce competition from Chinese workplace social platforms such as pulse and nailing.

Lingying closed China's remaining business related to the business environment

Guo Baosheng, a senior commentator, also believes that Lingying's closure of China's business is related to the economic environment. He said: "It shows that the Chinese market is downturn, and the companies in Lingying and other companies in the best global benefits were once China. Now the evacuation indicates that China's economy is shrinking. I have to withdraw from China. The leading Yingying is mainly the economic reasons evacuated."

In 2016, Microsoft acquired the Lingying business at a price of about \$ 26 billion. In 2021, LinkedIn's reason for the "challenging" of the business environment decided to withdraw most of the businesses from China, including the leading company that closed the social network function in China, and announced this week that it would shut down the remaining Chinese business.

Officials in some parts of China planted soil planting crops on the bridge, saying that "retreat to the field." Weibo/Guting provides The Chinese government's "retreating forest and returning farming" policy to eliminate a

large number of non -grain crops was accused by farmers. Recently, some netizens have disclosed that local officials are ingenious and demanded that villages to flatten villages and villages to restore farmland, and they are called "retreat to return fields." This was bombarded by netizens again.

**** **China's "stabilization of food" for "special operations" special operations "agricultural management team" law enforcement to provoke complaints** From the 20 years ago, the "returning farmland to the forest" turned the farmland into a forest, and the current "retreating forest and returning farming" fell to the forest to change the grain crops. On Tuesday (9th), there was a post of Weibo. The Tongcun Tong Group Highway was facing the "big surgery" immediately. Yesterday (8th) a township cadre came to work. Before returning farmland, it is about to engage in "retreat to the field" again. The posts wrote that we were all surprised, "retreating to the field" and "how can a new word emerging.

In an interview with Radio Asian Radio, a Farmer of Huanggang, Hubei Huanggang, said that decades ago, the local government opened the road between the farmland between the village and the village according to the instructions of the superior government to "cultivate the road" to facilitate the transportation of agricultural and sideline products to Cities, but now they say that these roads belong to basic farmland and have to restore farmland. He said: "This is really a blind, and the people are miserable. Around 2000, some places implement central policies. I know many local villages and villages to pass the highway, so they can make the original narrow mud roads. It is very wide and can be opened to traffic. This is a good thing. The common people are transporting production materials. Later, the lives of ordinary people have gradually improved. You said that the road has been dug again now, it is crazy. "

Weibo netizens complained that local cadres were ingenious, and they were accused by netizens who were "retreating and returning to the field".(Weibo/Guting provided) **The road to occupying basic farmland must be restored to cultivated land**

The netizen "Anji's Little Nine" posted quoted rural cadres that according to the above regulations, when the original construction of the Tongcun Tong Group Highway, the basic farmland was occupied, and the approval procedures were not completed. How many farmland will be restored. The villagers said that the highway occupation of the basic farmland in the construction of the Tongcun Tong Group should go through the approval procedures? Cadres say that there are very few approval procedures, especially in the general road entry roads, there are no approval procedures or regulations. Nowadays, all roads that occupy basic farmland must be cut off the cement road.

Qi Dalin, a farmer in Hubei, said that the local officials do not think seriously, let alone whether they violate the interests of farmers: "They are all like this, what they say above, they all want to discuss the people of the above people. This. In the 1980s and the 1990s, it was said that there were more trees and more trees, all of which were blind. "

China News Agency reported on November 11 last year that data from the State Forestry and Grassland Bureau of China showed that China has completed a total of 213 million mu for the mission of returning farmland to

forests. It also stated that the Ministry of Natural Resources, the National Forestry and Grassage Bureau, the National Development and Reform Commission, the Ministry of Finance, and the Ministry of Agriculture and Rural Ministry jointly issued the "Notice", which clarified the relevant policies and work priorities of returning farmland to forests and returning forests. The "Notice" states that after the second round of returning farmland to forests, the cash subsidy period expired, the central government has arranged funds to extend the subsidy period. However, two months later, "returning farmland to forests" became "returning forests and returning farming." The "Central Document No. 1" announced in February this year also mentioned the consolidation of the achievements of returning farmland and returning forests, and implementing relevant subsidy policies.

Restore the Mao Zedong era with food as the outline

Anhui current affairs commentator Shen Liangqing said in an interview with this station: "In the history of the Communist Party of China, all kinds of blind tossing. From the land reform in the early 1950s, to the socialist transformation of national industrial and commercial capital in the middle of the 1950s, to the Great to the Great Leap Forward, Great Famine, and then to the Cultural Revolution. After the Cultural Revolution, reform and opening up have been implemented, and people have been experimenting with ordinary people as mice. Now facing the international environment is not good. In my own hand, I restored the Mao era to take food as the outline. "

Some netizens feel confused about the "retreat to the field" appearing in the countryside. It is believed that local officials are blindly implementing central policies. Jiangsu netizens "listen to the rain and watch the wind" and leave a message. They cut off a pomineon road in the first two months. Although it is not long, it is only about two hundred meters long and two meters wide. To cut off. It is also written that road construction occupies basic farmland, even if 10 cm is rectified.

China's influence in the Pacific island country is increasing, and Canberra has been seeking to establish its own defense capabilities in the region.

According to Reuters, from 2032 to 2033, Australian defense expenditure accounted for 0.2% of its GDP, higher than the budget growth trajectory so far.

According to a budget statement, the Australian government will invest more than 19 billion A \$ 19 billion in the next four years to implement the priority of national defense strategies established by the government last month -which will include A \$ 9 billion [] 2. A \$ 4.1 billion in Australian Australian Australian dollars, and Australia -US and Britain's three -sided security agreement.

Australian Defense Minister Richard Marles said that the mid -term growth of national defense expenditures is in line with the surrounding strategic situation.

"Cold War Thinking" in China

After signed a security cooperation agreement with the Solomon Islands located in the Pacific region last year, China has caused widespread concern in Australia and the United States, worrying that China 's influence in the region will increase daily. However, after the Pacific National Fiji Prime Minister Sitiveni Rabuka came to power last December, he promised to abolish his former Frank Bainimarama signed with China in 2011 [] Essence

The British "Guardian" reported that Labcca said that "our (Fiji and China) democratic system and judicial system are different." Those countries that are similar to our systems.

In this regard, China has accused Australia in an attempt to destroy the security and law enforcement cooperation with Beijing and Fiji, and It is also called Australia, the United States, and New Zealand that they are "targeting" their relationship with Fiji. Qian Bo, a special envoy of the Pacific Island country in China, said that the relationship between China and Fiji will not destroy or usurp the other relationships of Fiji. China has never targets the United States, Australia and New Zealand. Interference or influence of other prescriptions. "

Qian Bo said that China has explained to Fiji and other countries in the district. Since the United States, Australia and New Zealand have police cooperation in the region, similar cooperation between Zhongfei should be able to conduct similar cooperation. He criticized that these countries are increasing the geopolitical tension in the region and have "Cold War Thinking."

Fiji Prime Minister Labcca spoke at a press conference during the 2022 campaign

In this regard, the Chinese Embassy in Fiji issued a sharp statement, accusing other countries of trying to destroy the relationship between China. However, the statement did not indicate any specific country. The embassy

stated that "the cooperation between China and Fiji is open and transparent, and it should not be disturbed by any country, and it should not be disturbed by any country." It is hoped that the "relevant country" will abandon ideological prejudice, objectively and rationally treat the China -Fei law enforcement police cooperation, and " The actual actions contribute to Fiji and the Pacific island nation, rather than just concern and helping the island nations because of geopolitics. "

It is still unknown whether Fiji stopped with China's law enforcement cooperation. Pio Tikoduadua, the Minister of Home Affairs in Fiji last week, was asked about the incident last week that the agreement was still "review" and did not end.

Regarding the "Taiwan issue", the embassy called the "one China" principle as an international consensus. The previous government and the new government of Fiji have repeatedly reiterated this principle and hoped that the Fifth will continue to adhere to the policy with actual actions.

In March of this year, Fiji overturned the decision to reduce the status of Taiwan 's diplomatic ambassador in Fiji earlier, allowing the group to restore the name of the" Republic of China (Taiwan) "; in April, Labcca canceled A series of incidents made Beijing quite a fire with the meeting with Ma Chaoxu, the deputy minister of China.

The Fed announced last week that the 10th increase interest rates were announced last week. Decision officials said that in the future, the impact of this wave of interest rates will be considered in the future. It is generally believed that this wave of interest rate hikes may be close to the end.

However, Williams told the "Economic Club of New York": "We did not say to end interest rate hikes."

He admits that he raises interest rates to suppress inflation. "In the past year, it has achieved incredible progress." But also said: "I think we must be as usual, based on data (to make decisions)."

Williams also said that in his baseline forecast, he could not see "there is any reason for interest rate cuts this year", because it also needs to reduce the high inflation.

He said: "I estimate that we need to maintain a restricted policy position for a long time to ensure that we really reduce inflation."

In order to suppress inflation, the Fed will launch a strong interest rate hike since March last year. (Translator: Ji Jinling)

Since Cheng Lei was arrested by the Chinese authorities in August 2020, the outside world knew very little about the progress of the case.

(Voice of Germany Chinese) Cheng Lei, a Chinese reporter, has been arrested and detained in China for more than 1,000 days. Since being arrested by the Chinese authorities in August 2020 with the "leakage of national secrets", the court has been tried again once on March 31, 2022, and the trial results have been delayed again and again.

Chenglei's partner, former CEO of the Chinese Australian Chamber of Commerce Nick Coyle, said in a DW interview this week that However, in the past, Cheng Lei can regularly conduct a 30 -minute consular visibility with Australian diplomats every month. After China's related restrictions on the new crown epidemic, they are currently visible face -to -face.

"This is a positive development. Cheng Lei is facing the fact that she is being detained as much as possible in the best physical and mental state. For her, the most worrying and concern for her is to separate from her children." Ke Ke. "Ke Ke." Ke Ke. "Ke Il revealed: "I and her family can pass the message to her through Australian diplomats during the consul, and the diplomats will also transfer her letter to me or her family after visiting her."

Koil added that the first six months after Cheng Lei was arrested, because the police were detained by the police in the way of surveillance and residence, it was very torment for her during that period. But he believed that Cheng Lei showed huge courage and toughness in the process. Through the letter

transferred by Cheng Lei, Koil believed that Cheng Lei did not lose the sense of humor she had in the past.

The Chenglei case has not made progress. Australian Foreign Minister Pennywong (May 9) once again called on the Chinese government to reunite with her children, and reiterated that the Australian administration was worried about the continuous delay of the case. Some experts believe that the Australian government should continue to urge the Chinese government to maintain transparency in the Chenglei case, because her family cannot directly visit her, and the transparency will become the key question.

Danielagavshon, director of Australia, who observes human rights, told DW that human rights should be a key issue when the Australian government contacts the Chinese government. She said: "When a lawyer, family, or consular personnel can only contact the defendant detained by the Chinese government in a very limited way, a case like Cheng Lei will become very urgent."

Curier is sure After taking office, the government "has been actively dealing with the case of Chenglei." He said to DW: "Under the premise of trying to repair bilateral relations with the Australian government, they have continued to emphasize the importance of solving the case of becoming into a transformer case."

Non -disciplined and non -interest triggering "Cicada Effect"

Cheng Lei is not the only Australian citizen who has been arrested by the Chinese government for spy -related crimes in the past few years. Australian Chinese writer Yang Hengjun has been detained to this day after he was arrested at the Guangzhou Airport in January 2019. The Beijing Second Intermediate People's Court opened his trial of his "spy case" in May 2021, but has not yet obtained the final trial results.

It is generally believed that the cases of Cheng Lei and Yang Hengjun occurred in the context of the deterioration of relations between China and Australia, but some observers believe that it is difficult for the outside world to determine whether the two cases are Chinese government based on the limited news. The "hostage diplomacy" method of consistent use. Human Rights Observation Senior Chinese researcher Wang Yaqiu told DW: "Cheng Lei's case is still different from the cases of two Canadians. The two Canadians have been detained because China wants to retaliate against the Canadian government's arrest of Huawei Finance Meng Wanzhou, but

Although the big background of the Chenglei case has deteriorated in China and Australia, the outside world is still unclear for her specific reasons."

In 2018, Meng Wanzhou, the financial director of China, was arrested in Canada. Later, China arrested two Canadian citizens to pressure Canada in the "hostage diplomacy" model.

Cheng Lei's partner Koyer said that Cheng Lei was the first six months after his arrest, because the police were detained by the police in the way of surveillance and residence, it was very torment for her during that period.

However, Wang Yaqiu believes that the Chenglei case will definitely bring a chilling effect to foreigners living or working in China, because although Cheng Lei is not like the goal that the Chinese government will suppress in the past, after her arrest Too many news about her, this situation "will definitely produce a" cold cicada effect ". She said: "Cheng Lei's basic human rights were not satisfied, and she was still in the news that she had no news at all, so this shows that the Chinese government's persecution of human rights is more serious than before."

Koyer said to DW that he still puzzled the crime of the Chinese government's accusation of Cheng Lei. In his cognition, Chenglei could not have privileges to obtain the so -called confidential information. He said: "As a foreign journalist working on CGTN (China Global Television), she cannot contact those information. Cheng Lei is a enthusiastic Australian citizen, but in her journalist career, she has also promoted foreign countries Enterprises have

developed well in Chinese or Chinese companies in foreign countries. As a business journalist, she believes that she wants to tell positive stories related to economic communication. "

Koil also shouted to the Chinese government, calling on the Chinese government to make a reasonable judgment on the Chenglei case as soon as possible. He said, "I understand that there is a system and program in China, but I also want to confirm that all parties can try their best to solve the current situation facing Cheng Lei, let her go home as soon as possible to reunite with her children."

Tens of thousands of people gathered at the overbound point of the US - Mexico border, waiting for the US Code 42nd Volume 42 (Title 42 of the United States code) to the US border after the expiration of the 11th.

Thousands of people have entered the United States at present. They slipped from the gap between this richest country in the world and poor neighbors. The shelter application was expected to rise significantly.

El Paso, Brownsville, and Laredo in Texas are difficult to cope with hundreds of local immigrants who have reached the place and announced their

emergency. Most of these people come from Latin America, and there are some Chinese, Russians and Turks.

When asking the United States whether to prepare an immigrants in response to the increase, Biden told reporters: "It is yet to be observed, and it will fall into chaos for a while."

Volume 42 of the American Code was implemented during the administration of former President Trump. On the surface, it was necessary to prevent people infected with COVID-19 (2019 coronary virus disease) and entered the United States. But in fact, this is just to quickly expel people who try to immigrate to the United States.

Since the 12th, immigrants can submit an application for asylum again. Their application will be processed through the legal system. This procedure may take several years.

Biden's Republican opponent criticized the border policy of the senior Democratic Party, saying that such a policy is equivalent to the Great Kaifeng; according to prediction, more than 1 million people may arrive in the next 3 months, so Essence

Biden has ordered 1500 active soldiers to go to the border, and it is expected that they will assist the border patrol team to handle the shelter application.

As the presidential election will appear 18 months later, and immigration in the United States, which is easy to set off in the United States, it is often a problem that has emerged. Biden hopes to deploy the generals to the border by implementing new regulations to help slow down the crowd of flowing.

Greg Abbott, Governor of Texas, criticized Biden, accusing him of "spreading a welcoming floor pad."

Aipot said that he was sending Texas militia to "all the hotspots along the border to help intercept and expel the big group of immigrants trying to enter Texas illegally."

U.S. President Biden and the Speaker of the House of Republican House of Representatives McCarthy negotiated the upper limit of US debt, but did not make breakthroughs.

According to the "New York Times" and Reuters reports, Biden and McCarthy held a meeting for about an hour at the White House Oval Office on Tuesday (May 9). Mo, and the Republican Senate's minority party leader McConal also attended the meeting.

Biden said the meeting between the two parties was "effective", and he also said: "Everyone attending the meeting knows what the risk of debt defaults."

After the meeting, McCarthy complained to reporters that Biden started negotiations without a time left, saying that the White House had no Plan B.

"I didn't see any new trends. This is not the way to govern the country."

However, he also said that the White House and Congress leaders agreed that the work team of both sides would continue to negotiate, and Biden and he expected to hold a meeting again on Friday (12th).

In addition, McConal told reporters that if they do not cut expenditure, it is impossible to increase the debt limit.

Biden and McCarthy both stated earlier that they would not make concessions to avoid the United States' debt default on June 1. The US Treasury Department previously estimated that if the federal debt limit is not raised, the Ministry of Finance may not be able to pay all government bills as soon as June 1.

A jury in Manhattan, New York, United States unanimously ruled that former President Trump's If you are responsible for slander, you have to pay Calle's \$ 5 million (about S \$ 6.63 million) in compensation. Trump will appeal to the ruling.

Comprehensive Reuters and Broadcasting Corporation (BBC) report, [] After several hours of review on Tuesday (May 9), the ruling reached an agreement.

Carol subsequently issued a statement saying: "Today, the world finally knows the truth. This victory not only belongs to me, but also belongs to every woman who suffers from being trusted."

The civil lawsuit began on April 25, and Trump did not attend the testimony throughout the interrogation.

After Trump made a ruling, Truth Social on his social media platform Truth Social said: "I don't know who this woman is. This judgment is a shame - Continue!"

The Trump Lawyer Group said Trump will appeal to the jury's ruling.

The 79 -year -old E. Jeancarroll (E. Jeancarroll) confirmed during this period of civil lawsuit that Trump, now 76, raped her in the locker room of Manhattan Department Store Bergdorf Goodman in 1995 or 1996, and raped her, and Refers to a post on Trump in October 2022 on a post on the TruthSocial platform claiming her allegations of "a nonsense", "lying", and "a scam", which harmed her reputation and asked to claim from Trump.

However, the jury believes that there is not enough evidence to prove that Trump rapes Corol.

Trump spoke at the annual meeting of the National Rifle Association (NRA) in April

(Voice of Germany Chinese) The magazine writer E.Jean Carroll accused her sexual assault and slander against her, and the New York jury determined that Trump was "responsible" on Tuesday (May 9) and had to pay 5 million US dollars for compensation and punishment. Compensation, but the jury rejected Carol's "rape" allegations.

In the civil claim lawsuit proposed by Corol, it covers three points including "forcibly touch", "Sexualabuse" and "Rape". The jury believes that Carol can prove that Trump is responsible for the previous 2 points, but Trump's behavior has not constituted "rape." According to New York State law, the term "rape" has its own definition, which is higher than that of sexual abuse or forcibly touch.

Carol, 79, accused of being edited by fashion magazine in the 1990s, she met Trump at Bergdorf Goodman in Bonorfgoodman and agreed to help him choose gifts for other women. Trump subsequently coaxed her into the locker room and raped. In 2019, Carol chose to make public the matter and officially reported it in 2022.

"Today, the world finally knows the truth." Carol said in a statement, "This victory not only belongs to me, but also every woman who suffers from being trusted." It is necessary to face a "wall of suspicion and intimidation", and the judgment is an important step to demolish this high wall.

Corolo went to the Federal Court of Manhattan on the 9th to charges her to sue Sichuan's sexual assault case to appear in court

After the layout, Trump's lawyer Joseph Tacopina told reporters outside the Federal Court of Manhattan that he would appeal. As long as the case is still appealing, Trump does not need to pay compensation.

Since the beginning of this trial, Trump was absent since its beginning of April 25. After the verdict was released, he criticized his self-employed community platform "TruthSocial". The result was a "shame" and claimed to "do not know who this woman was at all."

In October 2022, Trump stated on his "Truth Social" that Carol's allegations were "downright fraud", "scams" and "lies", and even said that Carol was not his favorite type.

Corol said that she had remained silent by Trump with his power and wealth. Later, she saw dozens of women standing up and accused Hollywood producer Harvey Weinstein's rape, which was deeply encouraged, so she decided to publicize Trump in 2019 and temporarily cancel such lawsuits in New York law in 2022. When restricting, the announcement will be reported. She said that Trump, who was still President of the United States, publicly denied the matter and then destroyed her career development, and his supporters continued to harass her on the Internet.

What does Trump have been sued?

Trump's election is affected?

Trump stated earlier that he intends to run for the 2024 US presidential election and return to the White House.

Reuters reports, In the face of disputes that may cause other politicians to be in trouble, they can always turn danger.

According to the analysis, under the polarized political climate in the United States, this civil judgment is unlikely to shake Trump's core supporters. These supporters believe that the reason why he was in lawsuits was to be attacked by political opponents.

Charliegerow, a Republican party in Pennsylvania, said that the negative impact of this matter can be small, and it is limited to women in the suburbs and the gentle Republicans: "Anti-Trump will continue to oppose and support Sichuan Pu's core voters will not change. I think those who are swinging in the middle will not be moved by such things."

Earlier, Trump had given this case in an e-mail that campaigned fundraising as an example. He claimed that Carol was a Democrat registered in the case.

His accusation of this lawsuit was not only the conspiracy of the Democratic Party, but also her fabrication to make up for it. Species the means of recalling sales in 2019.

In addition, Trump appeared in court in April due to the "sealing fee case" investigating 34 forged commercial record felony. His public opinion survey did not decline and rose. In the case, Trump was suspected of paying a sealing fee to two love actresses before the presidential election in 2016, so as not to hinder the election campaign. Trump did not plead guilty and said that these allegations were politically discredited.

Democratic Lissmith believes that it is still difficult to predict the impact of the Coroel case judgment. Will this cause the Republican voters outside Trump's inherent foundation "difficult to accept" and then promote them to fall into the party to the party. Another candidate still needs to be observed.

British Studies: Most antidepressants in the treatment of chronic pain are suspicious

Publisher: 法新社

Modified Time: 2023-05-10T09:20:03+00:00

Description: (Agence France -Presse, Paris, 10th) A large -scale research report published today states that almost no evidence shows that most antidepressants are effective in treating chronic pain.

Videos: []

Images: ["[000000.png](#)"]

However, British researchers engaged in this research emphasized that patients should not suspend their current drugs without authorization; they suggested that patients should ask doctors.

It is estimated that 1/3 people have experienced chronic pain (any pain that lasted more than 3 months).

For a long time, opium drugs prescribed by doctors for such patients are no longer recommended for most patients, because such drugs may be addicted and dangerous, especially in the long run.

Therefore, antidepressants have become prescription notes that doctors often prescribe for chronic pain patients, in order to alleviate pain in the brain that affects emotions in the brain.

However, a new inspection study of the medical information research organization "COCHRANE" shows that the effect and safety of almost all antidepressant drugs for chronic pain are difficult to determine. This is the first evaluation of all related topics.

Scientists from several British universities reviewed 176 trials, including nearly 30,000 patients, and they took 25 different antidepressants to treat chronic pain.

As a result, the researchers only believed that one antidepressant "Duloxetine" was effective for short -term pain.

Although this drug is also effective in fibromyalgia, muscle skeletal and nerve pain, researchers said that it lacks data with long -term side effects.

Another antidepressant "Milnacipran" can also reduce pain, but researchers have insufficient confidence in this because there are fewer research materials.

As for one of the most commonly used antidepressants, the most commonly used antidepressants, which is most commonly used for the treatment of chronic pain, the researchers said that they could not evaluate whether it was effective or safe due to lack of reliable evidence.

The main author of the study and the University of Southampton, the University of Southampton, said that doctors are easy to develop the habit of opening Amidelin.

Pinkes said at a press conference that 1/3 of chronic pain patients expressed affirmation of the placebo response, so doctors may also hear the praise of such drugs from patients.

Having said that, Pinkes emphasized that if the patient suddenly stops taking antidepressants, "it is really dangerous", "please talk to your doctor."

Researchers have called for better research and need to update health guide information in order to reflect the current best knowledge.

Indonesia President Zoko said that the Ayanan country should play a role in maintaining regional peace.

Reuters reported that the 42nd Asianiman Summit held in Labuan Bajo, Indonesia on Wednesday (May 10), gave an opening speech and issued this appeal.

Indonesia is the chairman of this year's Asian Dimension, and Zoko called on the Asians of the Asians to make a view on the Myanmar crisis and speak in a consistent caliber. The Myanmar issue can be said to be the most difficult problem faced since the establishment of Ya'an.

In addition to the Myanmar issue, the topics of the Asian Summit will also include the regional tensions and the code of behavior of the South China Sea.

In his speech before the meeting, Zoko asked: "Will Ya'an only remain silent? Or will it be the driver of peace and growth?"

He said: "I believe that all of our member states will agree, and Asian'an must be united in order to succeed."

East Timor, who seeks to join Ya'an, also participated in the Asian Summit. TAUR MATANRUAK, the premier of East Timor, said that Myanmar's restoration of order is crucial. He said: "We also have the obligation to promote Aya An and the international community to assist Myanmar to create peace."

East Timor was Portugal's colonies before independence.

A few days before the Asian'an Summit held, one Essence

The incident occurred on May 7, when the vehicles by diplomats in Indonesia and Singapore were driving to Taunggyi, the capital of Laun State, Eastern Myanmar to transport rescue supplies, but were shot and attacked by unknown militants. The Singapore Ministry of Foreign Affairs responded to the media inquiries on the 8th that the two Singaporean Embassy in Yangon was in the car at the time. They are now safe and have returned to Yangon.

The Myanmar military government failed to end violence and ensure the safety of humanitarian channels, which made the Asianan country dedicated to promoting the return of Myanmar to return to the peace process.

Scientists have pointed out that the scope of wildfires and this year have appeared so early this year, which shows the impact of climate change.

"We already have 390,000 hectares of land have been burned," said Announced entering an emergency.

She told the media today: "This is an unusual (harmonious) incident. This is a major event I think we must prepare in the future."

About 30,000 people have been ordered to withdraw from their homes, and hundreds of firefighters have worked hard to control the fire.

Yan Boulanger, a forest fire expert in the Canadian Department of Natural Resources, told AFP: "This is a special year, because the burning area has accumulated very quickly, and the number of large fires occurs very much."

Branja said that most wildfires are caused by artificially, including cigarette butts, camp fires that are not extinguished appropriately or sometimes malicious behaviors.

Terri Lang, a meteorologist in the Environmental Ministry of Canada, said the dry environment made spring a "dangerous moment".

Lan En told AFP that the weather phenomenon appeared in early May, "bringing real and abnormal heat and drying environment to Alberta."

A high -pressure ridge pushed the rain and kept high temperature, breaking several temperature records of Alberta Province.

In addition, the typical temperature difference between the cold north and the warm south helps the strong wind.

Lan En said, "This is a perfect storm."

"If the weather conditions are still extreme, wildfire may last for several weeks or months."

Political propaganda materials made by the "Jinggangshan Corps" on May 27, 1967, "Jinggangshan Corps. From website chineseposters.net **1. The background of "May 1st Notice"**

Hello everyone, welcome everyone to listen to "History of the Great", I am the host Sun Cheng. Today, we will continue to conduct a series of historical programs of the Cultural Revolution, telling the "Notice of May 16", which is officially launched by the Cultural Revolution.

On May 16, 1966, the Central Committee of the Communist Party of China issued a notice. It is worth noting that this notification actually does not even have a formal name. The full name is the "Notice of the Central Committee of the Communist Party of China". But the madness named "Cultural Revolution" set off by a notice has changed the fate of countless people, and also deprived of the lives of countless people. Probably because people think that such an important notice in history, without a serious name, it can't be

passed, so it uses the date it issued to give it a name and calls it the "May 16th Notice".

The "May 16th Notice" published on May 17, 1967 on May 17, 1967. (Wikipedia) The meeting of the May 16th Notice is what we mentioned in the previous lectures that the Political Bureau of the Central Committee of the Communist Party of China from May 4th to 26th, 1966 expanded the meeting. A total of 76 people attended this meeting in Beijing. At the meeting, they decided to defeat Peng Zhen, Luo Ruiqing, Lu Dingyi, and Yang Shangkun, and treated Mao Zedong's "sacrifice flag" to Mao Zedong. It was also at this meeting that they passed the decision to launch the Cultural Revolution and determined the fate of hundreds of millions of beings. It is particularly paradoxical that Mao Zedong himself did not attend the meeting, and the host of the meeting was Mao Zedong's number one attack target Liu Shaoqi.

So, what exactly did this very important notice say in history? Let's take a look.

In fact, some of the most anticipated common sense is that the vast majority of this notification is carried out in the name of criticizing Peng Zhen's "February Outline". We have said before that after Yao Wenyuan began to criticize Wu Yan's new historical drama "Hai Rui", under the leadership of Peng Zhen, the Standing Committee of the Political Bureau of the CPC Central Committee passed a name "February Outline in February 1966 The document, trying to limit the criticism of Wu Yan as much as possible within the scope of academic discussion.

We have previously said that as early as July 1964, a "five -person group of cultural revolution" was established within the Central Committee of the Communist Party of China. The members include the first secretary and mayor Peng Zhen, and the Minister of Zhongxuan Lu Dingyi Kang Sheng, the head of the theoretical team of the Central Committee of the Communist Party of China, Zhou Yang, deputy minister of the Central Propaganda Department, and Wu Lengxi, the president of Xinhua News Agency and the president of the People's Daily. This group expanded the meeting once in February 1966. At the meeting, Peng Zhen expressed dissatisfaction with the criticism of Wu Yangang's launch. of " ", Also known as " February Outline ". This outline was passed by the Standing Committee of the Political Bureau of the Central Committee of the Communist Party of China by Liu Shaoqi.

After the "February Outline" passed, Peng Zhen had previously reported to Wuhan to report to Mao Zedong, where he was there. In this report, Mao Zedong adopted a "hit Tai Chi" posture with an unclear statement, and seduced Peng Zhen to say that Wu Yan said that "it can be said to be anti - party and anti -socialism", which can be described as extremely deep. After that, Mao Zedong connected through his wife Jiang Qing and Lin Biao, thus launching a seminar on the symposium named Lin Biao and Jiang Qing. This question has a very low evaluation of the literary and art route since the establishment of the Communist Party of China in 1949. He believes that there is a "bourgeois" in terms of literature and art, which is opposed to Mao Zedong's "anti -socialism" "black line". And call on people to overthrow this "black line". In this way, Lin Biao, who symbolizes the military forces, showed his posture standing on the side of Mao Zedong. From this, Mao Zedong had enough confidence to do it directly to Peng Zhen. In fact, this "May 16th Notice" not only passed the seven modifications of Mao Zedong himself, but also some of the important paragraphs also directly from Mao Zedong's

handwriting. Its drafting group was led by Chen Boda and Kang Sheng. Jiang Qing, Zhang Chunqiao, Guan Feng, Qi Benyu and others also participated in drafting, and these people were all firm Mao factions in the Chinese Communist Party at that time. In other words, the May 16th Notice completely reflects Mao Zedong's will.

Two, extremely high political tuning: The hair -style political discourse in "May 16th Notice"

"Notice of May 1st" at the beginning with a very high adjustment of the door, a violent attack on the February Outline said, saying:

"The central government decided to withdraw" [], which was transferred on February 12, 1966(<https://zh.wikisource.org/wiki/%E4%BA%94%E4%BA%BA%E5%B0%8F%E7%BB%84%E5%90%91%E4%B8%AD%E5%A4%AE%E7%9A%84%E6%B1%87%E6%8A%A5%E6%8F%90%E7%BA%B2>), Revoked the original 'Cultural Revolution Five -person Group' and its office, re -established the Cultural Revolution Group, under the Standing Committee of the Politburo. The so -called "five -person group" report outline is fundamentally wrong, it violates the route of the socialist cultural revolution proposed by Comrade Mao Zedong, and it violates the socialist social class and the socialist social class and the socialist social class and Guidance of class struggle issues. This outline, the cultural revolution led and launched by Comrade Mao Zedong himself, at the Central Working Conference from September 1965 to October 1965 (that is, at the Central Political Bureau of the Central Committee of the Central Bureau of the Central Committee At the Standing Committee Meeting), the instructions of criticizing Wu Yan, Yang Fengyin violated and tried to resist. ""The so -called" five -person group "report outline was actually just the outline of Comrade Peng Zhen alone. It was made by Comrade Peng Zhen with the" Five -Man Group "member Kang Sheng and other comrades. To treat such a major issue that is related to the overall situation of the socialist revolution, Comrade Peng Zhen has never discussed and discussed in the 'Five -Man Group' at all. The central censorship did not get the consent of Comrade Mao Zedong, the chairman of the Central Committee, and adopted extremely improper means, arbitrarily arbitrary, abused power, theft of the central government, and hurriedly sent to the whole party. "

In this way, the various charges represented by the February Outline were settled on Peng Zhen, and Kang Sheng, who is also a member of the "Five - Man Group", was led to the relationship. Next, the "May 16th Notice" puts the

"February Outline" with a full ten "main mistakes", including "standing on the bourgeois stance" and "violating all class struggles are political struggles. The basic argument of Marxism, etc., also said that this outline distorted Mao Zedong's speech. It is worth noting that when the May 16th Notice criticized the February Outline, from the theory of Maoism, it completely denied that many people thought it was a righteous thing. Here I chose three paragraphs and read it for everyone.

The first paragraph is:

"When we started fighting the bourgeoisie's rampant attack, the author of the outline proposed that" Everyone is equal in the face of truth. This slogan is the slogan of the bourgeoisie. They use this slogan to protect the bourgeoisie, oppose the proletariat, oppose Marx, Leninism, opposed to Mao Zedong's thoughts, denying the class of the truth. The struggle of the proletariat and the bourgeoisie, Marxism's truth as the bourgeoisie, and the fallacy of all the exploiters of the exploitation class are either the east wind overwhelming the west wind or the west wind overwhelmed the east wind. What equality is on. The proletariat struggling with the bourgeoisie, the proletariat's dictatorship of the bourgeoisie, and the proletarian in the upper building includes the dictatorship in various cultural fields. Wait, can there be any equality for these basic issues? "

The second paragraph is:

"Outline said, 'It is not only necessary to overwhelm each other politically, but also to truly exceed and overwhelm each other at the level of academic and business. This kind of thinking about academic boundaries is also wrong. The truth of academic grasping, the truth of Marxist Leninism, and the truth of Mao Zedong's thoughts have already greatly surpassed and overwhelmed the bourgeoisie. Outline of the method shows the so -called 'academic authority' touted and raising the bourgeoisie. Avise and suppressing our batch of new forces of the proletariat and fighting in the academic world. "

The third paragraph is:

"Outline proposes to" don't be arbitrarily like a scientific valve ", and say that" be vigilant on the road of bourgeois experts and academic values'. What exactly is the 'academic valve'? ? Don't the proletariat do not dictatorship, don't overwhelm the bourgeoisie? Do you do not overwhelm the academics of the proletariat? The proletariat left, obviously to put on the hat of the "learning valve " to Marxist Leninist, which supports the real bourgeoisie's academic valve and maintains their crumbling monopoly

position in the academic world. In fact, those supported bourgeoisie The power of the capitalist road within the party of the learning valve, and those bourgeois representatives who enter the party's bourgeoisie -based learning valve are the people who do not read, read newspapers, do not contact the masses, do not learn. Arbitrary party lao who is arbitrary and overwhelming people ', stealing the party's name. "

Three, the political logic of "May 1st Notice"

In fact, there are many similar murderous words in the May 16th Notice. Limited to the program time, I can't list all of them. Interested friends can find it for themselves. But from these paragraphs, we can already feel the basic logic in this notice: it believes that "everyone is equal in the face of truth" is just a slogan of a bourgeoisie. There is no equal relationship in class struggle, only one party, only one party Defeating the other party, according to the hair language in the notice, "either the east wind overwhelms the west wind, or the west wind overwhelms the east wind." In addition, it is believed that the class boundary should be divided at the academic level, and Marxism - Leninism and Mao Zedong thought and "truth" are equal to the number. This so -called "truth" that the so -called proletariat mastered the academic level is that "it has already greatly exceeded the great surpassment And overwhelming the bourgeoisie. " In response to the so -called "bourgeoisie academic", this notification uses a seemingly doubtful sentence, in fact, it is a strong confirmation of a question: "Don't the proletariat do not dictatorship, do not overwhelm the bourgeoisie? The academic academics that eliminate the bourgeoisie? Is it a 'academic valve'? "

In general, according to the logic of this notification, the so -called "bourgeois academic" is not qualified to compete with equal competition of "the academic" of the proletariat, and only the "overwhelming and elimination". Moreover, Marxism -Leninism and Mao Zedong's thoughts are equal to the truth, and it is a supreme criterion. The "proletariat" greatly exceeds the "bourgeoisie" because of the mastery of this "high standard". In the face of the crushing of this so -called "truth" and "the highest standards", the "bourgeoisie" is not worthy of equality at all, only with "dictatorship". Speaking of which, I don't think we need to make more analysis, because the bloody and crazy atmosphere behind this thought has come to us.

After listed the top ten crimes, the notice made a qualitative conclusion on the February Outline, saying:

"In short, this outline is to oppose the socialist revolution to the end, oppose the cultural revolution line of the Party Central Committee headed by Comrade Mao Zedong, combat the proletarian left, shelter the bourgeois right, and prepare for public opinion for the restoration of the bourgeoisie. The reflection of thought in the party is a downright revisionism. Struggling to fight with this amendment line is definitely not a trivial matter, but the fate of our party and the country, the future of our party and the country, the party and our party and our party and the country The future of the country is also a top priority that is related to the World Revolution. "

From these words, the "February Outline" can be said to be "crime and evil" in the Mao faction. Class thought and thorough revisionist route. As for the struggle against this "revisionist line", it is related to the so -called "party and the country" and the fate of the "world revolution", and even "a top priority related to the world revolution." It can be said that according to this logic, Mao Zedong's struggle against Peng Zhen and the February Outline was simply saving the earth, and Peng Zhen has become a kind of "public enemy of the earth".

So, how do Mao faction do this so -called "saving the earth"? There is a very famous words in the "Notice of May 1st", summarizing what Mao Zedong wants to do next. In this regard, we will give a detailed description in the next lecture.

Thank you everyone. This is here this week, we see you next week.

In the past 20 years, the United States has monitored the United States to destroy Russia's malicious software

Description: (Agence France -Presse, Washington, 9th) The U.S. Department of Justice said today that it has cut off the "precision" malicious software network engaged in espionage activities in 50 countries in 50 countries in the Russian Federal Security Agency (FSB). NATO) Alliance.

U.S. officials said that the Russian Federal Security Administration has previously successfully implanted malware SNAKE or UROBUROS into computer systems around the world, mainly for government networks, research institutions, reporters, and other goals.

They said that the computers in these systems are also used as relay nodes to hide the SNAKE malware in and out of traffic in the target computer system.

The U.S. Department of Justice stated that in the long -term operations, the FBI installed its computer code in the system and instructed to Snake, causing malicious software to cover itself, and so that Snake could not operate.

Lisamonaco, deputy Minister of Justice, said: "U.S. law enforcement authorities have allowed Russia's malicious software to kill each other through high -tech operations, destroying one of Russia's most precise online spy tools, and Russia has used this in 20 years Tool promotes autocratic goals. "

Computer network experts have known this malicious software for at least 10 years. The US Internet Security and Infrastructure Security Agency (CISA) said the Russian Federal Security Agency began to develop the software in 2003.

CISA claims that Snake is "the most precise Internet spy tool in the weapon library of the Russian Federal Security Agency". It has a strong hiding ability and is extremely difficult to detect in computer systems and network traffic.

In addition, CISA said that this tool is also designed to be easily updated and corrected, and "due to the high degree of complexity, the program is wrong."

These levels have allowed the Russian Federal Security Agency to engage in spy operations without being detected through huge hosting networks for many years, invading computers with sensitive files.

CISA said that at least in one case, Snake was installed in a system of NATO countries, allowing Russian intelligence agencies to access and leak sensitivity international relations documents and foreign communication content.

CISA said: "The effectiveness of this type of cyber spy implantation software depends on its long -term hidden traceability."

U.S. Secretary of State Antony Blinken issued a statement on May 9th that the United States has strong encouragement(strongly encourage)WHO invites Taiwan to participate in this year's WHD as an observer(WHA), Let Taiwan provide professional knowledge for relevant discussions.

"Invited Taiwan as an observer, it will reflect the tolerance of WHO's adoption of international health cooperation and 'Health for All'. One of the responsible members, and Taiwan was invited to participate in the previous WHO as an observer.

Brinken pointed out that Taiwan's unique ability and way of doing things - including its important public health professional knowledge, democratic governance, and advanced technology -can review the issue of the World Health Conference to review great value: "Taiwan isolated from excellence in excellence It is unreasonable outside the Global Health Conference, and it destroys the tolerant global public health cooperation and security required by the world. "

US Secretary of State Antony Blinken (Reuters) [] [] Blinken said that Taiwan is a reliable partner, a vibrant democracy, and a good force in the world. The United States will continue to advocate that Taiwan will return to the World Health Organization as an observer and advocate that "Taiwan has meaning and actively participating in the United Nations System and International Forum."

He also emphasized that the United States supports Taiwan to participate in international activities appropriately, which is in line with the "One China" policy with the three joint communiqués of the Taiwan Relations Law, the United States and China, and the six guarantees. This is also the third public statement since Biden's third time since he took office in January 2021 to support Taiwan's return to WHO.

"This also shows the United States' consistent support for Taiwan's international space. In addition, after seeing the needs of global cooperation in public health during the epidemic, the United States also believes that Taiwan is necessary to participate in international health-related meetings." The political team leader Zhao Yixiang made the above-mentioned representation of this station.

Zhao Yixiang believes that whether it is the role of Biden from the role of the Secretary of State or the meeting between officials at the State Council and

relevant officials at the WHO, the United States should continue to propose to participate in international health cooperation in hope and significantly.

Taiwan has been rejected outside the WHA door for 6 consecutive years

The 76th WHO will be held in Geneva, Switzerland from May 21st to 30th.

From 2009 to 2016, Taiwan has been invited for 8 consecutive years to participate in the WHO as an observer. Affected by the deterioration of cross-strait relations, since the Tsai Ing-English government came to power in 2016, Taiwan has not received an invitation letter for six consecutive years. In recent years, Taiwan has repeatedly strived to attend the meeting with WHO Secretariat (WHO) Secretariat as observer.

(Reuters information picture) [] Regarding Brinken issued a statement for three consecutive years and strongly supporting Taiwan to become WHA observer, Taiwan's Foreign Ministry expressed sincere welcome and thanks. According to the Taiwan Foreign Ministry statement, when WHA is about to be held, Brinken's statement once again shows the strong support of the United States' meaningful participation in Taiwan's participation in international affairs. The Taiwan government will continue to actively defend the health rights of the people of Taiwan, and on the basis of existing good, strengthen close

cooperation with all countries such as the United States and other countries, and continue to contribute to the global epidemic prevention and public health affairs.

A spokesman for the United Nations Association of Taiwan, Zeng Kaikai, said in an interview with this station that the World Health Organization has long been controlled by China for a long time. Support Taiwan. "Such an institutional design has caused Taiwan to be unable to join the WHO, which is very unfair. We must push to the conference to vote every year. We will always lose, and it is impossible." He said. The Association has long promoted Taiwan's participation in the WHO. In addition to the absence of the epidemic for two years, Zeng Kaikai revealed that this year they also planned to go to Geneva to host a parade. response.

Last year at the WHO Conference, in addition to the two friends of Taiwan Paraguay and Guatemala, 10 countries from the United States, Britain, France, Germany, Canada, Australia, Luxembourg, and Lithuania also joined the ranks of support in Taiwan, which was quite rare in the past. Regarding the issues of Taiwan's participation in the World Health Conference, Zhu Fenglian, a spokesman for the Taiwan Affairs Office of China, said that after the DPP authorities came to power, they stubbornly insisted on the "Taiwan independence" position and refused to acknowledge that the "1992" principle of "China" was reflected in Consensus ", destroying the political foundation of cross -strait negotiations, directly led to the political foundation of Taiwan's participation in the WHO.

and has still been unknown. Relatives have given up the entrusted representative lawyers in exchange for the two people in accordance with the authorities in accordance with the authorities.

EU request Beijing to avoid human rights Yu Wensheng couple may become political chips * * * Human rights lawyer Yu Wensheng and his wife Xu Yan were criminally detained for provocation

Yu Wensheng: "After experiencing these years, sealing control, house arrest, monitoring and tracking, etc., I and my family live in China, all freedom and limited. In the face of power, we fight against Perseverance."

This video was uploaded to his personal Twitter in March, Yu Wensheng, a Chinese rights protection lawyer, explaining that he was released for one year, but last month, he and his wife Xu Yan last month. After the police station, the whereabouts are still unknown. Rights protection lawyer Wen Donghai tried to visit the son they left at home on Tuesday (May 9). They were suspected of being stopped by plainclothes, and their mobile phones were robbed.

Yu Wensheng's disappearance in recent months was strictly managed by the authorities by the authorities

Nearly a month when Yu Wensheng's husband and wife were missing, many rights protection people tried to their residence in Beijing to visit their 18 -year -old son, including the pseudonym Chen Long. Chen Long told this station that I believe that Yu Wensheng's son has been strictly taken care of by the authorities for nearly a month.

Chen Long: "Some lawyers went to see Yu Wensheng's son, but women at the door of the door were watching. As long as someone went, they would notify the National Security Council. Children, the national security followed. It is said that the lawyer went to sign and commission.

Chen Long said that he and many rights defenders were very worried about the situation of Yu Wensheng's husband and wife. Due to the strict control of the authorities, he could not explore and help take care of their sons.

Chen Long: "The couple of Yu Wensheng really did not have the news until now, because there was no lawyer to meet, and they could not understand the actual situation of them now, and they were really worried. The child was also pitiful. He just comforts the children. We just hope that there are many friends who can pay attention to the Wen Sheng family and visit the children,

but the social environment has caused a lot of people because of this deterrence."

Wang Qingpeng, a lawyer in the United States, was very concerned about the situation of Yu Wensheng. According to her understanding, Yu Wensheng's relatives were warned by the authorities and could not entrust the lawyer to make the outside world more difficult to understand the situation of the two, which is worrying.

Wang Qingpeng: "Lawyer Yu Wensheng had just been released from prison. Before that, his wife had been calling for him. Now even his wife was arrested and could not speak for him. The current family members have not been entrusted by the maintenance of stability, and the lawyer cannot meet. , So I do n't know the specific case. Lawyer Yu Wensheng is a very firm human rights defender. He has been arrested many times. This time he was arrested again. In the scope of Chinese law and international laws, they were repeatedly sentenced, so I couldn't imagine how lawyers Yu Wensheng and Xu Yan would be dealt with."

Wang Qingpeng said that before the disappearance of Yu Wensheng, he had been arrested many times before he was disappeared, and his son lived under intimidation and threats for many years. She believes that the encounter of the second generation of activists is the most real example of China's human rights.

Wang Qingpeng: "At present, the son of lawyer Yu Wensheng suffers a microcosm of the second generation of rights protection lawyers. We see that Wang Quanzhang and Li Heping are constantly being relocated, followed and threatened by national security. In adulthood, I have been growing up in such an intimidated and threatened environment, and some can not even go to school. For example, lawyer Xie Yanyi's daughter. From the encounter of the lawyer's lawyer, we know that the human rights situation in China is in a bad and bad person. Environment."

Wang Qingpeng, the initiator of "one person, one push in the political prisoner", said that according to past experience, international attention will help improve the situation of the person who is defended. More than 1,500 detained political prisoners believe that the attention of all walks of life can help improve their situation.

Description: On May 9th, Russia held a military parade at the Red Square in Moscow to celebrate the "Victory Day", one of the most important festivals in Russia. Putin compared his military operations in Ukraine and described Russia as victims of Western forces. Ukraine said that Putin's comparison was a common historical defense for aggression. This year's Red Square parade has become smaller than previous years.

The traditional military parade on the Red Square this year is significantly reduced compared with previous years.

(Voice of Germany Chinese) on Tuesday (May 9), Russia held a military parade to celebrate the defeat of Nazi Germany's "Victory Day" in the Red Square of Moscow. Reuters pointed out that due to Russia's winter offensive in Ukraine, frontline troops and weapon shortages, the scale of celebrations in Russia have reduced this year.

Russian President Putin delivered a 10 -minute fierce speech in front of the Kremlin, roaring the "Western Elite", and said that the civilized world was at a "decisive turning point."

Putin said: "A real war against our motherland has begun." He ordered the Western invasion of Western call for the West last year, destroying a large number of cities and killing thousands of civilians.

Russian President Putin and Belarus President Lukashenko attended the Red Square military parade.

On Tuesday, the Chairman of the European Commission Essence During the visit, she emphasized how the war was isolated Russia from most European areas and pushed Ukraine to the West. She claims that Ukraine is "the heart that represents today's European values."

"Victory Day" is the most important day for Russia under Putin. Putin described the invasion of Ukraine as a struggle similar to fighting Nazis. Ukraine's losses suffered in World War II than Russia. Ukraine said that Putin's comparison was a common historical defense for aggression.

The traditional military parade on the red field is significantly reduced compared to previous years. There is no modern combat tank square in this year's parade. Instead, a T-34 tank during World War II rolled over the red field. The fighter aircraft was also canceled over the red field.

The Russian private military group Wagner Prigozhin complained that Moscow's generals did not provide sufficient weapons to his troops with swear words, which also covered Putin's speech.

Ukraine President Zelenski said Moscow set himself to occupy the last period of Bachmart, but did not achieve this goal. Moscow will occupy Bach Murte as a stepping stone to capture other cities in the Wudong Industrial Area, and hopes to use the occupation of the city as a gift to the "victory day".

The European Commission President Feng Demorn visited Kiev, the capital of Ukraine.

Ukraine also said that 23 of the 25 cruise missile launched by Russia to Ukraine on Monday night. These missiles did not cause people and property to lose their personnel and property.

The Russian Ministry of Defense stated that the use of "high -precision, long -range sea base, and air -to -air weapons to concentrate on the enemy's barracks and ammunition depot."

Russia has become increasingly isolated in diplomacy, and this aspect has also narrowed the distance between Moscow and Beijing. When the Minister of Foreign Affairs of China, Qin Gang said in Germany on Tuesday that in order to seek ceasefire, Beijing will communicate with all the participants of the Ukrainian war.

Qin Gang said in a joint press conference after meeting with Germany Foreign Minister Belbak to meet: "As a permanent member of the UN Security Council and a responsible country, China will neither watch the fire from the shore nor the fire."

Russia was refused to send troops into Ukraine as an invasion, and it did not call for Russia to withdraw troops.

Chinese Foreign Minister Qin Gang attended a press conference after meeting with German Foreign Minister Berbak on Tuesday.

Putin said in a speech on Victory Day that all Russia is praying for the heroes of the front line, and cheer for "Russia, for our heroic armed forces, and cheer for victory!"

After his speech, the band played the music, the ritual, and the soldiers walked into the red field. Later, the armored car and the intercontinental ballistic missile with nuclear warheads.

But this year's parade is much shorter than usual. It happened over the Kremlin last week. Later, the military parade in other cities in Russia was reduced or canceled for security considerations. The parade of the traditional veteran's "Immortal Legion" was also canceled. According to tradition, people hold the portraits of the family members of the warriors during World War II, and commemorate the veterans who have contributed to the anti-fascist during the Patriotic War.

The Hong Kong judicial department tried to stop British lawyer Owen last year(Timothy Owen) Li Zhiying, the founder of the first media and the critic of the Chinese government, was defended, but it was not successful. Reuters information picture

According to Reuters, the Hong Kong Legislative Council passed a legal amendment on Wednesday (May 10) to restrict foreign lawyers involving

cases related to national security. The amendment stipulates that unless Hong Kong leaders have sufficient reasons to believe that the participation of foreign lawyers does not violate national security interests, foreign lawyers will not be able to participate in national security cases. This will be determined on a case -by -case case according to the specific situation.

The report pointed out that these amendments fixed a ruling of the Standing Committee of the National People's Congress of China into a law at the end of last year, that is, when the Hong Kong courts handle cases involving national security, they must be approved by the leader of the city to accept foreign lawyers without Hong Kong qualifications. Essence

In Hong Kong, prosecutors and defense lawyers have long been a part of the rule of law with foreign lawyers. In recent years, some foreign lawyers have been defending people who criticize the Hong Kong government. The Hong Kong judicial department tried to stop British lawyer Owen last year(TimothyOwen) Li Zhiying, the founder of the first media and the critic of the Chinese government, was defended, but it was not successful. Hong Kong Chief Executive Li Jiachao appealed to the Standing Committee of the National People's Congress and obtained the previous ruling.

British legal scholar Ericlai analyzed this that this amendment in Hong Kong allows the government to widely explain what is national security cases and who can participate in it. This will shrink some foreign lawyers to the cases participating in Hong Kong.

Agence France -Presse reported that Prosecutor Alvinbragg, a prosecutor in Manhattan, said in a statement that the two 7th -century stone carvings are currently worth \$ 3.5 million (about NT \$ 17.43 million). Saw it up and smuggle from China.

These sculptures are one of the 89 cultural relics purchased from 10 different countries from 10 different countries.

Since 1998, they have been "lended to" Metropolitan Museum of Art, and were seized by the prosecutor's office after criminal investigation this year.

Bai Airong said: "These two incredible cultural relics have been stolen, and at least one is basically not known for the public in the past 30 years. This is regrettable."

"Although the total value of these two cultural relics is more than \$ 3 million, these works that are incredible details and aesthetics can never be truly expressed through the price tag."

The total value of the entire batch of cultural relics is nearly \$ 69 million, which is part of the criminal investigation of the Antiquities Traffickingunit of the New York City. This department is responsible for tracking and returning the plunder.

According to Bai Airong's office, one of the funerals was stored in the storage room of the museum and has never been displayed.

These sculptures are handed over at the return ceremony of the Chinese Consulate General in New York.

Since January 2022, more than 950 cultural relics worth more than \$ 165 million have been returned to 19 countries, including Cambodia, India, Pakistan, Egypt, Iraq, Greece, Turkey and Italy. (Translator: Lin Yifeng/Calculating Draft: Lin Zhiping)

According to Hong Kong's "South China Morning Post", China's investment in Europe fell to a decade in 2022 because China's Qing zero policy and Russia's invasion of Ukraine and other geopolitical factors put pressure on capital flows.

Last year, China's investment in the European Union and the United Kingdom was only 7.9 billion euros (\$ 8.7 billion), a decrease of 22% from the previous year. This brought China's investment in Europe to about 2013; some time after 2013, the "Belt and Road" initiative proposed by Chinese President Xi Jinping brought a large -scale expenditure of China's foreign investment.

According to a joint study by the US think tank Rhodiumgroup and the Merics Institute (Merics), China's global foreign investment has also fallen sharply, consistent with its trends in Europe.

China 's investment in Europe last year is currently concentrated in four countries: Britain, France, Germany and Hungary, and China' s investment in the four countries is more than half of the so -called green space investment limited to electric vehicle battery manufacturers. quick.

Toyota Motor announced the net profit of the 2022 fiscal year (April 2022 to March 2023) was 2.45 trillion yen (about 18.12 billion US dollars), a decrease of 14% from the previous year, but still surpassed the estimated 2.36 trillion yen.

Toyota Motor estimates that due to the "improvement of semiconductor supply status and the efforts of manufacturing bases", net profit in the next year will increase by 5% to 2.58 trillion yen.

The car giant retained the throne of sales championships for three consecutive years in 2022, but like other peers, Toyota Motors is also trying to

fight against COVID-19 (2019 coronary virus disease) epidemic and global chip shortage.

President Sato Hengzhi told reporters: "In short, it is a very difficult year for manufacturing and delivery of vehicles to our customers."

Chiefs Miyazaki pointed out that from the natural disaster to the chip crisis, it was the reason why the previous fiscal annual production was limited, and acknowledged that "the price of raw materials soared" had affected the company's profit and loss.

Miyazaki Miyazaki said that the reason why Toyota can surpass expectations is mainly the efforts of manufacturers and dealers to help the company surpass the sales volume of the same period last year.

In the 2022 fiscal year, Toyota Motors sold more than 10.5 million cars worldwide, including cars produced by subsidiaries such as Hinomotors and Daihatsu, and it is expected that the next fiscal year will increase significantly to 11.4 million vehicles.

Miyazaki said: "As the supply and demand status of semiconductors improve, we expect sales in all regions to increase."

Sonpo Kazakhstan, a senior analyst of TOKAI Tokyo Researchinstitute, told AFP before Toyota Motor released his financial report that the increase in production capacity said that "the impact of semiconductor shortage is weakening."

Tokyo Research Consultant TiW Analyst Takada Mo added that Toyota Motors has built a system that can resist natural disasters such as earthquakes than "very rigorous".

Earlier this year, Toyota Motor announced the intentional management of high -level personnel. The grandson of Toyota Toyota, the grandson of Toyota Kituro, 53 -year -old Sato Hengji, was the president.

The USPSTF renewal guidelines for the USPSTF to start the age of breast X-ray examination of the average age of breast cancer to the age of 40 to 40.

Reuters reports that the USPSTF working group said that it will be greater for black women from the age of 40 for black women, because black women usually have more aggressive breast cancer, and their survival rate is lower.

The new guidelines overthrew the suggestion of the 2009 expert group. At that time, the USPSTF committee suggested that women start at the age of 50 to start a conventional breast X-ray examination. It is not recommended that women start breast X-ray examination in their 40s. It is suitable.

Former USPSTF Chairman Manjeon said that at the time, women in their 40s performed breast X-ray examination. After deducting the potential harm caused by the inspection, there were not many benefits.

Now the diagnostic technology and treatment methods of breast cancer are greatly improved. She said: "The situation today is very different from the past."

Expert: At the age of 40, the mortality rate of breast cancer will be reduced by 20% at the age of 40

Manonene said that the incidence of breast cancer of young women has been rising, and the technology of digital breast images has improved, which has improved the accuracy of X-ray examination, and better treatment methods have also improved the survival rate of patients.

She also said that the new computer model shows that if women's breast cancer screening every two years starts from the age of 40 instead of from the age of 50, and if all women who meet the breast X-ray examination will perform breast X-ray examination, The mortality rate of breast cancer in the United States will be reduced by 20%.

Manjeo is now the director of the Department of Medicine, the Department of Medicine, the University of California, Los Angeles.

Selling weapons to Taiwan

The United States has no formal diplomatic relations with Taiwan, but it is the main military supporter of Taiwan. For decades, Washington has sold "defensive" weapons to Taiwan based on the "Relations with Taiwan". After August last August, after the Speaker of the House of Representatives in the United States House, Plogsi visited Taiwan, the Chinese PLA launched the largest real -scale military exercise in the surrounding waters around Taiwan for decades. Then in September, the Bayeng government announced the 6th degree of Taiwan military sales case worth 1.16 billion US dollars. The US Ginseng Institute also passed the "National Defense Authorization Act" at the end of last year. The law plans to send US government officials to Taiwan to strengthen the bilateral cooperation of the United States and Taiwan.

The revision of the law originated from the Hong Kong High Court earlier approved Li Zhiying to hire British Royal Lawyer Tim Owen to defend the Case of the National Security Law involved in it.

(Voice of Germany Chinese) Hong Kong revised a law on Wednesday (May 10), Unless the written permit of the chief executive.

The amendment is the latest major changes in legal and political aspects of this international financial center city. After large -scale democratic protests in 2019, China has been working hard to clear the voices of Hong Kong's objection.

Hong Kong has been highly praised for allowing international lawyers to participate in the general law tradition of cases.

However, after the National Security Law, which was implemented in 2020, the Hong Kong government said that foreign lawyers participating in cases would bring "potential risks".

Lin Dingguo, director of the Hong Kong Department of Justice, said on Wednesday that the right to choose a lawyer in the Hong Kong Special Administrative Region refers to the right to choose a lawyer or a barrister who has a comprehensive qualification in Hong Kong as a legal representative, but does not include overseas lawyers who have not qualified for comprehensive practice in Hong Kong. Essence

The revision of the legal practitioners' regulations passed by the Hong Kong Legislative Council on Wednesday stipulated that under the "not violated national security interests", overseas lawyers were allowed to participate in the National Security Law case after issuing a certificate.

The revision of the law originated from the earlier approval of the Hong Kong High Court (Timowen) defended the Case of the National Security Law involved in it.

Li Zhiying is one of the well-known democratic sportsmen in Hong Kong. In August 2021, he was accused of "conspiring collusion with foreign forces" with one of the former supervisors of One Media, and Li Zhiying has been detained so far. At that time, after the Hong Kong official frozen its funds in accordance with the new security law, the "Apple Daily" founded by Li Zhiying announced its closure.

Interview with Li Zhiying: I will work together with Hong Kong

For a long time, both Hong Kong prosecutors and defense can hire foreign lawyers. The ruling team composed of three senior judges of the Hong Kong Court of Court of Hong Kong rejected the Hong Kong government's proposal to prevent Owen's representative Li Zhiying in court in November last November. Subsequently, the Hong Kong Department of Justice applied for an application to delay the case of the case for the interpretation of the Standing Committee of the People's Congress and obtain the approval of the High Court.

In December last year, the Standing Committee of the National People's Congress of China awarded the Hong Kong Chief Executive Li Jiachao to prevent foreign lawyers from participating in the power involving national security cases and overthrew the previous ruling of the Hong Kong High Court. Owen's work visa extension application has also been put on hold.

Legislative Councilor Lin Xinqiang said on Wednesday that he was disappointed with the exception of the amendment to allow foreign lawyers to apply for an exception to participate in the National Security Law case. He said at the Legislative Council: "The kindness of the enemy is cruel to ourselves."

Li Zhiying's legal team argued that the government had infringed his rights and argued that he was accused of illegal security law.

The legal team also filed a lawsuit on the National Security Council of Hong Kong and the entry affairs of Hong Kong and Hong Kong's immigration.

Both cases have been tried and are waiting for the decision.

Mongolians have taken Mongolian bags for a century, which is a symbol of the gradually disappearing nomadic life. However, Mongolian bags in Ulan Bato have been replaced by high -rise buildings.

Mining has made Mongolian wealth for ten years. Locals said that this has promoted the vigorous development of the construction industry, thereby squeezing it to the earnest needs of public services from hospitals to children's playgrounds.

OTGOO said, "I was mixed outside when I was a kid. We would play football, running in an open area like a wolf or rabbit." He was unwilling to interview with a full name.

"My child can't run as deliberately as us, the new apartment building is full of places."

Mongolia's mining industry flourish the economy and grows double -digit. Last year, the huge profits created by coal mines accounted for 25%of the domestic production hair.

The mining industry has long led Ulan Bato's wave of office space and luxury apartments.

The rapid development of Ulan Bato has been chaotic. The population increased from 500,000 in the 1990s to about 2 million people last year. This has also led to traffic knotting into a commonplace. Just commute to and from work to get a few hours.

However, the vital people's infrastructure has not kept up with this wave of construction. Parents said that many children can only grow in an environment without outdoor leisure facilities.

There are almost no large playgrounds, schools and hospitals in space covering a space, and many related facilities still remain during the period of the Communist Party more than 30 years ago.

Ulzii is the mother of 3 children. She said: "My child has the opportunity to go outside on the weekend. They always stay at home and let the 3C screen accompany."

Berlin Berbel Square, which witnessed the Nazi Burning Book

The above scene took place on May 10, 1933. Essence

Wernertre, a historian who wrote many monographs on the burning incident, said: "If there is no Nazis and no incident incident, then the cultural diversity of Germany and the innovative spirit that emerged in the 1920s must be possible. Continue. "The cultural and artistic revival of the Weimar Republic period quickly disappeared after the Nazis came to power. The brick band of books on May 10th is an iconic event.

Cultural elite fled one after another

As early as the start of the book, many banned writers have left Germany, such as Alfred Kerr, Bers Brothers of Thomas Und Heinrich Mann, Erika Und Klausmann) Brothers and sisters, Else Lasker-Schüler, Irmgard Keun, Ernst Toller.

During the Nazi rule, Erica Und Klaus Mann, who was forced to exile,) Brothers and sisters.

The cultural elites of the Weimar Republic fled from Germany. Because from the day Hitler came to power on January 30, 1933, they had realized that they had no future in Germany.

Nazi's rival: Jews, left -wing people, and liberals

A few years ago, the Nazis revealed the determination to kill the opponents. In addition to all Jews by the Nazis, they also include artists with different political opinions. Everyone who refuses to accept the Nazi ideology will be characterized as "non -virtue" and become a banned alien. The blacklist of the banned works and writers continued to be updated. As of May 1933, there were more than 200 writers on the blacklist, and one year later, the banned works were as many as 3,500.

Writer Remark is particularly hated by Nazi. In 1928, he published the novel "No War in the West", which reflected the cruel scene of World War I, and was moved to the screen by Hollywood two years later. The peacetime concept shown in the work makes the Nazis and conservatives feel dissatisfied. In their opinion, this is a great insult to German soldiers. In 1930, when Hollywood filmed films of the same name in Germany, the Nazi charge shocked the theater under the encouragement of Gobberl, who was official to the Minister of Publicity in the future, and was banned by the film for a time.

Keller, an open letter who opposes the Nazi Burning Book

"If you believe, you can stifle your mind, then you obviously have not learned the lessons of history. The tyrants have tried to kill their minds many times, but their thoughts have never been defeated and the tyrants are in the end."

The author of the open letter is the American deaf and blind female writer Helen Keller. Like Jack London, Hemingway, Gorky and other foreign writers, Keller's works are also banned and burned in Nazi Germany.

"Kaskat is standing there"

On May 10, 1933, in Berlin's burning operation, another lady suddenly shouted: "Kaskat stands there." The writer himself later wrote: At this moment, the witness of the burning operation, Kaskat, felt "extremely uncomfortable." He left the book of burning, but stayed in Germany, and the hardships of life could be imagined. However, because he was not a Jewish, he insisted on the collapse of the Nazis in 1945.

In 1970, the writer Caskat at a book reading meeting.

Persecution, torture, death, but most people are not so lucky. Reporter and writer Carl Vonossietzky was arrested in 1933. After many years of imprisonment and torture, he died in a hospital in 1938 in a closely ruling hospital. Anti -military writer Erich Mühsam was killed in the Orainburg concentration in 1934. German Jewish poet Grtrud Kolmar, a German Jewish poet who stayed in Berlin, died at the Oswelin concentration camp in 1943.

Successful writer in exile

Among the German cultural elites that have left their hometown, they can continue to engage in cultural undertakings and succeed. They include Blacht and Thomas Man.

Historist Trees said: "For American universities and cultural institutions, a large number of immigrants from Germany are simply an unexpected harvest, and their influence is still there. Unable to make up for it. "

The place where the book is burned will eventually burn people

There is such a inscription on Berlin Berpier Square where the Burning Burning Memorial Museum is located: "The place where the book is burned will eventually burn people." The memorial is a lighting ground full of empty bookshelves designed by Israeli artist Ulman.

Burning Book Memorial on Berlin Berbel Square

This sentence was originally a work from German Jewish poet Heine in 1820, but the Nazi period turned into a cruel reality. Trees said: "The Nazis burned books in 1933, burned the Jewish Church in 1938, and began to burn people in the massacre against European Jewish in 1942/43."

Burning Book: Not Nazi independent

Heine is certainly not a prophet. The reason why he wrote such a sentence was to reflect the religious trial in the Middle Ages of Spain. Burning books are not the originality of Nazi, but have a long historical heritage. Whether it is Christianity or the history of Islam, there have been more than hundreds of years of burning books. The ancient Greek and modern Iran and Russia have also appeared in the incineration books.

German Jewish poet Heine: The place where the book is burned will eventually burn.

All autocratic regimes in the world are afraid of words based on freedom, because this will threaten their dominant position. It is based on this fear that the Nazi also burned the poet's work on May 10, 1933, and Heine himself died of Paris as early as seven years ago.

The U.S. Government's International Religious Free Council (USCirf) held a hearing on May 10th to express concerns about the CCP authorities' implementation of multinational suppression and infringement of freedom of religious belief.

Democratic Senator Jeffmerkley opened bluntly that with the help of modern technology development and global information dissemination, the multinational suppression implemented by authoritarian countries such as China and Iran has pose a threat to the world. This situation urgently requires legislation and transnational country Cooperate to deal with.

Democratic Senator Jeffmerkley opened his speech.(Screenshot of USCIRF video conference) [] He said, the "Consumer Act of the Transnational Competition Policy" to crack down on multinational suppression by establishing a network composed of like -minded partners and supporting groups that face risks and records through assistance plans. Promotion is a key priority for US foreign policy. "

In March of this year, Senator Merckley United Republican Senator Marco Rubio and other two -party members jointly proposed the

TransnationAIRePression Policy Act. The law aims to formulate new US foreign policies and hold accountability to foreign governments and individuals that implement multinational suppression.

Nursing Turkel, chairman of the US International Religious Free Council, said at the hearing that in April this year, Avrilhaines, the US National Intelligence Director (DNI), pointed out that the Chinese authorities used modern technology to use modern technology. The sound of monitoring and reviewing objections is "the world's number one multinational suppression." This highlights the urgency of the United States through legislation and multilateral cooperation to deal with the multinational suppression from the Chinese authorities.

Nursturkel, chairman of the International Religious Free Council, spoke at the hearing. (Screenshot of USCIRF video conference) Eric Ueland, the commissioner of the committee, also said that the United States should also evaluate the responsibilities of domestic companies in assisting the relevant multinational suppression operations, strengthening the review of Nike, Coca-Cola and other companies suspected of using Uyghur forced workers, as well as leaking victims American technology companies, such as information data, etc.

SCOTTBUSBY, deputy assistant Secretary of State, who is responsible for democracy, human rights and labor affairs, told the committee that due to the continued serious violations of religious freedom by the Chinese authorities,

the US State Department has listed China as 12 as early as November last year as 12 One of the "special attention".

Basby said the U.S. government is implementing a multi -faceted strategic measure to respond to the cross -border crackdown operation of the Chinese authorities against religious groups. The strategy includes coordinating government agencies, strengthening information sharing in the combination of multinational suppression; improving the awareness of sharing information with the people, providing assistance for victims; deploying visa restrictions, economic sanctions, etc. Multilateral response measures; and training law enforcement departments, identifying multinational suppression behaviors, etc.

The multinational suppression is the characteristics of the People's Republic of China, and the world today. The most complicated form of suppression in the existence. It pose a threat to the values that our American people cherish and the integrity of international order rules. ""He said," With the greatest seriousness and attention, the U.S. government will continue to solve the transnational multinational country. Suppress the problem. "Nateschenkkan, a senior research director of the Human Rights

Organization of Washington, said at the hearing that related data showed that since 2014, a total of 854 multinational suppression incidents have been included in the book. Among them, 35% of the incident involved religious persecution. In these 35% cases, 3/4 came from China. He emphasized that the Chinese authorities have implemented the world's most comprehensive multinational suppression campaign.

Outside of the annual shareholders venue of German Volkswagen on the 10th, human rights activities demanded that Volkswagen to withdraw from Xinjiang. World Uyghur Congress Twitter Screenshot German Volkswagen Corporation held an annual shareholders' meeting on Wednesday (10th). Representatives of Uyghur human rights groups spoke at the meeting and criticized the company's production lines in Xinjiang and Chinese suppliers involved forced workers. They called on Volkswagen to close the Xinjiang plant and cut off their contact with related suppliers.

Volkswagen CEO claims that the Xinjiang plant has not forced labor to be criticized Strike Xinjiang forced Labor and the United States Senate to make a letter to the eight major car manufacturers to check ***

At the annual shareholders' meeting of Volkswagen Volkswagen on the 10th, the company's chief executive officer Oliver Blume said: "In China, as the first place in the market, our operations are in a strong position. Last year, we were in, we were in last year. The delivery of full -electric ID family vehicles here has doubled more than doubled. In order to ensure this status in the future, we need the correct strategy and appropriate steps. "

Bloom talked about the rapid development of the Chinese electric vehicle market and the strategy of maintaining the market leadership of Volkswagen, that is, designing products based on the taste of Chinese people, and establishing local partnerships. However, he did not mention the company's joint venture by the company in Urumqi, Xinjiang, China.

On May 10, 2023, Oliver Blume, CEO of Volkswagen, spoke at the company's annual shareholders' meeting. (Reuters) [] **The World Walight Conference called on Volkswagen: Close the Xinjiang plant to eliminate forced labor suppliers**

During the conference, the representative of the Human Rights Organization "World Uyghur Congress", Haiyuer Kuerban, was invited to speak in the name of "DachverBandkritische", and put forward their factory in terms of human rights in the factory in terms of human rights. Worry.

Kurban told this station: "I mainly ask Volkswagen to close the factory in Urumqi in the speech, and to completely cut off all the Chinese companies that involve Uyghur forced labor in China."

Kurban said that Volkswagen Volkswagen, as one of the world's largest automobile manufacturers, is also the only company that establishes production business in Xinjiang. Ten years ago, the company established a production line in this area where the Chinese authorities persecuted Uighurs and other ethnic minorities.

For the concerns of human rights issues, the World Uyghur Congress has long required Volkswagen to not establish factories in Xinjiang. Especially in 2017, after the CCP authorities under the leadership of Xi Jinping implemented a series of racial extinction policies in Xinjiang, the World Walight will worry about Volkswagen's company's company's company's There are more forced labor problems in the supply chain, and it has also exerted greater pressure on public opinion.

British university report disclosure: Western car manufacturers involve Uighurs forced labor

Kurban specifically mentioned that a survey report from Sheffield Hallamuniversity in the United Kingdom stated that there was a lot of connections between automotive factories in Western countries and Uyghur forced labor. The raw materials and processing of many Chinese parts suppliers are in Xinjiang, so the international supply chain is easy to involve the issue of human rights such as compulsory labor.

"This report is very clearly showed that Volkswagen, especially Chinese companies that are directly linked to and played a very important role in the Volkswagen's supply chain. The concentration camp directly mobilized to various production plants for Uighurs who forced labor, "Kurban said.

According to Reuters, about ten activists interrupted the speeches of the executives at the shareholders' meeting, condemning the company's vehicles forced by forced labor, and waving a banner written by "ending Uighurs forced labor". Another protesters cast a cake to the chairman of Volkswagen,

forcing him to bow his head to avoid. The security personnel subsequently took the protesters out of the venue.

On May 10, 2023, demonstrators protested before the annual conference of Volkswagen Co., Ltd. held by Berlin, Germany. (Reuters) [] In this regard, a Volkswagen spokesman told Reuters: "Constructive dialogue is important, and the shareholders' meeting provides a good opportunity for this. Except for a few people, everyone follows the specified guidance policy."

Is the Volkswagen setting up a factory in Xinjiang?

So, how does Volkswagen's concerns about the human rights issues of the Xinjiang plant respond? Kurban said: "They all know the CCP's destructive policy of the CCP, and they all have high attention to this aspect. But they avoid one of our main requirements, that is, close the factory of Urumqi." Kurban said that although they cannot independently verify this statement, the size of the public in Urumqi is much smaller than its factories in other parts of China. Relevant economic analysts in Germany believe that the factory is not good in production efficiency and economic efficiency, and has not brought any economic profit to Volkswagen in 10 years.

Kurban: Underestimating Political Risks Volkswagen is now in trouble

Kurban believes that the Chinese authorities have made Volkswagen's factories in Xinjiang to make it more dependent on China, and Volkswagen's senior management may greatly underestimate the political risks brought by the Xinjiang plant to them. Today, the local situation has evolved into the harsh situation of "racial extinction", and Volkswagen is now in dilemma.

On May 10, 2023, Hans Dieter Poetsch, chairman of Berlin, Germany, spoke at the company's annual shareholders' meeting. (Reuters) [] "When the World Uyghur Conference dialogue with the senior officials of Volkswagen Corporation, they also confessed this. That is, although they wanted to close the factory, they did not have such rights. In the local cooperative company, they have no way to make such a decision alone. "Kurban said," More importantly, they are afraid that the Chinese government will take this reason to retaliate against them. "

At the end of February this year, Volkswagen China CEO Ralf Brandstätter went to the Xinjiang factory to inspect and claimed that he did not find any signs of human rights in the factory and will continue to produce locally.

Kurban said that before this shareholders' meeting, they had communicated with some major shareholders of Volkswagen and stated to them their concerns in human rights: "Ask them to use their own investment and their own decision-making power, Press the executive committee of Volkswagen,

allowing them to close their factories in Urumqi, and cut off the connection with all Chinese companies involving the use of forced workers."

As of press time, Volkswagen Corporation has not responded to this station's inquiry about the Xinjiang plant and forced labor.

The Federal Investigation Agency (FBI) destroyed a set of malicious software used by the Russian elite spy and cut off the "precision" malware network engaged in spy activity in 50 countries in 50 countries in the past 20 years. Alliance.

Comprehensive Reuters and VOA reported that senior US law enforcement officials said that FBI technical experts identified and disintegrated the malicious software used by the Russian Federal Security Agency for unknown US computers. They hope that this will cause a fatal blow to one of Russia's major cyber spy projects.

US officials said on Tuesday (May 9) that the Federal Security Agency had previously successfully implanted malware SNAKE or UROBUROS into computer systems around the world, mainly for government networks, research institutions, reporters, and other goals.

Computers infected by SNAKE around the United States and around the world have become a channel for the stolen data back to Russia.

The US Cyber Security and Infrastructure Security Agency (CISA) said that Snake is the most precise cyber spy tool in the weapon library of the Russian Federal Security Agency. It is particularly strong and difficult to detect in computer systems and network traffic.

This has allowed the Russian Federal Security Agency to engage in spy operations without being detected through a huge hosting network for many years, invading computers with sensitive documents.

The U.S. Department of Justice said that Snake was "implantation of the Russian Federal Security Agency's premier network spy malware."

US Minister of Justice Garland said in a statement: "The Ministry of Justice and our international partners have demolished a global computer network with malicious software. Including our NATO allies. We will continue to strengthen collective defense to deal with the damage and stability of the Russian regime to destroy the security of the United States and our allies. "

The U.S. Department of Justice said that the FBI was removed by the court's approval and codenamed Medusa, and the Snake network was demolished. The MEDUSA operation used a tool called Perseus created by FBI, paralyzing the Snake malware of the infected computer.

FBI is working with other national authorities to inform other victims infected by Snake.

The court documents announced on Tuesday introduced the department of the Russian Federal Security Agency as Turla. How is a well-known Russian Federal Security Bureau's facility known to the Russian city?

The US Department of Justice said the department has repeatedly upgraded and modified malware to ensure that it is still Turla's "the most complicated long-term cyber spy malware implant".

Saudi President Aced was invited to attend the Arab Summit

Description: (Agence France -Presse Damascus, 10th) Syrian Presidential Palace said today that President Arabic received an invitation letter from the Arab League summit in Saudi Lahara next week. This is the first time that after the outbreak of the Syrian Civil War, Asedes were invited to attend the summit for the first time.

The ArableAgue was originally suspended in Syria in November 2011 because the Aceride regime suppressed domestic protests. These demonstrations broke out earlier in 2011, and finally evolved into civil war, causing more than 500,000 people to die, millions of people's displacement, and Syria's infrastructure and industry were also severely hit.

However, on the 7th of this month, the Arab League has welcomed Syria to return to the league. This also caused the Arabic regime to be accepted by the Arab state after many years of isolation.

In the statement, the Presidential Palace said that Ased was invited by Salman Bin Abdulaziz ALSAUD to receive the invitation of Saudi Arabian, "Participate Essence

According to a statement, Adeld said that the summit will "strengthen the United Arabic operations to realize the desire of the Arab people." The last time he attended the Arab League summit, back to the meeting held in Libya in 2010.

After more than 10 years of diplomatic interruption in Saudi Arabia and Syria, it announced yesterday that it will restore the operation of each other's diplomatic representative agencies. Lyad cut off relations with the Aseride government in 2012, and long publicly advocated that Aseide stepped down, and even supported the rebels in the early days of the Syrian civil war.

But in April this year, Saudi Foreign Minister Faisal Bin Farhan ALSAUD visited Damascus to meet with Aserdide. It was the first time that the Saudi Minister of the Syrian war in Syrian officially visited the Aseride government for the first time.

Since the junction of Syria and Turkey in February this year was attacked by a strong earthquake, and in March, the regional diplomatic activities have been continuously changed in the Middle East's political landscape in March. Tehran is a close ally of Damascus.

After the relationship between Aydd hopes that the relationship with the rich Persian Gulf countries can alleviate economic pressure and bring the required funds required for reconstruction. Because of the Syrian conflict political solutions that have not yet been generated by the United Nations, Damascus still cannot obtain wider international funds.

However, analysts said that Western sanctions on Syria are likely to continue to scare away investment.

The United States and the United Kingdom said yesterday that they still oppose establishing relations with Asedes, but cooperate with Arab countries that restore relations with Syria.

Although the Syrian frontline war is roughly silent, there are still large areas in the north that are not controlled by the government, and political solutions cannot be seen in front of them. (Translator: Zhang Zhengyu/Calculation: Lin Zhiping)

A bill that prohibits Chinese citizens from owned by land in the state has passed the state legislative agency and submitted to the governor Ron De Setis(Ron Desantis)Signed as a law, it is formally implemented on July 1. Governor Ron DeSantis/Facebook Recently, many US state parliaments prohibit Chinese people from buying houses in the United States through

legislation or proposal. This has aroused heated discussion in public opinion in China. Florida Governor Rondesantis has recently signed a number of bills to make it a law, including restricting the Chinese people buying real estate locally to curb Beijing's growing influence. So who is in favor of the above legislation, who is opposed?

The United States will restrict foreign individuals and companies to purchase land near military bases * **Facts for facts | The United States prohibit buying houses and confiscation of assets through the series of "Chinese excretion" measures?** ***

At the signing ceremony of the bill on Monday (May 8th), the Governor of Florida Desambis showed the three bills of bills that had been signed in front of the media shot, emphasizing that this was to curb the increasing influence of the Chinese government to enhance the influence of the Chinese government. Essence These three bills include restricting the use of real estate in Florida, the use of tight TIKTOK for short video and video sharing applications, and restricting the impact of the Chinese government in the field of education.

De Santis said at a press conference: "We don't want the Communist Party of China to appear in the sun (Florida)."

Protect national security

The relevant laws of Florida were formally implemented on July 1. Among them, the "SB264" bill that has attracted much attention from the outside world is prohibited from buying land and houses such as local military facilities in 20 miles of local military facilities. Syria, of which the restrictions on the property restrictions of Chinese citizens were extended to all scope of the whole state. The law stipulates that if some locals sell properties to citizens above the above seven countries, they will be severely punished.

The above laws stipulate that the Chinese Internet quickly aroused heated discussions. For a while, the topic of "the United States prohibits Chinese people from buying a house" is full of WeChat groups. Is there an exception of this law that Chinese people buying a house in the United States? The exception is that if citizens from the above -mentioned 7 countries hold a specific U.S. visa, they can be allowed to hold a property, but they need to be registered with the relevant departments of the Florida government; Chinese citizens holding non -tourism visas can buy a single area of not more than 2 acres of acres. Land and need to be at least 5 miles away from military facilities.

These bills have been supported by the Governor of Florida Desandis and Republican and some Democratic members, and are regarded as an important measure to ensure US national security. Juneteufel Dreyer, a professor at the Department of Political Department of the University of Miami, who specializes in the issue of the Chinese Communist Party, believes that the restrictions on Chinese citizens are actually very limited.

"The range of two acres of land is quite large, and there are many land 5 miles away from military facilities. In addition, people who are born and growing up in China can buy anything they want." Jin Defang said.

The bill called "SB264: Foreign Interests" prohibits Chinese citizens from "buying or obtaining real estate" in Florida or has more than a small amount of "indirect interests of this kind of real estate". The picture shows the scenery of Miami in Florida, USA. (Reuters information picture) [] So, what do local Chinese residents think of the above legislation? Mr. Chen, who lives in Orlando, Florida, expressed his support to this state law in writing. He believes that many Chinese in China have invested in real estate in Florida, becoming the promoter of house prices in Florida, and also aggravated the pressure on the house purchase of locals in Florida.

Mr. Chen also said: "The Chinese Communist Party is circled all over the United States. They often buy in the name of businessmen or companies, but behind the CCP direct instructions, this is a direct threat to the United States."

Chinese people love Florida the most

In recent years, Florida has become one of the most popular home entries in the Chinese. According to a report released by the National Association of Realtors last year, Chinese investors invested a total of \$ 6 billion in US real estate from March 2021 to March 2022, becoming the third largest foreign investor in the United States in the United States ; Among them, the investment in Florida accounted for 24%, ranking first.

Franklin, a real estate agent who practiced in Florida, told this reporter that the proportion of investment in China in the Florida in the past is indeed high, but due to the restrictions of the new crown epidemic and the Beijing Qing zero policy, the real estate in Florida is now in Florida. Most of the buyers from the United States are estimated to have an impact on the local housing market after the implementation of the above state law.

Frank: "There are places where Chinese people come to buy a house are generally fast, and the market is relatively happy. Of course, the impact on the (housing market) is of course very nervous. In addition, this bill is issued, and other states will also Imitation will of course affect. Originally our business could grow, but this part (Chinese business) need not be considered, but we still do a lot of the American people and Chinese (business). "

Frank believes that the basis of the local public understands that the relevant legislation is from the consideration of protecting US national security and ensuring that the land in Florida is not controlled by the Communist Party of China or related entities. Its regulations are prohibited from discrimination based on racial, nationality, religion or gender in housing sales. In addition, Mr. Chen, a resident, also believes that there are many disputes in the law, and I am afraid that it will cause trouble to the Chinese people with legal work status. **Worried about increasing racial discrimination Chinese lawyers will join for***

The bill had previously passed the 95:17 votes in the Florida Senate. Democratic State MP FENTRICEDRISKELL, who held opposition, believed that the bill was "too extensive" and tended to "discriminate based on national blood."

In addition, dozens of Chinese people have traveled outside the state parliament building to protest. In an interview with the legislature Chinese lawyer, Hongweishang, a Florida Chinese lawyer, said that the legislation violated Article 14 of the US Constitution Amendment on the prohibition of discrimination and may exacerbate American society's racial discrimination against Chinese.

Shang Hongwei: "We can understand (bill) for national security considerations, and target these countries, governments, and officials (restrictions), but this law confuses government agencies with individuals, because individuals do not represent the government, private enterprises, nor do they represent the government. A completely different concept is a law that is discriminatory. From a government department to a bill, a statement is issued, and restrictions on people or people in a certain race or nation will cause all the races, nations, or similar people to cause similar artificial artificial arts, or people who look similar to people. Bad influence. "

Shang Hongwei said that the "Chinese American Legal Defenseall" and other Chinese lawyer groups plan to file a lawsuit against the above legislation.

One of the founders of the "Huamei Rights Protection Alliance", Clayzhu, said in a written statement to the station that the law's restrictions on the Chinese are "too wide". The statement said: "We agree to protect the goal of national security, but we must achieve the method of compliance with the constitutional peace and multiple core values. This law in Florida is specifically targeted at Chinese and other specific groups. This is based on racial and national discrimination. ","

In recent years, the Chinese government has been accused of increasingly possessing American agricultural land, causing concerns from all walks of life. Incidents that have attracted attention from public opinion are that some Chinese citizens purchased farmland near a Air Force base in North Dakota in 2022. This move prompted the US federal government and multiple states to begin relevant legislation in order to restrict entities and individuals with Chinese backgrounds and individuals. Buy real estate or agricultural land in sensitive areas.

Chinese Foreign Ministry spokesman Mao Ning had considered the United States' considering prohibiting Chinese citizens from buying real estate in the United States on February 10, criticizing the United States to "generalize the concept of national security and politically put the issue of economic and trade investment.

After the release of Wuyi, he disclosed on Weibo that the situation of being beaten and abused during Xuzhou was detained. On March 2 last year, it was taken away by the Xuzhou police again. In Xuzhou Peixian, he was once again monitored in the name of "provoking trouble".

Today's "Network Game" show, please listen to our interview with Chang An Xiu Ming, the lyrics of the song "Where are you in Wu Yi".

For two consecutive three and eight consecutive sections, while overseas public opinion, while paying attention to the phenomenon of iron chain women and Chinese trafficking women, also called on China to release black black clothes that loses freedom to the iron chain woman.

Many songs created by Changan Xiuming are concerned about China's rights protection campaign. His song "Where Are You Whatever" published in November last year on personal accounts banned by China. Changan Xiuming stated on the oil pipe that every woman who resisted unjustly to pay attention to the answer to history.

In fact, Changan Xiuming not only pays attention to the fate of women who have been suppressed by China because of their rights to defend their rights, but also the fate of women in other parts of the world such as Iran.

In addition, Changan Xiuming also launched a number of songs that pay attention to or anti -brainwashing on the personal channel of the oil pipe "Don't Love Me" and "That moment".

Japan Foreign Minister Lin Fangzheng said that Japan was negotiating on the opening of NATO's first Asian Liaison Office, and said that Russia's invasion of Ukraine destroyed world stability.

The United States CNN reported that Lin Fang was announced on Wednesday (May 10) that the above news was announced in an interview, and the relevant discussions on the opening of the NATO Liaison Office were in progress, "but the final details have not yet been determined."

Lin Fang is mentioned in CNN's interview. It is said that the world has become more unstable due to the Russian and Ukraine War. "What happened in Eastern Europe was not only a problem in Europe, but directly affecting the situation here.)become more and more important".

He also pointed out that in addition to the Russian and Ukraine War, Japan is still competing with North Korea with nuclear weapons and the rise of China, and the regional security environment is "grim and complex."

Lin Fangzheng said that Japan was not a member of NATO, but this move issued a message that NATO's Asia -Pacific partners are in contact with NATO in a "very stable way".

The opening of the NATO liaison office in Japan will mark a major development in the background of the Western Alliance in the deepening of the geopolitical fault, and may lead to criticism of the Chinese government.

China has previously warned that NATO has expanded its influence to Asia and responded an angry response to reports on the establishment of a Japanese office before, saying that NATO Dongjin and interference in Asia - Pacific affairs will destroy regional peace and stability.

NATO has similar liaison places including Ukraine and Vienna. Japan Economic News (Nikkei) reported last week that the contact offices opened in Japan will be able to discuss issues such as geopolitical challenges, emerging and disruptive technologies, and cyber threats with NATO's liaison offices, such as South Korea, Australia and New Zealand.

Former Pakistan Prime Minister Emran Khan was detained on Tuesday (May 9). His supporters plan to march on Wednesday (10th) to the capital Islamabad to express protests. conflict.

Reuters reported that the Pakistani National Accountability Agency arrested Emran Khan on Tuesday on the grounds of suspected corruption. He is also the chairman of the Justice Movement Party.

Local media said that Emran Khan attended the hearing involved in many cases involved in his case in the Islamabad High Court and was arrested after leaving the court.

National mobile data services were closed immediately, and the services of Twitter, YouTube and Facebook platform were also disturbed.

After the supporters of Emran Khan and the police had a physical conflict, the three provinces issued an emergency order to prohibit all rally. The Pakistani Administrative Region is divided into four provinces.

Pakistan's Minister of Information Maria told the broadcasting company Geo News on Wednesday that protests are the operation of the Justice Movement Party planning, not a public response to Emran Khan's arrest.

The Shenzhen Municipal Bureau of Statistics issued a statistical bulletin on Monday (May 8th), saying that Shenzhen's permanent population was 17,661,800 at the end of 2022, a decrease of 19,800 compared with 2021.

Multi -media in the mainland pointed out in this news that this was the first time since the establishment of the city in Shenzhen in 1979.

According to the China Business News, the analysis of Chinese population scholar He Yafu believes that there are two main reasons for the decline in the population of Shenzhen. One is the impact of the crown disease epidemic. It was one of the reasons to tighten the settlement policy in 2021.

From the perspective of Guangdong Province, from the perspective of the province, the resident population of Guangdong Province decreased by 272,000 in 2022, and the migrant population outside the province decreased by 692,000.

But it seems that this trend not only happened in Guangdong. The interface news in March has reported that according to the "2022 City Commercial Charm Ranking List" released by the First Financial Weekly, in the top 10 cities in the new first -tier cities in 2022, 7 cities have permanent population growing, but their increase increase A significant decline in the previous year.

Some scholars have pointed out that as the population of various provinces enters the negative growth, the "reduction" of pop -up production in the future has become a common trend in various regions of China.

Pakistan Electric Power Minister Khurramdastgir Khan Agence France - Presse information picture

According to Bloomberg, Pakistan Electric Power Minister Khurram Dastgirkhan said in an interview last weekend that Pakistan has ordered a group of Russian oil and pays in US dollars, but they hope to pay RMB next.

He said that Pakistan hopes to form a long -term arrangement in the trading of the rupee and RMB so that it can use other opportunities in the future.

The report pointed out that the use of RMB imported oil is good for Pakistan, because Pakistan is seriously dependent on energy imports and the risk of debt defaults in the country is trying to restart the US \$ 6.5 billion rescue plan for the International Monetary Fund. However, this expectation of Pakistan also meets the desire of Russia's hopes to get rid of the US dollar and euro exports, which is conducive to promoting the internationalization of the RMB and weakening the dominant position of the US dollar in the international community.

The report emphasized that the renminbi is being degraded in global trade. At present, China and India are gradually using Renminbi, rubles or Diram (UAE currency) to import Russian oil.

In addition, some Chinese media reported that Brazil, ASEAN and other countries began to turn to the use of RMB settlement in trade and financial transactions, and Argentina also began to directly pay goods imported from China.

The Human Rights Organization Hong Kong Supervision issued a report, saying that under the firm control of Hong Kong in Beijing, more than a dozen Hong Kong Economic and Trade Office overseas, such as another China Embassy, Hong Kong Supervision Report Screenshot

According to the website of the Human Rights Organization of the Hong Kong Free Freedom in Hongfoundation, 30 Hong Kong initiatives and their international allies jointly believed in the US Senate Foreign Relations Committee and the House of Representatives Foreign Affairs Committee on Wednesday (May 10th). Call on them to support the "Hong Kong Economic and Trade Office Certification Law", re -evaluate the status of "Hong Kong Economic and Trade Office", and consider closing the possibility of these offices within the United States.

The Hong Kong Free Fund Commission said on its webpage that at first, the Hong Kong Economic and Trade Office was to provide a platform to allow Hong Kong to promote trade and economic relations with other countries on the international stage. The staff of the Hong Kong Economic and Trade Office enjoys diplomatic status in the United States. However, since the CCP has increased its suppression of Hong Kong and destroyed Hong Kong's relative autonomy, the Hong Kong Economic and Trade Office now acts as an agent of the Communist Party of China and directly instructed the policy to the Hong Kong government.

This open letter states that there is an act of abuse of power, including lobbying American politicians, surveillance exile people, and organizational cultural activities. Essence The Hong Kong Economic and Trade Office no longer fulfills the mission to encourage trade between the United States and Hong Kong, but instead has unnecessary intimidation to Hong Kong people who escape from the Chinese Communist Party. The U.S. Congress should take action immediately to solve the problems brought by the Hong Kong Economic and Trade Office as a "diplomatic outpost" in China.

In the next step, the "Hong Kong Economic and Trade Office Certification Law" will conduct review and voting voting in the American Senate and House of Representatives.

Australian journalist Cheng Lei was arrested in China for "leakage of national secrets" in China

Cheng Lei, a Chinese reporter of Australia, who was arrested and detained by the Chinese government, has been detained for more than a thousand days. Although the court secretly opened the trial at the end of March last year, the trial results were delayed so far.

According to the Voice of Germany, Cheng Lei's partner and former CEO of the Chinese Australian Chamber of Commerce, NickCoyle, said in an interview this week that Cheng Lei is currently working hard to maintain a healthy state, but what she is most worried about and cares about is with. His children are separated.

Koyer said that during the epidemic, Chenglei can regularly conduct a 30 - minute consular visibility with Australian diplomats every month; after the epidemic seal is closed, he can currently visit face to face.

Australia Foreign Minister Pennywong (Pennywong) once again called on the Chinese government to reunite with her children on Tuesday (May 9). Some experts believe that the Australian government should continue to urge the Chinese government to maintain transparency in the Chenglei case.

Although some people believe that the case of Cheng Lei and Yang Hengjun occurred in the context of deterioration of China -Australia relations, but the specific reasons for Cheng Lei were still unknown to the outside world. Another observer believed that it was difficult for the outside world to be based on the basis of the outside world. The existing news determines whether the two cases have always been used by the Chinese government's "hostage diplomacy".

According to Reuters, the Australian Minister of Trade Don Farrell will arrive in Beijing on Thursday to talk to the Chinese Minister of Commerce Wang Wentao on Thursday to seek a comprehensive restoration of the normalization of Australia's exports to China.

China used to be the largest trading partner in Australia, but since 2020, because Australia has called for a thorough origin of the new crown virus, Australian -China relations have become tense. The 5G products of China Telecom giant Huawei are prohibited. But since this year, the trade between China and Australia has gradually recovered. The Australian government has expressed their joy in this, which is also the background of Farrell's visit to China.

However, in the other side, in the latest government budget just announced by the Australian government, the \$ 1.3 billion budget to the surrounding Pacific island nations is added to develop relations with these countries in the next five years. The Associated Press pointed out in the report that this is the influence of Australia's growth in the region in order to compete in the region.

Japan through the new version of the Criminal Procedure Law stipulates that the defendants who have been released on bail are from absorbing, and the court may order the defendant to wear satellite positioning system (GPS) equipment.

Kyodo News reported that the Japanese Senate passed the new version of the Criminal Procedure Law on Wednesday (May 10). The revised law stipulates that the court may order the defendant who was released on bail to wear GPS to prevent his absconding; for the defendant who did not attend the trial and left the designated residence, it would punish new criminal punishment.

It is reported that wearing GPS measures is affected by incidents such as Karlos Ghosn, former chairman of Nissan, to Lebanon and other incidents, and aims to prevent similar incidents. This regulation will be implemented from the new version of the Criminal Procedure Law. The problems such as

wearing and application methods of related equipment will be discussed within five years. Privacy issues will be included in the scope of discussion.

According to the new regulations, the defendant took off the positioning equipment during the bail, or entered the "prohibited entry" area such as airports and ports designated by the court, and would be detained and "detention" for one year (that is, in prison and imprisonment).

The new version of the Criminal Procedure Law also stipulates that the public trial day does not accept the "crime of not in court" summoned by the court, and the "crime of restricting the place of residence" without permission to residence will be detained for two years.

In addition, the new version of the law will also select the "Supervisor" when the defendant is released on bail and reports the defendant's living conditions in accordance with regulations. To obtain bail, not only the defendant wants to pay bail, the supervisor must also pay the supervisory deposit.

A report released by the South Korean Institute of Development (KDI) on Wednesday (May 10) states that the prosperity of the Korean semiconductor industry is close to the bottom, but it is still difficult to expect the recovery of the semiconductor market.

The Yonhap News Agency reported that the report of the South Korean Institute of Development Research said that considering the replacement cycle of 60 % of computers and mobile devices in semiconductor demand, it is expected that the prosperity of the semiconductor industry will end in the second and third quarters of this year, but now it is expected that the semiconductor market will fully recover the Sales market. It's too early.

A research member of the economic outlook room of the hospital said that considering that the demand for computers and smartphones has increased, the semiconductor industry's prosperity may begin to recover in the middle of

next year. However, due to the greater global economic uncertainty next year, the specific situation is difficult to predict.

The report also pointed out that the downturn in the semiconductor industry not only repeats exports, but also has a negative impact on domestic demand, and it will even become a factor of deterioration of tax conditions, which will continue until next year.

According to analysis, if the export volume of semiconductors decreases by 10%, the GDP of South Korea (GDP) will be reduced by 0.78%; if the price of semiconductor fell by 20%, GDP will decrease by 0.15%. However, the semiconductor industry has limited impact on the employment market.

The report said that the recent prosperity of the semiconductor industry is mainly caused by the sluggish sales of the storage chip. In the first quarter of this year, system chip sales decreased by 11.1%year -on -year, and the storage chip decreased by 56.3%. Because South Korean semiconductor exports focus on storing chips, it is relatively vulnerable to the influence of the prosperity fluctuations of the industry.

The BRICS countries will discuss the feasibility of common currency during the South African summit, but South African Foreign Minister said that countries should not make any decisions.

Bloomberg reported that the US interest rate hikes and geopolitical conflicts have pushed up the price of commodity prices in the US dollar and the US dollar pricing, and harmed most emerging markets. This triggered the appeal to replacing the US dollar as global trade currency with other currencies, and a choice is to allow the BRICS Group (BRICs) consisting of Brazil, Russia, India, China, and South Africa to use its own common currencies. This topic may be included in the BRICS Leaders Summit in Johannesburg on August 22.

South Africa Foreign Minister Naledipandor said in an interview with Cape Town on Tuesday (May 9): "This is a question we must discuss and moderate. Success is because it is very difficult in economics. You must

consider all countries, especially when you just get out of the crisis and are in low growth. "

Saudi Arabia and Iran and other 19 states to join

BRICS countries account for more than 40 % of the world's population and nearly one -third of the global economic output, making it one of the most important economic groups in the world. 19 countries including Saudi Arabia and Iran have expressed their interest in joining the group.

Pan Duer pointed out that the BRICS and other countries proposed, "Why can't we use our own currency to trade? Why do we insist on trading through the US dollar?" She said: "South Africa has a currency used in international transactions. We hold a lot of US dollar debt, so we must take this discussion responsible. "

VESTACT, an investment management company headquartered in Johannesburg, believes that the US dollar may maintain its leading currency status for a long time. A report from the company said: "No other currency has such recognition, stability, and economic strength behind ... the only currency that can be replaced by the US dollar is the euro."

After the US Federal Preparatory Council (FED) raised interest rates last week and the latest employment data in the United States beyond estimates, the market's eyes turned to the US Consumer Price Index (CPI) that will be released later.

Although the Federal Reserve hints that the continuous tightening cycle may be suspended, the observer reminds any signs of any retreat of inflation will cause pressure on decision-making officials to continue to raise interest rates.

Although the United States, the world's largest economy, still shows toughness, several indicators show that the US economy has slowed down, causing doubts that the economy may fall into decline.

STEPHENINES, a strategist of SPI Asset Management, pointed out: "Although investors continue to look forward to the best situation of inflation and interest rates, growth is also slowing down."

"Central banks of various countries are still tightening policies, so risk assets are limited."

The Wall Street stock market has a weak trend at the beginning of the week, and the Asian stock market follows up more.

The Japan -stock Standard Nikkei 225 Index closed down 0.4%today to 29122.18 points. The Hong Kong Stock Hang Seng Index closed down 0.5%to 19762.20. The Shanghai Comprehensive stock price index closed down 1.2%to 3319.15 points.

As for other Asian stocks, Sydney, Seoul and Taipei stock markets closed down; Bangkok, Wellington and Jakarta's stock market rose slightly. Singapore's stock market is almost flat.
